

Chapter 1360 Enhancement

The next day, Shiloh and Trudy woke up.

Liam checked their conditions. He noticed they had mostly recovered and let out a sigh of relief.

Though Liam trusted in his skills, this trust was mainly in his ability to keep himself safe. If Shiloh and Trudy were not well, he couldn't ensure their safety against a sudden attack from the Titan Bugs.

Besides, the siblings, both at the fifth-stage Primogem Expert level, would be able to help him if something bad happened.

After waking up, Shiloh and Trudy both thanked Liam. They knew that without Liam's help, that Titan Bug would have easily killed them.

Liam brushed off their thanks, saying, "No need to mention it. We're friends and teammates now. We succeed or fail together. I couldn't just watch and let you die."

Shiloh understood this and didn't push the formalities.

He figured that Liam must have used some secret technique to kill the Titan Bug as powerful as a second-stage Primogem King. He believed that continuing to thank Liam might seem like prying into Liam's secrets. This was something he wanted to avoid.

In fact, Liam was also surprised by his ability to kill the Titan Bug at that level with just one strike.

Before, when he had been a fourth-stage Primogem Expert, the

strongest enemy he could instantly defeat was an eighth-stage Primogem Expert. Against a ninth-stage Primogem Expert, he couldn't manage a one-hit kill.

The gap between Primogem Kings and Primogem Experts was enormous. Before attacking that Titan Bug, Liam had thought he might be able to kill a first-stage Primogem King at best, and even that would rely on luck.

Liam was confident in his ability to handle a second-stage Primogem King, but he had never expected to kill one so effortlessly.

This made him wonder about something. Could it be that his mastery of the Death Power had enhanced his sword of darkness?

Thinking back on the fight, Liam realized that he hadn't used any law powers. Instead, he had relied only on his own strength and the sword of darkness.

This led him to believe that his speculation was true.

To be sure, he pulled out the sword of darkness for a closer look.

After carefully inspecting the sword, he noticed that its sharpness had significantly improved.

By just observing the blade, he could feel a sharper edge.

When he tested its power, he found that the sword of darkness was now twice as strong as it had been before. Even though it was still a Mortal-grade weapon, this improvement was impressive.

Liam was excited about this new discovery.

After all, back on Blue Star, before his rise in power, he had wished to improve the sword of darkness by using his special

power of the dark element.

But his efforts had failed, and he had slowly forgotten about it.

Recently, during a mission in the No. 76 planetary system, his interest in upgrading the sword of darkness had been reignited after it had absorbed shadow material from the Dark Mist Spirit.

Now, he learned that the Death Power had surprisingly enhanced the sword of darkness.

Even though the Death Power's effect on the sword of darkness was gradual, Liam believed that with enough time, the sword would eventually rise above its Mortal-grade level.

If the sword of darkness could advance to an Immortal-grade weapon or even something greater, it would significantly increase his power.

This potential filled Liam with great anticipation.
