

Chapter 1392 Hidden Strength

Chad, Everett, and Lewis also grasped this crucial situation. They understood this moment was their final shot.

Thus, the three of them quickly activated the sword formation. Suddenly, a burst of golden light filled the cave, and the Gilbson family's sword formation materialized on the ground.

It was clear to everyone this was their last chance.

Even if their previous efforts hadn't lured the King of the Titan Bugs closer, they had to use the Gilbson family's sword formation now.

If they didn't act now, the relentless assault by the Titan Bugs would leave them with no chance of winning, possibly leading to their complete destruction.

The anxiety was thick among the team members as they feared the King of the Titan Bugs might not fall for their trap.

Thankfully, the result was favorable.

Their strategy worked as planned.

Drawn by the Death Power emanating from Liam, the King of the Titan Bugs, seeing the team weakening, became overconfident. It charged into the cave, eager to seize the Death Power for itself.

"It's here!"

Everett felt a surge of urgency and quickly signaled to Lewis

and Chad to join him at the core of the sword formation. They all directed their primogem energy into the formation, causing the once dim formation to blaze with bright golden light.

By then, the King of the Titan Bugs had reached the cave entrance.

Its immense size cast shadows in the already dark cave.

Lewis kept his focus on the King of the Titan Bugs, and as it neared the sword formation, he shouted, "Attack!"

Chad and Everett, poised and ready, nodded together. They then poured all their primogem energy into the heart of the sword formation.

Instantly, the formation exploded with a brilliant light.

Following this, a wave of sword energy swept out, filling the cave with overwhelming force.

As the central figure controlling the sword formation, Lewis lifted his hands and delivered a decisive slash.

The impact of this attack was on par with a blow from a second-stage Primogem Emperor.

Moments later, the sword's radiance flew out, instantly wiping out the lower-level Titan Bugs near and inside the cave.

The earth itself split open under the formidable force of the sword energy, creating a vast chasm.

Both the entrance and the ceiling of the cave were cleanly sliced by the sword radiance, leaving behind a scene strewn with corpses.

The King of the Titan Bugs took the full force of this onslaught, and the outcome seemed clear.

Everyone breathed a sigh of relief, looking at the dust all around because of the strike.

It appeared that the King of the Titan Bugs had been killed by this powerful strike.

However, before they could start celebrating, the dust fully cleared.

There stood the King of the Titan Bugs at the cave's entrance, disheveled but visibly unharmed.

Liam's heart skipped a beat, and he found himself murmuring, "How can this be possible?"

Not only Liam, but everyone there was also stunned.

Why couldn't the sword energy, which was as powerful as a second-stage Primogem Emperor's strike, kill the King of the Titan Bugs, who was only at the peak of the ninth stage as a Primogem King?

Suddenly, a formidable pressure filled the air in the cave.

The aura was of a fourth-stage Primogem Emperor.

As everyone grasped this reality, their eyes widened in shock.

The aura of a fourth-stage Primogem Emperor was actually emanating from the King of the Titan Bugs.

It turned out the King of the Titan Bugs had been hiding his true strength all along. It was in fact a fourth-stage Primogem Emperor!
