

I CAN COPY TALENT

Chapter 13

“Three copies of Intermediate Fierce Beast Blood should allow me to cultivate for five days, enough to increase my strength to 600 pounds of strength, or even more.”

Ye Tian roughly estimated.

The strength of 600 pounds plus the speed talent and the medium sword skill talent were enough to crush any martial artist with his combat strength, and even compared to the newly promoted martial artist, it would not be much weaker.

“By the way, I don’t know what effect the stalactites I got has, I have to check it out as soon as possible!”

Ye Tian also hoped that the stalactite could greatly improve his cultivation, maybe it would allow him to be promoted to a martial artist early.

In the hundred years of the last day, I don’t know how many strange treasures were born, so naturally someone sorted out the treasure catalogue, which is to avoid some warriors entering the wild and missing the treasures.

However, such a treasure book is not expensive, and you can buy it with a thousand pieces.

If it had been in the past, Ye Tian would not have been able to buy it, but now he was not short of money.

In addition to the three pieces of beast blood, the reward for the first place was 100,000 yuan.

So, Ye Tian went to the store and bought a relatively complete treasure book. Back at home, Ye Tian turned page after page, and finally turned most of the time to find a record of stalactite.

“The geocentric liquid, the Stone of the Earth Vein, absorbed the Heaven and Earth Yuan Qi and condensed for hundreds of years, and has the effect of enhancing cultivation talents, and only has an effect on those below the medium cultivation talents.” The Land of Birthplace Heart Liquid has a small probability of Birthplace Elemental Stone, which has a talent enhancement effect for martial artists below the level of advanced cultivation talent! ”

Looking at this introduction, Ye Tian was short of breath.

“God, it turns out to be a treasure that can enhance cultivation talent, once it is sold, don’t say 100,000, even if it is a few million, tens of millions of people will buy it, right?” Ye Tian murmured.

But in the blink of an eye, he snuffed out this thought.

If he did sell the geocentric fluid, he would be dead the next day.

At this point, he also understood why the spotted snake was able to break the racial restrictions and ascend to the level of the fierce beast.

At that time, he also took a look at the bloodline talent of the spotted snake, its bloodline talent had reached the medium talent, and it seemed to be two species with other spotted snakes, and now it seemed that the geocentric fluid had enhanced its bloodline talent, otherwise the spotted snake would not want to be promoted to the level of the fierce beast in his lifetime!

“Unfortunately, the effect of geocentric fluid on improving cultivation is too low, and I don’t worry about talent at all, even if this thing is useful to me, I don’t need to take it, and it is useless to me with medium cultivation talent.” It

doesn't work for me, and it can't be sold, what is it for? Ye Tian said with some loss.

Suddenly, he thought of his sister Ye Yu.

"By the way, my sister seems to be of inferior talent, and if you give her these geocentric fluids, wouldn't you be able to raise her talent to a primary or even intermediate talent?" Ye Tian thought.

Lunch at noon.

Ye Tian looked at his sister and said, "Sister, this is a good thing, you drink it!" Immediately he took out the geocentric fluid and placed it in front of Ye Yu.

"What is this?"

Ye Yu was somewhat curious.

She wasn't worried that her brother would harm her, she was just worried about whether this thing was good or not?

"Great complement of good stuff!"

Ye Tian said seriously.

He didn't tell his sister about the effect of geocentric fluid, after all, her sister hadn't yet touched cultivation, she didn't know what her talent was, and saying it would cause a lot of trouble.

"Brother, don't you drink?"

Ye Yu looked at his brother with wide eyes.

"I've drunk it, it's for you!" Ye Tian touched Ye Yu's head and said affectionately.

"Well, then I drank!"

Ye Yu drank the geocentric liquid in one gulp.

The amount of geocentric fluid was not much, and it was quickly drunk by Ye Yu.

“What does it feel like?” Ye Tian asked hurriedly.

After all, he had never drunk geocentric fluid, and he did not know the specific effect of geocentric fluid, but the treasure book said that anyone drinking geocentric fluid was fine, because the effect of geocentric fluid was very mild.

“I feel warm and comfortable!”

Ye Yu said what he felt.

“Sister, this thing is very precious, don’t tell anyone else, you know it!” Ye Tian solemnly instructed.

He was afraid that Ye Yu would slip up when he was playing with other partners outside, and if he was guessed by someone with a heart, then they would be dangerous.

“Brother, I won’t say that!”

Ye Yu nodded.

The two continued to eat.

While eating, Ye Tian used the Replication Talent to observe Ye Yu’s talent all the time.

About three minutes had passed, and Ye Yu’s talent had really changed.

Human: Leaf Rain

Cultivation Talent: Primary

Ice Talent: Elementary (unawakened).

After eating lunch, about another hour had passed, and Ye Tian found that Ye Yu’s talent had changed again.

Human: Leaf Rain

Cultivation Talent: Medium

Ice Talent: Elementary (unawakened).

Until the next day, Ye Yu's talent had never changed, and it was obvious that medium was the limit, because the geocentric fluid only had an effect on those below the medium talent, and Ye Yu had already been promoted to medium talent, and it was impossible to continue to improve.

"My sister is already a medium talent, and with the addition of the Ice Talent, it will not be a problem to become a top warrior in the coastal base in the future!"

Ye Tian was pleased.

After having money, Ye Tian sent his sister to the class, after all, his sister is only 13 years old, if he stays at home all day, he will be sick, and in the class, he can not only learn more knowledge, but also play with more partners, which is the day that his sister should have.

At first, her sister did not agree, because she knew the situation in her family, but when Ye Tian took out 100,000 yuan, she agreed.

As for the origin of this money, Ye Tian said that he participated in a competition at the academy and won the first place, and 100,000 yuan was a reward.

In fact, this is not a deception, after all, the trial is also a competition.

When his sister went to school, Ye Tian was relieved to cultivate.

In the blink of an eye, a month passed.

At this time, the blood of the Intermediate Fierce Beast had already been consumed by Ye Tian.

And a month's cultivation made Ye Tian's strength break through again, reaching 800 pounds of strength.

The strength of 800 pounds is already considered a high-level martial artist, and it is not far from impacting the martial realm.

In terms of real combat effectiveness, Ye Tian was almost comparable to a warrior.

Unfortunately, without the blood of the beast, his progress rate became slow, and his strength was not enough to go to the wild to hunt and kill the beast, so he could only slowly spend time to improve his strength.

Mo family.

Mo Shaobei was out of the customs.

Since the end of the trial, he had retreated his cultivation to impact the Martial Realm, and now he had entered the Martial Realm as he wished.

The whole Mo family was celebrating this great event.

Just as the outside world was talking about Mo Shaobei, Mo Shaobei was discussing something with his old servant.

"Elder Li, how is the investigation going?"

Mo Shaobei stared at the old servant Li Hai and asked.
