

## Super D. S 2721

Chapter 2721: Open Wanluo Prison

The funeral star field is located in the middle of the star field of the third cosmic human race comprehension camp and the science and technology camp. In the deepest part of its central core, there are several naturally formed cosmic wormholes.

These wormholes are in the third universe, and the other is in other cosmic planes, even in the nameless void.

There are two wormholes, which have been confirmed to be connected to the first universe occupied by the Tianzu people, and the second universe in which the Wanluo Federation, in addition to the Terran, has a large number of other star-space groups.

In addition to this, there are three natural cosmic wormholes. No one knows where their other ends are connected, and few people dare to go in with danger, because no one who can enter these three natural cosmic wormholes can come back. !

Although the five natural cosmic wormholes are located in the deepest part of the core of the funeral star field, the distance between the skin and the sky is not close, and it takes several light years.

Of course, for the technical strength and the level of cultivation and civilization of the Federation of Van Lo and the Celestials, the distance of several light years is really nothing in the eyes of the real strong.

Among them, the natural wormhole that connects the first universe controlled by the celestial family is located at the very edge of the five wormholes, and the location is still remote.

Moreover, since this natural cosmic wormhole is the first universe of the universe, and the numerous slaves of its scorpion enter the third passage of the human universe, it is rarely seen in the periphery of this wormhole. The appearance of the federal strongman appeared.

The closer to the edge of the wormhole, the rarer the figure of the human monk and the Venezuelan strongman. Over time, the large circle of the star near the edge of the wormhole is almost the third cosmic celestial group and its slaves. The battlefield front of the race was at the base camp.

A large number of strange and strange servants of the celestial family are visible in the vicinity of this wormhole.

But today, this star field is quite deserted, because the Devils scouted the army's top ten space bastions, and they came to each other in a strange way!

Among the three known stable cosmic planes.

The third universe, occupied by the human race.

In the second universe, there are a lot of other star-space groups that join the federation.

The first universe has long been unified by the Tianji people!

Even in the third universe, the human race is actually divided into two camps. Although they are harmonious, they are different forces.

But in the first universe, the Tianji family is the only hegemon of the well-deserved.

There are many servants and servants under his command. Among them, because of their particularity, the devil's group is no different from human beings, and it is difficult to be distinguished. It is the most favored by the celestial family.

Among the many servant ethnic groups, the other ethnic groups have only a few sporadic and scattered powers entering the third universe of mankind.

Only the devil is an exception.

They invaded the scouting power of the third universe of the human race, not only in a large number, but also formed a formed team. Ten space fortresses, which were given by the high-level people of the heavenly family, surrounded the wormhole's surrounding stars, reflecting the strategic significance. , almost close to the front line!

For this reason, the other servants of the First Universe, basically do not dare to easily provoke the devil's group.

Unknowingly, the demon family seems to have become the most powerful slave group under the celestial family. Therefore, the space bastions of the eight devils are coming at the same time within one day. Other celestial groups that originally lived in this area The slave servants, the first time, hurriedly retreat...

"Booming!"

In the distant starry sky, a black space fortress with a diameter of 10,000 meters, like a fast-moving small meteor, with a rumble, is approaching quickly.

Soon it was near, and the other eight space fortresses lined up on the edge of the wormhole were directly in front of them.

This last arrived space bastion is the Black Wind.

"call out!"

"call out!"

"call out!"

.....

With the advent of the Black Wind, the other eight space fortresses that had already waited here all shot a black light, shooting in different directions to the Black Wind.

At the same time, the central part of the Blackwind Fortress also appeared a black light curtain with a square of a circle. Like a passage entrance, all the eight black beams that were lasing were shot above the light curtain and continued. .

Soon, from the eight space fortresses lined up in opposite directions, there were a lot of resources and treasures. Through these eight black beams, the black wind was transferred. The role of the eight black beams was actually Same as the conveying pipe.

If it is only a small amount of resources and treasures, it can be stored in a space box, but because the quantity is too large, and because many treasures are too high, the general space storage method can not be loaded at all, so only with this method.

The Devil's Scout's ten space bastions, in the absence of special reasons, used to return to the magical star field on the edge of the first universe every 20 years, and now, from the most recent return, there are two years. Not enough.

For nearly two decades, each space bastion has more than 10,000 demon scouts as coolies and hunters. In this funeral field, the source of the nucleus and other rare minerals are constantly being extracted. The right object, killing people.

I can imagine how many resources and treasures they have accumulated, how large the number is!

For this reason, even with this fastest way of transporting pipes, there are a lot of resources and treasures escaping from the opposite eight space bastions, but the whole process continues. An hour is over.

Then, the eight space bastions that withdrew the black light column left, and all of them left, and the black light curtain in the middle of the black wind was the same as the entrance of the passage. Quickly disappeared.

All of this, naturally, is the demon of the black wind, and the demon squad is under control. But in fact, I am afraid that even the tyrants do not know, he is still able to do this, in fact, completely. It is because Ye Xuan temporarily opened the permission.

The purpose is to receive this batch of resources and treasures.

Anyway, white, don't white!

After all this was over, Ye Xuan almost regained the temporary opening authority. All the resources and treasures received were all entered into the warehouses of the third floor warehouse area of the Black Wind.

As he regained the temporary opening of the authority, these warehouses were completely closed, not to mention the warehouse management of the demon, and even even the Gu guess, there is no way to open.

"Hey!"

The buzzing sound of the buzzer suddenly came out, and it rang through every corner of the entire black wind at the bottom of the Wanluo prison, and all the imprisoned federal powerhouses were alarmed.

In the next moment, the central area of the cockpit floor showed a huge black light curtain without warning. The main passage of Wanluo Prison opened...

Chapter 2722: amnesty

"what's the situation?"

The opening of the main passage of the Villo Prison, the first time I was alarmed by the tyrant in the core hall on the top floor of the Black Wind. He was enjoying the care of the two beautiful devils, and he immediately became angry and angry: "Who opened the main channel of Wanluo Prison? Go to the central control room and check it out..."

Those who have this permission are only sitting in the five magical think tanks in the central control room on the left side of the top core area.

At this moment, accompanied by the Gu guess, the five devils in the right side of the luxury hall received instructions, and two of them even went to the entrance of the luxury hall, while the spiritual strength extended, the hall portal will be opened. The spiritual brand has passed the past.

In the next moment, the mental imprint was placed on the sensor side of the portal. The latter flashed a little black, but the door... did not move.

It didn't open at all.

The two devils had a slap in the face, and the other person, even if he did the same, also shot a spiritual mark.

The result is no suspense, still no response!

It's strange to be able to open it. All the permissions of the Black Wind have been taken back by Ye Xuan. The entire space fortress has been transformed into a private magic weapon like the black mosquito. Don't say they are two, even if it's a guess, don't I want to step out of this top floor.

"Greatly... big boss, it seems to be a big deal, I, I... we don't seem to be able to open the door..."

Under the madness of the heart, the two devils' ventricles stopped their steps and turned to the central sofa area of the hall to guess the past.

.....

At the same time, the bottom of the Wan Luo prison!

With the opening of the main passage in the central area of the Wanluo prison, a large number of densely squeaking squeaks followed. Nearly 10,000 prison cages distributed in this vast black prison, surrounded by columns, are slowly being stowed and hidden in the folding space of this area.

Of course, all of this is also Ye Xuan's work. However, he did not open all the cages. It is only about 80% of the total. It is completely random. The other two or more than one hundred cages have no movement. !

After refining the starry sky super brain as the intelligent hub of the Black Wind, Ye Xuan directly grasped the identity information of the 10,000 federal prisoners. The more than 7,000 federal powerhouses he released were basically nothing. Back view, but the repair is a good state.

In Ye Xuan's case, since they can't conquer them like the Devils, and these guys are basically impossible to have any treasures of treasure, it is better to put them directly and earn a lot of federal contribution points for themselves.

As for the more than a thousand federal powerhouses who have stayed, either the background is uncommon or they are very famous in some fields. There must be heavy treasures in their hands, and the value is not small. So Ye Xuan did not intend to put it directly. I will squeeze it out first.

Among them, the immortal dynasty royal family Long Xuan, who is closest to his prison cage!

At this moment, as the nearly 80% of the cages were opened, and the main passageway from the space fortress was opened, the more than 7,000 federal powerhouses who had escaped from the cage were first stunned. They were ecstatic, and they rushed toward the main channel of the black light curtain in the center of the black prison.

Although the reality that happened in front of us is too strange, they simply can't consider too much. This is a rare opportunity to escape. If the main channel of the black light curtain is closed again, then it is really pitted!

Don't miss the opportunity, don't wait!

In an instant, a large number of federal powers flew in and rushed into the black light curtain passage, and the figure disappeared and disappeared completely.

This scene is like the legendary world!

At the same time, in the area of the Devil's Jailer on the edge of the Wanluo prison, nearly 100 demon jailers rushed over at this moment. Although they were cultivated as low-level, in this black prison, there is a lot of mysterious black. The fog has the effect of suppressing and even restraining the power of the human beings, so that they can't do the cultivation at all. Even if they want to fight, at most, they will fight the flesh.

Therefore, these demon jailers have no fear at all, and they have witnessed such a large-scale jailbreak behavior. Although they are confused, they still know at least what they should do. In any case, they can stay a few and count more. More, the reward for returning is getting richer!

Soon, more than a hundred devils jailers rushed to the edge of the main channel of the black light curtain, and launched a fierce battle with some of the newly arrived federal powerhouses.

For all this, Ye Xuan did not pay attention.

The cage was also closed, and the main passage was opened. All this has been done to the best of its ability. If some of the existences still fail to escape, they can only blame themselves for being unlucky.

"Open the door! Hurry and open the door to me..."

Three or four hundred meters to the right, the Emperor Longxuan was savagely squatting in front of the pillar on one side of the cage, constantly flapping and roaring.

Seeing that most of the prisoners around him escaped from the cage, more than half of them have completely escaped through the main channel of the black light curtain. He alone and another small group of hapless prisoners. The cage did not respond. This kind of differential treatment has made him miserable.

"Open the door!"

"Son of a bitch....."

"Hecked you? I am the emperor, I am the three emperors of the dynasty. I have to save me first to save!"

"My day..."

After a few unsuccessful slaps, Long Xuan was desperate. Even in the roaring, he even showed his identity. He felt that he was too unlucky. He had been in this funeral field for so many years. But the back is horrible.

First, on the way back to the Tianhe Star, he was caught by the Black Wind. Then he discovered that the immortal Zulong, who was prepared for his own mother, had fallen into the hands of others. Now more than 7,000 prisoners have been smashed. But there is no part of him...

"Card!"

Just as Long Xuan snarled wildly, the ear suddenly came up with the kind of cage column that had risen upwards and did not enter the folding space.

His face was first happy, then he looked down at his feet subconsciously and found that his prison was immediately unresponsive, and his face was suddenly dark.

Then, Long Xuan's line of sight followed the direction of the card's abnormal sound.

More than three hundred meters away, Ye Xuanzheng looked calm and calmly, and he took the hand out of the cage slowly rising from the pillar. It seemed that he had glanced at him.

"I rely!"

"This is not fair!"

"Son of a bitch!"

"Laozi Prince, Laozi is the Emperor of the Immortal Dynasty, you can't do this to me!"

"My day..."

Seeing that Ye Xuan can get out of his way, he still has no reaction on this side. Long Xuan's heart is completely unbalanced. The voice of the roaring voice in the mouth continues to be endless. He is passing through his cage and is rushing to the front of the black light curtain. A large number of federal powerhouses heard it, but unfortunately, no one has ever seen him.

What about Xuan Zizi? Can you be more important than your own escape?

Ye Xuan glanced at the guy with a pity, and when he was swaying, he rushed out of the main passage of Wan Luo Prison...

Chapter 2723: Mistaken wormhole

After the black wind, Ye Xuan sneaked into the back of a small dead star not far away, quietly crouching down.

After about ten minutes, it was estimated that the more than 7,000 federal powerhouses who had been yelled at him had gone almost the same. He only took the shot and passed the black wind to the immortal world.

Of course, the main channel of the black light curtain of the bottom cabin Wan Luo Prison has also been closed by him.

According to his original plan, Ye Xuan intends to hide far away from a remote and secluded star field, and then refine some slave prints. After completing all this, the black wind will be released and enter. Conquer the demon in the Battlestar Scout.

Of course, it is impossible to all retire. After all, he still needs a lot of brains of the devil to improve the level of the spiritual source. It's ok to kill half of it!

With this thought, Ye Xuan swayed from the back of the small crouching back star, just wanting to worship the purple hole shuttle, the virtual air on the right side of his figure, but suddenly came a strange The irresistible power of terror.

"嗡隆隆....."

This force not only appeared extremely abrupt, but even strong enough to make a small piece of emptiness in the vicinity tremble slightly. Ye Xuan's figure was sucked uncontrollably, like a broken kite. The void is quickly projected.

When he turned to the first place, he clearly saw the natural wormhole leading to the first universe on the right side. It seemed that there was a black smudge that flashed through, and this inexplicable horror sucking force is exactly from Spread inside the wormhole.

"by!"

At the beginning of the millennium, Ye Xuan had only had a swearing slogan, and it was easy for him to recite the purple hole shuttle in the first time.

In the next moment, the black brilliance in the natural wormhole flashed again, and the purple hole shuttle was launched in the future, and it was pulled in instantly, as if it had not entered the black hole, it disappeared completely...

Just as the purple cave shuttle was sucked by the terrorist force that was transmitted to the natural cosmic wormhole in the first universe, at the same moment that the wormhole disappeared, because Ye Xuan left not long ago, and the Tianhe star was just calm. , boiled again.

This time, Ye Xuan released more than 7,000 federal powerhouses. In addition, he refining the Black Wind and obtaining a large number of rare resources that would have been sent to the ancestral ancestors and then to the celestial family. And treasures.

All of this, although the outsiders do not know, but along with his federal identity, the Star Wars mercenary brand branded in Ye Xuan's knowledge, but it is full of insight.

Moreover, just before Ye Xuan offered the purple hole shuttle, the information was sent out by the interstellar mercenary card with a special signal wave frequency.

Therefore, Ye Xuan's federal contribution points have skyrocketed without any suspense.

Since then, Ye Xuan has finally left the list of people. At this moment, all the information about the changes related to him has been displayed almost at the same time in the Federal Affairs Hall of all the administrative stars of the Federal Republic of Vatican!

The list: the 999th!

Ye Xuan: The 9th order of the star nuclear environment!

Interstellar Mercenary Number: tha13148080!

Current federal contribution points: 176878943 (30000000)!

Previously, Ye Xuan's ranking was 1998, and the federal contribution score was 100 million, but 30 million points have been used.

Now, with his federal contribution points more than 70 million in a flash, directly let Ye Xuan rush out of the list, into the list!

And his cultivation is a realm. Although he has jumped from the eighth step of the previous star to the ninth order, it is still in the first realm of the star, and it is unique in the list.

All of this is done in just one day, and it's hard to think that the entire Tianhe Star is not sensational!

At the moment, the Federal Affairs Hall over the Tianhexing Sea has completely blown up the pot. A large number of federal powerhouses and interstellar mercenaries all look up at the information screen with ecstasy, and occasionally marvel...

"God, come again..."

"Sure enough, it is my idol, how long does it leave? The blink of an eye is more than 70 million federal contribution points! I knew that the last time I had to go back to the dead skin, I have to ask him to go out and mix together, maybe this seven thousand Tens of thousands of people can fall on awkward body..."

"More than 70 million contribution points, people will get their hands in the blink of an eye, think about squatting in this star field for hundreds of years, a total of more than a thousand points, this person is better than people... really dead!"

At the same time, on the immortal star of the dynasty capital of another emptiness in the endless distant star field, the royal lady suspected of being the mother of Longxuan was also informed of the ranking of Ye Xuan's federal contribution points, and she burst into tears on the spot: Xuan Er, it really is a good son of Niang, this is only a month, it is more than 70 million, presumably to kill the big leader of the Mozu scouts, and the realm must also successfully break through."

"You are a little devil, clearly breaking through the black hole and entering the ninth big realm. The concealed cultivation is just the ninth order of the star nuclear environment, or the same naughty ah..."

"Auntie!"

With the whispering whisper of the graceful lady in the imperial star, the three emperors, Longxuan, who was still imprisoned at the bottom of the Black Wind, had sneezed in the same way, and they couldn't help but think of themselves. Mother-in-law.

Under the miserable heart, Long Xuan sat down on the ground, and the language whimpered: "Hey, mother, my son wants to go home, it's bad luck recently, it's dangerous outside..."

.....

In just three days, Tianhe's star Changbai Zhengjun and the federal garrison commander Zhao Long have gathered together for seven or eight times.

For Ye Xuan, who broke away from the list three days ago, and rushed into the list of things, the two of them felt incredible until now, but they saw the emperor's singer's squad, the black wind, and they all went. It has become a prisoner of others, and it is still so profitable to make a contribution point... This is completely unscientific!

At this moment, Zhao Longzheng was delighted to make great strides into the official residence of Bai Zhengjun. When the talents just entered the gate, they laughed loudly.

"Ha ha ha... good news, good news for Tianda!"

"Things have already been determined. Our princes are really fine, and they have made great achievements!"

"An hour ago, a large number of federal powerhouses returned to Tianhe, and these guys revealed a message after seeing the rankings of the emperor."

"It turned out that they all just escaped from the Black Wind three days ago. There are thousands of people in total. This is exactly the same time as the emperor's rushing into the list. There is no doubt that these guys are the emperor. The means of rescue are saved, otherwise his more than 70 million new contributions can't be explained!"

"And, the identity of the emperor's adult has completely confirmed that some of those guys have their own mouths. At that time, in the Black Wind's Wanluo prison, there was indeed a young man who claimed to be the emperor's prince! We really didn't guess wrong. !"

"Oh, I don't have to worry anymore. It really is the prince of the dynasty. Maybe people are deliberately being shackled, purely to earn points."

At the end of the day, Zhao Long seems to think of something, his face suddenly stunned: "Oh, it is a pity that the 30% of the federal soldiers, this month, have been cleaned up by me..."

Chapter 2724: Advent star

Hearing Zhao Long's mention that the 30% of the federal soldiers who had been cleaned up by him by various means within this month, Bai Zhengjun first stunned and then slammed his mouth and slammed his mouth. Dragon's, really want to say, Bai Zhengjun is somewhat responsible.

We must know that the total number of federal troops stationed by Tianchen in Tianhe has reached more than 100,000, and 30% is more than 30,000. Zhao Long is really worried, and it was solved within a short period of one month. The soldiers under the 30,000 hands are counted down on average, and thousands of people every day.

The thoughts flashed through my mind, and Bai Zhengjun suddenly realized it. It seems that he had really looked down on this guy before, and his heart was really embarrassing.

Fortunately, because of the reason of the Emperor Xuanzi, the two men have become enemies and friends, and they share common interests with each other. They are firmly tied together, but it makes Bai Zhengjun slightly gratified.

Under the sudden heart, Bai Zhengjun even laughed and led Zhao Long to sit down in the living room: "Zhao Xiong said this, the 30% washed federal soldiers are indeed a pity, but now we have confirmed Xuan The identity of the emperor, even his mind and means are quite understandable. In this case, as long as there are several contacts in the future, depending on the ability of both of you and me, it is no accident to be rewarded by Xuan Huangzi. Things."

"With the support of the Emperor Xuanzi, how can we still see this little Tianhe star? At that time, we can go directly to the imperial capital, let alone the small 30,000 garrison soldiers, even if all the stars of Tianhe The federal garrisons are all gone, and I am irrelevant to you and me!"

"Ha ha ha..."

"This statement is very!"

Zhao Long thought that he was happy to listen. When he laughed again, his face was full of emotion: "This time it is really a turn of the peak, Zhao is never expected to be the black wind of the devil's adult." After the flagship smashed away, it was not only innocent, but it was also able to stir up such movements in the magician's space bastion. It was really amazing!"

"That is nature, but the family of the royal family who came from the emperor's immortal star, is it so easy to see through?"

Speaking of this, Bai Zhengjun seems to suddenly think of something, a slight pause between the words, his face changed instantly: "Oh, it's not good. At that time, together with the Emperor's adult, the flagship of the Black Wind, who was scouted by the devil, seems to have Xuanyuan Ziyuan, a maid of the girl, shouldn't the woman be alive? If so, when it comes back, will Xuan's head disappear and you will not be exposed to me?"

When Zhao Long heard it, he suddenly stopped. After thinking about it, he suddenly flashed a touch of coldness: "If that's the case, then it's no wonder that our hearts are hot..."

.....

"Booming..."

"boom!"

As the sound of the thunder of the thunder continued to scream, Ye Xuan's whole heart was hung up to the eyes of the blind, gazing at the one, controlling the trembled purple hole shuttle as much as possible, aimlessly following the front. The endless darkness goes all the way!

At this moment, he is already in the natural wormhole leading to the first universe.

If he had successfully sacrificed the purple hole shuttle in the moment before his body fell into the wormhole, and immediately broke into the inner cabin of the battleship, he was afraid that he had already broken his bones.

This large natural wormhole connecting the two cosmic planes, even the general star-rated large warships may not be able to guarantee comprehensive, only by the physical strength of Ye Xuan, it is obvious that the force of the void in the wormhole can not be suppressed. .

Fortunately, this purple hole shuttle that had just completed its fifth fusion not long ago did not disappoint him. After incorporating the wormhole ship, the strength of the hull of the purple hole shuttle was increased by at least several times, even if it was wormhole at the moment. The force of the void in the air was like a raging sea boat, but after all, it was hard to smash down and never disintegrated.

This situation lasted for more than a month. During this period, Ye Xuan barely slacked off. Although there was nothing in the darkness, he used his intuition to fully control the purple hole shuttle all the way...

At the moment, the end of the endless darkness of the dark end, finally appeared a very faint star glory, Ye Xuan stunned, and then the spirit of great vibration, the speed of the purple hole shuttle was almost immediately promoted to the extreme Like a purple-black tiny meteor, it quickly went away.

"boom!"

At the moment of rushing out of the wormhole, the hull of the purple hole shuttle violently vibrated again, but the sensation quickly dissipated. It was in front of the line of sight, and it was already a vast expanse of the galaxy!

"call out!"

In the thought room, Ye Xuan's body shape has already taken out of the cabin, waving the purple hole shuttle into the body after the immortal world, this will hide the body shape, free to choose a direction, while plucking forward, while looking This strange star field.

The same endless void, the same countless stars, big and small, dotted!

This star field seems to be no different from the third universe of the human race, but Ye Xuan understands that this place, in all likelihood, does not belong to the third universe where the human race is located, but is the first to be occupied by the heavenly family. A universe!

Previously, after refining the Black Bass Space Fortress, through the intelligent center of the Black Mosquito Super Brain, Ye Xuan had some understanding of the first universe in which the Devil's ancestral home was located.

As far as he knows, the inheritance ancestral home of the entire demonic group is a ridiculous star field at the edge of the first universe, and the natural wormhole that enters the third universe of the human race is in this magical human domain. The deepest point.

Therefore, Ye Xuan came from the third universe through the wormhole, and the starry sky that is coming down now should be the hinterland of the devil's star field!

Although the Devil's Star Field is located at the edge of the first universe, its territory is extremely vast. There is a huge black star in the center of the star field, called the Magic Emperor Star. This star is the royal ancestral home of the Devils.

The endless galaxy of the magical star is surrounded by the top ten tribes of the demon family. Each tribe has a small field.

Each tribe has a great commander and a high priest. Among the entire group of demons, they are second only to the emperor's supreme being, and the realm is in the black hole.

Under the command of the general commander, it is the big leader of this level, and it has jurisdiction over ten small leaders.

That is to say, each demonic tribe, its tribes, the total number of nearly one million, the entire demonic group, there are more than 10 million people.

It doesn't seem to be a lot of listening, but as long as I think that each of the devils is equivalent to at least a thousand points of federal contribution points, Ye Xuan's whole heart can't help but sway.

When it comes to earning federal contribution points, where else is it better than this Devil's Star? In Ye Xuan's view, this magical star field is simply a dreamless hunting ground!

As soon as I read this, Ye Xuan even made a decision: "If you come here, you will be safe! It took more than a month to bury your head in the wormhole. How much will you have to make up for it?"

Chapter 2725: Cleaning the black wind

For the whole three days, Ye Xuan controlled the purple hole shuttle that opened the hidden array method, and finally stopped in an extremely quiet edge.

After the purple hole shuttle, Ye Xuan directly threw the black mosquitoes out of the immortal world, and then they entered the inner compartment of the black mosquito, and at the same time, the first time to the buck and the nai with spiritual strength. Boshan, Limos and other magic slaves issued a warrant.

After a few moments, these guys came to the luxury hall in the core area of the top of the black mosquito.

Ye Xuan first asked Buck about the progress of the cultivation of all the magic slaves of the black mosquitoes in the near future. After confirming that nothing was missing, they turned to the two sides of the Nebo Mountain and the Limos.

"The Begwind has been refining by me. Now all the demons of the Black Guef and the Black Wind are scolding, and all of them are trapped inside. You two will take me with me, help me to accept the Gu guess, clean the black wind. number!"

Speaking of this, Ye Xuan suddenly remembered something, and turned to Buck again: "In addition, you inform the sea and a green feather, let them choose 500 powerful magic slaves, then follow me Enter the Black Wind and hunt down the low-level demon in the second-tier Dongfu area.

After Buck took over the order, even if he turned and went, he would come back to life in less than an hour, saying that a thousand demon slaves are ready to go, and they can leave at any time.

"If that's the case, then let's go!"

Ye Xuan immediately got up and waved his hand. He led the Nebo Mountain and the Limos mosquitoes behind him and took out the black mosquitoes directly.

At the same time, the middle position of the Black Mosquito Space Fortress also appeared a black light curtain with a radius of about 100 meters. Each of them returned to the sea and the Cang Qingyu led the elite of five hundred slaves to rush out.

"call out!"

The sound of the emptiness disappeared. After all the elites of the magic slaves came out, Ye Xuan directly collected the black mosquitoes into the immortal world, and then threw the black wind out.

"Our time is very abundant, let's start with the second layer of the Devil's Cave area!"

During the speech, Ye Xuan even played a spiritual brand, and then, on the hull of the Black Wind Fortress, there was a portal that quickly became apparent.

"boom....."

Ye Xuan took the lead and the figure was just appeared on the central square of the second floor of the Batu Caves. The right side had a loud bang.

A demon man who is located in this place is scouting, and his face is full of anger and punches. It is not bad to cultivate the realm, and the star is nine steps!

"The nine-stage big ones are full, and they are still mixed in the second layer. It seems that you are not very motivated in this magical black wind!"

After licking his mouth, Ye Xuan's figure swayed away from the punching force of the other side, and he did not hesitate to shake his hand to shoot a second-level slave!

At the same time, the Nebo Mountain and the Limosa, as well as the one thousand devils and elites led by the sea and the Cang Qingyu, also arrived in succession. The originally empty central square was in an instant. It's a crowd!

"Okay, then you are free to act. All the demons who are below the fifth order of the nuclear rank are scouting, killing them all, taking the brain and taking the nucleus. As for the corpse, after the battle is over, clean it up and unify it in the central square!"

After that, the leaves turned to pick a main channel, and the body shape swayed.

Through the starry sky and super brain of the Black Wind, Ye Xuan has already been in the palm of his hand.

Right now, the third and fourth floors of the Black Wind have a total of about 1,500 or so demons.

These guys are very good at repairing the realm. After all, it is the flagship of the Devil Scouts. The big heads are guessing in person, and their subordinate strength level is naturally higher than the other nine space fortresses such as the black mosquito. I have raised it.

Basically, they are between the third big-world satellite and the sixth big realm.

The 1,500 powerful demonic elite, Ye Xuan is ready to conquer 1,000 and kill 500.

In addition, the low-level demons stranded in the second layer of the Devil's Cave House are around 8,000, all of which are repairs of the star's nuclear environment.

The eight thousand low-level magic people, Ye Xuan is ready to conquer half, killing half.

In this way, the slaves he needs to prepare will reach the tens of thousands of horror, and there are more than one thousand, which are three to six slaves!

At the moment, Ye Xuan's current slave example is less than 500. Nine, two, eight, four, seven, ten, and three to six, a total of four hundred!

These are the emergency slaves that he reserved.

As for the five thousand slave seals needed to clean the entire black wind, you can only temporarily hold your feet and accelerate the condensate!

With this purpose, Ye Xuan went straight to a three-level passage, picked a Devil's Cave House, and after all the more than ten demon people in the scouts were conquered, they were allowed to wait outside the Dongfu as an alert.

Later, he turned and entered the Dongfu, closed his eyes and began to fully condense the magic seal.

With his current level of spiritual strength, when condensing the most common level of slavery, the speed is far from being comparable in the past. In just two days, less than four thousand first-level slaves have been completed.

The next step is simple. Ye Xuan is like a wandering around. When he sees the demons who are repaired in the sixth order or more, they raise their hands and throw a slave print, and immediately accept it.

A total of 4,000 first-class slaves were consumed by him in less than a day. At this time, the hunting mission of the sea slaves and Cang Qingyu and other magic slaves is nearing completion, starting in the entire second floor area. Expand the carpet search and clean up some of the fish that are hidden in the hidden corners.

And Ye Xuan once again entered a Devil's Cave House, retreating the last thousand thousand to six-level enhanced version of the slave.

Although the number of slaves that were condensed this time was only a quarter of the previous one, but because they were all three-level or more enhanced version of the slave print, the time spent was more, and after three days, Ye Xuan came out of that. The Devil's Cave House.

At this time, on the central square of the second layer of the Devil's Cave House, thousands of demons who had been cleaned up in the past three days scolded the corpses, and they had already piled up.

Seeing the arrival of Ye Xuan, when the sea returned to the sea and Cang Qingyu, even if they greeted them, they would kill the devils before, and more than 4,000 pieces of magical nucleus from the brain were handed over.

After Ye Xuan took over, even when he threw it into the body's phagocytic system and gave instructions, he immediately began to decompose and extract the spiritual source of the magic core.

After doing all this, Ye Xuan took out the devil's blood-stained tears sword that had been advanced to the epic level. After shaking his hand, with a cheerful clear sound, the sword instantly turned into a blood color. The head plunged into the pile of flesh-and-blood corpses like a small mountain, and began to madly pick up the blood in the corpse!

Half an hour later, when the Devil's Blood Tears leaped back and forth in Ye Xuan's body, thousands of piled up demons were completely turned into a dead body. However, this time it was collected once. Such a huge amount of blood and blood, but his blood-stained tears sword is still epic, and has not advanced again...

Chapter 2726: Qi battle

Less than six days, the area of the Devil's Cave in the second floor of the Black Wind has been thoroughly cleaned.

However, Ye Xuan did not rush to the third and fourth floors above, but spent half a day or so to rectify and assigned four demon slaves to let them choose their own centurion. Step by layer, until the end of the formation of four complete compilation of thousands of magic slaves!

In the meantime, the return of the sea is to lead the 500 elite demon elites who have fallen to the bottom of the black wind, and to kill the jailers of the following hundred.

As for the more than a thousand federal powerhouses still in prison in Wanluo prison, Ye Xuan did not intend to pay attention to it at the moment. Anyway, he couldn't run away, and he was free to go back and deal with it.

After finishing all this, Ye Xuan only took the mosquitoes and the Nebo Mountain, accompanied by the third floor!

The devils in the entire third-tier area are all elites who have been trained as satellites in the third world. They can't compete with Ye Xuan's current strength. Therefore, during the entire process of sweeping the third floor, He almost shrunk in the back, and Limo and Neboshan both crushed in front.

What he needs to do is just that the demonic elites who met along the way have been suppressed by Limosa and Naboshan, and they have thrown out an enhanced version of the senior slave print. It is extremely easy.

The two black caves were repaired by the supreme powers, and the entire third layer was only used for half a day. More than 1,000 demonic elites were killed by nearly four hundred, and in addition, eight hundred were Ye Xuan planted a slave to accept the service.

As for the last two hundred places, Ye Xuan is specially reserved for the fourth floor. The four-layered devil elite is about three hundred people. After receiving two hundred, the rest will be killed together!

Before entering the fourth floor, Ye Xuan went to the warehouse area on the third floor. The purpose was to bring the various resources and treasures accumulated in the warehouses into the immortal world.

The accumulation of the entire nine Devils Space Fortress in the past 20 years, the massive two characters are not enough to describe the countless resources and treasures, was taken away by Ye Xuan 90%, leaving all the more common grades!

Subsequently, the three servants of the main servant entered the fourth floor of the Black Wind.

Although the magicians on the fourth floor are extremely powerful, for example, the nearly one hundred pro-military guards are basically the existence of the sixth largest realm of nebula, but even so, facing the two black caves of the supreme power They are still just ants.

There were black mosquitoes and two people in the Nabo Mountain. They cleaned the outer area outside the circular corridor on the fourth floor. Ye Xuan only took about one hour.

The last two hundred demon slaves were finally completely consumed, and nearly half of them were guarded by the pro-military who had repaired the nebula.

At this point, the entire Blackwind space fortress, only the third layer of the magic nest, and the core area of the fourth floor of this circular corridor has not been cleaned up.

At the end of the magic nest, Ye Xuan intends to stay in the end, and in the core area of the fourth layer, the devil who is trapped in the moment is only a dozen or so.

In addition to the big-headed Gu Gu guess, there are only five think tanks, five housekeepers, and two devils and son-in-laws, as well as four confessions of the confidant!

And Ye Xuan intends to use the slave print to accept the service, in addition to the Gu guess, there is a think tank and a housekeeper, the rest, can kill!

At this point, before entering the core area of the fourth floor, Ye Xuan has clearly informed the two mosquitoes and the Nebo Mountain to facilitate their release!

It is best to kill the excess existence as soon as you enter it!

He guesses that there is a supreme existence of the nine-order grand perfection of the black hole, while both the mosquitoes and the Neboshan are black holes, but only the strength of the seventh and fourth orders, the two join hands The tyrants have been reluctant, and where is there any effort to deal with the extra intrusions?

"The task of both of you is very simple. After entering, you must first kill the extra targets as soon as possible. In addition, you only need to join forces to guess the tycoon for a moment. It is best to irritate him and distract him. attention!"

Before entering the portal in the core area of the fourth floor, Ye Xuan turned to the side of the mosquitoes and Nebo Mountain, and once again said: "The last point is very important, it is the key to success or failure, remember!"

After that, Ye Xuan even started to grasp the spirit of the core of the sea, directly opened the perfect shock skills, the body shape disappeared in an instant, and even a little bit of breath can not be sensed, as completely disappeared.

"call out!"

Immediately afterwards, a spiritual brand was raised by his hand. After the sensor device on the side of the portal, the originally closed passageway was opened.

In the next moment, the two mosquitoes and the Nabo Mountain swayed into two fast-flowing photoelectric vectors, and spurred them side by side.

Ye Xuan, who has lost his body shape, is quietly following the post...

.....

"Neibo Mountain? Black mosquito?"

The abnormal sound of the channel portal suddenly opened the suspicion of the sofa area in the hall and its many think tanks and confidants, all of which looked down subconsciously.

Almost at the next moment, when Gu guessed and exclaimed, his face was first stayed, and then he realized what he was, and suddenly he was angry: "It turned out that you two are secretly deceiving, and Laozi is not slaughtering you."

"boom!"

"Hey..."

Not to be furious, the tyrants screamed in the mouth, and the two sides of the Nabo Mountain and the Black Mosquito, who were eager to go, had already shot at the same time, without any reservations.

A majestic spiritual pressure is like a hurricane that has set off a tsunami. It has been swept away from the body of Nebo Mountain, and it has been given a guess. It immediately descends to the top of the head of the magic man's brain, wrapped in space. The loud bang that was shocked and slammed down!

"puff!"

"Card..."

In the face of a full-fledged attack by a black hole, the few magic men's think tanks spurted blood without any suspense, and there was a loud sound of bone cracks. The body shape was the first time. The wilting went down and turned into a piece of meat, soft and soft.

At the same time, the mosquitoes directly restored the body of the black mosquitoes, not only the body trunks turned into ugly and horrible giant mosquitoes, but also stretched out a pair of black translucent membranes, gently tapping, There are countless black energy wind blades venting out of the air, sweeping over to the front.

The situation is like a broken bamboo, covering the sky!

Not only has it locked in the shape of the other devil's butlers and close waiters, even the tyrants are no exception. They are also shrouded in the dark clouds formed by countless spiritual wind blades. Shrouded, like a cracked sorrow, want to keep coming.

This is the abnormal sound of the body of flesh and blood being swept by the spirit wind blade. There are countless spiritual wind blades. In the blink of an eye, all the demon housekeepers and guards

except the tyrants are divided into corpses and turned into countless flesh and blood of different sizes. Remnant block, falling to the ground.

At the same time, Ye Xuan, who has concealed his body shape, is also close, directly bypassing the back of the Gu guess, waiting for an opportunity to move...

Chapter 2727: Super big stomach king

In the blink of an eye, more than a dozen confidants and housekeepers, and near-servants, were killed in a seven-eight-eighth eight-eighth.

However, Ba Gu's guess was reflected in the extreme shock in an instant, and his hair was out of a rage of anger, and his look turned to the extreme.

From the inside of the body, there is a violent breath of Mo Ke Feng Feng rushing out, like a raging wave of raging waves, turning into a torrent of water, wiping everything!

Ye Xuan's face instantly changed wildly, and the whole body and mind were shrouded in an unprecedented sense of crisis, and life and death were suspended in the front line!

"Destroy the whirlpool!"

In the face of this fearless resistance, some strong desire for survival suddenly blasted from the heart of Ye Xuan, and quickly rendered, making Ye Xuan completely crazy, even the perfect shock skills have not been ignored, look stunned, screaming .

At the same time, the purple and black spiritual source nucleus hanging in the brain of the sea, also began the crazy speed of rotation at this moment, all the spiritual power contained in it is extracted in an instant, the ultimate Compression, and finally turned into a tiny point that is hard to understand with the naked eye, rushing out of Ye Xuan's knowledge of the sea, and screaming toward the tyrant.

At the same time, the ten-level slave print was turned into a weak man, and went on!

"puff!"

"Humph!"

"Hey..."

In the next moment, the horror of the roaring out of the body has come to the forefront, as if a huge star is rushing at the top speed, Ye Xuan immediately spurts a blood arrow, his body is like a broken The line of kites flew away without any suspense.

It is the same mosquito that was later cultivated in the black hole. In the face of this horrible power of the 9th-order consummation, it is also a sigh of sorrow. The figure that hangs in the air is like a leaf wrapped in wind. It reveals the meaning of the storm.

As for the realm of the boundary, it is only the fourth stage of the black hole. Even the Nabo Mountain, which has not arrived in the late stage of this period, is even more instantly rushed out of the volley. The volley is backlit for hundreds of meters. After landing, it is still madly retreating. .

"boom!"

A terrifying noise rang out!

That is as small as a dusty dust, but in reality it is the purple-black dot that was formed by the ultimate compression of all the sources in the spiritual core of Ye Xuan's brain. At this moment, it exploded.

The power of the infinite spirit of the massive infinity is completely bloomed at this moment after the ultimate condensing. In just a short period of time, it will cover the vast space of hundreds of meters in diameter around the perimeter, and the inexhaustible spiritual source. The forces collided with each other and instantly turned into a huge energy vortex, frantic and violent, seemingly annihilating everything!

It is impossible to prevent it from happening. It is the supreme existence of the nine-order grand perfection of such a black hole. In the face of this whirlpool, the violent turmoil is almost violent, and its figure is suddenly stagnant for a few moments.

Just at this time, the ten-level slave print that turned into a faint miasma was also silently falling to the side of his neck, and it disappeared without a body, and disappeared without blinking!

In this scene, Ye Xuan, who was just turned back by his body shape, took his eyes to the bottom of his eyes, and when he was suddenly stunned, he was completely black and lost consciousness.

.....

After seven days, Ye Xuan was awakened from a coma.

Although the consciousness has recovered, his whole person's state is still very poor. There is no pain in the body. There is a temperamental starburst beast in his mind. He is constantly roaring and roaring. The sound of the turbulence made him a headache!

All of this is precisely the result of all the spiritual powers accumulated in the core of the mental source in the brain, which was caused by the extreme overdraft of spiritual power.

"Hey, all the magic cores are broken down, do you immediately extract the spiritual source?"

Just as Ye Xuan knew that the spiritual source of the sea was completely empty and depressed, the familiar system prompt sounded at the right time. It was actually the brain of the devil who had been thrown to the system to deal with it, and all of them had been broken down.

Under the surprise, he even gave instructions to the system to immediately extract all the spiritual sources.

Soon, a turbulent flow made Ye Xuan aware of the emergence of the sea, slowly but continuously infused into the core of the spiritual source suspended in the sea.

The pain of the desire to burst in Ye Xuan's mind gradually eased. After nearly an hour, he finally disappeared completely.

Until then, Ye Xuan realized that he was lying on the sofa in the core lobby of the top of the Black Wind Fortress!

As for the two mosquitoes and the Nebo Mountain, at the moment, they are practicing on the other sofa not far from the side. In addition, there is a figure in the hall, which has already been planted by him. The hegemony of the conquering, at this moment, sitting on the sofa not far away, shutting down and retreating, already no longer the violent and arrogant momentum!

"Master, are you awake?"

After all, it is the supreme existence of the 9th-order grand perfection of the black hole. Even if it is in the state of retreat, he still feels the wake of Ye Xuan in the first time, his eyes are wide, and he gets up.

On the side, both Nebo Mountain and Limoso were awakened at the same time, and they immediately rose up and walked side by side.

When Ye Xuan even asked about things after his coma, it was learned that the time was already seven days later. If he counted the time spent on the next two layers, Ye Xuan entered the Black Wind. There are half a month.

Fortunately, the space bastion of the demon's scouts has engraved the concealed method. The black wind is now in this state of concealment, and there is no need to worry about being discovered by the devils who have inadvertently passed by the outside world, thus causing the whereabouts to leak.

At the moment, Ye Xuan's status has not recovered, and it is really unavoidable to leave in a short time. Therefore, after some thoughts, he decided to use this opportunity to study the immortal star super-shards.

One thought of this, Ye Xuan even waved his hand, let Bai guess and Nebo Mountain, Limosa three free activities, do not have to stay here, and then took out a space box from the immortal world of the body, which contains A lot of magical black crystals.

"Hey, I found the magic black crystal! Do you immediately take the black crystal power to nourish the star brain fragments?"

After opening the space box, Ye Xuan flipped it directly to the body's phagocytic system. The next moment, the familiar system prompts quietly in his mind.

"Get it all out, right now!"

When Ye Xuan even issued an order that he immediately took it, he then ignored the matter and handled everything with his own engulfing system.

What he didn't expect was that only less than an hour passed, and in his mind, the system sounded again.

"Hey, all the magical black crystals have been taken! The current level of the star brain fragments: fragment level!"

Run out?

Ye Xuan immediately stunned and almost suspected that he had an auditory hallucination.

I want to know that he has just thrown it into the space box of the phagocytic system. It can hold a hundred cubic meters of magical black crystals. It is piled up and hills. The size of the nail cover is not immortal. The film, after only less than an hour, was all consumed?

The key level has not changed, it is still a fragment, and this appetite is too big, right?

Chapter 2728: Black mosquito test

With unwillingness, Ye Xuan even took two space boxes from the immortal world of the body, and all of them were thrown into the swallowing system, and then they immediately issued instructions to immediately grab them.

The magical black crystals contained in these two space boxes are also one hundred cubic meters. In the space bastion of the demon's scout, this object is the most common kind of cultivation resource, and it is extremely stocky.

Therefore, Ye Xuan does not worry about the problem of consumption at all. The only thing he is embarrassed is the growth rate of the immortal star super-brain fragments.

In the unlikely event that the massive magical black crystals go down, this guy has never responded, and has been stuck in the current fragment-level immobility, which is really troublesome!

I remembered this big thing in my heart. Ye Xuan's thoughts on retreating and rehabilitating were gone, and he waited uneasy. After about two hours, the familiar system prompts appeared in his mind.

"Hey, all the magical black crystals have been taken! The current level of the star brain fragments: fragment level!"

Still fragment level?

Ye Xuan is dumbfounded again.

With the first acquisition before, Ye Xuan had expected that the two space boxes that were thrown out this time would be consumed at about two hours, but this is not the point.

The point is that the guy swallowed two hundred cubic meters of magical black crystal, and its grades are still fragmentary.

This is clearly the wrong rhythm!

"This time, ten cubes are thrown together. If there is no movement, it is really unreasonable!"

After two consecutive disappointments, Ye Xuan became more and more calm. This time, he took out ten space boxes directly from the immortal world. A total of one thousand cubics of magical black crystals, all of which were thrown at the engulfment system. .

After nearly ten hours of restless waiting, the long-awaited system prompt tone once again arrived as expected: "Hey, all the magical black crystals have been captured! The current level of the star brain fragments: the residual film level!"

"by!"

"Before and after, I plunged in 1,300 cubic meters. It's hard to be dead, but it's too shameless?"

The result was still the same, and it hasn't changed since the beginning. Ye Xuan finally couldn't help it. In a hurry, he even swore, and the whole person was crazy!

"The last time! If I have no face and no skin to die, I really can't wait!"

After some entanglement, Ye Xuan decided to try again for the last time.

This time, the handwriting is bigger. A total of a hundred boxes of space that he took out from the immortal world, the magical black crystals contained in it, the total amount reached 10,000 cubes of terrible!

Since then, Ye Xuan has begun to wait for a long wait, until the evening of the fifth day, the system sounds of long-awaited, finally ringing again.

"Hey, all the magical black crystals have been taken! The current level of the star brain fragments: fragment level!"

"Lying grass..."

Ye Xuan collapsed on the spot, almost spurting out a bit of old blood, gnashing his teeth, killing the heart, and stagnation in the chest is unwilling, even more suddenly, more intense!

However, even if he was not willing, he did not intend to continue to try.

Thousands of cubics are thrown down and there is no reaction at all. Isn't it going to be thrown in 100,000 cubic meters? He remembered that he didn't care, he couldn't afford it at the crucial time. He really wanted to throw a hundred thousand cubic meters. Wouldn't he have to wait for the guards for two months?

People are crazy!

After thinking about this, Ye Xuan finally gave up the urge to try again. After the mood was completely calmed down, he began to ponder the matter. Even he even guessed that Naboshan and Limos were called by him. , together with analysis and scrutiny.

Of course, for the sensitive information of the immortal stars and super brain fragments, as well as the personal starry communication system, Ye Xuan is impossible to truthfully reveal, just a few words will be taken.

"The problem should be on the magic black crystal..."

When he just finished the general situation, the mosquitoes barely thought about it. Even when they responded: "You should be some of the most common ordinary-level magic black crystals in your hands? If it does not work, then I I suggest you try to get some chanting crystals to try..."

"Do you have more mourning? Is there any difference?"

Ye Xuan was paralyzed on the spot. Until now, he realized that the original black crystal is also the same as the original source of the star, but it is actually graded.

And the estimates he has in his hands are all the most common low-grade goods, no wonder no effect!

You must know that the subject of the super brain fragments is, after all, the most powerful starry sky super brain, even if it is now a fragment, but the grade has not changed, how can you see this most common inferior magic? Black crystal.

"Multiple chanting crystals refer to those magical star crystals that have a halo. The ordinary magic star crystal is just a translucent black crystal, and the crystal is empty, nothing."

Seeing that Ye Xuan is not clear, the mosquitoes will smile with patience and explain: "When you look at the crystal, you can see a layer of halo like a pupil in the crystal. Less than one weight, more than nine weights, halo The more you have, the higher your grade!"

"So, if you sneak into the crystal, if you subdivide it, you can call it a single singer, a double singer, until the last gossip, nine!"

"It turns out!"

Ye Xuan immediately realized, and then he shook his head and smiled: "So, in my hand, the amount of magic in the black crystal, I really can't find a high-end goods, don't say it, even There isn't a single one!"

At this point, Ye Xuan's brow wrinkled and turned to the side of the tyrant to guess the past: "Isn't it all hidden by you? Two large space bastions can't find even a single 瞳The high-level crystallization, this is not normal!"

"Whether it is a single or a slap in the face, the general devil strong, in fact, is not in contact..."

The mosquitoes smirked and said again: "Because in the vast expanse of the magician, the only place where you can produce more sacred crystals is whether it is the gossip or the worst single. All of them come from there, but the average ordinary demon has no qualification to enter!"

"So, even if there are occasional mourning crystals that fall from that place, they are all controlled by some high-ranking demons. It is impossible for ordinary demons to look at them!"

"However, if the owner really wants to enter that place, there is a perfect opportunity right now..."

Speaking of this, the depths of the bottom of the mosquitoes seem to have a very sloppy sorrow, and the words are slightly flashed. Then the words are followed: "There are black mosquitoes among the top ten tribes of the devil. The tribe's Son is vacant. If I remember correctly, there are still about two months. It is the day when the testimony of the black mosquito tribe is selected. As long as the master wins a trial quota, he can make a big swing. Entering the area..."

"Because, any of the top ten tribes of the Devils is in the forbidden land of the Devil's Star, and is selected through trial and trial."

"And the holy devil bans the land, it is the only place in the magician's star field that produces more sacred crystals..."

Chapter 2729: Target black mosquito

"So, I have to go to the black mosquito tribe first, and then get the qualifications of the black mosquitoes from the trial, and then go with other trials to the magic star in the center of the devil's star field? It seems a bit It's cumbersome!"

After listening to the explanation of Limosa, Ye Xuan finally understood, but immediately frowned, after a little thought, only to look at the mosquito again, slightly unwillingly asked: "In addition to the trial of the Son, Is there no other way to enter the magical star's sacred forbidden land?"

"The holy devil is not allowed to enter, it is said that even the inheritance of the devil's group is derived from it, so in the entire devil's field, where is the most important place!"

"In addition to the Tribes of the Ten Great Tribes and the Devils, only the ten great tribes of the top ten tribes and the ten high priests, as well as the descendants of the demon kings, are eligible to enter."

"But even if these exist, they are not always ready to enter, and there is only one chance to enter every hundred years."

"Even even the Emperor himself is like this."

"The sacred forbidden land is a mysterious independent void. The limit of one hundred years is precisely one of the rules of this void. It is like the avenue of the law that all things in the universe follow. It is not the manpower that can be changed and reversed at will."

"It turned out to be..."

Ye Xuan nodded, and then his face showed a smile of sorrow. He shook his head and said: "It seems that it is only possible to go to the black mosquito tribe to get a trial qualification for the Son, and it is not too late. Let's get off now."

During the talk, Ye Xuan turned to the side of the tyrant to guess: "You will stay behind the black wind, the magic of the three-storey warehouse area black crystal opened the supply, as soon as possible to the second layer of the four magic slaves The combat power of the Brigade has improved."

"As for the more than one thousand federal prisoners in the bottom of Wanluo Prison, I don't have to pay attention to it for a while. The jailers don't have to be dispatched. Let them air dry for a while. After the trial of the Holy Tribe of the Black Mosquito tribe, I will come over and deal with it. ""

After that, Ye Xuan even left the Black Wind with Limosa and Neboshan, and after walking out of the black-light passage entrance, the figure of the three people appeared in the outer universe.

"call out!"

In the middle of the wave, the black wind that had been refining into a magic weapon disappeared into Ye Xuan's body in an instant, and he was taken into the immortal world. Then, Ye Xuan sacrificed the black mosquito number and gave a few words to the Nebo Mountain. After that, he was asked to return to the black mosquito number and sit in the middle of it.

The reason why this is not to let Nebo Mountain stay outside and go to the black mosquito tribe, Ye Xuan is actually a decision made after careful consideration.

In fact, if he is not familiar with this magical star field and really needs a guide to stay with him, he even wants to get back to the black mosquito.

Although with the strong strength of their black hole, if you stay with me, when Ye Xuan walks this magician star field, he basically does not have to worry about security issues anymore, but this dependence is not a good thing, and there is still a pole. Big after trouble.

Ye Xuan has just entered this starry world with the cosmic galaxy as the big back. The realm of repairing the realm is still at the bottom of the first big realm. It is the challenge that should be overcome, the test and the growth, and the rapid To enhance the golden age of cultivation, it can be said that everything starts from the beginning. If there is a black hole in the world, like a flower in the greenhouse, it is tantamount to self-destruction!

Soon, with Ye Xuan turning the black screen of the black mosquito, the shape of the Nebo Mountain was instantly smashed into a stream of glare and disappeared.

After the black mosquitoes were born into the immortal world, Ye Xuan turned to the first mosquito to refine the realm into the third realm of the satellite, and confessed some problems that need to be paid attention to when walking the magician's star field. Then he waved a common private warship that was refining, whether it was appearance or performance, and broke into it with the mosquitoes, and quickly moved toward the star field where the target black mosquito tribe was located... ..

.....

The black mosquito tribe is located in the northwest direction of the magic star of the central domain. The area under the jurisdiction of the tribe occupies a vast void of one-tenth of the entire magician.

In this vast expanse of the genus, there are countless stars scattered in large and small, but the overall situation is basically the same as the third universe occupied by the human race. Most of the stars and stars in the void are That kind of ridiculous existence.

Not to mention the wisdom of life, even the plants are not, at most, it is only rich in some strange minerals and resources.

This ruined star is probably about 90% of the total.

The remaining celestial bodies are divided into two types.

One is the Warcraft Star, which was ravaged by various World of Warcraft. The mosquito was captured by the mosquito star from the big black-collar tribe. It is her ancestral land, and the whole mosquito star is covered with countless black mosquitoes. Warcraft. Among all the Warcraft stars in that star field, the mosquito star is the largest and most eye-catching.

The reason why the black mosquito is called black mosquito is the reason.

Warcraft Star, in this small one-of-a-kind star, it occupies more than 90%!

In the end, this small and small one is the place where the black moths of the black mosquitoes thrive, and they are called the magic stars.

The number is only ten!

The ten devil stars are commanded by the ten big heads of the black mosquito tribe. The devils under their arm are basically in the hundreds of thousands, and the warriors like the human army are 10,000. The number of rules.

Among the ten devil stars, the name of the black mosquito star is the main base of the entire tribe. The most powerful commander and high priest in the entire tribe is seated on the black mosquito star.

The Neibo Mountain, the head of the black mosquito star, was sent out to represent a black mosquito tribe to control a space bastion and to travel to the third universe of the human race as a frontline scout.

Except for the nine devil tribes other than the black mosquito tribe, basically all of them are sent out to represent the tribe to control a demonic scout for the Battlestar, and they are all the devils on the tribal main star.

As for the trial of the Son, it is generally chosen from the tribe to try the tester. Each magic star has only one trial quota. That is to say, the entire black mosquito counts down, only ten magicians can Enter the forbidden place in the magical star.

Ye Xuan came to see him, and he still had a face. If you want to get a share of the ten trial places, it is really not too easy.

It can even be said that there is basically no hope!

These conditions were all learned from the mosquitoes when Ye Xuan was on his way to the black mosquito tribe.

In addition, he did not know until now that the ninth big realm after the black hole was originally called the original point, and the black mosquito tribe leader, Zuo Fengtai and the high priest, the murder of the two priests, were all realm. Original point.

The former is the third order of the original point, the latter is the first order of the original point!

Chapter 2730: Weird

Although the great commander of the black mosquito tribe, Zuofengtai, has a strong third-order cultivation of the original point, and it is still the way to strengthen the body, but in fact, the high-priest priest, the high-level priest, is the only one. If you shoot, Zuofengtai may not be the opponent.

This situation is basically prevalent in the other nine demons.

The tribal leaders are generally strong and control the real power.

Although the high priest has a low realm and does not have a custom, but his status is detached. Because to become a high priest, you must first become a tribe.

After becoming a saint, you must also obtain the inheritance of some spiritual power from the forbidden land of the Holy Spirit, or use the secret of spiritual power, so that you can become a high priest.

Among the top ten tribes of the devil, in addition to the great commander and the high priest, the Son also has the qualification to enter the Forbidden City, but it can only enter once every 100 years.

For this reason, whenever a tribe's original Son descended and needed to select a new Son, all the demons in the Horde were almost unmoved. After all, to become a saint, you have the opportunity to become the high priest of the tribe, but it is a step into the sky!

Considering that there are too many competitors, and the black mosquito star as the main star of the tribe, the overall strength level of all the demonic strongmen under its jurisdiction must be slightly better. Yes, Ye Xuan decided to count from the other nine devil stars. Choose one of them as the starting point.

Two days later, Ye Xuan's private battleship finally entered the star field of the black mosquito tribe, and the closest demon star in front of the virtual sky was the Montenegro star, and Ye Xuan asked the direction of the mosquitoes even when The battleship was rushed to the scene.

The head of the Black Mountain Star is called Sha Ming. It is a magician who walks through the practice route. Its realm is the second order of the black hole, which is two lower steps than the Nebo Mountain.

Soon after, there was a huge star in the endless void in the sky, and according to the direction of the mosquitoes, this star should be the Montenegro star of one of the top ten magic stars of the black mosquito tribe.

When Ye Xuan went out with a private battleship with Limosai, he waved the battleship and took it away.

In the Devil's Star Field, and even among the various ethnic groups in the First Universe, other warships and magic weapons, things like warships and magic weapons are actually very common.

Under the background of the starry sky era, even different cosmic planes have been able to travel back and forth through the cosmic wormhole. Therefore, no matter whether it is a cultivation system or anything else, it can only be extraordinary, basically it will quickly Spread it out.

In fact, before Ye Xuan and Li Mo mosquitoes came from the edge of the Devil's Star Field, they had already encountered many warships of the Devil. At first, Ye Xuan was quite surprised, but after seeing more I am used to it.

However, although the achievements of science and technology in the first universe, even in the scientific and technological achievements, even the pressure on the scientific camp of the human race, the devil is just a slave group under the celestial group. For such a slave group, the celestial family does not. May spare no effort to take care of and care, so all the magic stars of the Devil's Star, there is nothing like the human ethnic group's administrative star defense.

However, there is still a star network. After all, the first universe is so big. If the star network is not popularized, the Tianzu people can't easily control all the slaves.

Moreover, the starry network of the first universe also uses the starry sky super brain as the biological intelligence hub.

Even the administrative stars of the Science and Technology camp of the Third Universe are just using the ordinary starry sky and super brain as the intelligent center of the starry network. The devil is the slave of the celestial family, and is used by ordinary demons in the star field. The starry sky is super brain, and naturally it is impossible to be a high-end item.

It is even more likely that it is only the lowest level of the starry sky super brain used by the Devils in the Ten Major Battlestars.

In this case, Ye Xuan can completely refine the starry sky of the black mountain star in the same way as the starry sky super brain that conquered the Black Wind.

This thought just passed by in my mind and was quickly abandoned by Ye Xuan.

After all, the Montenegro is a huge demon star, completely different from the space fortress. It even has no starry defense. Even if it refines its inner starry sky, Ye Xuan can't be like the black wind. Directly close all channels and completely ban all the demons.

In fact, all he needs is only the testimony of the Holy Mountain of Montenegro. There is absolutely no need to make such a big move to refine the starry sky and super brain. It is enough to just connect the network into the network and obtain some intelligence information.

After the decision, Ye Xuan even issued a search for the super brain wave frequency signal to the communication system, and selected the nearest signal channel to connect to its network command.

Moreover, considering the success of the starry sky super brain that was connected to the Black Wind Fortress last time, without waiting for Ye Xuan to react, there are innumerable information data entering his brain in an instant, which almost makes his mind unsteady. This time, Xuan also added a sentence after the instruction was issued. All the information data is not busy and transmitted all over the bones. What is needed, he will give the search conditions at any time, and then search for it temporarily.

In the next moment, the system sounded in the mind.

"Hey, start searching for the star network frequency... the search is over, start the condition screening..."

"Hey, check out! Access is successful! Network attributes: low-level star network, Montenegro! Super brain level: normal level damage! Is it refining? Or swallowing?"

Refining? Still devour?

When I heard the last sentence, Ye Xuan suddenly stunned and climbed a few black lines on the brain.

The immortal starry sky super brain fragments will not be broken by myself once? I didn't see it when I was in the center of the Batu No.

As the intelligent center of a communication system, it is necessary to devour the starry sky and super brain of other star networks. This style is a bit wrong. How do you feel the bandits who just came down the mountain?

Just as Ye Xuan's thoughts flashed through these thoughts, the system sound of the communication system sounded abnormally again.

"Hey, please confirm with the host, is it refining? Or swallowing?"

what's the situation?

Ye Xuan is completely suspicious. This is obviously not normal. He just squats and God does not respond immediately. At most, it will take two or three seconds.

The wolf who has just hungry for ten days has just gone this way!

With this in mind, Ye Xuan immediately responded with a clear attitude, neither refining nor engulfing!

However, he secretly left his heart and looked back. He must carefully ponder and see if this is a problem. After all, this performance is really too great for a central nervous system of a communication system. It's a little weird...
