

## **STRIKER 511**

Chapter 511: Normalcy returns!

City A(10th Zone):

Gisela heard Jeremy's question. She has been thinking about it as well.

"We don't know what they are planning next?"

"Why don't you guys just focus on training?" Gisela said to them.

"If it were earlier, your strength is alright. But the situation has changed now. You guys need to increase your strength."

"In that way, Elder Harold won't look down on you," She added.

Hearing that everyone's face changes drastically. They seemed to realise that the organisation got another head all of a sudden.

Things can't go like the previous ways. They understood Leader Gisela's words and decided to work hard and focus on the training.

Jeremy Night sighed in relief. He was wondering about the Sun Wheel Organisation. Now Leader Gisela had given them legitimate reasons to increase their strength.

Even he encountered a new problem right now. He joined here because of the condition. A condition that he won't tell anything about his Lifeline beast.

Head Neil Moon accepted it. But he doesn't know how Head Harold will take it.

When the meeting ended. We walked out of the place. We three made a decision to increase our strength.

Then we parted ways. Jeremy returned to his room. He thought of his parents. Once things settle down. He decided to tell his parents.

---

Days goes by,

The situation returned to normal. The sudden change of Shadow Moon Organisation status didn't bring any changes to local life.

From outside the Shadow Moon Organisation appears to be normal. Since most of the members left. An internal change took place.

The criteria of recruiting people have changed. The Shadow Moon Organisation would first recruit people from the 5th Zone.

If the talents there were not enough then they would recruit in the 10th Zone. But these rules are for the next recruitment.

Not for the people who have decided to stay in the organisation. Many members were worried about Head Harold.

But he happens to be more carefree than the Head Neil Moon. Since two people can't stay in one place. Harold decided to stay in the 5th Zone.

He would only come for some important occasions. He has also recognised the members here. Especially, he valued the loyalty shown by the members.

He had promised them that there won't be any bias. Whether it's 5th Zone or 10th Zone member. They are members of the organisation first.

After joining there won't be any infighting, because of it the members relaxed. Slowly, everyone started to take missions.

Neil Moon was glad that this small turbulent period didn't affect anyone. That's why he had decided to merge with the Red Pill Chamber of Commerce.

Now he doesn't have to worry about hostile forces. As long as it's not forced from the top 3 zones, the new organisation will survive and thrive forward.

Meanwhile,

The Sun Wheel Organisation also returned to their normal activities. A Female Head was appointed by the Thorne Family.

She comes from the bloodline of the Thorne Family. Former Head Frank Doolin was reduced to her Assistant.

Frank Doolin is acting low key. He avoided mentioning the past grudges. At one point, he realised that Thorne Family people are not easy to fool.

They could guess that he is using their power and status. Not only that he learned about Neil Moon's friend. That person has an unusual identity, not worse than the Thorne Family.

So he decided to bury his grudge for now.

---

Room:

Jeremy Night is diligently training these days. Fortunately, no big changes have happened. So he focused on his training and yielded results.

So he touched the barrier for the next small stage barrier. Once he breaks the barrier he will reach the peak stage.

Today, he is going to attempt the breakthrough.

Buzz!

He received a message on his device. He checked it and saw that Leader Gisela summoned him. He didn't dare to ignore it.

Since the organisation has changed. He doesn't want to break the rules. He walks out of the training room and gets ready quickly.

About 10 minutes later,

He arrives before Leader Gisela's office. To his surprise, the other 2 members are here as well. It's been weeks since he saw Captain Sinag and Ada.

He found that they are stronger than before. Both of them are close to becoming Tier-4 Beast Tamers. He sighed inwardly.

He thinks that pressure has brought them to breakthrough.

Sinag and Ada are also observing Jeremy Night. Jeremy doesn't seem to be Tier-2 Beast Tamer to them.

"Come inside!" A female voice sounded all of a sudden.

Hearing that we collected our thoughts and entered inside. Team Leader Gisela is sitting behind the desk.

Compared to gloominess before, her complexion looks better now. The change in organisation brought change in her as well.

Jeremy suspects that Leader Gisela has grown her strength as well. He doesn't know what to say. The whole organisation is working hard.

We sat in our seats. Gisela's gaze sweeps three of them. Her eyes flashed with appreciation.

"All three of you have worked hard. You have gained progress in your strength," Gisela commented.

Sinag smile and said, "Leader, everyone is doing mission now. The Sun Wheel Organisation doesn't seem to be targeting us anymore. Can we start doing the mission?"

Hearing that Gisela smiled and said, "Looks like you have been collecting information."

"But you are right. There doesn't seem to be any problem. You guys can start doing the mission," She added.

She then said, "But I have summoned you guys for another reason."

After saying that she placed three small boxes on the table.

"It's the monthly resource given by the main branch. It's one of the natural energy strengthening pills," Gilsela said.

Gasp!

Ada sucked a cold breath of air. Even the faces of Sinag and Jeremy changed.

Jeremy was not a rookie anymore. He knows some information. One of the ways to increase your strength was to consume natural resources.

You can use the field area for that. Then you can find something special filled with rich natural energy. But there is another way which is to use pills.

Chapter 512: Tier -2, 5th Rank -Peak Stage!

Office:

"This pill is useful for Beast Tamers below Tier-5. If you are at the verge of a breakthrough. This pill helps you cross that barrier," Gisela said with a smile.

"The enormous energy in the pill is enough for both your lifeline beast and you," she added.

Sinag and Ada exchanged happy looks. Because they are at the verge of a breakthrough. Then they thanked Leader Gisela.

Jeremy was shocked inside. He has touched the barrier as well. But he decides to break through without using the pill first.

Then he thanked her as well. Because the pill comes from the 5th Zone. It shows that you can't buy easily here in the 10th Zone.

There are several first class forces here. You can't bypass them to buy from the store. He thinks that good things have started happening from the merger.

Then three of us collected the pills into our storage ring.

"Jeremy, do you want to go back to your family?" Gisela asked.

Jeremy shakes his head and said, "I had thought about it. I would like to return after becoming a Tier-3 Beast Tamer."

"Tier-3 uh, you will reach it in a couple of months," Gisela said.

Then we spoke for a few minutes before ending the meeting. Three of us then walked out and spoke for a few minutes.

Each of us shared the training progress. Jeremy congratulated both of them. Like he guessed earlier, they are going to become Tier-4 Beast Tamers.

The pill came as a timely help for them.

"Once we consolidated our strength after breakthrough. We can start doing the mission," Sinag said.

Ada agreed. Jeremy nodded to her as well. He has been crazy practising the Blade One Move. He wanted to try the move against the live target.

After parting ways, he returned to his room. He then enters the training room to start the breakthrough process.

He sat crosslegged on the ground and started running the inner healing method. Maybe the unknown beast egg understood his thoughts.

It started to suck the natural energy from the surroundings. His mouth curves into an arc. He was grateful that he got such a powerful lifeline beast egg.

For others they have to wait for their lifeline beast to reach the limit as well. Sometimes, the Beast Tamers reach the limit before their Lifeline beast.

It depends on the bloodline of the Beast. So they need external resources like the pill to help the lifeline beast reach the limit.

But for him it's not necessary. His lifetime beast is progressing faster than him. He is the one dragging the lifeline beast behind.

What more these breakthroughs are helping towards the unknown beast to hatch. So he can't evaluate his unknown beast egg with current common sense.

Time goes by,

The unknown beast egg stopped sucking the natural energy at one point. Then it started giving back the feedback energy.

Jeremy Night immediately sensed the feedback energy. He used the inner healing method to circulate inside the body.

As the feedback energy coursed through his body. The hungry cells are actively absorbing the feedback energy.

This process is leading to evolution. The feedback energy is going to every part of the body.

Click!

Tier-2, 5th Rank - Peak Stage!

At one point, the barrier was broken. The body reaches another evolution. The bones, tendons and inner organs are getting strengthened because of the new evolution.

Jeremy could feel his senses getting better. His normal eye sight has always been better because of his awakening talent.

Without including the eye ability, his normal eye sight becomes sharper. Though it's a small change. But it's powerful.

If he becomes Tier-3 Beast Tamer, then the changes will be big. But there are four more ranks left.

Time goes by,

He is using remaining feedback energy to consolidate. When the feedback energy dries out. He senses the changes inside.

Especially, he started from the mental zones. He checks the concentric circles representing Tiers.

The 2 Big circles are completely lit. The 2nd circle's sub-blocks have 5 bright and 4 full sub-blocks representing the rank.

He is confident that the remaining four sub-blocks will be bright soon.

Then he opened his eyes and saw small impurities covering the body. He stood up and exited the training room.

He enters the bathroom to take a shower. The bath lasted for 20 minutes. He then walked out of the bath and changed to comfort clothes.

He then thought of Sinag and Ada. He thinks they must have started the breakthrough process as well. Then he took out the device and started browsing online news.

----

5th Zone(City A):

Harold Red gave a new makeover to the building. Since it's a new organisation. He wanted the building to be new as well.

He is looking at the name board.

"Shadow Moon Chamber"

Harold is grinning happily. He causally glances at the passer by. He knew the old foxes must have sent spies to collect information.

But he didn't care. He is busy with something else. The business on the track. The news of the merger has given hope to people and clients.

They have started coming back to his store. Not only that he recruited some talents. He selected them after thorough screening.

Now he is going to focus on completing the orders of the big clients.

Meanwhile,

The rival forces are paying attention to the new developments. They disliked it. But they can't change the trend.

In any place, the presence of two Tier-8 Beast Tamers is not an ordinary thing. They are assets to the Human Alliance.

The forces would think twice before offending them for personal reasons. Not only that forces are not afraid of these developments.

Their business won't be affected by these changes. Yet they won't miss a chance if an opportunity presents itself to damage the new organisation.

Meanwhile,

The Thorne Family is one who is paying the most attention. Coincidentally, they have become rivals.

Every move of the Shadow Moon Chamber is important to them. If something happens to their Beast Tamer, they won't definitely remain silent.

The current peace is an illusion. All that is needed is a trigger to destroy the peace.

Chapter 513: Mission time!

City A (10th Zone):

A week later,

Jeremy, Sinag and Ada entered the wilderness for a mission. Three of them are not the same anymore. Both Sinag and Ada are now Tier-4 Beast Tamers.

They won't become a burden for Jeremy Night. At the same time, Jeremy Night broke through a week ago. He has been practising the Blade One Move.

His skills are sharper than before. Their current mission is to hunt down hybrid corrupted beasts. They got the news that their population has considerably increased.

After the Beast Invasion, not everyone entered the Wilderness to hunt. Especially the Mercenaries who are not from the Beast Taming Forces.

This period of less hunting has caused rapid growth of the hybrid beasts population. The hybrid beasts and common Corrupted beasts were found everywhere.

They are a hybrid of dog and wolf species. In rare cases, it could be a hybrid of other four legged creatures.

They are now heading towards the inner area. They are using the main path to walk. Three of them are in their new uniform.

Their emblem is new as well. It's a Red Moon Emblem. The passers- by are looking at them in a new light.

They recognised that they are from Shadow Moon Chamber. Not only the organisation does the business of Mercenary missions. It is involved in trade business as well.

Because of it, the tasks were covered in a wide range. There are escort missions as well. But those missions are for the Tier-5 Beast Tamers.

Three of them are chatting and laughing. At the same time, they kept their eyes on surroundings as well.

They could hear the conversations as well. Compared to before, the passer by people's eyes filled with new awe and surprise.

Because their current identity is different. The main branch of the organisation is located in the 5th Zone. They are from the second branch.

Jeremy sighed inwardly. He was worried that changes would be large. But nothing bad had happened.

Instead they got more benefits. Especially, the inner natural energy strengthening pill which he got as a monthly resource yet to be used.

There are other benefits as well. As long as someone shows promising talent. The organisation will invest in that Beast Tamer.

"Harumph, hereafter no one will target us," Sinag said with a smile.

"Are you talking about the Sun Wheel Organisation?" Ada asked.

"Yes, they won't trouble us either," She added.

She then notices Jeremy and asks, "Jeremy, what do you think?"

Hearing that Jeremy raised his eyebrows in surprise. He knows things aren't that simple.

"We can't judge people's hearts. Maybe both of our new organizations don't want to be hostile. But we can't say for sure that people won't fight," Jeremy said what's in his heart.

He knew people who were greedy for resources would attack anyone. So it's up to the higher ups to decide.

Sinag and Ada exchanged looks. Their eyes filled with surprise. They didn't think deeper like Jeremy Night.

A two hour later,

They got deeper into the inner area.

"Let's wait. The hybrid beasts last attacked the Beast tamers in this area," Sinag said.

She has done her homework. Ada and Jeremy nodded to her. Sinag Clark is still the Captain of their team.

Jeremy trusted her. It saves him trouble doing other work.

Ada said, "Jeremy, if we come across the hybrid beasts. Let us fight. We wanted to test our new strength. You can fight if necessary."

Hearing that, Sinag quickly added by saying, "She is right. Don't eliminate the beasts before we can fight them."

Jeremy smiled. He can understand the mood of the two seniors.

"Okay," he replied.

Because he wanted to try his new move as well. But his blade move is helpful against the Tier-5 Corrupted Beasts.

If he uses it against Tier-4 and lower tier Beasts, it would be over kill.

Ada and Sinag smiled. Both of the ladies had discussed it privately.

The three of them are standing inside the inner part of the wilderness. Their current area is the area of the dense forest with little space.

The tall trees and the dense plants stretch endlessly. The ground is covered with dry twigs and rotten leaves.

If the hybrid beasts appeared near them, then they could hear the sounds. That's why three of them are not moving away from the spot.

Jeremy is smelling the scent of the wet earth and mixture of other things. But there is no smell of blood.

He thinks there have been no incidents recently. Maybe they should go deeper.

Sinag and Ada are observing the surroundings. They are collecting information from their experiences. They have more experience than Jeremy Night.

Swoosh!

A green butterfly appears next to Sinag. It's her lifeline beast. The green butterfly made a sound before happily circling around Sinag.

Flutter!

Then she flew around Ada and Jeremy Night. The Green Butterfly recognises two of them.

Sinag told her lifeline beast to check whether there are any beasts around them.

Flutter!

After receiving the command, the green butterfly flies away from the spot.

Ada's eyes sparkled.

She said, "The Green Butterfly has become more beautiful than before."

Sinag smiled and replied, "Not only that, its sonic attack has become stronger as well."

"Wow!" Ada exclaimed in a surprise.

Jeremy shakes his head and starts using his eye ability. In this dense forest, the help of eye sight is crucial.

Because there is no large space. If there is any sudden danger, they don't have enough space to plan or attack.

Flutter!

On the other hand, the Green Butterfly is flying in the mid air above the ground at a safe distance. If any beast targets it, the Green butterfly will easily retreat.

The Green butterfly goes 200 metres away from the previous spot. There is open land with no trees and green cover.

The hybrid beasts are resting in that place. They are lying on top of each other. The numbers are more than 20.

The Green butterfly didn't go near that place. After circling in the air, it headed back towards Sinag Clark.

Chapter 514: Fighting against groups!

Inner Area(10th Zone):

Sinag Clark, Ada and Jeremy Night are monitoring the surroundings. Ada has brought her black bear lifeline beast outside.

The black beast can sense if there is any danger nearby.

Growl!

The black bear made a sound before starting observing the surroundings. Jeremy notices the bear.

The bear found his gaze and made a sound towards him in recognition. He smiled in response.

Ada notices the bear's reaction.

"What happened?" She asked the lifeline beast.

The lifeline beast made another sound to her. Only she could understand. Her eyes flashed with a surprise.

Both Sinag and Jeremy saw this scene. They are curious.

Ada then said, "Last time, my lifeline beast said Jeremy Night is strong. This time it's sensing more threats from you."

Jeremy Night raised his eyebrows in surprise. He recalled the last meeting. He thinks that the beast has sensed the power of an unknown beast egg.

"Not only you. My green butterfly says the same," Sinag uttered with a smile.

Flutter!

Next, the green butterfly comes back to them. It goes circling around Sinag while conveying the message.

"More than 20!"

Sinag uttered.

Ada and Jeremy Night heard her words. They are shocked. Jeremy didn't expect this many numbers.

He was expecting to find one group. But there are a couple of groups here.

Ada asked, "What happened?"

Sinag then said, "There are more than 20 hybrid beasts resting a hundred metres away."

Gasps!

Ada exclaimed in a surprise.

She then added by saying, "So, it's true that their population has grown. We easily encountered more than 20 beasts in one place."

Jeremy Night's heart stirred. Such an increase in population is not good for anyone.

If these hybrid beasts were to launch a beast invasion alone, it could become a dangerous situation for the city.

"Let's go. We should eliminate this threat," Jeremy said with a sense of urgency.

Ada and Sinag exchanged looks. They made a decision to fight against the hybrid beasts. Now the number of corrupted hybrid beasts are more in numbers.

They don't know if both of them can handle this. Moreover, they are worried about their lifeline beasts.

Green Butterfly and Black Bear are Tier-4 Lifeline Beasts right now. But it's difficult to say whether they can go against this many beasts.

Jeremy saw through their thoughts.

He said,"It's a serious problem. I will take care of the front. You guys support me from behind."

"Okay," Sinag replied.

Ada agreed as well.

Flutter!

Sinag then told the Green butterfly to lead the way.

The Green Butterfly made a sound before leaving the way forward.

Growl!

The Black bear made a sound. It started following the Green butterfly. Both of them fought many battles together.

Together they become Tier-4 Beasts as well.

Swoosh!

Next, three of them started following the beasts from behind. They are moving through the green forests.

It didn't take long for them to swiftly arrive at the place. Their arrival alerted the corrupted beasts as well.

Roar!

One after another the hybrid beasts roared out loud. They are between Tier-3 to Tier-4 Beasts.

Jeremy immediately found out that there was no Tier-5 Aura. He was disappointed. But Sinag and Ada sighed in relief.

They were worried that their lifeline beast would be in danger if there are Tier-5 Corrupted beasts here.

Roar!

The hybrid beasts started charging towards them. Their eyes completely turned red. They are showing their sharp teeth to tear down the enemy.

Swoosh!

Jeremy unsheathed his blade. The beasts are targeting each one of them.

"You guys fight as a team. I'll take care of the rest," Jeremy uttered.

"Take care!"

Sinag said.

Then she orders her green butterfly to take the charge.

Boom!

The Green butterfly releases the sound attack targeting the beast coming towards Sinag.

The sound attack reaches the target in the blink of an eye. It shattered the ear drums and brain of the Tier-3 Beats instantly.

Puchak!

The beast falls dead on the ground the next moment.

"You attack too," Ada said to her Lifeline beast.

Roar!

The Black Beast let out a roar before charging towards the coming beast. Its huge paw smashes the beast's head.

Growl!

The Tier-3 Hybrid beast body flew sideways before crashing into the ground.

The 2 lifeline beasts are dealing effortlessly against the Tier-3 beasts.

Pfff!

Jeremy casually swings the blade and severs the head of the beast. The Tier-3 Hybrid Beasts who took the first charge are all dead right now.

Roar!

The Tier-4 and remaining Tier-3 Hybrid Beasts enraged. They became even more mad. The whole group started dashing towards it at the same time.

Swoosh!

Jeremy moves in front of the 2 girls next second. Then all the hybrid beasts started coming towards him.

He immediately coated the rust blade with starlight liquid. The blade was covered in starlight liquid in a flash.

He didn't have to use blade one move. He is using the eye ability to predict the movements.

Pfff!

A Tier-3 Hybrid Beast leaped forward. The second beast is still charging towards him.

He quickly adjusted his body before making a slash.

Slash!

The starlight blade goes through the abdomen of the first beast. A clear red line appears.

Then he faced the second beast before stabbing the blade on the neck.

The second beast senses the danger. But it's too late to move.

Puchak!

The blade went through its neck like butter. When he draws the blade. It leaves behind a hole. A torrent of blood gushes forth from the neck.

Tud!

Both the beasts fell down to the ground. They weren't killed in the first strike. But facing this many beasts. He focused on causing fatal injuries first.

Sinag and Ada saw the whole scene. They saw how Jeremy Night moved before taking down the beasts precisely. They found that the timing was perfect.

Flutter!

The Green butterfly is using the sonic attack from the air. The Tier-3 Hybrid beasts are dying first.

Roar!

The Black Bear is fiercely taking down the hybrid beasts. The Tier-3 Hybrid beasts are fatally injured and dead from its attack.

More than 10 dead beasts lay around them within minutes.

Chapter 515: Unexpected disaster!

Wilderness (10th Zone)

Roar!

The Tier-4 Hybrid beasts let out a fierce roar. They turned towards Jeremy Night and found him as the immediate danger. They are charging towards him to eliminate the threat.

Swoosh!

They look menacing with their bloodshot eyes. If it were lower tier beast tamers, they would have bit them into pieces.

Now, Jeremy Night killed their Tier-3 members. All the Tier-4 Hybrid beasts are charging towards Jeremy Night.

Puchak!

Jeremy remained unfazed. He continues to cut down the beast coming across his path.

Time goes by,

The trio effortlessly dealt with the hybrid beasts group here. The Green Butterfly and the Black Bear were exhausted.

But they didn't suffer any injuries. It's because of Jeremy Night, they didn't have to face Tier-4 Hybrid beasts. Otherwise, they could be wounded.

Sinag and Ada took back their Lifeline beast into their mental zone. They were tired out as well. They didn't have much experience of facing this many beasts before.

"Jeremy thanks again," Sinag said in a serious tone.

"Yeah, if not for you we would have suffered," Ada added.

Both of them discussed earlier to fight against all the hybrid beasts. But the situation here forced Jeremy Night to take most of the action.

"It's okay, let's go back. If we come across any other groups we can eliminate them," Jeremy Night uttered.

A quick gleam appeared in his eyes.

He thinks that it's one of the groups they encountered. He fears that there could be a much stronger group somewhere else.

The trio then started walking back. They had to go through the dense cover of forest again. Once they walk out of the place, they will see the flat land.

Time goes by,

Jeremy is using eye ability to stay vigilant. The two girls are leading forward. But they didn't know Jeremy Night is using eye ability right now.

Roar!

All of a sudden. A terrific roaring sounded across the forests. It doesn't sound like the sound of low tier beasts.

"What's this sound?" Ada blurted out in a surprise.

"Could it be a Tier -5 Beast?" Sinag uttered.

Jeremy's eyes glinted with seriousness. He had faced Tier-5 beasts before. So he knew this was not the sound of the Tier-5 beasts but much more terrifying than that.

"This place is not safe. We should head back," Jeremy said.

Hearing that Sinag and Ada agreed. They dropped the matter of the hybrid beasts and started going back.

Meanwhile,

A 15ft Tier-6 Tree Ape from the core area has come to the inner area. The condition of the Tree Ape was not good. It has suffered serious injuries all over its body.

It urgently needs a place to recuperate. At the same time, the other beasts living in the inner area are fleeing from the spot.

Especially, the Tier-5 and Tier-4 Beasts are running away from the place. They are spreading to other inner areas. This situation is quite dangerous.

Not very often, the core area beast comes to the inner area to hide. But it happened now.

The situation has become dangerous for not only low tier beasts. But for Beast Tamers as well. If the Beast Tamers find themselves crossing roads with the Tier-4 and Tier-5 Corrupted Beasts.

Then casualty could happen.

On the other hand, Jeremy is leading the group back. He doesn't want to waste time. Sinag and Ada trusted Jeremy Night. So they started following him from behind.

They have finally entered completely flat land. Their movement speed was better than before. They are hoping to get out of the inner area as soon as possible.

But things didn't go as planned. Jeremy quickly spotted the many beasts running in their direction. He could discern whether it's a Tier-3 or Tier-4 Corrupted Beasts.

But the number of Corrupted beasts coming in their direction are large in numbers. Jeremy felt the sense of crisis. If he tells them they would be scared.

He doesn't know what to do right now. He paused his footsteps. If he continues to run with others, then they would definitely cross paths with this horde.

"Jeremy, what happened?" Sinag asked.

They could tell something was wrong.

Jeremy looks at them. He doesn't know what to do next. He then casually looks around. Then he spotted a lone mountain rock with dangerous slopes. But his gaze fell at the bottom.

There is a cave opening at the bottom. The mouth of the cave is almost at the height of the tree. That's why he was able to spot from this distance.

"Follow me!"

Jeremy said to them.

Sinag and Ada started following him. As they are approaching the lone massive rock. They could feel the tremor in the ground.

Sinag and Ada's expressions change drastically. They both turned around and saw a large number of beast hordes coming in their direction.

Their expression turned pale with fright. They understood now. Jeremy Night is leading them towards the cave opening.

Jeremy saw the approaching horde. But they are closer to the mountain rock. Three of them increased their speed.

Swoosh!

They quickly arrived at the base of the mountain rock. Jeremy uses his eye ability to observe the place. He didn't see anything dangerous.

"Green Butterflies can help," Sinag said.

"We don't have time for that. Let's go inside," Jeremy said.

Then three of them walked into the cave. Jeremy unsheathed the blade and started using it to remove the overgrown weeds.

Sinag and Ada are observing the place.

While doing that Jeremy finds another small cave opening inside the cave. He quickly tells Sinag and Ada. Three of them entered the small space to hide.

They blocked the small entrance with the small rocks.

At the same time, the beast horde running away from the Tier-6 Tree Ape reaches the place. Most of the beasts continued running bypassing the cave structure.

Only a few beasts which are injured and low tier choose to enter the cave. They entered the cave one after another.

Jeremy Night, Sinag and Ada felt the tremor. Their expressions were grave. They don't know whether Tier-5 Beasts have entered the place.

Chapter 516: Part 1: New changes

Wilderness:

The Tree Ape found a safe place and was hiding to recuperate. But it was responsible for the beast horde. Many beast taming teams found themselves trapped.

They had no choice other than to fight. But the number of beasts is large. They are overwhelming in numbers. So casualties started to appear.

Meanwhile,

Jeremy, Sinag and Ada are inside the small cave passage. They have covered the entrance with rocks. So far the beasts didn't find anything wrong.

Because they are restless and panicking. If the Tier-6 Beast had normally been present, it wouldn't have caused this much commotion.

But it's escaping from the core area with injuries alarmed the beasts with intelligence. All the higher tier beasts have human-like intelligence.

So they sensed the threat and escaped from the place.

Jeremy calmed down his heart. He is hoping that these beasts will vacate the cave structure soon. So that they can return to the city.

The wilderness always brings unexpected surprises. But this time it was an unexpected disaster. If they had caught in between a beast horde, he didn't know what would have happened.

The 2 girls have become silent. Sinag and Ada understood the gravity of the situation. Earlier, they took up the mission to reduce the hybrid beasts population.

Now, they fear it could become a rescue mission. Three of them looked at each other. They spoke with gestures. Three of them had tactic understanding.

Time passed,

The night time comes. There is no illumination whatsoever. If the trio makes a fire, then they could alert the beasts.

So far most of the beasts had left the place. Because they need food. They can only get it by hunting. Those with groups had left. Now, few other beasts remain.

Surprisingly, they didn't fight among themselves. Otherwise, the cave structure would have collapsed.

---

Shadow Moon Chamber:

Gisela heard about the recent changes in the wilderness. She found out that Tier-6 Beast from the core area caused a beast horde.

As a result there are reported injuries and casualty. She started to worry about her members. After the mass resignation incident, only less than 8 people are in her team.

It includes, Jeremy Night, Sinag and Ada. She started worrying about them. If it were an ordinary incident, she wouldn't mind. She believes in Jeremy's combat strength.

Even if they encounter Tier-5 beasts they are smart enough to escape from the beasts. But the Tier-6 and above beasts are different.

They can easily cause havoc. The appearance of the Tier-6 Beast has caused a horde of beasts. If it truly went on a rampage, what would happen.

She also finds that whenever Jeremy enters the wilderness something interesting happens. She thinks it's because they are exploring a dangerous place.

If they had explored normal places like other teams, then their situation would be normal.

She then reported the news to Head Neil Moon.

Neil Moon is still the head of the building here. His friend is heading the organisation there in the 5th Zone. Things have been going well. There are some minor hindrances. But they are not major obstacles.

When he heard about the teams stuck in the wilderness. He raises his eyebrows. As a veteran Tier-8 Beast Tamer, he is most concerned about the situation in the core area.

If the core area was not calm, they wouldn't be calm as well. Now he wonders why Tier-6 Tree Ape fled the core area. The core area is actually vast. It is many times more vast than the city.

So it had plenty of places to hide. Yet it had come to the inner area. He furrowed his eyebrows. Since it's a troublesome thing. He decides to call the City Governor Marcos.

Soon, the City Governor Marcos attended the call. He heard from Neil Moon. He was not surprised. He came to the same reasoning as the Head Neil Moon.

There is something happening in the core area which they aren't aware of. City Governor Marcos decided to send a team of Tier-7 Beast Tamers.

Even if they come across Tier-8 Corrupted beasts, the team can escape from the situation. Head Neil Moon relaxed a lot.

Since Marcos is sending a team to find out the cause. He will know the answers soon.

20 minutes later,

A six member team entered the wilderness. The six people are veterans, Tier-7 Beast Tamers. They know the purpose of the mission.

They are going to the border connecting to the core area.

Meanwhile,

All the Beast Taming Forces in the city are paying attention. Including the Central University 10 and Beast Taming Association here.

The core area's existence is a hidden danger to the city and its people. So the core area needed continuous monitoring. They can't move the city or the core area.

Unless it's a terrible conclusion, they won't abandon the City. Every zone is under the control of the Human Alliance. They needed to know every change in the wilderness.

After the Beast Invasion, City Governors had become proactive. Marcos immediately reported the changes to the Human Alliance.

Though the problem appears to be small. He decided to report. Last time, the presence of the Two Ant Queen Beasts caught them off guard.

If not for the Lords from the Human Alliance, the city would have been buried. He doesn't want to see another situation like that.

On the other hand, the news media started reporting about the changes. Even the City Governors and organisations wanted to stop it. They couldn't do it.

Because many beast taming teams are stuck in the wilderness. So the information is impossible to hide.

The locals started panicking. They are just trying to come out from their recent trauma. Now this news is a nightmare for many people.

Especially to the families who lost their loved one. Marcos released a statement saying that he sent a team to find the reason.

So he assured people not to panic. Once the situation is found to be normal, then the Beast Tamers who are trapped will be rescued.

This timely statement has calmed many people's hearts.

Chapter 517: Part 2: New changes

Wilderness:

At midnight, none of them were sleeping inside the small cave passage. From time to time, they are hearing the noises from the Corrupted beasts.

Jeremy's eyes glinted with understanding. He is not going to let down his guard. He was aware of the dangers. At any time, the corrupted beasts could find them out.

So he has to be ready to face the crisis. Sinag and Ada are trying to be fully awake. If they wanted they could summon their Lifeline beasts to guard.

But doing so would definitely alert the corrupted beasts resting on the other side.

Don't know what happened. A Tier-5 Wind Leopard about twice the height of a human adult is currently resting on the other side. Compared to other beasts it was slightly injured.

Currently, it's not bothered with other lower tier beasts. The other beasts also noticed that the wind leopard was injured. So they kept their distance from it.

If it were ordinary times, they would have become a snack for it. Right now, the wind leopard is recuperating. While doing that it sniffs from time to time.

The scent of mixture is attacking its nostrils. It's making it uncomfortable. It also smelled the disgusting scent of humans. But it saw no humans inside the cave.

The Wind Leopard didn't take it seriously and continued to rest.

Time goes by,

The lower tier beasts have started leaving the cave structure. It's been several hours since the commotion occurred.

All the big tier beasts had left the cave. The lower ones are leaving now. The Wind Leopard saw this scene. But it didn't react.

As the time passed, the number of beasts in the cave decreased to single digits. It didn't take long for all the beasts to leave. Now the Wind Leopard alone is resting inside the cave.

The Wind Leopard suffered leg injury. Because of it, its speed has reduced. If it tries to move without rest, then the injury could be worse.

But the Wind Leopard is starting to get hungry. It's now regretting that it didn't kill the lower tier beast when there was opportunity earlier.

If it wants to eat, then it has to go outside to hunt. The situation angers the beast.

Sniff!

The Wind Leopard once again caught the smell of the humans. The Leopard's eyes sparkled. It is suspected that humans could have approached the cave.

If it was careful, then it could hunt down the humans to eat. The Wind Leopard slowly stands up. A white layer of skin covered its body with dark circle spots everywhere.

The teeth of leopards are as sharp as blades. The two 10 inch canine beast teeth on both sides of the jaw are especially deadly. All it needs is one bit to kill the enemy.

It doesn't matter whether it's a human or corrupted beasts. The bite would definitely lead to death.

The Wind Leopard stands up. It has red eyes distinct to the corrupted beasts. It would become bloodthirsty whenever possible.

Once taken over by the blood instinct the beast would become more dangerous.

The Wind Leopard starts walking back and forth inside the cave. It slowly walks out of the cave entrance. It didn't see any humans nearby.

But the scent of humans was still lingering. The smell has never been wrong. The Wind Leopard suspects the humans could be hiding.

It slowly exits the cave passage and decides to go around the cave. Just as the beast walks away from the cave, the scent of humans is gone.

The Wind Leopard was confused. It's a Tier-5 Beast. No clues hidden from its nose. Then it walked back and started to follow the scent of the humans.

The scent once again leads the Wind Leopard back to the cave passage. Upon entering inside the Wind Leopard becomes serious.

It's the same as the earlier. The scent of humans is still lingering inside the passage. Right now, it's standing in front of a pile of rocks.

The Wind Leopard casually lowers its head towards the rocks.

Sniff!

The scent of humans has become strong. The Wind Leopard understood something.

Roar!

It let out a thunderous roar. The sound alone shakes the cave structure. The small stones are falling from the top.

On the other hand, Jeremy, Sinag and Ada are ready to battle. The time has come. They understood that some beast had found them.

Sinag and Ada are clueless about it. But Jeremy Night has found a clue already. He noticed the departure of some beasts earlier.

He thinks that the cave must have gained space. Their human scent is impossible to hide from the beast. He unsheathed his blade and gripped it tightly.

Tud!

The Wind Leopard is removing the rocks one by one. With human-like intelligence, the Tier-5 Beast found something behind the pile of rocks.

As it started to remove the boulders the scent of humans increased. The Wind Leopard was convinced. It was already suffering from hunger.

The scent of humans makes it more bloodthirsty.

Tud!

As time went by, one after another the boulders were removed. The passage to the other side becomes visible. The figure of humans can be seen from this side.

Roar!

The Wind Leopard let out a small roar. It spotted the humans as well. It removes the boulders with the deadly claws.

When the final boulder was removed. The Tier-5 Wind Leopard was ready to charge inside.

Swoosh!

Yet it meets with the sharp blade. The Wind Leopard quickly shifted its body. Yet it's too late. The starlight filled rust blade stabs the beast shoulder.

Pfff!

Blood sprayed on the ground. The Wind Leopard was already injured to begin with. Now the blade has stabbed its shoulder.

Jeremy Night withdrew the blade. He aimed for the head. Yet the beast showed a fast response.

"Wind Leopard!"

Sinag cried from behind.

Hearing that he squinted his eyes. He was unsure of the beasts earlier. Now it's a Wind Leopard. Jeremy thinks it's going to be a tough battle.

"Careful!"

"The Wind Leopard possesses wind abilities," Ada added from behind.

Jeremy knows about it as well. Some of the Corrupted beasts have ability. They have met such a beast today.

Chapter 518: Rare Wind Leopard

Wilderness:

The Wind Leopard enraged. It didn't expect to suffer an injury on the shoulder. Before it could think of the next thing. The human tried to attack him again.

Swoosh!

The wind leopard retreated the next second. Then it stopped and looked at the humans.

By using the opportunity, Jeremy is dashing out while slashing at the beast.

The starlight filled rust blade once again reaches the target. This time the wind leopard was paying attention. It's easily shifted.

Boom!

The blade missed the target. Jeremy is using his eye ability. He sees the beast's leg was actually injured. Yet it was able to evade his attack.

"This Tier-5 Beast was not ordinary," he thought.

Sinag and Ada stepped out as well. They stood behind Jeremy Night. They have dreadful feelings. They have never seen such a big Tier-5 beast before.

The canine teeth of the big leopard can easily take their life. Just one bit was needed.

Jeremy notices them. He said, "Stay behind. Don't bring your Lifeline beast outside."

He knows that Green Butterfly and Black Bear will be injured easily.

Roar!

The Wind Leopard roars at them. This time a fierce wind attack shot from its mouth. The wind attack contains invisible blades.

Boom!

The trio are in their clothes. They are not wearing any armour suit. It's deadly to face the wind directly.

"Evade!"

Jeremy shouted. Three of them moved to the edge of the cave. The wind attack strikes the ground.

Boom!

A loud sound occurred. The dust and smoke covered the place.

Jeremy Night felt the seriousness. He sheathed his blade and took his hand gun. Before the dust could go, he covered the bullets with the starlight energy.

Since the beast was already injured. The only way he could force the beast to leave was to harm its legs again.

He uses his eye ability to aim. He didn't wait for the dust to settle. He could see with his powerful eye sight.

He aims at the Beast's hind legs. Then he pulls the trigger one after another.

Bang!

The shooting occurs. The starlight bullets are fired at its legs. The bullet goes through the target in a shot. The starlight power easily left the hole in its leg.

Roar!

The Wind Leopard let out a painful roar. It didn't expect to suffer the leg injury again. This time the human attacked it from a distance.

The beast realises the weakness. Before it could attack.

Bang! Bang!

The fire shots rang continuously. In quick succession, the front legs were shot. Blood is gushing from the wound.

Pfff!

The Wind Leopard finally felt the fear. The Tier-5 Beast decided to give up. The next second, it fled from the cave.

The Wind Leopard was intelligent. Earlier, it was confident to take down the humans. But the human with long range ability caught it off guard.

Now, all of the legs were injured. It needs to find a place to recuperate again.

The dust settled. Jeremy puts back the gun in the case. He checks out the place again. Seeing that there was no threat. He sighed in relief.

"Phew!"

Sinag and Ada heaved a sigh of relief as well. They were worried that Wind Leopard would fight with them to death.

When they saw the wind attack marks on the ground.

Gasp!

Both of them sucked cold breath of air. Multiple one inch deep cuts were seen on the ground. If the attack were to land on their body, they would have been shredded into pieces.

Jeremy notices the cuts on the ground. His eyes flashed with seriousness.

"The corrupted beasts with abilities are terrifying," He said to them.

"You don't have idea. Once upon a time there are many corrupted beasts with abilities. Because of their threats, the beast taming forces took the decision to eradicate them."

"What you see are the remnants," Sinag said in a serious tone.

"If the beasts have the ability to attack our city, then we would have less of a chance to win," Ada said from the side.

"Fortunately, they were cleared out a long time ago. This Wind Leopard was a rare sight," She added.

"Let's wait here till the sunrise. We will leave early in the morning," Jeremy said to them.

Sinag and Ada agreed. None of them want to run into other terrifying beasts.

They stay inside the cave structure.

Time goes by,

The next morning comes. The trio left the cave structure and started their return journey to the city.

On the way, they have kept their eyes on the surroundings. One thing is to watch out for the corrupted beasts.

Another thing is to look for beast taming teams. The beast horde appeared all of a sudden yesterday. The Beast Taming Teams could have found themselves in trouble.

If they need rescue, then they have to help them. But so far they saw no one on their path. They continued to walk on their feet.

Jeremy is using eye ability to cover a large distance. He is getting more information about the terrain than others.

He doesn't know the reason behind the beast horde. He thinks they will know after getting back to the city.

Several hours later,

They returned to the main path to the city. They are in the Outer Area right now. Soon they will reach the city.

On the way, they saw a few teams in bruised state returning as well. They must have encountered some trouble. Only the trio are looking better.

Which attracted the attention of the Beast Tamers as well. Their hostility reduced upon seeing their red moon badge.

They don't dare to offend forces of their level. None of the teams spoke to each other. Soon, they started to see the outline of the city wall.

About 20 minutes later,

They took a cab to reach the organisation back. The trio were totally exhausted. If not for Jeremy Night's quick thinking and shooting ability, they wouldn't have returned in one piece.

Upon entering the building, they parted ways. They decided to submit the mission report later. Everyone needs a good sleep right now.

Chapter 519: Appreciation!

Shadow Moon Chamber:

When Gisela came to her office. She was notified by the staff that Jeremy, Sinag and Ada returned safely. Hearing that she sighed in relief.

She understood that they might be taking a rest. So she reported to Head Neil Moon next. Head Neil was relieved as well. But he was curious why it took them so long.

Gisela told him that she would give a report after speaking to them. They must have faced challenges. She decided to hear from them later.

Time goes by,

The Beast Tamers who were all trapped inside are getting out one by one. It's because the six member team found the teams trapped in the inner area.

They failed to find the reason. Instead of wasting time at the border, they have started rescuing people. After searching for the entire night, they found a couple of groups.

After rescuing them, they resumed their search in the morning.

As the people started coming back to the city, the tension among the locals reduced. The Beast Taming Forces relaxed as well. They don't want another Beast Invasion to happen.

City Governor Marcos is keeping an eye on the updates. He has also been reporting to the Human Alliance.

Knowing the changes in the wilderness, the higher ups in the Human Alliance became cautious.

They were ready to dispatch the level-9 Beast Tamers as well. Before sending them they wanted to confirm the situation.

Marcos reported that Beast Tamers are coming back safely. The higher ups of the Human Alliance asked for further reports.

Marcos then asked Enzo and Leonor to do the investigation. They wanted to know what happened from the victims. The 2 City Governors left the office a few minutes later.

One hour later,

Marcos got the first report. He went through the report and understood that a dangerous beasts horde occurred all of a sudden.

The beasts are in particular fleeing from the border area. They are not controlled by powerful beasts. Instead, they had fled in fear.

Marcos was surprised. In most cases, there is a higher tier beast which commands the lower tier beasts. In the beasts horde, nothing like that happened.

If they had fled from one direction, then something must have forced them to do so. Apart from the beast's living core area, nothing can scare the beasts.

He is now looking forward to reports of the Special Team. He is hoping for them to find something concrete.

But he didn't know that a special team was involved in the search and rescue instead of the investigation.

---

Time goes by,

In the evening, Jeremy stepped out of the room. He is going to meet Leader Gisela. She had already sent a message a couple of hours ago.

She wanted them to meet her after the rest. He then started heading towards her office. On the way, he texted Sinag and Ada as well.

On the other hand, Sinag and Ada left their room. They are heading to the leader 's office as well.

Soon, they arrived in front of Leader Gisela's office.

Then they asked for her permission. She allowed them to enter.

Creak!

The door opens. Then the trio walked into the room. Leader Gisela is sitting in her chair. She asked them to take their seats.

When three of them sat and felt comfortable. She began to ask about the changes in the wilderness. Sinag and Ada both looked at Jeremy Night.

Hearing that Jeremy Night decided to speak. He then turned towards Leader Gisela and began to recount things to her. Especially from the challenges in their mission.

At first Gisela was calm. But when she heard about more than 20 Hybrid dog beasts. She was surprised. Then Jeremy continues to tell her.

When he said about the sudden beast horde. Her gaze turned solemn. He then told about the cave hideout and their later encounter with Tier-5 Wind Leopard.

Finally, he said that they waited till the sunrise to leave.

"Tier-5 Wind Leopard!"

"To think you spotted a rare beast. It's really shocking. If the Wind Leopard wasn't injured, then the situation would have become dangerous," Gisela said in a solemn tone.

After that extermination mission, it's not easy to encounter a beast with abilities. Some of them fled to the core area to survive.

But that's not the problem here. The beast horde was caused by some other reason. She then collected her thoughts and looked at them.

"You guys did a good job. The Wind Leopard can fight with Tier-6 Beast with their abilities. You guys did well in instilling fear in it," She appreciated them.

Both Sinag and Ada are Tier-4 Beast Tamers now. She thinks this trip was a good experience for them.

Jeremy is thinking about the hybrid beasts. He thinks the growing population of the hybrid beast is going to be a huge problem sooner or later.

"Jeremy, did you consume the inner strengthening pill?" Gisela asked.

Jeremy shakes his head. He is planning to use it during the next breakthrough attempt.

"I'm going to use it during the next breakthrough," Jeremy said to them.

Hearing that Gisela was not surprised. She knows that Jeremy Night is very much focused on his training.

"Okay, guys. You can go back. If there is any suitable mission, I'll inform you guys," Gisela said with a smile.

She was impressed with their mission this time. If a similar mission appears she will recommend it to them.

Jeremy, Sinag and Ada stood up to leave. They walked out of the office room.

"This mission gave us an amazing experience. I hope we will have similar experiences in future," Sinag said.

"Thanks to Jeremy. Otherwise, we would find it difficult to escape," Ada added.

Jeremy heard the words. He shakes his head. He decided to head back. Then he bid goodbye to them before going towards the room.

He is going to practise hard. So the next couple of days are going to be busy.

Soon, he returns to his room. He locked the door. Then he went straight to the training room to practise.

Chapter 520: Tier-2, 6th Rank - Early Stage!

Mighty Order:

Somewhere at a large underground facility. Several big shots have gathered here. It's rare for big people to gather here in one place. Because the situation is quite dire.

They are discussing the recent losses suffered by the organisation. Most of the zones are facing the problems from the Corrupted beasts.

Their attacks have increased in recent years. Even the Human Alliance were looking for an opportunity to expand the human populace.

Once they built another human zone. Then they can shift the people to that place and abandon the unsafe zone.

While this was going on. The illegal organisations have suffered the most. They can't do their business openly. The Human Alliance knew of their existence.

It's because of their founder and a few other people who were Tier-9 Beast Tamers.

The Human Alliance is not ready to tear faces with them. So they have been doing things low key.

Right now they have gathered here to resume their business. Due to beast attacks in some cities. They had stopped their operations temporarily.

Most of the business includes the trafficking of the corrupted beasts. Including their blood, inner organs and cubs for research.

Sometimes their actions have indirectly led to the beast attacks on several cities.

The City Governors of those cities knew it. But they can't do anything to them. The name of the "Mighty Order" instilled fear in them. Only the Human Alliance can do something about them.

These big shots have decided to resume their work. They are discussing which zone to start from. Mostly, the zones with core areas of the wilderness areas are important.

The blood of the higher tier beasts are a valuable resource. The rich and sick people especially buy it in astronomical amounts.

Even some dying Tier-8 and Tier-9 Beast Tamers put their luck on higher tier beast bloods.

Such consumption has led to fatalities most of the time. But rarely few people have managed to improve their condition.

During their discussion the name of the 10th Zone came up. The 10th zone has a core area. But they have faced a beast invasion recently.

Some of the big shots opposed it. But others decided to take risks. If they take risks to achieve things then their losses can be reversed. They might earn huge profits.

But the people who were opposing were not blind. Any mishap could trigger beast invasion. Last time, their teams tried to poach higher tier beast eggs from the core area.

But their activities were exposed. The city officials destroyed their tunnel. Some of their men died in the mission as well.

No one will tolerate such activities after the beast invasion.

If the Human Alliance learned about it then they would definitely destroy their strong holds. They won't think about the Tier-9 Higher ups.

The fierce arguments were made. In the end, the large number of people have decided to resume their operations in the 10th Zone.

They needed blood, inner organs and other treasures from the core area of the wilderness. They have decided to send their special teams to carry out the tasks.

Once the task was completed. They will use their own ways to smuggle these items.

Days passed,

Several new faces landed at the airport of 10th Zone City A. These new faces have come to carry out the illegal operations.

Most of them are Tier-5, 9th Rank Beast Tamers. The lowest member is Tier-4, 9th Rank Beast Tamer.

Undoubtedly, they are strong members. But they are not only a team. Many more teams yet to come. Since they are going to do their operations in the core area.

They will definitely come across Tier-6 and above beasts. Even this powerful beast taming team is not strong against the Tier-6 Corrupted Beasts.

Since they are doing illegal activities. They have to do it low key. If the Beast Tamers above Tier-5 start to appear, it will alarm the City Governors.

Then they will definitely pay attention to their whereabouts. They don't want such a thing to happen.

The team silently exited the airport and entered the city. In the coming days more and more people will appear.

The City A is facing another crisis. But nobody knows about it.

---

Shadow Moon Chamber:

Inside the training room, Jeremy took the inner strengthening pill from the wooden box. Looking at the pill, his eyes flashed with a quick gleam.

The breakthrough opportunity has come. But it was a little bit later than he had expected. The cells are not absorbing the natural energy faster anymore.

He then swallowed the inner strengthening pill and closed his eyes. Something different happens next second.

The inner strengthening pill energy is being sucked by the unknown beast egg. In the blink of an eye, the unknown beast egg has fully consumed the energy.

His eyes flashed with a surprise. He had never thought of an unknown beast egg to take liking to the inner strengthening pill.

The inner strengthening pill is the product of the 5th Zone. It must have been made using expensive herbs.

Click!

Not long after, the unknown beast egg breakthroughs. Then it started to give back the feedback energy.

When the feedback energy appeared in his body. He started to circulate the feedback energy. The feedback back energy goes in his body.

On the way the cells are absorbing the feedback energy like the hungry wolf. He could feel the unknown barrier being tested.

Once the barrier is broken. He will reach the next stage.

Click!

Tier-2, 6th Rank -Early Stage!

The barrier was broken a few minutes later. Like the floodgates opened. The natural energy is gathering towards the body like a torrent.

They started entering the body. Jeremy is using the inner healing method to circulate. The remaining feedback energy dried out.

The cells are now absorbing the natural energy. Jeremy could perceive the small changes in the body. His senses have become further sharper.

His eyesight has improved as well. Not only that, muscle bones, tendons and inner organs have strengthened. His muscles have become well toned.

He also saw the blood moving like a crimson stream inside the body. He is stronger than before.
