

STRIKER: INDEPENDENT BEAST TAMER

Chapter 20 Glass Family

Beast Taming Association:

"Young Master, how did it go?" Captain Morris asked.

"My rank is verified. I'll get the license in one hour," Jeremy said with a smile.

At this time, the Association Head walks out with a smile on his face.

"Young Master Jeremy, if you need any other assistance, you can ask me,"
The Head said. He wants to badly impress the youngster in front of him.

Jeremy saw through his little thoughts. He knows there will always be people who want to curry favour with him.

"My job is done here. I'm going back home," Jeremy said before leaving together with Captain Morris.

"Youngsters these days are clever," The Head shakes his head with a bitter smile.

Jeremy, walking on his way back, notices that people here are looking at him with surprise and curiosity.

"I heard that Ross Family's third child is coming today as well."

"I wonder what her lifeline beast is?"

The staff's conversation reached my ears.

"Petra," Jeremy raised his eyebrows in surprise. Everyone knows that children of the City Governors are competitive.

Before, the status of the Night Family was weak. Apart from him, there is no one to carry the family forward. So a lot was riding on him.

Fortunately, the A-level Talent saved his family status. After pushing down these thoughts, Jeremy left the association building.

"Young Master, I heard you will be leaving for University studies. Do you need to buy anything?" Morris asked.

It's not a secret that Jeremy Night will be leaving the city for his studies. Every talented student does that after awakening.

Jeremy smiled and replied, "I guess Mother is taking care of the matter."

"Let's go back; I want to enjoy the remaining days with my parents," He added.

Then the flying car started moving back towards the Estate.

...

Glass Family:

A 20-foot-long crystal green snake is devouring a Tier-1 corrupted rat beast in an open field. In the open field, there are many corrupted rat beasts locked up in cages.

They can be seen everywhere around the open field. This open field is located in the backyard of the Glass Family Building.

Right now, the third child of the City Governor, Bob Glass, is observing the crystal green snake. His name is Levy Glass. The Crystal Green Snake in front of him is his Lifeline Beast.

He is standing almost 6ft tall in height. He has brown hair and eyes. His skin tone is fair. He is dressed in a green suit, matching the colour of his lifeline beast.

Just as he observed his lifeline beast eating. He hears footsteps nearing him.

"What is it, Marie?" Levy asked without turning back.

Behind him, a female maid walks up to him.

"Young Master, there is news. Young Master Jeremy was spotted in the Beast Taming Association. According to the reports, he went to get his Beast Tamer License"

Marie said neither in a loud voice nor in a low tone. Her voice sounded pleasant.

"Jeremy uh," Levy uttered in a surprise.

The three governing families of City C have a good relationship on the surface. But they are actually competing with each other.

Before the Night Family was lacking in foundation. Everyone thought that the Night Family's fortune was going to end with City Governor Ron Night's legacy.

But Jeremy's successful awakening has turned everything around. He has awakened rare body talent with an A- Grade. Which is better than him and Petra Ross.

But the Glass and Ross Family were not these two. They have both older brothers and sisters as well. It's just that the Night Family managed to stay in the race with Jeremy's successful awakening.

"I wonder what his lifeline beast was. Did you get any news?" He asked without turning back. He was curious what the lifeline beast of Jeremy was.

Maid Marie hesitated before saying, "Young Master, we have tried. But nobody knows about his lifeline beast."

"Interesting," Levy's eyes flickered.

He knows that body type talent requires a suitable Lifeline Beast to bond. Otherwise, their Beast's fighting capability would be compromised.

For example, his B-level Talent is Hardening. He can harden any material to make its defense strong. His Crystal Glass Snake is known for its high-level Bloodline Limit, defense and poison ability.

He can use his talent to strengthen his lifeline Beast's scales. It will increase the defense power of the scales. And with the Lifeline Beast's poison ability. He can use the lifeline beast in frontal attacks.

The same goes for Petra Ross. Levy doesn't know the lifeline beast of Petra. But he thinks the lifeline beast is going to be a fire element type because of Petra's talent.

But when it comes to Jeremy Night. He couldn't even make a guess. Levy has asked his father before. His father told him that Jeremy's talent has a lot to do with individual fighting but not with the lifeline beast.

But Beast Tamers use their lifeline beast to fight in battles. Rarely does a Beast Tamer himself fight against the Corrupted Beasts.

There are examples of that. But there are very few.

"What is he going to do?"

"Is his family thinking about buying a high-level Bloodline Beast?" Levy mutters to himself.

Only high-level Bloodline Beast and above can awaken more than one ability. With such a lifeline beast, Jeremy can use his lifeline beast in battles.

The more he thinks about it. The more he becomes curious.

"Marie, is it confirmed that he is going to Central University 14?" Levy asked.

"Yes, young master. Young Master Jeremy signed the contract yesterday," Marie answered.

"Looks like we are going to have fun in Central University 14," Levy said to himself. His eyes flashes with expectations.

He was not at all saddened by his B-level Talent. Rather, he was happy to bond with a high-level Bloodline Beast.

Which has secured his future. He can reach Tier-5 without much effort.

All he had to do was to make sure to give high level resources to his lifeline beast. Evolution will happen naturally.

"Marie, go and make arrangements for my trip. I'm going to City A before anyone else," Levy said in a serious tone.
