

## Chapter 1546 An Invaluable Gift

The room was filled with audible gasps, each a clear sign of shock.

Standing next to Liam, Cecil showed a face full of disbelief. His eyes were wide.

The birthday gift Liam handed over was beyond valuable.

It was the blood essence of Blood Sovereign!

It was from a Primogem Deity of the Blood Clan. Only those who reached the level of Primogem Deity could have blood essence.

Even though it was only a single drop, its value was beyond debate.

With careful use, it had the power to prolong Katherine's life greatly.

After all, the blood essence of Blood Sovereign was famous throughout the Cosmic realm for its ability to boost physical strength.

Its ability to extend life was, of course, unquestionable.

Katherine was the backbone of the Vaughn family. Every extra day of her life mattered more than words could say.

Without a doubt, Liam's birthday gift was beyond priceless!

For a brief moment, all eyes in the hall locked onto Liam. Envy flickered within their gazes, revealing their desire for the blood essence.

Still, they remained rational, not acting recklessly. Liam was no ordinary individual; he was a famous genius of the Rosefinch Galaxy. Anyone foolish enough to take the blood essence from him would face the wrath of the entire galaxy.

Besides, Katherine, now indebted to Liam's generosity, would be the first to confront anyone with sinister intentions.

Liam was well aware of the current situation and said, "This single drop of blood essence was incredibly difficult to acquire. I paid a heavy price to obtain it. While it is truly extraordinary, I lack the power to safeguard it. That is why I believe it is most appropriate to offer it as your birthday gift. I insist that you accept it."

His words were carefully chosen to convince everyone in the hall that this single drop was all he had.

Even though he doubted anyone would dare attempt to take the blood essence from him, his years of experience had instilled in him a habit of caution.

Even in the Human Clan, where the environment seemed ideal, there were always those willing to forsake their principles for a chance at profit.

Liam had encountered such individuals in the past.

As Liam had expected, when he finished speaking, the faces of everyone in the hall fell with clear disappointment.

They had hoped to buy blood essence from Liam earlier if he still had some.

The guests at Katherine's birthday celebration were all powerful figures from their respective planetary systems, each backed by influential family elders.

The blood essence had the potential to prolong the lives of their elders, which would, in turn, increase their family's influence.

However, from Liam's words, it became clear that he appeared to have only this one drop of blood essence.

Even if he possessed more, they understood that there was no way to get their hands on it. The way Liam had framed his offer left no room for negotiation.

Trying to take it by force would only lead to a conflict with someone as

talented as Liam.

That was the last thing they wanted.

They knew the price would be too high if they went up against a genius like Liam.

What Liam had said was actually true.

He had indeed paid a steep price to get his hands on the blood essence.
