

STRIKER 391

Chapter 391: Part 2: Solemn duty

Wilderness (Outer area):

As time passed, Jeremy got closer to the destination. It didn't take long for him to reach the first spot before noon.

Jeremy then takes out the digital device to confirm that location. He sees that things are mentioned in that description.

It exactly matches the current spot. He knows the exact distance travelled so far. It also matches the mentioned distance.

After confirming it, he placed the digital device back in the storage ring. He then sweeps his gaze across the place.

The current place is filled with overgrown bushes and trees. Jeremy then takes out the black container given to him by Leader Gisela.

He then removed the cover and saw the oval-shaped devices inside the container. The oval-shaped devices were palm-sized.

Jeremy picked the silver oval device. His eyes flash with surprise. It's new explosive devices told by Leader Gisela.

He sees the explosive devices in amazement. Then he acts according to the instructions. He digs up the ground.

After removing the soil, he placed the silver oval device inside. Then he covers the top with the soil. He doesn't have a clue how the device is going to activate.

Then he looked around and started going towards the next direction.

As the time passes, evening is getting closer. For the first time, Jeremy Night found something interesting.

He is now deep inside the outer part of the wilderness. Yet he saw no other corrupted beasts apart from the corrupted beasts that he had killed earlier.

Suddenly, a look of realisation dawned on him.

He thinks that because of the flying ant beasts. No other corrupted beasts live here. They must have vacated the place.

This gave him a rare chance to finish the task closely. He was worried for nothing. If there are no corrupted beasts here, he can complete the task sooner.

After gaining some clarity, he started walking better.

Time passed,

In the evening, he arrived at the narrow creek. His eyes wander around the narrow creek. After learning that there aren't any corrupted beasts here.

He takes out the digital device to confirm the location. The second site mentioned was the narrow creek. According to the mission description, he reads the other clues.

Which matches the descriptions as well. He then does the process again. He digs up the land. After digging up, he places the silver oval-shaped object inside.

He then covers the dig with soil. Once he is done with the process. He left the place. He needs to find eight other places to complete the task.

Meanwhile,

The other genius beast tamers are doing fine. But they were quite faster than Jeremy Night. They got the help of their lifeline beasts.

They have planted at least four oval devices so far. At the same time, Audrey Reed is faster in her work as well. She has planted more than four explosive devices.

Like others, she is having immense fear as well. She doesn't want to come across the flying ant beasts. Her father had informed her to start planting the explosives at the sites close to the inner part of the wilderness.

She has completed the task at those sites. She is now going towards other sites.

...

Wilderness (Inner area):

The Flying Ant beasts, which were already gathered in large numbers, started to have more members added to their army.

The numbers have crossed 50,000. The 50,000 Corrupted beasts are comparable to the 50,000 Beast Tamers. But their strength varies.

In each tier, the number of Corrupted flying ants was high compared to the Beast Tamers. So that can easily put pressure on all the Beast Tamers living in the city.

Even with the help of the lifeline beasts, the beast tamers of the city would find it hard to block the beast invasion.

Right now, their numbers are larger than in the previous attack. The city administration officials are clueless about it.

As time passes, eventually the evening passes and the nighttime comes. The flying ant beasts' army, which has completely taken over a quite large area, receives instructions from the flying ant queen.

Buzz!

The next moment, the flying ant beasts begin flapping their wings. They appeared in midair. In the blink of an eye, the entire army appears in the sky.

From a distance, it has taken on the shape of the black clouds. If it were daytime, their shape would become clear to others.

Slowly, the front line of the beast army moves. They have entered the outer area of the wilderness. They have started advancing to the city.

The City administration didn't have a clue that the Beast Invasion had started. They are still clueless. But they had Tier-8 Beast Tamers stationed near the city gate.

Their Tier-8 Lifeline beasts can spot the threats coming from the outer part of the wilderness. So the city Administration officials got a window of time to prepare.

....

Meanwhile,

Jeremy Night has completed the task in 5 sites. There are still five more to go. But at night, he is not taking any chances.

So he is still using his eyes to monitor the situation. Who knows? He could come across the Tier-5 Corrupted Beasts.

Last time, he had that experience. It was with great difficulty. He was able to escape last time.

A few minutes later,

He hears a low buzzing sound. At first, he thought he had heard it wrong and continued with the walk.

As time passes, the buzzing sound increases. This time, I knew something was up. I paused my footsteps and continued to look around.

Buzz!

The buzzing sound continues to increase.

"Where is this sound coming from?" Jeremy Night asked himself.

He then continues to hear. As time passes, the sound is getting closer and increases as well.

Then he suddenly saw something moving in the sky. But in the night sky, the moving thing appears to be black as well.

Jeremy Night felt a sudden sense of crisis. He had never felt this level of crisis before. His senses were screaming at him to escape. He doesn't know what to do.

Chapter 392: Part 1: Beast Invasion started (Flying ants)

Wilderness:

Jeremy raised his head and saw that the black cloud was nothing but the army of corrupted beasts.

"It must be flying ant beasts," Jeremy thought.

Swoosh!

Without further thinking, he burst forth with great speed. He started fleeing towards the outer area of the wilderness.

As he continues to flee, the sense of crisis is increasing again.

"I'm getting the sense that something is following me from behind," Jeremy thought.

My talent kicks in. My senses were heightened.

Outside,

The flying ant beasts that were flying over the sky. Their destination is the city. A few among them kept an eye on the ground.

They saw a prey fleeing in panic. He is none other than Jeremy Night.

The three flying ant-beasts suddenly dive down. They wanted to target the fleeing prey. These flying ant beasts were Tier-4 in strength.

In the blink of an eye, they have closed down the gap. They were a few metres away from Jeremy Night.

Jeremy Night, who was running forward, felt something was wrong. The sense of crisis is stronger than before. He activates his eye ability.

Slowly, he turned his gaze sideways. Then he saw the flying ant beasts coming towards him.

Seeing that he has realised he was being targeted. He unsheathed his katana blade. Then he began to cover the blade with the starlight liquid.

The blade was covered with starlight liquid in a few seconds.

Swoosh!

One of the Tier-4 ants was about to attack using its mandible. Right at that moment, Jeremy turned around and slashed at the beast.

Pfff!

The starlight-filled katana blade cuts through the head. The blood burst forth while the huge body of the ant beast fell to the ground.

Jeremy didn't stop there. He went forward to strike the next beast. It was Tier-4 Ant as well. The blade cleaves the head into two pieces.

Pfff!

The torrent of blood gushes forth. Its huge body fell to the ground. Then his gaze fell on the third beast. Its clawed shape was about to pierce through his chest.

Fortunately, he has his eyesight. The claw's speed was slow under his eyes. The next second, he changes the direction of the blood.

Swoosh!

He side-stepped to avoid the attack while directing the blade at the ant beast's head.

The next moment, the sharp black claw cuts through the empty air. At the same time, the ant beast's head comes in contact with the blade.

The starlight-filled blade penetrates into the head. The Tier-4 Ant froze on the spot. Jeremy withdrew the katana blade before continuing with the escape.

The last corpse fell to the ground. There are still flying ant beasts flying in the sky. Jeremy understood it was too late.

The invisible beast has already started. He can't place the remaining 5 explosives. He needs to find a place to hide.

As time passes, Jeremy continues to look for the same spot. It didn't take long for him to find a place in the underground cave. The cave is big enough for a human to get inside.

Jeremy felt it was a good place. So he entered the small space. After entering, I found that there was no space to move around.

But it's enough for him to lie down. He then finds a couple of pieces of rocks to block the entrance.

A few minutes later,

After blocking the entrance, he takes out the digital device and finds that the signal is available. So he made a call to Leader Gisela.

He is hoping that the call will connect. Surprisingly, the call was connected the next moment.

"Jeremy Night, what happened?"

"Did you encounter any difficulties?" Gisela asked.

She knows Jeremy Night won't call her unless there is some difficulty.

Jeremy said, "I have completed the task at 5 sites. There are 5 more to go. But the problem is that the beast invasion has started."

"I just saw large black clouds flying across the sky. They are moving towards the outer area. I'm sure they will reach the city sooner," he added.

"What?"

"The beast invasion has started," Gisela blurted out in shock.

"Yes, I just found a place to hide. If I appear outside, I will be swarmed by the army of the ant beast," Jeremy said it again.

"Jeremy, listen carefully. If a large number of corrupted beasts are nearby you, then throw away the remaining 5 explosives," Gisela revealed a truth.

Hearing that Jeremy's heart was stirred.

"Leader, what are you saying?" Jeremy asked.

He realises that the Leader is saying some truth right now.

"I'm sorry, Jeremy. I didn't explain it clearly to you. The explosives were made of new technologies. The device will activate if its sensor finds a large number of beasts nearby," Gisela replied.

Jeremy's eyes flickered with an understanding.

No wonder, he didn't find any switch to activate.

"Listen, one more thing. There is no need for you to come back. Stay safe in the hideout. I'll call you when the Beast Invasion is over," Gisela said.

Jeremy was shocked to the core.

He said, "Leader, how can I stay back? I want to contribute as well."

"You were already contributing. If you come back then the Sun Wheel Organisation would do something during the battle."

"Apart from you, there are other geniuses in the outer area as well. I believe their families would have given the same instructions," Gisela replied.

Hearing that Jeremy understood something. This mission at first seemed like a suicidal mission. Now the mission was changed to survival.

"Okay, take care of yourself. I need to inform the Head, Neil, about this." After saying that, Gisela ended the call.

Jeremy looked at the device before turning it off. He needs to save the battery. Since it was confirmed that he can't leave right now.

He doesn't want to waste the energy. After arranging everything, he leaned against the wall. He is thinking about the explosives right now.

He still has 5 explosives. But there are no beasts outside. If they found out his place, then he would use it.

Chapter 393: Part 2: Beast Invasion started (Flying ants)

City A (10th Zone):

Not only has Jeremy Night reported to Leader Gisela. The other geniuses informed their respective families as well.

The families and other forces got news before the Tier-8 Beast Tamers could sense it. It didn't take long for the City administration to get the news.

Alarm!

A loud alarm sounds across the city. It was the emergency alarm. The alarming sound has sent a shock wave across the city.

The locals and the business owners were in a state of panic. The Central University here had already sent students back to their families.

After hearing the alarm sound, they were shocked. If they were too late, then the families would have been in distress.

Now their families can prepare themselves for the worst situation.

Meanwhile,

At the airport, the alarm sounds have caused the staff to act according to the guidelines. During the beast invasion, no flights can be airborne.

Especially, when the beast invasion is caused by the flying ant beasts. They can easily destroy the flight.

The flights that were going to take off were stopped. The pilots heard the sound as well. They stopped their flight.

The passengers were terrified. The old people knew what was going on. They had faced the beast invasion before. They started to take control of the situation.

From the air control tower, the signals were given to the incoming flights that the airport was going to close. No incoming flights were allowed to land.

So they were advised to turn around. Only in case of a refuel emergency, they can enter the airport.

The airport has security team members. They were all strong beast tamers. They have asked the people to stay wherever they are.

If they go outside, they could cause more chaos and panic. They are going to face the beast invasion from the flying ant beasts.

They can fly across the city wall to enter the city. So it's unwise for people to go outside right now.

The three City Governors came outside for the first time. They are Tier-8 Beast Tamers outside. But their strength is closer to Tier-9.

Among the City Governors, one of them was an old woman. The other two were old men. They each took direction before disappearing from the spot.

Except for the south side, the three of them appeared above the city wall on the other three sides. They started to look ahead into the sky.

The Tier-7 Beast Tamers are stationed at the City Wall. They were commanders. Then there are Team Leaders and Squad Captains.

A large number of beast tamers were stationed at the top of the city wall. If it were other corrupted beasts, they wouldn't be worrying too much.

But this time they are facing a threat from the flying ant beasts. The 500-foot-tall city wall is useless against them.

The City Governors were standing in mid-air. It was seen by the locals and other beast tamers in the city. Even the Beast Tamers stationed at various positions saw this scene as well.

The City Governor's job is to find the opponent's leader as soon as possible. Only by taking down the top head would the beast invasion stop.

In their case, they have to find the ant colonies to kill the queens. Only if the queen ant beasts' dies. The soldier won't receive instructions from them.

The City Governors were waiting for the right opportunity. They wanted to confirm apart from the flying ant beasts. They were not facing a threat from other corrupted beasts.

Then only can they leave the city to look for the ant colonies. The city administration had already obtained the evidence from the Shadow Moon Organisation.

It's because of their incompetence. They underestimated the importance of the evidence.

If they had acted on the evidence, they would have found the ant colonies sooner to eliminate the queen.

But they were too late to do anything. The City Governors got the information from the City administration. They, too, heard that such a mishap had happened.

Upon learning that they were furious. Then only they had asked the families of the geniuses to carry out the strategic attack.

The three Governors are doing too many things at the same time. They were looking for other corrupted beasts.

At the same time, they were waiting for the explosion to happen.

Meanwhile,

Inside the outer area of the wilderness, the flying ant beasts are still flying in the sky. Among them, a few flying ant beasts were flying close to the ground.

These flying ant beasts were hungry. They were looking for the prey. Even if they find other Corrupted beasts, they would attack for sure.

A few minutes later,

A group of flying ant beasts is getting close to one of the explosion sites. When the flying ant beasts group got closer.

The silver explosive buried in the soil got activated. The sensors inside the device sense the incoming of multiple beasts.

When the flying ant beasts fly over them. The explosive device exploded.

Boom!

A deafening sound was heard.

A huge mushroom cloud was formed. The surrounding area was swept away by the shock force.

The explosion blasted away the flying ant beasts. The blood mixed parts splattered on the ground. The small group was completely wiped out.

This loud explosion has caused the giant black clouds to stop their movements in the sky.

But multiple explosions occur one after another.

In the blink of an eye, more than 60 explosions were heard. Over 60 giant mushroom clouds appeared in the night sky.

Each explosion has wiped out a group of flying ant beasts. They are between the Tier-2 to Tier-4 Flying Ant beasts.

On the other hand, the sound of the explosion was so loud that it was heard by the people in the city.

The City Governors first spotted the mushroom clouds. It was an indication that the beast invasion was inevitable.

The Commanders, Leaders and the captains were all ready to face the upcoming attacks.

Meanwhile,

Some geniuses were still finding the hidden spot. The rest of them were hiding safely. But no casualties have occurred so far.

Because most of them had completed their task near the outer area border close to the inner part of the wilderness.

Chapter 394: The City Governors' first strike

Shadow Moon Organisation:

Head Neil, Elders, the Team Leaders and the members all heard the loud explosion. The next second, everyone came outside.

In the mid air, everyone is looking in the direction of the city wall. They could see that City governors were there as well.

Head Neil who was dressed in the white tuxedo is looking in the direction of the outer part of the wilderness.

He knew Jeremy Night was sent for the strategic mission. He knows the mission content. The newly developed explosives were placed at different strategic locations.

The explosion sound just now was the result of the corrupted beasts triggering it.

"Everyone get ready for the battle," Neil shouted.

Hearing that the Leaders and Elders began to act. The Leaders all have three squads under them.

They immediately summoned them.

Gisela summoned her squads as well. It didn't take long for everyone to come outside. Sinag was there with her team. But there was one person missing.

The person is none other than Jeremy Night. Sinag was searching for him. Seeing that he was not here. She was tense.

"Is he sleeping?" Ada asked.

Other members realised that Jeremy Night was not here. The female members were concerned. But the male members didn't show any reaction.

Fredric didn't open his mouth. The warning from Leader Gisela humbled him down.

The other male members were silent as well.

Gisela saw her squad members. Her gaze suddenly fell on Sinag. She then comes to her.

"Leader!"

Everyone greeted her.

Gisela nodded to them and said, "I have sent Jeremy Night for some other work."

Hearing that Sinag and others understood. They put their heart at ease. Fredric and other male members didn't say anything.

But they were disappointed. Fredric thought the newcomer would be scolded by Leader Gisela. But the opposite has happened.

Then the elders have come out as well.

They are going to face a beast invasion from the flying ants. So there is a large possibility for them to enter the city.

Similarly,

The other Mercenary Organisation and Beast Taming Families had their Beast Tamers gathered outside.

They are not only going to protect their territory. But they were going to fight for their City as well.

Similarly,

The Central University had their Instructors, Guards and Elders to come outside. Everyone is going to face the beast invasion.

Unlike other invasions, where they had their huge city walls to block their threats. This time they are facing a flying type beast.

Last time, when the flying ant beast invasion had happened. The Beast Tamers were fighting inside and outside the city wall.

The casualties were high in numbers.

Meanwhile,

The locals who were old and weak. The children and the low tier beast tamers went inside their home's basement.

Those living in the residential area went inside their basement as well. While this was happening around.

The City Governors were looking in the direction of the outer part of the wilderness. The commanders, the leaders and the squad captains were all ready.

The City Governors were an old woman and the two old men. They recognised the mushroom clouds. They immediately gave commands to people under them to be ready.

Shortly afterwards,

Several black clouds appeared close to the City wall. Upon seeing that the faces of the commanders and others changed drastically.

They were not expecting this many black clouds. Each black cloud has an army of flying ants. This immediately sent cold shivers down many beast tamer's spine.

The three City Governors' expressions turned grave. Then they started to give instructions to others. The Team Leaders and the elders were the first ones to act.

Swoosh!

One after another different lifeline beasts appear beside their beast tamers.

Boom!

The next second, the lifeline beasts began to use their ability.

One after another the projectile attacks come in contact with the black clouds.

Boom!

A loud explosion occurs.

The flying ant beasts which come in contact with the different types of attacks. The low tier flying ant beasts exploded on the same spot.

The Tier-4 and Tier-5 Flying Ants were injured. But it is not enough. The black clouds continue to move forward to the city.

The city Governors communicated with each other. They have decided to enter the inner part of the wilderness to find the ant colony.

Swoosh!

The next second, three of them started flying towards the inner part of the wilderness.

In a flash, one of the old men came to one of the black clouds.

Boom!

He uses a fire ability. The large projectile of flames engulfed the whole black cloud. The entire black cloud lit up in the fire.

Weird cry!

The flying ants in the large black cloud began to let out a weird cry. They were getting toasted and fried.

The old man went past the giant fire ball.

Pfff!

Similarly, the old woman uses her ability. A large wind blade appears out of nowhere. It went horizontally slicing through the black cloud.

In the black cloud, the flying ants' bodies were cut into two pieces. The flying ants were the Tier-2 to Tier-6 Corrupted Beasts.

Boom!

The third old man instead used the lifeline beast directly. A massive gigantic crocodile over 100ft appears in the sky.

It has golden and silver scales covering its body.

The black cloud appears small compared to the size of the crocodile.

The old man then gave the order to the crocodile lifeline beast.

Under the eyes of many gathered on the top of the city wall. The giant crocodile swallows the black cloud as a whole.

Swoosh!

The next second, the old man appears on top of the crocodile head. He then lands on the head. The second old man who used fire ability earlier.

The old woman who used wind ability earlier appeared next to the old man.

Three of them were standing on top of the crocodile's forehead. This scene was witnessed by everyone standing on top of the city wall.

...

City A (10th Zone):

The city governors left the spot and disappeared into the wilderness. Now it's up to the commanders and other beast tamers to protect the city.

The disappearance of the three giant black clouds momentarily stunned the flying ants in other black clouds.

The Tier-7 Beasts hidden in other black clouds wanting to attack the city governors. But the presence of the giant crocodile has deterred them.

Swoosh!

The next second, the black clouds increased their pace towards the city wall. The black clouds suddenly splitted into further small clouds.

They are going to attack the city from all directions. It was seen by the beast tamers on the top of the wall.

The commanders then gave instructions to the people on the ground to get ready to face the attack from all sides.

These black clouds slowly approach the city wall from all directions. The faces of the patrol guards turned pale.

Each cloud consists of more than a hundred flying ants. But the patrol guards there are many small clouds approaching them.

From this they can tell that they were outnumbered.

The faces of the leaders and squad captains were grim. But the commanders have given clear instructions. They can't move away from their spot.

The flying ants then one after another separated from the group. They started charging towards the patrol guards.

Whereas some of black clouds approach the top of the wall. The beast tamers standing on top of the wall were ready to face the black clouds.

The remaining large black clouds fly across the city wall from all sides. They entered the city and divided into smaller clouds.

The beast tamers gathering inside split into different groups to fight against the flying ant beasts. They started charging towards them.

The small and medium sized clouds dispersed. The flying ants appeared on the ground.

Buzz!

They started flapping their wings. The flying ants between Tier-2 to Tier-5 are in strength.

The Tier-6 and Tier-7 Flying Ants were engaged by the Commanders and the Leaders.

Boom!

In a flash, the two groups collided into each other. An intense fight started. The Beast Tamers began to use their lifeline beasts to fight.

The lifeline beasts were easily tearing apart the flying ants. Some of the lifeline beast species were strongest. They were easily destroying the flying ants.

But the flying ants have an advantage. It was their numbers. Suddenly, more than two flying ants joined together to fight against the lifeline beasts.

Suddenly, the pressure was on the Beast Tamer's side.

Simultaneously,

The other flying ants have started attacking the high tower buildings. The debris was falling down to the ground.

The Beast Taming Families and Mercenary Organisation have started defending their territory as well.

The weak old age people, children and women were hiding inside the basement.

At the area of the Shadow Moon Organisation, the Head Neil is instructing everyone.

After doing that he dared out towards the big clouds to stop them from entering inside the city.

The Heads of the Beast Taming Families and Mercenary Organisations were each dealing with the black clouds as well.

Chapter 395: Wiping out small group!

Wilderness (Outer Area):

Jeremy Night is hiding inside the small space. But he could hear the wings flapping sound from time to time. This is the second beast invasion in his lifetime.

He doesn't know what's going on the other side. The black clouds were large in numbers. He could tell that the number of flying ants was large.

It can easily outnumber the strength of the Beast Tamers in the city. But he was not afraid. He thinks that the City administration must have other options.

For example the availability of explosives. The new tech explosives were stronger than he had thought.

Earlier, he had heard those explosions.

The explosives must have taken out the large number of the flying ants. Right now, Jeremy Night is hesitating whether to go outside or not.

During the beast invasion in the 14th zone. He had contributed more to the city. He wants to do the same here.

Buzz!

Just as he was thinking over it, he heard the buzzing sound. The buzzing sound indicates that something is nearing his hideout.

Hearing that his expression changes drastically. He knew this might happen.

Crack!

The next second, something struck the boulder blocking the entrance. The claw blades of the flying ant came inside.

Seeing that Jeremy's expression changes. He takes out the katana blade. Without waiting further, he thrusts the blade in that gap.

Pfff!

The blade pierced through something. Jeremy thinks that it's the head of the flying ant. He then withdrew the blade and continued to hide and wait for further attacks from the flying ants.

Quiet!

There was a silence. No attacks from the flying ants. But Jeremy Night didn't let down his guard. He could still hear the flapping sound of the wings.

His only fear was that there could be a large number of flying ants outside.

Meanwhile,

Outside the small hideout, the small army of flying ants over 50 in numbers were circling around the place.

If Jeremy Night sees this scene, he would be shocked to the core. Because he was right. A group of flying ants have found prey inside the hideout.

The flying ant group is diverse. In this group, the strongest one is Tier-4 Corrupted Beasts. Suddenly, more than 5 Tier-4 flying ants struck the boulders blocking the entrance.

Boom!

The boulders were pulverised. The opening to the small hideout was cleared out.

Swoosh!

A shadow rushes outside from the hideout. The sudden movement stunned flying ants. The shadow enters the overgrown bushes before hiding from their sight.

The shadow is none other but Jeremy Night. He is using the eye ability and senses. He knew the corrupted beasts won't give up easily.

Fortunately, he was able to utilize the right opportunity to come out. He held the katana blade tightly in his right hand.

At the same time, he is using his second eye ability. Everything becomes transparent under his eyes. Then he could see the large number of flying ants.

He could see through their bodies. They are searching for him. He also notices that apart from this group there are no other black clouds in the surroundings.

Which means he is safe as long as he clears out the threat in front of him. Jeremy also notices the size of the flying ants are different.

They are smaller compared to those who he had witnessed earlier. Which means they are not higher tier beasts.

Buzz!

Suddenly, the 5 Tier-4 flying ants charged towards him. Seeing that Jeremy was ready to strike. He didn't have to use the starlight energy against the Tier-4 Beast.

Buzz!

The sharp wing blades cut through the air. The flying ants charge towards the prey to cut its body. When it got closer. The prey side stepped all of a sudden.

Instead, it faced the incoming sharp blade. The sharp blade went straight into its head.

Pfff!

A torrent of blood gushes forth. The Tier-4 Flying Ant is dead but there are four more to go.

Jeremy Night uses the opportunity to strike the remaining beasts at a fast pace. He is saying the katana blade with the aid of his eye ability.

Slash!

The blade cuts through the wings of the second beast. Then it slashes at the abdomen of the third beast. In the blink of an eye two more beasts were down.

The last two flying ants are trying to attack with the claw blades.

Jeremy Night's senses were heightened. The beast's movements were slow under his eyes. Because of it he avoided the unnecessary movements.

Puchak!

He plunged the blade forward. The blade penetrates the thorax severing the organs.

Swoosh!

He then withdrew the blade before striking the last beast. The last attack was swift and controlled. It went through the neck of the beast before severing it.

Pfff!

The severed head rolled over the ground. All the 5 flying ants were down within a few minutes.

Jeremy then walks over the flying ant which still has breath of life left.

He then struck its head by thrusting the blade in its head. After killing the beasts, he eyes scans over the place.

The rest of the small group had long since fled from the place. Seeing that Jeremy Night sighed inwardly. He doesn't want to waste time with others.

Since the hideout was compromised. He doesn't want to stay here. The smell of blood could attract other beasts.

So he left the place and started walking towards the direction of the city. He is taking huge risks at this moment.

He could come across something dangerous than the Tier-5 flying ants.

If it happens, there could be no escape. Unless he uses the explosives for the fight. But those were for the emergency situation.

The beast invasion had just started now. He doesn't know how long it will continue.

Similarly, the Genius Beast Tamers are fighting as well. Their hideouts were discovered by the flying ants.

Unlike Jeremy Night, they had their lifeline beasts to help them.

The Tier-5 and above flying ants are targeting the City right now. Their queen had given them clear instructions.

Only the low tiers are hunting for the prey in the outer area.

Chapter 396: All night fighting!

City A (10th Zone):

The flying ants are chasing chaos in the city. All the Beast Taming forces are fighting against the flying ants which are large in numbers.

Smokes and fires can be seen on top of the many buildings. There were no flying vehicles in the sky. All the transport services were stopped.

Even the streets have become the battlefield for the Beast Tamers. A fierce fight is going on everywhere.

In the Central University, the Instructors were dealing with black clouds. If they dealt with the one block clouds, then they saw other black clouds entering the city from the wilderness.

The Dean of the Central University here was a middle aged man. He is dealing with the large black clouds alone. He is letting the instructors deal with the small black clouds.

Meanwhile,

In the Shadow Moon Organisation, the Head Neil is destroying the black clouds one after another. He is alone dealing with the dozens of the Tier-6 Flying Ants.

Leader Gisela and other team leaders were dealing with other small black clouds.

Whereas the squad captains and the team members were fighting against the Tier-2 and Tier-3 Flying ants.

As the time passes, the number of flying ants have increased in numbers. The team members were facing the pressure.

Fredric and others fight against the flying ants with help of their lifeline beasts. Their lifeline beasts are facing immense pressure.

Ada and other girls are working as a team while fighting against the flying ants. Their lifeline beasts are that of different species.

The flying ants sometimes use the flight ability to escape. So the beast taming forces are experiencing great pressure.

Unless, the City Governors found out that Ant Queen. The onslaught is going to continue.

....

Wilderness:

The Giant Golden and Green crocodile is flying towards the Ant Beast Colony. They are following the direction of the black clouds.

Whenever they come across the black clouds. The Giant Crocodile swallows the black clouds as a whole.

As the time passed, they continued to search the inner part of the wilderness.

The Ant Queen Colony is extremely hidden. When they came to the spot where the ant beast colony was first sighted. That place is empty right now.

Three of the City Governors turned grave.

"The land is empty. The ant queen long since vacated the place," The old woman said.

"We should split and look for the ant beast colonies," She added.

Hearing that the two old men agreed. Then the old man with fire ability and the old woman with wind ability left with their Lifeline beasts.

...

Morning time comes. The streets were filled with blood and organs of the flying ants. The corpses of the beast tamers and their lifeline beast can be found on the street as well.

The continuous long night fighting has caused the mountain of corpses piled up here and there. Most of them were the piles of flying ant corpses.

But compared to the night, the attack from the black clouds continues. The appearance of the black clouds have reduced. Which immensely reduced pressure on the beast tamer's side.

Since the large black clouds had stopped appearing frequently. They started to deal with other smaller clouds. When in return reduced the pressure on the team leaders' side.

The Team leaders were able to protect their squad teams better.

...

Shadow Moon Organisation,

Gisela is dealing with the small black clouds. Because of it, the squad under her were able to catch their breath.

Sinag, Ada and others were soaked in blood. They are having a short break to recover.

"The number of beasts have reduced," Fredric said.

"The City Governors might have eliminated the Ant beast queen," Albert said from the side.

"What is Jeremy Night doing right now?" Ada asked.

"Don't worry, he will be doing better than us," Sinag replied.

Both of them have witnessed Jeremy Night's strength before. He is someone who could go against the Tier-5 Corrupted beast.

As long as Jeremy Night doesn't face the black clouds filled with Tier-5 and above beasts. He will be fine.

"Harumph, he must be hiding somewhere safe," Fredick made the comment.

Quiet!

Hearing that there is a pin drop silence. Because they were not only the squads here. There were other squads present as well.

Everyone heard Fredric's comment right now.

Sinag's face turned dark. Her heart filled with anger. Fredric was warned many times. But he still harbours ill intentions against Jeremy Night.

Ada was there as well. She is glaring at Fredric. Amelia, Ruby and Florence were the same. They thought Fredric was causing unnecessary problems.

This time even the male members were fed up. Albert said, "You should mind your business."

Hearing that Fredric was stunned. Cedric and George were the same. They are having bad expressions. Because Leader Gisela had warned everyone.

Yet Fredric is repeating the mistake.

But they didn't know the team leaders heard it as well.

"Gisela, it appears your 3rd Squad was not united," A middle aged man said. He is the leader of the 3rd Team.

Gisela was angry. She then turned towards Fredric.

Fredric felt someone was looking at him. When he saw it was Leader Gisela. He was petrified on the spot. He realises he has made a great mistake.

He embarrassed Leader Gisela in front of other leaders.

"Ha...Ha...Ha...., looks like I was right. What about the 10th member? The newcomer whom you hired was nowhere to be seen," The middle aged man asked again.

Gasp!

Hearing that there was a small commotion. No one expected the team leader to speak like this during the battle.

Before Gisela could reply. Head Neil's voice sounded.

"If anyone was found talking non-sense in the middle of the battle, he will be kicked out from the organisation. Including the team leaders."

Hearing that everyone was dumbfounded. The middle aged shut his mouth. He knows it was targeted at him.

So he became silent. But he already caused many people to have doubts.

They were also thinking about Jeremy Night.

Chapter 397: Facing the dangerous small black cloud alone!

Wilderness:

Morning time,

Jeremy Night hadn't faced any threats in the night time after eliminating the small group of flying ants.

But he thinks that the worst situation continued in the daytime as well.

Because he sees the black clouds moving towards the City from time to time. He could only imagine the situation of the city in his mind.

"Everyone must have been exhausted," Jeremy thought.

He began to wonder whether there was heavy casualty or not. During the night time, a huge shadow flew across the wilderness.

He noticed that shadow might have come from the city. He thinks that city governors or someone else powerful must have taken the action.

Yet the black clouds in different sizes are approaching the city. It only meant that the ant beast colonies were not found.

Jeremy's heart was filled with doubts. He was sure that he had provided them with evidence.

If they had followed his evidence, they would have reached the ant beast colonies by now.

But he doesn't know what's happening on the other side. Jeremy then collected his thoughts. He decided to take a risk.

He has reached close to the city right now. He is at the edge of the outer area of the wilderness. But he doesn't know why he had this thought of finding out the ant beast colony himself.

It was just his random and foolish thought. But he has the new explosives with him. If he could put these things inside the ant beast colony, he thinks it would be helpful in reducing the number of black clouds.

As this plan firmly sat in his mind, he turned around and started walking back to the wilderness. If others knew about Jeremy Night's actions, they would be shocked to the core.

But no one has the guts to think about something like this. Yet Jeremy Night is acting on it. He is doing something which is impossible for the Shadow Moon Organisation Beast Tamers to think.

Especially, the third squad members wouldn't have imagined the newcomer would dare to do something like this.

Fredric and others still don't have a great opinion about Jeremy Night. Fredric had already said that Jeremy Night is hiding somewhere.

Though Leader Gisela fails to provide any explanation. It has firmly sat in everyone's mind. Only the Team Leader Gisela and the Head of the organisation knew what's going on.

Captain Sinag and Ada still have a positive attitude towards Jeremy Night. They think Jeremy Night must have some important job to do.

They both knew Jeremy Night had done a job for the Beast Taming Association as well. He was not relying on their organisation's missions only.

Time passed,

Jeremy thought he would have a smooth journey as long as he doesn't appear on the open land when the black clouds fly in the sky.

But he was proven wrong. A small cloud split from the large black clouds and started coming in his direction.

Seeing such a scene in broad daylight. Jeremy felt goosebumps all over his body. He didn't expect to be exposed right away.

He was still standing under the giant shade tree. Yet he was spotted by the flying ants.

Buzz!

He could hear the buzzing sounds coming from the small cloud. He doesn't know whether the small black cloud got any Tier-5 Flying ants.

If not he will deal with them easily.

He didn't move an inch from the spot. Because this open land surrounding the giant shade tree is a good spot for the fight.

Swoosh!

Jeremy draws his katana blade. He then uses his senses and eye ability. Everything around him becomes so quiet.

He could even sense and observe the small leaves falling over the ground.

The small black cloud dispersed into several flying ants. The sizes of the flying ants were different. Among them there is a large 10ft Tier-5 Flying Ants.

But the number of the Tier-5 Flying Ant is 10 in number. The rest of them are flying ants from Tier-3 to Tier-4. Their strength is 20.

In total, 30 flying ants have surrounded Jeremy Night.

Jeremy Night's expression turned grave. He immediately takes out the hand gun and holds it in his left hand.

In his right hand, he held the katana blade tightly.

He didn't expect to face more than one Tier-5 Corrupted Beasts. That too, ten flying ants.

Jeremy kept his calmness. He knows there is no chance for escape. If he makes a mistake he could die.

He then uses his eye ability to target the Tier-5 Flying Ants. He then covers the bullets with the starlight liquid.

Bang! Bang!

Jeremy continues to shoot one after another. The starlight bullets cut through the air before reaching the Tier-5 Flying Ants.

The Tier-5 Flying Ant senses the threat. It was about to move the body. But the starlight bullet goes through the right eye.

Puchak!

The right eye burst open. The starlight bullet didn't stop. It goes through the head and crushes the brain.

Tud!

The Tier-5 Flying Ant stopped flapping its wings. It dies on the same spot.

Pfff!

The second starlight bullet did the same. It kills the Tier-5 Flying Ant in seconds. Now eight more to go.

This all happened within seconds.

Buzz!

The Flying Ant beasts were stunned. The next second, they were enraged. The flying ants started charging towards Jeremy Night from all sides.

Buzz!

Jeremy Night covers the blade with the starlight liquid.

Puchak!

In a flash, the Tier-3 and Tier-4 came close to him. If he makes any small mistake, then he will be cut down by the blades of the flying ants.

Under his senses and eye ability, he could predict all the attacks directed at him.

Swoosh!

Jeremy moves his body while swinging the katana blade.

Pfff!

The blade cuts through the thorax and heads of the flying ants. The ground was splattered with the blood mixed with organs.

In a blink of an eye, more than 5 flying ant beasts were cut down.

The Tier-5 Flying Ants were circling around to trap the human prey.

Chapter 398: Energy beam attack!

Wilderness:

Puchak!

Jeremy is slashing the katana blade here and there. But every time, the blade swings. It cuts down the body part of the flying ants.

His senses and eye ability were heightened. He is using them in coordination to deal with the nearby beasts.

Once the nearby beasts were down. He can take down the Tier-5 Flying Ants.

Jeremy Night took down 5 more flying ants in a few minutes. There aren't many flying ants left.

Buzz!

This time one of the Tier-5 Flying Ants moves forward to attack. The claw-like blades were directed at Jeremy Night.

Jeremy aims at the eye of the ant at close quarters. Just as the claws were about to hit him. He pulls the trigger.

Bang!

The next second, the starlight bullet hits the target.

Puckak!

The brain of the ant beast was hit hard. It dies the next moment. Three down. Now there are 7 more to go.

Buzz!

The other flying ants were not attacking anymore. They are maintaining the distance.

Bang! Bang!

By using the opportunity, Jeremy pulls up the trigger again.

One after another starlight filled bullets pierced through the air before hitting the eyes of the Tier-5 Flying Ants.

Finally, the flying ants begin to act together.

Remaining Tier-5 Flying Ants charging forward at the same time.

Jeremy is still controlling things. He was waiting for the flying ants to get closer. So he can pull up the triggers.

A few seconds later,

Bang! Bang!

The same thing is happening again. The starlight bullets struck the eyes of the beast at close quarters. The Flying ants had nowhere to escape.

Their movements were too slow to stop the speed of the bullets.

At the same time, Jeremy Night's katana blade is dancing in the air. He is doing two things at the same time.

Puchak!

Blood mixed organs of the ant beasts were splattered on the ground. Jeremy Night is continuously using his heightened senses.

About 20 minutes later,

He was standing under the same giant shade tree, covered in the blood of flying ants. Around him the corpses of the flying ants were piled up.

He had dealt with 10 Tier-5 Flying Ants and 20 other flying ant beasts within half an hour.

Phew!

After confirming their deaths, he heaved a sigh of relief. He then sheathed his katana blade and put his hand gun back in the holder before walking away from the place.

He quickly left the spot and disappeared into the woods.

Meanwhile,

The conditions and situations of other genius beast tamers weren't good looking. Some of them are injured. They and their lifeline beasts were not in condition to fight.

There are still a few beast tamers left who are still trying their best. The beast tamer is none other than Audrey Reed.

Audrey Reed is concerned about her family. Because the Beast Invasion looks never ending. The black clouds are continuously moving towards the City.

Compared to the night time. She noticed that they weren't appearing frequently. Yet she was scared not knowing the strength of flying ants.

...

City A (10th Zone):

The city is starting to fight back. This time city administration has taken out their weapons outside. Its energy beam weapon capable of taking down the Tier-7 Colossal Corrupted Beasts.

It's a strategic weapon used to drive away the walking disaster like the Single Colossal Tier-7 and above corrupted beasts.

But the current situation is not less than that of a disaster. They have taken out his energy beam weapon to target the large black clouds.

The Tier-7 Flying Ants are leading the attacks from the large black clouds. The second in command of the City Governors were responsible for the strike.

Boom!

A blue beam was shot at the incoming large dense black clouds. It doesn't matter whether people are on the ground or on top of the city wall.

Everyone saw the bright blue beam. The powerful beam went across in straight line before piercing the dense black clouds.

Weird Cry!

A weird loud cry was heard. The black cloud disintegrated the next second. The surviving flying ants were scattered.

Some were trying to enter the city. While others are charging towards the Beast Tamers on top of the wall.

Meanwhile,

The City administration officials celebrated the attack. But they need charging time before they can use it again.

Fortunately, there are Tier-8 Beast Tamers who were dealing with the black clouds. It gives them enough time to charge their weapon.

...

Sun Wheel Organisation:

One of the powerful Mercenary organizations is facing casualty right now. Their Beast Tamers are dealing with both the big and small black clouds.

Each Beast Tamer is fighting against the double digits of the flying ants. Even the Leaders are fighting against multiple Tier-7 Flying Ants.

Yet they couldn't stop the casualty from happening. The 3rd Squad Teams of each leader were hit hard.

The 3rd Squad Team's Tier-3 Beast Tamers are facing the attacks from not only Tier-3 Flying ants but from Tier-4 Flying Ants as well.

Because of it, their lifeline beasts were getting injured. The flying ants are able to kill the lifeline beasts quickly, hereby making the beast tamers crippled.

...

Shadow Moon Organisation:

The situation is the same for the shadow moon organisation. The 3rd Squad is facing problems. The Team Leaders could see the problem.

But they themselves were occupied. Fortunately, the retired elders intervened from time to time to save the members.

Sinag completely looks disheveled and bruised. Her body is soaked with blood and mixed organs. Beside her Lifeline beast, the beautiful green butterfly was exhausted as well.

Cry!

The Butterfly makes a sound. It wants to go back inside the mental zone to recover. Sinag showed a helpless smile.

She then made a decision and allowed her Lifeline beast to take rest. The Beautiful Green butterfly disappears from the spot.

It went inside Sinag's mental zone.

"It would be good if he was here," Ada said from the side. Her black bear lifeline beast was exhausted as well.

Chapter 399: Blowing up the Ant beasts' colony!

Wilderness(Inner Area):

Jeremy Night was able to go through the forest without getting spotted by another black cloud.

He was making sure he was travelling through the dense area, not the open land.

One good thing, though, was that no other corrupted beasts were sighted because of the beasts' invasion.

He was able to reach the inner area of the wilderness quickly.

The first thing he did was to recall the ant-beast colonies. He didn't know whether it was good to find the ant-beast colonies.

If the ant-beast colonies were present, then they must have been spotted by the City Governors.

Now he has to make some decisions.

Suddenly, he saw smoke in the sky. The place is located far away. It must be rising from somewhere.

Jeremy's eyes gleamed with a twinkle. He thinks something must have happened in that place.

"Maybe the City Governors have taken action?" Jeremy thought.

He then decided to go to that place. There is a risk of encountering Tier-5 and above beasts. But Jeremy Night was not scared.

He knows how to find the ant-beast colonies. He had to take risks. He started walking towards that place.

Jeremy is still going through the dense vegetation area. As he continues to walk, he uses his eyes as well.

Swoosh!

Suddenly, Jeremy sees a flying ant in the far distance. He stopped his footsteps and looked at the flying ant in surprise.

Because the flying ant was small in size. From the beginning of the beast invasion. He had never seen such small-sized flying ants.

It's the first time he has seen such a beast. What is it doing here?

He thinks it must be a Tier-2 Flying ant. He doesn't know why? But he thinks it's good to follow the small-sized flying ants.

Maybe the Tier-2 Flying Ant came out to hunt. He might reach the flying ant beast colony by following this Tier-2 Flying Ant.

A clever plan comes to his mind. Jeremy Night started doing that. He doesn't have to get closer. His eyesight is enough to track the beast.

Time passed,

He eventually got closer to the flying ant. The flying ant also started going somewhere. Jeremy is increasing his pace so as not to lose sight of the beast.

It didn't take long for him to reach the flying ant beast colony. Like he had suspected the Tier-2 Flying Ant disappeared into one of the holes.

Jeremy saw other flying ants around the ant beast's colony. As he continued to observe, he found out that these ants were Tier-4.

It's just one of the many flying ant beast colonies. Still, the Tier-4 Corrupted Beasts are no less of a threat.

Many of the city's population are powerless when it comes to dealing with Tier-4 Corrupted beasts.

Swoosh!

Jeremy unsheathed his katana blade. He held the blade tightly in his right hand and started covering the blade edge with the starlight liquid.

He then came out of the bushes, charging towards the nearest flying ant.

Puchak!

He swung the blade. The blade in his hand went in a parabolic arc before cutting down the flying ant.

The flying ant's body cleaved into two.

Swoosh!

The other 2 Flying Ants darted out towards him. Their movements were slow in Jeremy's eyes. His blade dances in the winds before striking down the two flying ants.

Pfff!

Their broken body parts are splattered on the ground.

After dealing with the three flying ants, he takes out one of the remaining five explosives. He then drops it into one of the holes which is going underground.

He knows that the explosive is going to activate by itself.

Swoosh!

So he immediately left the place and started going in the opposite direction to hide.

The explosive device is falling underground before landing on the space filled with eggs. These are flying ant eggs.

The explosive device senses them as corrupted beasts. Since the number of eggs is hundreds. The sensors treated it as the corrupted beasts.

Boom!

The next second, several beeps were heard. Right after, the explosive device exploded on the spot. The whole of the ant's egg was blasted away.

They were destroyed in seconds. The whole of the underground space was covered with the fires. The grown-up adult flying ants were engulfed in the fires as well.

Boom!

In the blink of an eye, the top of the ceiling was blasted open by the rising flames.

Jeremy, who was running ahead, heard the explosions. He is grinning from ear to ear. Unfortunately, he didn't know the extent of the damage.

But he knows that the explosive won't be triggered unless there is a large number of flying ants living underground.

He has only four explosives left. He needed to find an even bigger ant colony. He believes the next colony won't be further away.

So after running so far. He takes a rest under the giant tree. He didn't spot any black clouds so far. The smoke is still rising to the sky in that place.

His initial idea was to reach that place. Seeing that he is calculating whether to follow the initial goal. But right now, he thinks he has entered the area of a beast colony.

These ant colonies are new. He hadn't seen these before. If they were left out, the flying ants would come out endlessly.

After gaining some clarity, he decides to search in this area.

Meanwhile,

The Three City Governors had found one big ant colony. Right now, they are fighting against the Tier-6 and Tier-7 Flying Ants.

They are in large numbers. The Three Governors knew that the Ant Beast Queen must be a Powerful Tier-8 Corrupted beast.

If they want to reach her, then they have to clear out the hurdles first.

The Golden Green Crocodile tries to swallow the group of flying ants.

Swoosh!

But these flying ants were faster. They clearly maintain a distance from the giant crocodile.

The City Governors' expressions were serious. Because they found out they are dealing with one of the ant-beast queens.

Chapter 400: The City Governors' actions

Wilderness (Inner Area):

The old man who is the Beast Tamer of the Golden Green Crocodile made a decision. His name is Marco. He is one of the three City Governors.

He is also the oldest and strongest among the three.

The second old man's name was Enzo. He is the one who uses the fire ability.

The next and last of the city governors was the old woman. Her name is Leonor.

Marco said, "You guys take care of the other queen."

"I'm dealing with this one," he added.

Hearing that Enzo and Leonor agreed. They went away from the place.

Now the old man Marco alone has to deal with the flying ants here.

The Giant Golden Green Crocodile swings its tail.

Boom!

The brute force generated by the tail struck the body of the flying ants. The flying ants' bodies were cut down into pieces.

The shock force sweeps away the surrounding area. The tall trees and overgrown plants were uprooted directly.

The land terrain has changed. Sudden cracks appear on the ground. The large mountain rock was cracked into pieces.

At the same time, the ant beast colony was struck by the shock force. Many openings to the underground were closed.

Many ant eggs and larvae were crushed by the sudden impact. The underground spaces were hit hard. Deep inside the underground, the enormous ant beast queen is resting.

It's Tier-8 pressure alone that is keeping the worker ants away.

Suddenly, the ant beast queen felt the destruction of the eggs and larvae. It got angry.

It immediately ordered the remaining worker ants to take care of the threat outside.

Outside,

In one swing of the tail, the Tier-8 Lifeline beast Crocodile wipes out half of the team. The remaining beasts pose no threat to the beast.

The old man, Marco, knows that Tier-7 Worker Ants would come next for sure. But the expression of the old man was not good-looking.

He knows the power of the ant queen. The corrupted beasts are usually stronger than the Beast Tamers.

If the Ant Queen comes out, then he might require the help of the other two City Governors.

Boom!

Shortly afterwards, the Tier-7 Worker Flying Ants came out in large numbers. The size of the worker ants was over 10ft.

There are more than 50 in number. The old man's expression was grave. It's just one of the ant queens' lives here.

There is another one as well. The other two must be facing each other as well.

"If these things were let go to the city, they could easily destroy the whole city," Marco said in a grave tone.

He had not come here without a plan. He had asked the help from the Human Alliance. He thinks that the Lord must be here by now.

If they weren't able to eliminate the ant beast queen, they could only request help from the lord.

Buzz!

The Tier-7 Flying Ants started launching an attack. The Giant Golden Green Crocodile Beast is facing the attack from all sides.

Meanwhile,

The City Governors Enzo and Leonor are attacking the colony of another ant beast queen. They were facing the same problem as Marco.

After eliminating the surrounding flying ants, they struck the ant beast colony. But a large number of Tier-7 Flying Ants came outside.

Enzo and Leonor looked at each other's faces. They immediately summoned their Lifeline beasts outside.

Boom!

A Giant Red Lion King over 30ft in height appears beside Enzo. Upon appearance, the red flames begin to spread across the place.

Puchak!

The powerful flames struck the Tier-7 Flying Ants. Their wings were caught on fire. Their whole body began to burn.

In the blink of an eye, more than 5 Tier-7 Flying Ants were burnt to ashes, and a few others were injured.

Buzz!

The other flying ants retreated backwards. Because the Red Lion King is a Tier-8 Lifeline beast. It's extremely powerful.

It can easily destroy the Tier-7 Flying Ants here.

Boom!

On the other hand, Leonor's Lifeline beast was Blue Wind Horse. Its height is over 20ft.

But its wind attack was extremely powerful. After appearing, a powerful wind force came out of nowhere and struck the flying ants.

Puchak!

Their bodies were torn apart by the wind blades. In the blink of an eye, a large number of Tier-7 Flying Ants were hit hard.

Some of them lost the ability to fly. Their wings were cut down.

The appearance of the two Tier-8 Lifeline beasts has deterred the remaining Tier-7 Flying Ants.

Roar!

The Red Lion King ignored the Tier-7 Flying Ants. But it roared at the ant beast colony. It can sense that a powerful ant-beast queen is living in the underground.

Neigh!

The Blue Wind Horse did the same. It felt the danger from the ant beast colony.

Enzo and Leonor felt the fear of their lifeline beast. Though they are Tier-8 Beast Tamers. The Tier-8 Corrupted Beast is extremely intelligent.

The Ant Beast Queen has strong survival ability. It won't be easy for them to eliminate. But they were thinking the same.

If the three of them were combined, then they could defeat the Tier-8 Ant Queen together.

Meanwhile,

The Ant Beast Queen senses the threat as well. It could sense four lifeforms at the same level as her. But she was not afraid.

She knows how to deal with the Human Beast Tamers. Because she was not in their territory. Instead, they have come to her territory.

Other corrupted beasts are living in the Inner Area. They just have temporarily retreated. But it doesn't mean that they don't know what's going on here.

The Tier-5 and above beasts are intelligent. Since the Human Beast Tamers are here. Their presence must have been felt by others.

The Ant Beast Queen is thinking that it would be a matter of time before other overlords arrive. When they come, the powerful human beast tamers won't have a chance to leave.

The city near the wilderness would be cleared out as well. Like the humans, the Corrupted Beasts wanted to expand as well.
