

STRIKER: INDEPENDENT BEAST TAMER

Chapter 8 Hunt

The following day,

The news of awakened students and their backgrounds leaked. Apart from Jeremy Night, the heirs of the Ross and Glass Family have awakened their talent as well.

The Ross Family's child and the Glass Family's child awakened a B-level Talent. Both families were happy with the result.

They weren't intimidated by Night Family Child's A-level Talent. Because these 2 Families have more than one descendant, they were not worried.

Their Family foundation is stable.

Meanwhile,

The High School administrators in City C are preparing for promotion.

Principal Hubert is in touch with Central 14 and Neptune University's representatives.

They want Jeremy Night to join their University. Because he was the only one in City C who had awakened A-level Talent.

Principal Hubert gets caught in the middle. He needs the support of both the University. Central University 14 attracts top-level talent.

Neptune University attracts the Medium Level Talents and below. Already, some students have agreed to join Neptune University.

Hubert is going to contact the Night Family. He knew that the Night Family asked for some time to make a decision. But he wanted to remain updated.

...

Night Family,

Jeremy Night steps out of his room after getting ready. He has decided to go out of the city to hunt the corrupted beasts. He wore a black suit. After the awakening ceremony, he has become sharper. His Physique has become well-toned.

While doing some stretching and push-ups. He felt the new profound strength coming from his muscles.

When he reaches the Hall. He spotted his mother coming from the kitchen.

"Jeremy, are you going somewhere?" Nora asked.

Jeremy immediately tells her about his decision. Nora Night agreed. She knows that her son likes to go outside to hunt.

But she has to make sure to arrange a team of guards. Ron Night has gone to the City Office. His son's successful awakening has reduced a lot of stress for him.

His position as the City Governor is now stable. Besides, his son has agreed to join Central University. But he has not informed the representative, Kim, yet.

In his office, he leaned back in his chair, relaxed.

After stepping out of the mansion, Jeremy joins the Guards. Then they left the Night Family Estate by using the flying armoured car.

A few minutes later,

As they reach the bustling area of the city. There are a lot of flying cars zooming through the air. Jeremy stared out of the window.

He sees a different flying car with different shapes and sizes. There are rare supermodels and custom-made flying cars. Yet they are flying across in formation without causing much noise.

The City C is quite large. The city stretched below the skyscrapers. So much so the huge city requires three City Governors to govern.

In the blink of an eye, hundreds of flying cars crossed the intersection. The armoured car sped through the air and reached the towering city gate within a few minutes.

The High Towers ahead reminds Jeremy of danger lurking beyond the City Wall.

The Flying Armored Car stopped at the City Gate Entrance/Exit. The City Guards who were waiting at the entrance saw the Raven, the Night Family emblem.

The Captain of the City Guards walks out and approaches the armoured car. He then sees the Night Family's son sitting back in the window seat who became famous overnight.

"This kid has awakened an A-level Talent," The Captain's eye shone with a bright light.

He then spoke with the Night Family's Captain. After knowing that they are going hunting outside. He immediately allowed them to exit.

Jeremy watches everything from his window seat. He could see their guards were all looking at him. Their eyes were sparkling. After nodding at them, he asks the driver to go deeper into the wasteland.

After leaving the City Wall, the armoured flying car flies across the air. There are several other flying cars moving to Wasteland in the same direction as them.

"The Night Family's child is going out. Change the direction," A Mercenary Team Captain instructed his driver.

Then many Mercenary Teams changed their route after spotting the Night Family Vehicle. Because the Night Family's Armored Car is completely Black. The Night Family's Raven logo is attracting attention as well.

The news of the awakening ceremony must have reached them as well. None want to trouble the future big shot. The Armored Vehicle went deep inside.

It's the area where Corrupted Beasts roam around in groups.

The Armored Flying Car halted after some point. It then touches the ground without making any noise.

Creak!

The next second, the guards walked out one by one. Jeremy walks out last.

"You guys set up a camp here. I'll go and check the perimeter," Jeremy said.

Hearing that everyone's expression changes. They knew how dangerous this wasteland was. There are Tier-2 Corrupted Beasts living here.

Usually, Jeremy goes hunting with others to kill Tier-1 Corrupted Beasts. Now that they have come even deeper. Their chances of encountering Tier-2 Corrupted Beasts are more.

So the Night Family Team doesn't want to let their young master roam around alone.

"Young Master, Jeremy. It's too dangerous to go alone," The Captain said.

"Captain Morris, I know. I'm going to check the perimeter. If I don't come back in 15 minutes, then you guys can move," Jeremy said in a strict tone.

Captain Morris is a Tier-3 Beast Tamer. So in case something wrong happens, he can reach Jeremy's location. So, after giving some thought, he agreed.

Jeremy then goes out alone. In the blink of an eye, he disappears from the spot. The Night Family Team starts setting up the tent.

Shortly afterwards,

Jeremy covers quite a distance before arriving at the ruins of old buildings. This area was once upon a time a normal residential area.

But after the mutation, people fled. Places became abandoned and became the hiding and living spot for Corrupted Beasts.

The problem arises when the Corrupted Beasts attack the human settlements.

So from time to time, they have to clear out the surrounding areas.

Looking at the several old ruins structures in front of him.

Jeremy took the sharp black katana out from his storage ring. His fingers brushed the handle before he gripped it using his right hand

The cold blade shines. A Katana blade can split the object into two pieces upon touch. Jeremy has been practising katana sword moves since childhood.

Now that he has awakened strong talent. He feels a lot more sharper. Especially when it comes to senses.

Rustle!

Something moved inside one of the ruined structures.

Jeremy's eyes immediately fell on the ruined structure not far away from him. He started moving towards the place.

Jeremy then recognised the place. It should be a supermarket.
