

Chapter 1356 What Should We Do

Shiloh's and Trudy's expressions darkened as they realized they were being encircled by an increasing number of Titan Bugs.

These Titan Bugs were formidable, each being above the level of a five-stage Primogem Expert.

Shiloh and Trudy were five-stage Primogem Experts, but they were weak compared to these bugs.

Trudy turned pale with fear. Facing the looming threat of death, she tugged at Shiloh's clothes and whispered, "Shiloh, how about leaving this guy here to distract the Titan Bugs? There are thousands of them! If we don't use Liam to draw their attention, more bugs will swarm us, and we'll all die!"

Even though Trudy had been whispering, Liam had heard every word because he was much more powerful than Trudy was.

However, Liam stayed silent. He wondered how Shiloh would manage such a serious situation.

He had always known Shiloh as someone who wouldn't abandon his friends just to save himself. Yet, he wanted to see for himself what Shiloh would do.

As expected, Shiloh sternly rebuked Trudy in a low voice, "What are you talking about? You think we should just abandon our friend because we're in danger? Since I've decided to team up with Liam, I will never stoop to such cowardly behavior! Trudy, listen to me, don't even think about it! If you bring it up again, don't expect me to still consider you my sister!"

don't expect me to still consider you my sister!"

Trudy's face flushed instantly. She wanted to say something, but seeing her brother truly upset, she hesitated and shut her mouth.

Liam had clearly heard Shiloh's words. Seeing Shiloh firmly reject Trudy's suggestion, Liam had a better impression of Shiloh now.

However, Liam chose not to reveal his full capabilities. He always followed his usual rule of being prepared for everything, no matter what.

Given that they were deep within the Titan Bugs' stronghold, he wasn't certain if any formidable Titan Bugs were hidden in the shadows. Hence, it was beneficial to hide his true abilities, giving him the advantage of catching others off guard during a critical situation.

Naturally, if Shiloh or Trudy were to face danger, he was ready to unveil some of his hidden abilities.

With a feigned seriousness, Liam looked at Shiloh and asked, "Shiloh, what should we do? The number of these bugs is increasing. We need to do something now."

Shiloh, understanding Liam's point, clenched his teeth and said, "It looks like we'll have to deploy the sword array!"

The sword array Shiloh mentioned was the magical formation they had used before while searching for spark metal.

Liam was intrigued by this sword array. It was also the first attacking magical circle he had encountered since arriving in the Cosmic realm.

After announcing his plan, Shiloh pulled a small sword array from his pocket.

He then channeled his primogem energy to activate and rapidly expand the sword array.

The array shot from his hand, blazing brightly. Finally, when the sword array expanded sufficiently, it fell and covered the

ground.

In a second, the circle of the sword array appeared on the surface of the valley!
