

## **STRIKER 166**

Chapter 166: Back to the class

The following day,

Jeremy Night woke up on time. After getting out of bed, he started his morning routine. While doing that, he also recalled yesterday's events.

The challenge duel went well, according to him. He believes others won't challenge him anytime soon. It's just that he doesn't know what the 2-S Graders are up to.

They might well bring surprises to him. So he is being open-minded. He wants to learn from them.

He knows that apart from his A-Grade Talent, he is making improvements because of the unknown egg lifeline beast. He thinks his lifeline beast must have huge bloodline potential.

If he had contracted an ordinary beast, then he would have become an ordinary A-Grade Talent as well. Now, because of his unknown egg lifeline beast, he can use Starlight energy as well.

If the S-Graders challenge him, then he would gladly agree. He had made up his mind to leave this zone and go to a better zone.

He knows it's not possible right away. But in the meantime, he thinks it's beneficial to learn from the S-Graders.

He has a clear idea about his roadmap ahead. Then he continued to do his work.

Meanwhile,

The news of Romeo Barrett's defeat was known to everyone. It had reached the ears of most people last night.

Those who didn't know probably went outside for a mission yesterday. So the first-year students weren't surprised.

They quickly accepted the fact that Jeremy Night is the strongest among the first year. Even those who had supported the Attack Department yesterday received a reality check as well.

There was a strength gap between Jeremy Night and Romeo Barrett. It's not simply about Beast Taming Power, but the difference in skills and utilization of their talent as well.

Romeo couldn't use his sword talent properly, whereas Jeremy Night, who is known for having body-type talent, defeated the opponent with basic sword moves.

It was clearly noted by all other department instructors as well. Hereafter, they are going to properly teach their students.

Time passed,

Jeremy Night left the dorm building and started striding toward the Department Building while walking on the path.

He came across other students who looked at him respectfully as well. It was not new, but this time the fellow first years' attitude was clear.

Jeremy obviously felt satisfaction. In this way, no one would come to bother him. He can mind his own business.

Shortly afterwards,

He reached the department building. The Medicine and Machinery Department students were doing their own work.

Seeing them, he recalled his old plans. He had wanted to form a team to explore the wilderness. It's just that his two classmates are not ready yet.

They were still training. But he thinks he should take them to experience the wilderness from time to time.

Otherwise, they won't get much improvement if they train behind closed doors.

"Why don't I take them today?" Jeremy thought.

Having this idea, he decided to talk to them immediately. He then entered the elevator.

Buzz!

He pressed the top floor button. The lift started moving to the top floor. When it reached the spot, the door opened automatically.

Jeremy stepped out of it and went straight toward his class. He got there and saw he was the first one to arrive.

He quietly went inside and sat in his seat. Then he started to look up the trending news. He wanted to see what's going on at the camps.

Soon, the news feed came up. He saw most of the topics were about his duel against Romeo Barrett. He had expected it.

He then scrolled down the page. His eyes caught something interesting. It was an article about Victor Scott. He is one of the S-Graders with Spider Lord Talent.

A hint of curiosity appeared in his eyes. Earlier, he was thinking about them. Then he opened the article to read it.

At first, he thought it was some random gossip news. But it turns out this guy was training hard yesterday.

"Did my win put pressure on him?" he asked himself.

Even though Victor Scott is an S-Grade Talent, his talent is related to the Control Department. If he failed to poison Jeremy, then he could be easily defeated.

But still, he doesn't know much about his talent—whether it's related to beast control only or if he can use poison as well.

If he can use poison without relying on the Spider Lifeline beast, then it would be scary, like how Jeremy can use Starlight energy directly without the lifeline beast having to appear outside.

"If he is busy training, then what about her?" he asked in his heart.

As far as he knows, May Lindsey seems to be a competitive person. No S-Graders would like their limelight to be taken away by someone.

He can understand Victor Scott's situation because his talent is related to the Control Department. He needs preparation before facing Jeremy.

What about her? May Lindsey's talent is Ice-Supreme. If he is not wrong, she can freeze her opponent with Tier-1 Power.

Which means her ice element might have a freezing effect on him. The only way to face her would be to engage in close combat.

If he gets hit by her ice element one or two times, then it would become difficult for him to retaliate.

"Let's wait for her," he muttered to himself.

He's sure she will challenge him. The question is when.

...

Elemental Department:

May Lindsey came to her class as well. The next second, she found all eyes on her. To that, she responded with a kind nod and smile.

She knew what everyone was expecting from her. She had just sent battle footage of Romeo Barrett and Jeremy Night back to her family.

Once they have done their analysis, she will know what chance she stands against Jeremy Night in a real fight.

She doesn't want to go unprepared like Jeremy Night. Yesterday's duel had shown the strength of Jeremy Night.

She is better than Romeo Barrett when it comes to skills. She doesn't think she is weaker than Jeremy Night. Rather, she thinks her ice skills will be effective against Jeremy Night.
