

STRIKER 106

Chapter 106 Tier-1, Rank-3, Early Stage

Jeremy Night and others parted ways. He returned to his room ten minutes later. The first thing he did was to enter the bath. His clothes were a mess.

He wanted to clean his body, which was soaked with blood and mud. The bath lasted for more than 30 minutes.

Then he stepped out of the bath and changed into comfortable clothes. Only then did he feel good. But he immediately felt a wave of tiredness.

He went to bed and lay down to sleep.

....

City B:

Meanwhile, the news of the invasion end reached other cities under Zone 14. After learning that City A had won the war against the Tier-7 Beast invasion, they expressed happiness and joy.

City A is considered the pillar of Zone 14. If anything happens to City A, then they will suffer as well.

In City B, one of the Governors, who is the grandfather of Betsy Lowe, sighed in relief. Because of the invasion, he had lost his sleep.

Though they were not the ones under attack, his granddaughter was conscripted. So he worried for her day and night.

Only after the result of the invasion came did he feel better. Not only that, he heard about the performance of his granddaughter. His granddaughter, Betsy Lowe, had killed many Tier-2 Corrupted Beasts.

He thinks this is going to raise their family reputation.

...

City C:

On the other hand, the same thing happened in City C. One of the City Governors, Ron Night, had been paying attention to the situation.

After learning that the invasion had come to an end, he couldn't be happier. He was relieved to know that the threat hanging over his son's head was gone.

Then he immediately informed Jeremy's mother, his wife, Nora. When she heard that, she put her head down to relax. Both the veterans were not emotional fools.

They fully understood the responsibility of the Beast Tamers. So they considered this invasion a valuable battle experience for Jeremy Night.

If such a thing happens in the future, they are confident that their son will handle it better.

...

Central University 14:

The following day,

Jeremy Night was still asleep. But the unknown egg became active again. It was absorbing more natural energy from the surroundings.

Jeremy was unaware of this. Otherwise, he would have practiced the breathing method as well. With the Inner Healing Method, he could have shortened the time for the next breakthrough.

Time passed,

The aura of the unknown egg rose to Tier-1, Rank 3, Early Stage.

The unknown egg then didn't stop there. It continued to absorb more natural energy from the surroundings before giving feedback to Jeremy Night.

Jeremy Night, who was asleep, suddenly noticed a warm energy coursing through his body. Suddenly, his strength rose from Tier-1, Rank 2, Mid Stage to Tier-1, Rank 3, Early Stage.

The unknown egg had accumulated so much energy that it reached Rank-2 Peak Stage before entering Rank 3, Early Stage.

Jeremy opened his eyes and sat cross-legged on the bed. He started to practice according to the Inner Healing Method. With his cooperation, his new strength would stabilize quickly.

The natural energy from the surroundings entered Jeremy Night's body. His breathing method was the Inner Healing Method.

Like the name suggests, it has to do with healing. He could feel his inner organs being nourished.

Time passed,

Jeremy opened his eyes one hour later. The corners of his mouth curved into an arc. After coming from the battlefield last night, he didn't expect to yield unexpected benefits.

His Beast Taming Power had risen to Tier-1, Rank 3, Early Stage. He thought six more ranks to go, and he would touch the threshold of Tier-2 Power.

He then shifted his attention to the mental zone. His lifeline beast, the unknown egg, became normal. It was still absorbing the natural energy from the surroundings.

But it was not as active as before. Right now, it was just breathing. Jeremy then noticed that the quantity of starlight had increased. He could feel a small increase in the power of starlight energy.

With a smile on his face, he retracted his vision and got out of bed to get ready.

About one hour later,

Jeremy Night walked out of the dorm building and started heading back to the Department Building.

On the way, he found that the footpaths to other places were empty. It looked like no one had come out of their rooms.

He then continued walking.

Shortly afterwards,

He reached his department building. There he saw students from the Medicine Department and the Machinery Department.

Upon seeing him, they nodded. Jeremy responded with a simple nod. He didn't know whether his records had been made public.

He thought the attitude of the students was better than before. After reaching the lift, he stepped inside and pressed the button to the top floor.

When the lift arrived at the 5th floor and the door opened,

Jeremy stepped out and began walking toward the calls. When he got there, he saw he was the first one to arrive.

He didn't know whether Betsy Lowe and Daniel Stone would appear. He went to the first-row seat to sit down. Then he began to think about his next course of action.

He had gained valuable experience from the battlefield. More importantly, he was not afraid of Tier-4 Corrupted Beasts anymore.

He thought as long as his power reached Tier-2, he could use his starlight energy to kill Tier-4 Corrupted Beasts.

He didn't know about the ins and outs of the Invasion. He had heard that a Tier-7 Corrupted Beast was leading the invasion. But it was a single Tier-7 Corrupted Beast.

Yet it had made the whole City A response. If there were many Tier-7 Beasts, the situation would have become impossible to survive.

Suddenly, he realized the importance of strength.

The 3rd and 4th Year Students were Tier-3 and Tier-4 Beast Tamers, respectively. But he had decided to reach at least Tier-5 before graduating from the University.

Jeremy gained clarity in his thoughts. He was clear about his goal.
