

I CAN COPY TALENT

Chapter 1

Cluttered bedroom, a wooden bed.

“My head hurts!!!”

“I... Still alive? ”

Ye Tian's chaotic thinking slowly woke up, and the memories of the previous ones in his mind came to mind one by one.

At the same time, a new wave of memory merges with his soul.

“Turns out I crossed!”

He laughed bitterly, the body was not his, but a teenager with the same name.

He came from the era of 2019, but now it is 2119, also known as the first year 100.

That is, he came to an era a hundred years later.

The era a hundred years later is also known as the Yuanqi era, also known as the talent era.

The news in Ye Tian's mind about this hundred years was digested by him one by one.

At the beginning of 2019, there were many space cracks on the earth, countless fierce beasts poured out of the space cracks, and human beings suddenly fell from the top of the food chain, surviving under the ferocity of the fierce beasts.

In the face of the fierce beasts, humans tried to use heat weapons to destroy them, but a mysterious substance appeared between heaven and earth, which was called Yuan Qi by later people, which destroyed the structure of the heat weapon, so that the heat weapon could not play its due effect, and even the nuclear bomb of the ultimate weapon became scrap iron.

Mankind has suddenly entered the era of cold weapons, and weak human beings rely on cold weapons where they are the opponents of fierce beasts.

Fortunately, the fierce beasts that have just entered the earth are all low-level fierce beasts, which gives humans a chance to survive.

After the research of many scientists, human beings have found that the new mysterious substances on the earth can be used by human beings, so a new profession has emerged –

Warrior!

Exercise physical fitness, absorb vitality, break the limits of the human body, and be a warrior.

At the same time, the human genius is turned on.

A small number of people have talents, and the most common is cultivation talents, cultivation talents determine the achievements that a person can eventually achieve, and in addition to cultivation talents, there are other talents, such as sword talents, flame talents, ice talents, and so on.

Relying on talent and warriors, humans have gradually been able to compete with fierce beasts, but most of the area of the earth has been occupied by fierce beasts, and only a very small part of the area has been occupied by humans, and a survival base has been established.

It is worth mentioning that today's earth is far larger than before, and it seems that under the influence of Yuan Qi, the earth has expanded hundreds of times.

"Yuanqi, talent, fierce beasts, what a wonderful world!"

Ye Tian took a deep breath and immediately smiled.

Perhaps, it would be nice for him to be able to come to this era.

But soon, his face was heavy.

"Space cracks appeared, Yuan Qi came, a very small number of people on the earth awakened their talents on the night of the arrival of Yuan Qi, cultivation talents are innate, do not need to awaken, but other talents can awaken the day after tomorrow, but for the earthlings at that time, talent awakening is not a good thing, but a disaster, because there is no matching strong flesh, talent awakening is to find death, according to records, at that time, many human beings were destroyed by the powerful force brought by talent awakening, either dead or crippled."

"It seems that I was just because of the awakening of the inexplicable talent, the whole person... Boom! "

Ye Tian could be sure that at that time, he had absorbed countless Yuan Qi, and the whole person exploded, resulting in death.

Although a hundred years ago, human beings would suddenly awaken their talents because their bodies had not adapted to the vitality, but even if others could not withstand the power brought about by the awakening of talents, at most they would die or be crippled, and it is conceivable that my awakened talents must be incomparably anti-heavenly, but unfortunately they crossed, and they could not know what kind of talent it was!" Ye Tian was quite sorry.

After sorting out the news of his past life and this era, Ye Tiancai slowly looked at his current body.

This body is a 15-year-old body, placed in the Yuan Qi era, which is the period of just cultivation.

Before the age of 15, the body has not grown well, and it is not suitable for cultivation, unless some large families use some precious treasures to catalyze the growth of the body, they can cultivate in advance.

It can be said that 15 years old is a golden age, and once you reach the age of 20, if you cultivate again, even if the talent is very high, the future achievements are very limited.

“Fortunately it wasn’t an old man’s body, otherwise I would have been miserable.”

“Not right...”

Ye Tian’s face suddenly changed.

He finally remembered one thing from his memory, and that was the gift of this body.

The talent of this body is very low and low!

Weak and other talents!

In this era, the most important talent is the cultivation talent, and the cultivation talent from low to high is the weak talent, the secondary talent, the primary talent, the medium talent, and the high talent, it is said that there are higher talents above the higher talents, but that is not the secret that Ye Tian can know.

Anyone who is at least 15 years old can purchase a Talent Stone to view their talents, only to view cultivation talents, other talents require special attribute talent stones to be viewed.

The predecessor was after turning 15 years old, excited to buy a talent stone to check the talent in his room, only to find that he was a weak talent, desperate to attack the heart and scream for his life, which cheapened Ye Tian.

“Mother, weak talent, this is the most garbage cultivation talent, even to become a warrior has no hope!”

Ye Tian was also desperate.

Martial disciples and martial artists are the first two realms of cultivation, and martial artists are actually not real realms, martial artists are the real first realm, and with a thousand pounds of strength, they can become martial artists.

But if you want to become a martial artist, the minimum limit is the inferior talent, the inferior talent is a level higher than the weak talent, but in the end his life is only barely becoming a martial artist in the early stage, but in general, the inferior talent at least has a hope, once he becomes a martial artist, even if it is the early stage of the martial artist, he is also a big person, above ordinary people.

But weak talents are embarrassing, even if you cultivate all your life, you are also a martial artist, which is a talent limit.

“If only I could change my talent!”

Ye Tian comforted himself.

“Bang bang bang !!!”

There was a knock at the door.

“Brother, are you inside?”

A slightly childish girl’s voice came from outside the door.

Ye Tian knew that it was his sister Ye Yu in this life, who was 13 years old this year.

Ye Tian opened the door and saw a cute girl like a porcelain doll.

“Brother, how is your talent?”

Ye Yu asked curiously.

Talent is everyone’s secret, unless it is a loved one, if others ask it, it is a provocation, after all, no one wants their talent to be known by others, such as some highly talented people, once others know the specific talent, may lead to assassination.

In this world, such a thing has not never happened.

Therefore, no one is allowed to ask about the talent of others.

However, Ye Tian naturally did not blame his sister.

“Xiao Yu, my brother’s talent is very good, and he can definitely become a great warrior in the future!” Ye Tian stared at the light rain and smiled slightly, but the laughter was full of bitterness.

The next moment.

His pupils shrank and he was shocked!

Only to see a virtual image appear on his retina.

Human: Leaf Rain

Cultivation Talent: Inferior

Ice Talent: Elementary (unawakened).
