

The Game 1041

[Chapter 1041 The Bandit Of Knowledge! Learning A Book In One Go! 2](#)

Qin Lin immediately looked at the thesis on Li Kai's computer. Surprisingly, he could understand it this time.

"brother qin, i'm putting in so much effort to help you write your thesis," li kai said, as if he was trying to take credit for it.

"Old brother Li, you've worked hard. I'll write this thesis myself." Qin Lin smiled and patted Li Kai's shoulder. Then, under Li Kai's stunned gaze, he directly said to the researchers, " give me a copy of the test report on the tea tree. Also, help me prepare a set of test equipment.

"Alright, Chairman Qin!"

The researchers immediately got to work after Qin Lin's words.

In their eyes, Chairman Qin was a genius researcher and a great expert in cultivating Xiangshui tribute rice and the tea tree. The last experiment was still deeply engraved in their minds.

Li Kai, on the other hand, looked at this scene in shock.

These researchers didn't know about Brother Qin's background, but he did.

If one were to say that he had deceived the world to gain fame, the current old Brother Qin was no less than him.

How could Brother Qin write a thesis and an academic report of this level?

Brother Qin, if you write this paper and show it to Minister Lu and the people from the Chinese Academy of Sciences, aren't you just asking for exposure?

qin lin, however, had already taken the tea tree test report handed over by a researcher and read it.

If he were to look at these reports before, he would definitely not be able to understand them based on the knowledge from the genetic research book he had previously.

But this time, with just a glance, he could instantly bring in the data and deduce what was going on in his mind.

After reading the report, the other researchers also prepared a set of research equipment.

Qin Lin also took the tea branch that he had broken earlier, walked to the equipment, and began to operate it.

Li Kai was confused. He felt that something was wrong with Qin Lin today. He wanted to go forward and find out what was going on, but he was shocked by Qin Lin's next move.

It was a very complicated extraction experiment for genetic mutation.

However, old Brother Qin had actually agreed to it. This was even more complicated than the experiment he had done last time.

This experiment could be applied to the paper on the tea tree.

After finishing one experiment, Qin Lin switched to another one and continued to test and verify the tea leaves.

The more Li Kai watched, the more shocked he became. He even suspected that the person in front of him wasn't his brother Qin, but an expert who had done a lot of in-depth research in this area.

The researchers looked on with faces full of admiration. They were really prostrating themselves in front of their boss. Who would believe that he was a tourism major?

To be honest, all of them added together couldn't compare to Chairman Qin, who studied tourism. They didn't know if their studies were in vain.

Li Kai didn't forget to take out his phone and take a picture of Qin Lin.

This was a rare material, and there would be a time when it would be useful.

Qin Lin spent the rest of his time in the laboratory, doing experiments and writing papers. This time, he could experience the joy of being immersed in the ocean of knowledge.

Perhaps he also knew why those scientists spent their entire lives pursuing further experimental research.

On the other hand, he had relied on his cheat to steal the knowledge that did not belong to him. He was a knowledge thief, and this knowledge was given out of thin air by the cheat and not plundered from others.

As for Li Kai, as Qin Lin soaked in the laboratory, the shock on his face grew.

When he couldn't take it anymore, Li Kai even clenched his teeth and gave himself a slap to confirm that he wasn't dreaming.

...

In a village in your city, Zhao Chunhe started to pack up his clothes with the help of his wife.

His wife, who was beside him, said expectantly, you have to cooperate with this time's clinical trial. You have to believe in Linlin laboratory.

"En!" Zhao Chunhe nodded. He knew that this was his only chance.

Otherwise, with their family's income, they wouldn't be able to afford his cancer treatment.

Your city was not a backward place. After all, the house price had risen to more than 20000 Yuan. However, it was definitely not a developed place. After all, it was only a small county.

However, because of the influence of Linlin villa and Linlin company, the people in your city had a much better life in the past two years. However, in the face of cancer, no matter how good their lives were, they would become poor.

Zhao Chunhe's family was like this.

He wasn't a lazy man. Instead, he worked hard every day.

Previously, he had worked in a factory in Xia city and earned more than 7000 Yuan a month. He could still save a lot of money by maintaining his position.

since last year, he had returned to you city. by growing linlin watermelons, his family had become rich, and their days had begun to flourish.

however, the weather was unpredictable. at the best time of his life, he was diagnosed with late-stage liver cancer, and his whole family fell into the bottom of the valley.

The money he had saved in the past was like a cup of water on a burning cart of firewood.

but just as he was feeling hopeless, someone came to his door and said that he could participate in a clinical trial of linlin's laboratory to treat his cancer, but he had to sign a confidentiality contract during the treatment.

A person in despair would definitely grasp this opportunity tightly.

More importantly, this was Linlin's laboratory's clinical trial.

In you city, who wouldn't believe in Linlin laboratory?

This also gave him a sense of anticipation, as if he had seen hope.

After Zhao Chunhe was done packing up, she left the house. An ambulance was already waiting outside.

A person got out of the ambulance and said to Zhao Chunhe, " "Zhao Chunhe? Show me your ID card and other relevant information."

[Chapter 1042 470! The Bandit Of Knowledge! Learning A Book In One Go](#)

This person was obviously very responsible.

After all, the significance of this clinical trial was very great, and it was impossible for anyone to have the opportunity to replace him.

Although the news had not been leaked out at all and it was impossible for it to happen, it was not wrong to be cautious since Minister Lu had placed so much importance on it.

After confirming Zhao Chunhe's identity, he took Zhao Chunhe to the ambulance and headed to you city.

You City Hospital had been very busy since yesterday.

Yesterday, the yard had given the order to clear out an area and isolate it.

The people and patients in that area would have to be transferred to other areas, and the arrangements would be a little messy. After all, it was only a kuake City Hospital.

Moreover, it was arranged by the county Head and the Deputy County Head, which caused an uproar in the hospital and all kinds of speculations.

Some people even suspected that there was some kind of disease that required treatment in such an isolated area.

In the quarantine area of the hospital.

You City County hospital's director, Lin Qi, was already waiting with a few doctors and nurses that he had selected.

Their expressions were either serious, excited, or expectant.

compared to other people who were making wild guesses, they knew the purpose of the quarantine area. it was to cooperate with linlin laboratory's clinical trials, and the subjects of the experiments were all cancer patients.

Linlin's laboratory had actually developed a drug for cancer.

This was absolutely shocking news.

Now that the clinical trial was being held in you City County Hospital, they could still participate in it. How great of an honor and how much experience would that be?

If not for that, the Dean Lin Qi would not have personally led the team.

Even now, they still didn't know what the medicine was or what it was called.

at the side, sun xian and chen li were also waiting. minister lu's men had already gone to pick up the people from the clinical trials and should be arriving soon.

The two of them also attached great importance to this matter.

The tea leaves that targeted cancer had been cultivated in you city, and their tea industry was developing well. If the clinical trials were successful, the tea trees would be promoted and planted, and you city would have the right time, place, and people.

"Sun Xian, Chen Xian, I wonder what kind of medicine Linlin's laboratory has developed?" Lin ran, the director, couldn't help but ask.

"Dean Lin, you'll know in a moment." Sun Xian laughed and kept him in suspense.

At this moment, a few patients were pushed out of the elevator one after another. They were Zhao Chun and a few other people who were participating in the clinical trial.

Minister Lu and Yuan Shan followed behind.

for this clinical trial, they only borrowed you city hospital's location. they did not let you city county hospital participate in other aspects.

seeing this, lin ran immediately led the doctors and nurses to the patient for the clinical trial.

He also knew the identity of Minister Lu and Yuan Shan, so he reported immediately, " Minister Lu, academician Yuan, the equipment is ready. We can test the patients now.

"En!" "Let's draw their blood for a blood test first," Minister Lu ordered.

Lin Yang immediately waved his hand and asked the nurses to draw the ice Emperor's blood. He, sun Xian, and Chen Li also welcomed Minister Lu and Yuan Shan in.

inside.

A man brought by Minister Lu also took out a password box and entered the password to open it.

Lin ran and the other doctors were obviously attracted by it. They knew that it was the drug for cancer.

When the box was opened, a can of tea leaves appeared in front of them, and they were all dumbfounded.

How could it be tea leaves?

[Chapter 1043 Can We Live In This House? 1](#)

Lin ran and the doctors were all attracted by the tea.

They even subconsciously thought that Minister Lu was in a good mood and was in the mood to make tea in a clinical trial of this level.

But in the blink of an eye, he felt that something was wrong. If he wanted to make tea, he just had to bring tea leaves. There was no need to use that kind of protected password box to bring a can of tea leaves, right?

The can of tea leaves was taken out and Yuan Shan carefully took it. He also said to Lin Yang and the others, " "Dean Lin, this tea is for the clinical trial."

after these cancer patients are done with their various tests, I'll make tea for them to drink. In the beginning, they'll drink six cups a day. They'll make changes after checking the situation.

as for the tea leaves, there will be people looking after them. You just have to receive them on time.

Yuan Shan's words made Lin Qi and the doctors' eyes widen.

The tea leaves were used to treat cancer?

It wasn't that they were ill-informed, but that the news was simply too shocking.

They wouldn't be surprised even if he took out any medicine.

But these were tea leaves.

Before today, who dared to say that tea could treat cancer?

But they knew better that Minister Lu wouldn't joke, not to mention that this involved the Linlin laboratory, which had always been a place to give people surprises.

The cancer test was not that fast. Even if it was a clinical trial, the test results of Zhao Chun and the others were only out the next day.

The cancer symptoms of these people were different, so the data that they had to focus on was different.

For example, if Zhao Chunhe had liver cancer, he would pay attention to the statistics such as his AFP and CIA surgical field.

Of course, for Zhao Chun and those with late-stage liver cancer, these values were over ten times the standard.

The other people had to pay attention to the data of CA19 -9, CA724, CA50, CA242, CA15 -3, and various other data.

Before the start of the clinical trials, these values had to be recorded clearly and then tested daily for comparison.

Naturally, there were also CT scan reports.

When the test results came out, Zhao Chun and the others had finished the nutritious meal that the hospital had specially prepared for them.

Lin ran also personally led a few doctors to make tea for them and officially began the clinical trials.

when they were making the tea, lin ran and the others had already confirmed that the tea leaves were effective for cancer, but they still had strange and incredulous expressions on their faces.

When Zhao Chunhe and the others saw a nurse bringing in a few glasses of yellow liquid, they guessed that it was the medicine they were going to take.

"I want to finish it all." The nurse gave everyone a cup of tea and reminded them with a strange expression.

After all, it was just tea, but now it was being used to treat cancer.

zhao chunhe immediately picked up the cup of tea and poured it into his mouth.

He was very cooperative with the treatment because he knew that this was his only hope of recovery. Only when his cancer was cured could he go back and reunite with his family, not dragging them down.

However, as soon as he ate it, his face was full of shock. He couldn't help but ask, " "Nurse, why is this tea? It's not medicine!"

The other patients were also stunned.

their cups were also filled with tea, and they all asked, "

that's right. Mine is also tea. What's going on? "

"Nurse, did you get the wrong one?"

"....."

They were here to treat cancer, not to drink tea.

The nurse hurriedly explained, " this is no ordinary teapot. It's a special tea cultivated by Linlin's laboratory. It's used to treat cancer. Don't waste it.

when zhao chun and the rest heard this, they immediately looked at each other.

However, in the next moment, the few of them finished the cup of tea as quickly as possible.

They would not believe that tea could cure cancer.

If the tea leaves were cultivated by Linlin's laboratory, they would definitely believe it.

The nurse heaved a sigh of relief.

However, after Zhao Chun and the rest drank the tea, they felt an obvious abnormality.

After all, this tea had A +2 anti-cancer attribute.

After drinking a large cup of tea, Zhao Chunhe could clearly feel a special warmth in his liver.

This warm feeling made him very comfortable.

Moreover, in the late stage of liver cancer, there would be excruciating pain from time to time.

However, after drinking the cup of tea, he did not feel any pain at all.

Zhao Chunhe quickly realized this and couldn't help but smile. He could feel that the tea really had an effect.

A few days passed by quickly.

For the past few days, Zhao Chun and the rest of the group had been drinking six large cups of tea every day.

After a few days, Lin ran and the doctors started to feel incredulous.

This was because Zhao Chun and the other patients in the clinical trial had not taken any painkillers in the past few days.

In the late stages of cancer, there would often be clinical pain, and it was necessary to take painkillers to relieve the pain. The kind of pain that ordinary people couldn't endure.

However, in the past few days, Zhao Chun and the others did not seem to be in any pain.

In Lin ran's office, she was already waiting nervously for the report.

Sun Xian and Chen Li had also come over today. They were also a little nervous as they waited.

Minister Lu and Yuan Shan both sat there. They looked calm, but they were still a little nervous.

They were all waiting for Zhao Chun and the others' examination reports.

The general clinical trials for cancer were definitely not effective in a few days. The first to third phases of clinical trials were calculated in years, and it was possible to take five to ten years.

However, the tea leaves they were using now were different. Furthermore, Zhao Chun and the others had not experienced any pain for the past few days.

[Chapter 1044 Why? Can We Live In This House? 2](#)

Even though he didn't think it would work so quickly, he couldn't help but look forward to it emotionally.

Soon, a doctor came in with a few sealed bags and placed them on the table. President, Minister Lu, academician Yuan, sun Xian, Cheng County, and Zhao Chunhe's reports.

Yuan Shan was the first to step forward and take Zhao Chunhe's report.

The CT scan would definitely not show anything.

He immediately took out the various numerical test reports and read them.

It's too unbelievable! Yuan Shan looked at it and suddenly took Zhao Chun's test report from a few days ago and compared it with the one he had received a few days ago.

Then, he became even more excited. It's only been a few days, and Zhao Chunhe's AFP, CAA, and other values have dropped. According to this rate of decline, he should be able to recover after drinking this tea for half a year to a year.

This Lin Shenzhu is the same. Her CA19 -9, CA724, and other values have also dropped. Lin Yang was also looking at the report in his hand with excitement.

Without chemotherapy, the pathological values of a patient in the final stage of cancer would not decrease. Instead, it would only become more and more serious.

Now, even without chemotherapy, the value had dropped, which meant that the tea had really taken effect.

"Linlin's laboratory is amazing." Lin Qi couldn't help but praise.

Who wouldn't think so after receiving confirmation?

Sun Xian and Chen Li looked at each other and felt even more emotional. They could also see the urgency in each other's eyes.

He had to keep a close eye on Linlin's laboratory and wait for the tea tree cultivation to be promoted. He couldn't let anyone poach the tea tree.

"Really? Why would boss Qin major in tourism?" Minister Lu couldn't help but complain, "I really want to get him into the Chinese Academy of Sciences so that he can put his mind in the right place."

Unfortunately, he also knew that this was impossible.

After all, boss Qin had such a huge business.

He hated that they had known each other too late.

"I wonder how Mr. Qin's thesis and academic report is going." After Yuan Shan found out that the effects of the tea leaves were so strong, he became even more expectant.

"Let's go and tell boss Qin the good news. Also, ask him about the thesis and academic report." Minister Lu also wanted to know, so he left the county hospital with Yuan Shan and went back to Linlin Manor.

He wanted to use Mr. Qin's thesis and academic report to inspire those people at the Chinese Academy of Sciences.

...

Linlin's laboratory.

Qin Lin sat down in front of a computer and operated it. The printer started and began to print.

Li Kai, who was beside him, immediately ran to the printer and waited. He could not hide the shock on his face.

In these few days, he really felt that he didn't know old Brother Qin anymore.

Sometimes, he felt that his knowledge in some areas was crushed by old Brother Qin.

How long has it been? The other party had even asked him what books he wanted to read.

After a while, the printer stopped.

Li Kai hurriedly separated the printed thesis and academic report, then ordered them with a stapler. Then, he began to read them in a hurry.

He had been waiting for Brother Qin's complete thesis and academic report.

However, when he looked at the thesis and academic report, Li Kai was immediately immersed in it. The more he read, the more fascinated he became.

Even if it took a few days to come up with the arguments, theses, and conclusions, even if he knew that Brother Qin was just bullshitting, he still felt that it made sense.

After he finished reading the papers, he looked at Qin Lin and asked, "Old Brother Qin, on what basis?"

"Why? why?" Qin Lin was a little confused.

"Why is your thesis better than mine? And you're doing such a wonderful academic report?" Li Kai didn't understand and was hit hard.

"Perhaps I'm smarter than you, Brother Qin!" Qin Lin laughed and teased.

Why? Of course, he had to rely on the mysterious stone tablet, how to write a good thesis, how to write a good academic report, and those 12 books.

Li Kai was hit hard by Qin Lin's words. He angrily placed the thesis and academic report on the table.

Because he really couldn't refute it.

If Brother Qin wasn't smarter than him, how could he have written such a good paper and academic report in such a short time?

Not to mention the content, just the form alone was something he could not compare to.

One had to know that when he took the blame previously, he had spent a long time carefully studying how to write a thesis that could better fool people.

Qin Lin looked at Li Kai's expression and smiled proudly. He also picked up the thesis and academic report and returned to Linlin Manor.

As soon as he arrived at his office, he saw Minister Lu and academician Yuan walking over excitedly.

qin lin seemed to have guessed something as soon as he saw the two of them. the clinical trials at you city county hospital had been going on for a few days.

The +2 attribute should have some effect, so he could make a comparison.

As soon as Minister Lu entered the office, he eagerly told Qin Lin the results, " boss Qin, I have good news for you. The effects of the tea leaves that you cultivated are really strong. It only took a few days for the effects to start showing.

"really? That's great." Although Qin Lin knew the result, he still acted like he had just received good news.

His acting was so successful that even Minister Lu and Yuan Shan couldn't tell, and they were a little happy to share the good news.

Yuan Shan didn't forget about the important matter, so he asked, " "Boss Qin, now that I've seen the effects of the tea leaves, I'm looking forward to your thesis and academic report."

[Chapter 1045 Can We Live In This House? 3](#)

Now that he had heard about the thesis and academic report, Qin Lin knew his background. He handed the thesis and academic report he had written to Yuan Shan, the senior."Academician Yuan, please help us correct this!"

Yuan Shan took the thesis and academic report and immediately started reading. After knowing the effects of the tea leaves, he was looking forward to this.

Even if he knew that the papers and academic reports for the Chinese Academy of Sciences could not possibly write the core of the cultivation research, the level of research involved in boss Qin's papers and academic reports was high enough.

Just like Li Kai, Yuan Shan was also immersed in Qin Lin's thesis and academic report. The more he read, the more surprised he became.

However, his shock was different from Li Kai's. Li Kai was shocked because he knew Qin Lin's background.

Yuan Shan was surprised because the thesis was so well written. In his eyes, boss Qin was a monstrous genius. This was what he and Minister Lu both knew.

" amazing, amazing. it's so exciting. it's so bright! " yuan shan couldn't help but praise.

Minister Lu couldn't help but ask, " "Academician Yuan, how's boss Qin's thesis and academic report?"

"In this type of research, the number of people who can write a paper like this at the Chinese Academy of Sciences can be counted on one hand," Yuan Shan said with emotion.

"It's that powerful?" Minister Lu understood what Yuan Shan meant.

While chief Lu and Yuan Shan were still in shock, the greenhouse trees in Linlin Manor caused another sensation.

If it could be said that every greenhouse tree's similar appearance had caused a sensation before, it was now because the greenhouse tree had completely grown into a whole.

The greenhouse tree grew very fast. According to the ratio, it could finish growing in a month.

Now that the overall shape of the greenhouse tree had been fully developed, the next thing to do was to thicken the stem, grow the green leaves, and bloom.

The greenhouse tree's +2 beauty, +2 photogenic appeal, and +2 attraction attributes had also been triggered.

It was round and beautiful, with green leaves, flowers, and stems as one. It was magical to begin with, and it was hard not to attract people, attracting more and more tourists.

It was just that with the fence surrounding it, no one had discovered the specific use of the greenhouse trees.

Lin Han was attracted by the greenhouse. She was a home designer and liked beautiful things.

She had seen all the other projects in Linlin Manor, and these plants, which were called greenhouse trees by Linlin Manor, naturally attracted her attention.

For some reason, someone had posted these greenhouse trees on the internet in the past two days. The greenhouse trees in the video were inexplicably attractive, and many people were attracted to them.

This was also a strange thing. The greenhouse had been planted for so long, and there had been people who had taken videos and uploaded them before, but they had not been as attractive.

if he uploaded the video now, it would be just like the sea of triangular plum blossoms. it was beautiful just by looking at the video. moreover, now that he was closer, he was also attracted to it and felt that it was very beautiful.

It was a very strange feeling.

while lin han was enjoying the view, she saw someone from linlin villa remove the fence.

This was because the greenhouse trees were about to take shape, and they could also decorate the things inside. After all, it was going to be used as a Pavilion for tourists to rest.

Seeing this, Lin Han's attention was once again attracted. Because the fence had blocked them previously, no one had noticed the abnormality inside. Now that the fence had been removed, Lin Han's attention was once again attracted.

She couldn't help but be curious and wanted to see what was going on inside. Seeing the people of Linlin villa leave for the next place, she curiously moved closer to the greenhouse tree to take a look.

this looks like a door, " she said, " and that small gap looks like a window? "

Then, she peeked into the greenhouse through the door and saw the space inside.

"It's actually like this?" Lin Han was suddenly stunned.

She had thought that the tree's appearance would be stylish, and the paper inside would be messy, which was caused by the growth pattern of plants.

However, when she saw the dozens of square meters of space inside, she couldn't believe it. She thought of the door and the window. In her eyes as a designer, this seemed to be a single apartment with rough edges.

In other words, it was a simple room that had its walls painted. The green leaves and the flowers that were about to bloom were the best decorations.

Lin Han couldn't believe his eyes and wondered if he was seeing things.

[Chapter 1046 472-This Is Too Beautiful!](#)

This was the reason for the beggar's house tree?

After the initial shock, Lin Han still believed in her own judgment. She was an experienced furniture designer.

If she couldn't even trust her own judgment, she had no reason to be in this line of work.

Moreover, the stems were tightly packed and covered with green leaves. Even in winter, the cold wind could not come in. It was an excellent place to grow.

Therefore, she took out her special camera and started to take pictures of the interior of the greenhouse, not letting go of any corner.

Because of the designer's habit, she wanted to make a design for a model of furniture for such a treehouse.

She felt that such a house was too unbelievable.

Moreover, this greenhouse tree was completely in line with her aesthetic.

She would definitely come up with a perfect design.

After shooting the video, Lin Han was no longer in the mood to tour the villa. She hurriedly left the villa and took a taxi back to the Zhong min hotel. Then, she took out her computer and connected it to her shooting device, starting to model the greenhouse tree.

Linlin villa's actions naturally attracted the attention of other tourists.

After the fence was removed, the tourists who passed by naturally looked in curiously.

After all, the greenhouse tree had attracted a lot of attention the moment it was planted.

Therefore, many people also noticed that there was a large space inside the strange-looking greenhouse tree.

Soon, people discovered that the people of Linlin villa had started to build chairs and tables inside the greenhouse.

It was a place for them to rest.

Someone had taken a video and uploaded it to the internet.

It was only then that everyone realized why Linlin villa's people had removed the stools for tourists to rest in the first place.

For a time, the internet was lively again because of the greenhouse tree.

now I finally know why Linlin Manor wanted to dismantle the chair. I thought that Linlin Manor had finally made a brainless decision. It turns out that I was ignorant and ill-informed.

"i thought it was just for decoration. who knew there was more to it!"

"as expected, any movement in linlin villa will surprise people. i suddenly realized that such a beautiful resting place is simply too good. it's another unique feature."

@ the person above, it's not just unique, it's also unique that other scenic spots can't learn.

"..."

While the internet was abuzz with the greenhouse tree, a video attracted everyone's attention again:

let's share the experience of the greenhouse trees in Linlin villa. Find those greenhouse trees with a lot of flowers and enter them to rest. There will be a nice fragrance of flowers. Moreover, you can also feel very refreshed while resting inside. It's best to prepare snacks and fruits for yourself. It's absolutely a super enjoyment!

Naturally, this was the +2 attribute of 'refreshing'.

Obviously, someone had already entered the greenhouse with tables and chairs to rest, and had discovered this wonder and had a new experience.

This attracted everyone's attention.

Especially the tourists who were already in Linlin Mountain Villa.

Even Lin Lanzi, the manager of the multimedia department, noticed it.

She had to pay attention to any new projects in the villa immediately.

Now that the greenhouse tree had become popular, she also wanted to bring people to make a video and upload it to the official account.

"President Lin, does the greenhouse tree really have such a magical effect?" A girl with glasses asked curiously.

I don't know. We'll know once we go and take a look. Lin Lanzi sighed and said.

To be honest, she was quite helpless.

As the person in charge of publicity, she didn't even know what was so special about this new project. She even waited for the tourists to discover it first before realizing it.

But who would have thought that the greenhouse tree could have such an effect, where one could feel refreshed while resting inside?

Even Chairman Qin himself didn't know about this, right?

Moreover, she suspected that the tourist had exaggerated the truth.

The so-called refreshing feeling was probably the contrast between the cool shade of the greenhouse tree on a hot day and the fatigue from playing.

This was also why many people liked to take shelter in the shade on hot days.

Now, the sunlight could not penetrate the greenhouse at all, so it was the coolest place. The so-called refreshing feeling was probably this contrast, which was exaggerated by the tourists.

Lin Lanzi probably thought so.

But even so, she had been praised by the tourists, and they could totally follow suit when they promoted her.

As for how to follow suit and boast, he still had to experience it first.

lin lanzi, the bespectacled girl, went out of the office and soon arrived in front of the first greenhouse tree. however, there was already a long queue in front of the greenhouse tree, and there were already tourists waiting in line.

The same thing happened to several greenhouse trees. In front of one of the greenhouse trees, there was even a quarrel, "

"How can you be like this at your age? And you're not letting people in?"

"That's right, this greenhouse tree belongs to Linlin Manor, not your family."

"We're all tourists, so we can all go in!"

"....."

Lin Lanzi frowned. The bespectacled girl walked over and saw that an old lady was blocking the entrance of the greenhouse.

Although the space inside the greenhouse was not small, with dozens of square meters of space, which could provide a lot of people to rest, there was only one entrance. The entrance was blocked, so no one else could enter.

The other visitors were also unhappy with the old lady. It was obvious that she had been blocking the door for quite some time.

however, the old lady did not care about what the other tourists said at all. she even shouted in a very righteous manner, " I came here first. My son and grandson don't want to be disturbed. You can go. We'll be here for the night.

[Chapter 1047 472-This Is Too Beautiful!](#)

It was obvious that he was treating the greenhouse tree as his own.

At this moment, Lin Lanzi also saw a family playing and having fun in the greenhouse tree. They didn't seem to care about the tourists queuing outside at all.

The couple even pointed at the tourists lining up outside and smiled as if they were very proud.

Lin Lanzi frowned.

She had been paying attention to the hot news on the internet today and had just seen a video of a few old aunties occupying dozens of underground parking spaces for square dancing and even making a scene.

the netizens all felt that the bad guys were getting old.

She did not expect that Linlin villa would encounter such an unreasonable old lady.

Moreover, looking at the situation in front of him, it wasn't just a problem of the bad guy growing old. There was also the problem of the upper beam being crooked, the lower beam being crooked. It might also be inherited in the family.

"President Lin, how could she be like this? The greenhouse tree isn't her home." "I'll get her to move," the bespectacled girl said angrily.

"This kind of person won't listen to you. Besides, it's our negligence and thoughtlessness." Lin Lanzi stopped the bespectacled girl and then called Gao Yaoyao.

Gao Yaoyao was in charge of this matter. Then, she called Chen dabe.

To deal with this family, it was probably better to rely on the security Department.

Perhaps the security guards were not good enough. The aunties who occupied the underground parking lot were caught red-handed by the security guards. In the end, they had to be taken away by the police.

However, when the family members went to bail them out, they found out that there were reporters, so they all wore masks and hats and were too embarrassed to see anyone.

Indeed, it was unlucky to have such an old man in the family.

therefore, in the end, this matter might still have to rely on captain hong and the scenic area patrol police.

A moment later, Gao Yaoyao arrived. When she saw Lin Lanzi, she said sweetly, "Sister LAN Zi, you specially called me over. What's wrong?"

Lin Lanzi immediately explained the situation to Gao Yaoyao, then said, "Yaoyao, it's our villa's fault for not being able to handle this. Hurry up and settle it. Don't alarm Chairman Qin and the others.

Gao Yaoyao nodded and immediately said, "I'll arrange for a group of attendants to guide the visitors. This is a special situation. Set a resting time for each visitor. Once the time is up, we'll change the group.

Lin Lanzi nodded.

This method was still feasible in such a popular situation. After all, the visitors' attention was now on the greenhouse tree.

It was human nature to go for whatever was on fire.

The situation would be much better after the heat died down.

A moment later, Chen dabei also arrived.

He immediately went up to the Auntie with the security guards and persuaded her, " "Big sister, although our Linlin villa is a Scenic Area, it is also a public place. Other tourists can also enter the greenhouse. You can't do this."

The woman obviously did not care about Chen dabei and the other security guards. She even said disdainfully, " "What can't be done? Do you security guards have the final say? If you have the ability, catch me? Do you have the power to enforce the law? Do you believe that I'll lie down if you touch me?"

Chen dabei was left speechless by her bold and confident words.

The dissatisfied tourists all hissed and pointed their phones at the old woman, obviously planning to make her a hot topic.

Many of them had also seen the news of the old lady occupying the underground parking lot for square dancing.

To be honest, they were born in the 80s, 90s, and 00s. Even if they were criticized by the older generation, they were really not bad. At least they knew etiquette, righteousness, and integrity. They would not do such a thing.

sometimes, it was not unreasonable to say that bad people were getting old.

Chen dabei looked at the old lady in front of him, speechless. To be honest, he usually convinced people with reason.

In such a situation, he would always be reasonable.

If it didn't make sense, he didn't mind informing Captain Hong and the others to deliver the silver bracelet.

So, Chen dabei did not waste any time and immediately called Captain Hong.

A moment later, the police's electric scooter sounded with the siren.

After Captain Hong got out of the car to understand the situation, he directly led his men to invite the old lady's family into the patrol car.

He didn't waste any time and even gave her a silver bracelet.

One must know that Linlin villa's promotion to a 5A scenic spot was already set in stone, and the county had already prepared for the promotion of their Security Office.

Therefore, they had to carry out a thunderous operation on the public security of the scenic Area. Moreover, it was a real thunderous operation, and they could not just shout slogans.

However, to everyone's surprise, even after they were brought into the car, the old lady's family was still unconvinced and even shouted, " "What's there to judge? catch me!"

This could only mean that the legal awareness was too thin.

Naturally, the tourists were not stingy with their applause.

There was no doubt that with the popularity of the greenhouse tree in Linlin Manor, this family would definitely be on the hot search tomorrow.

She just didn't know how they would face their friends and colleagues.

The matter was resolved, but Lin Lanzi did not forget about the main matter. However, there were long lines everywhere she looked for greenhouse trees. In the end, when she went to the greenhouse that had just been completed, there was no longer a queue.

The greenhouse was not built with chairs, but a swing.

There were many flower houses like this, but after the construction of these flower houses was completed, the outer fence was not removed.

Because the swing needed the stem at the top to withstand the force, for safety reasons, they had to wait for the greenhouse trees to grow for 30 days.

At that time, even if a 500-pound fatty came to sit on the swing, there would be no problem.

Of course, it was also fine for Lin Lanzi to bring her assistant along if she wanted to experience it.

However, when Lin Lanzi sat on the swing with her assistant and shook for a while to rest, she could clearly feel the difference.

[Chapter 1048 472-This Is Too Beautiful!](#)

This was because the refreshing +2 attribute had been triggered.

"President Lin, this feels great." The bespectacled girl said in surprise.

Lin Lanzi nodded.

It was indeed very good.

At this moment, she suddenly realized that the refreshing feeling in the video was not an exaggeration. It was completely different from what she had imagined.

The feeling of suddenly becoming clean, clear-headed, calm, and relaxed was too real and perfect.

Lin Lanzi immediately thought that the following publicity did not need to rely on bragging at all. Resting in this greenhouse tree would really make people forget to leave.

Not long after.

Lin Lanzi and the bespectacled girl went back to the multimedia department and started to prepare for the following publicity. The official account of the villa and the video material had to be kept up.

However, as soon as she returned to the multimedia department, an employee came over to report, "Mr. Lin, look at the internet. The greenhouse tree is on fire again. One of the visitors is a designer. She made a design for the greenhouse tree and even modeled it. It's so beautiful.

Lin Lanzi was puzzled.

The staff member opened a video, and the voice said, "Hello everyone, I'm Lin Han. I'm sure everyone is paying attention to the greenhouse tree, Yingluo."

Linlin Manor.

In the office.

Qin Lin was controlling his game character to mine when Zhao mochen came over. In front of her was the flopping parrot Xiao Wu. "Master, I've brought the mistress to see you."

His words seemed to be asking for credit.

After knowing that Zhao moyin was in charge of food and that he would get delicious food after flattering him, the parrot only played with animals like wangcai and followed Zhao moyin around. It said, Mistress, you're even more beautiful today.

During this period of time, he felt that he had gained a lot of weight.

As soon as Zhao Moxi came in, he video-called Qin Lin and said, "Honey, look at the greenhouse trees, they're so beautiful. Can we renovate a few more of them? Or we can get a few in the manor."

Qin Lin took the video and saw a beautiful woman talking, "hello everyone, i'm lin han. i'm sure you're all very concerned about the greenhouse tree. it's very popular on the internet."

Linlin Manor seems to have turned the greenhouse tree into a resting Pavilion, but I found the real use of the greenhouse tree. It can be made into a fairy tale version of a perfect home.

so, I made a video model of Linlin villa's greenhouse and made a dynamic video design.

the video changed, and a greenhouse tree appeared. however, this greenhouse tree was different. there was a curtain, an open window, a windowsill, and a small windmill on it.

As the video zoomed in, it showed the interior.

The room had turned into a room surrounded by flowers and green leaves. There were light-colored flower pots and emerald green plants decorating the room, which complemented the romantic bed and quilt of fans, giving the entire space a fairy-tale like fantasy.

Moreover, the whole room was decorated with elegant blue decorations, which gave people a sense of romanticism.

There was a light purple sofa beside the bed, and there were cute dolls on the sofa. The simple-colored pillow on the bed complemented each other, creating a warm and natural space.

In addition, there were many other designs that made people feel tempted.

the designer named lin han was obviously a very romantic designer.

Even if it was just a model design, the greenhouse tree in the video was very attractive.

Qin Lin could not help but sigh. Lin Han had discovered the real use of the greenhouse tree.

In the game, this was the dwarf's house.

Now, Lin Han's design had obviously turned it into a romantic, sci-fi, and fairy-tale single apartment, which was very attractive.

"Hubby, what do you think of this greenhouse tree?" Zhao Moyu's eyes were filled with anticipation as he asked. He was obviously attracted to it.

Women always liked to be romantic. It had nothing to do with how much money she had. It was purely emotional.

When Qin Lin heard this, he smiled and pulled Zhao Moyi into his arms. He smiled and kissed her on the lips. "Linlin villa's lady boss has spoken, how can we not do it? We definitely have to forge it, and we have to look for Lin Han's design!"

Zhao Moyu felt very happy when he heard this, but he said honestly, "I'm in the office. You're so annoying!"

"Haha, then I'll kiss you again." Qin Lin's face was filled with pride, and he even had a new idea in his mind.

Not only could he get Lin Han to help him design a few greenhouse trees, but he could also take the opportunity to organize an event.

It had been a long time since the villa had held any activities.

I'll give you greenhouse tree seeds for the event.

and this would be the only greenhouse tree seed that would be leaked out, so it should cause a sensation, right?

perhaps these seeds would be the best wealth in someone's life.

[Chapter 1049 473!! Hot Event With Such A Special Effect](#)

Not only was Zhao Moqian attracted by Lin Han's design, but more and more people on the internet were also attracted by Lin Han's design.

Lin Han's video also became a hot topic at the fastest speed, and the comments section exploded.

Oh my God, I didn't expect the space of the greenhouse tree to be designed like this!

this single apartment transformed from a greenhouse tree is too romantic.

"I'm willing to live separately from my husband if I have such a single apartment."

"I just want to know if this greenhouse tree can be promoted. No matter how much it costs, I'd like to get one in the villa's courtyard, which is a few hundred square meters."

that's really too whimsical. I strongly recommend that Linlin villa build a greenhouse and tree residential area.

The next day, Linlin villa and the greenhouse were undoubtedly the most searched items on the internet.

First of all, the old lady who wanted to occupy the greenhouse tree yesterday was on the hot search news as expected.

The video of him being rude and causing trouble was uploaded to the internet and immediately went viral.

This could be said to be due to the popularity of Linlin Manor's greenhouse tree, or because there were too many aunties on the internet who came to brush up the values of newcomers. The netizens were disgusted and couldn't help but want to scold them.

Yesterday, it was an Auntie who occupied an underground parking space and square-danced as if she was in the right. Today, there was news of an Auntie making a scene in a Scenic Area like Linlin villa.

It was precisely because of these aunties who tried to make their presence known that the term 'aunties' gradually became a malignant tumor.

Therefore, the concept of bad people getting old was deeply rooted in people's hearts.

Seeing the middle-aged woman being taken away by the police in the video, the comments were even more popular.

we respect our elders and the elderly. We also give the elderly some preferential treatment in terms of social morality and the law. However, some elderly people really need to be severely punished.

He couldn't let respect and special care become the excuses for some old people.

naturally, apart from that, the greenhouse tree and the designer named lin han were even more popular.

In just one night, this beautiful designer had become the most popular person on the internet, and countless people had even tagged Linlin villa under his video.

Such a house was too beautiful. He believed that countless people would want to own such a romantic, fairy-tale house.

At this time, the official account of Linlin Manor released two announcement videos, which attracted everyone's attention.

The first video: "Hello, everyone. I'm Ian Zi. This is a video in response to everyone's @. I'll explain about the greenhouse tree.

this greenhouse tree is indeed an entire tree. It's very magical. After it grows into a greenhouse tree, it will also be very beautiful.

this greenhouse tree can indeed be used as a house. Not only will you be able to enjoy the fragrance of the flowers, but you'll also feel refreshed. The key is that it's very sturdy and can basically be lived for decades. Everyone must be curious about whether this greenhouse tree can be promoted.

" i'm sorry to tell everyone that this greenhouse tree is a genetic mutation that current science can not explain. the number of seeds is limited, and new seeds can not be cultivated. within 20 to 30 years, there should be no way to crack it and promote it. "

Many people were disappointed when they saw the video. After all, when they saw the greenhouse tree, many people had already begun to fantasize about having a greenhouse tree.

Many people had even planned where they could plant the greenhouse tree.

Now, he was telling them that there was no way to promote the greenhouse tree?

However, when he thought about the magic of the greenhouse tree, where a seed could grow into a house of dozens of square meters, it seemed normal that there was no way to cultivate it.

After all, science was hard to explain.

However, this undoubtedly showed that the greenhouse tree was very precious. Furthermore, it was unique to Linlin Manor. Even if others wanted to get it, they could not.

The second announcement video also attracted a lot of attention: Hello everyone, I'm Ian Zi. I'm sure you've all seen the designer Lin Han's designs. Our boss and lady boss also like them very much.

so, I'm planning to buy the design of designer Lin Han and invite her to help build a greenhouse tree according to her design.

"as a reward, our boss will gift a greenhouse tree seed to designer lin han."

When the netizens saw this part of the video, they went crazy.

The previous video had already shown that the greenhouse tree seeds could not be cultivated or promoted. Only the ones in Linlin Manor could be cultivated.

Now, the owner of Linlin villa was planning to give Lin Han a greenhouse tree seed because of her design?

This was too envious.

Come to think of it, a greenhouse that could be lived in for decades was definitely not less valuable than a house in a first-tier city, right? Or it would be more expensive.

Moreover, this might be the number one greenhouse in the outside world.

However, the video was not over yet.

In the video, Lin Lanzi continued. at the same time, our boss and lady boss will also be holding a creative design event. That is to design a design for the greenhouse tree model. They will also submit it to our Linlin Manor official account.

" our official account has already created a page to vote for all the fans of the villa. there are also videos that provide material for the greenhouse tree model. "

by then, the five most popular designs and the five authors that Our Lady boss likes will receive a greenhouse tree seed as a gift.

in addition, for the five most popular designs, two lucky fans will be chosen from each of the voting fans, and each of them will be given a greenhouse tree seed.

[Chapter 1050 473!! Hot Event That Has Such A Special Effect](#)

and these greenhouse tree seeds will be out of print. Besides Linlin Manor, only these greenhouse trees will be born in the outside world.

Once the video was released, it caused a sensation.

he had thought that this greenhouse tree only existed in linlin manor, and that it would only be a masterpiece to the outside world.

But who knew that in the blink of an eye, the owner of Linlin villa would give him seeds.

Lin Han had one seed, and there were ten more seeds that could be obtained through the submitted design. In addition, Linlin villa would draw lucky audience members to give away ten more seeds.

This meant that 21 SEEDS would be distributed.

These 21 SEEDS would be considered a masterpiece in the outside world.

As soon as the video was released, it immediately caused a sensation. In a short time, there were people who wanted to buy it in the comment area.

one million. Whoever wins can come to me with the seeds.

don't embarrass yourself with a million. I'll buy one for three million!

5 million.

"....."

The price was getting higher and higher. These people had obviously seen the price of the greenhouse tree. Not only could they live in it, but it would also be valuable as a collection in the future.

Of course, there were also people who bought the seeds and tried to cultivate the greenhouse trees. These people obviously did not know enough about their own abilities.

Without external hacks, it was impossible for them to train it.

Soon, the price of greenhouse tree seeds online was raised to 10 million.

The person who bid was also a familiar internet celebrity, or rather, a rich second generation, young master Wang, who looked like a loser the most.

Seeing the other party's forthright offer, everyone knew that the other party might have really made a fortune from his recent investment, just like what the news had said.

Of course, the price of 10 million for one seed also caused the entire internet to explode.

Linlin villa's seeds hadn't been given out yet, and the event hadn't even started, but the price had already been raised to such a high level. It was really terrifying.

this also made countless people pick up their pens and computers, download the modeling video material provided by linlin villa, and start to design.

There were professional designers, students, and laymen among them, and all of them were there for the seed.

naturally, more people turned on tiktok in a hurry, searched for the linlin villa account, and chose to follow the official account of linlin villa.

Because only the fans who followed Linlin villa could vote, and only if the voted design won would the voting fans have a chance to win the prize.

One seed was worth 10 million, and there were 10 chances.

Wasn't this better than buying the lottery?

In a short period of time, it seemed that all the users of mouyin who had seen the video went to the official account of Linlin villa to follow it, causing the number of followers on the official account to increase rapidly.

Mouyin naturally noticed this as well. After all, the user traffic was surging towards Linlin villa, so it was not like they could not see it.

They could only sigh at the fact that Linlin villa had completely mastered the flow of traffic.

However, they had no other choice. They could only manipulate the words of internet celebrities. If they wanted to ban them, so be it. Even the most popular internet celebrity would die after being banned for a month or two. They could make another one popular at any time.

However, Linlin Manor was completely different. It was an existence that could not be replicated.

In addition, the power of Linlin company was unparalleled. Since they dared to ban Linlin villa, there was no doubt that there would be platforms immediately inviting Linlin villa.

Moreover, the crazy popularity of Linlin villa would be popular on any platform. At that time, it would take away the traffic of their music.

More importantly, Linlin villa was a hot topic every three days. Would they release their voice? He was afraid that Linlin Manor would Sue him.

Hence, they could only let Linlin villa run wild in the ocean of traffic.

Lin Lanzi was in her office, looking at the increased number of fans on the official account of the mountain villa. She couldn't help but smile.

Chairman Qin was still Chairman Qin. He was really good at event planning.

This simple event was enough to make the official account of the villa gather fans like crazy. With this rate of increase, it would probably break the 100 million mark after the event.

The attraction of the greenhouse tree seeds could be seen.

Obviously, Lin Lanzi didn't know that this was just Qin Lin's idea because his wife, Zhao moqian, liked it.

However, the internet was already full of discussions about the greenhouse tree seeds, and Lin Han had once again become the center of attention.

He did not know who the other greenhouse tree seeds belonged to, but Lin Han was already qualified to get a greenhouse tree seed.

Lin Han felt that it was unbelievable. She had only made a model design for the greenhouse tree because she liked it, but who knew that she would become so popular?

She used to have her own media account, which was what every designer did. They shared their designs with their media accounts to attract potential customers.

However, she had only had 1000 fans in this account after half a year.

Just because she had posted the design of the greenhouse tree, her background notifications had never stopped. In a short time, her followers had increased from 20 million to more than 500000, and it was still moving towards 1 million.

This made her feel like she was dreaming.

Furthermore, her relatives, friends, and classmates, who she had never contacted in the past, were all contacting her to congratulate her.

It made her truly understand what it meant to never lack 'friends' if you were successful.

What was even more unbelievable to her was that the owner of Linlin villa had asked her to build a greenhouse tree according to the design and had even given her a greenhouse tree seed.

Because of this, his private messages were almost blown up. Countless people asked her if she was selling the greenhouse tree seeds. Even the account of the big star, Chen Chichi, offered 10 million Yuan, saying that it was for her good friend, young master Wang.

This simply made her a little confused.

the greenhouse tree seed and the 10 million yuan kept spinning in his mind.

In the end, Lin Han rushed to the office area of Linlin villa. She knew that it was more important to agree to build a greenhouse tree for the boss of Linlin villa with her design.

...

The internet was abuzz, but Qin Lin, who was the instigator, didn't pay much attention to it. After all, he was the boss. If Lin Lanzi and the others didn't do a good job, they wouldn't be able to live up to their salary.

In the office.

He sat in his office chair, his attention completely focused on the game in his mind, controlling his game character to go to the lake mine to continue mining.

However, his luck today was still not very good.

He controlled his game character to excavate four layers in a row. After excavating the 39th layer, other than gold, silver, and copper, there was only diamond ore. There was no special harvest.

There wasn't even a single strand of hair, let alone bones or spring water.

This made him raise his legs suspiciously to look at whether he had stepped on something left by wangcai.

But that wasn't right, if he stepped on something left behind by Wang Cai, there should be luck.

When he thought of this, he had the urge to call out to Wang Cai.

Fortunately, his dignity as the master made him restrain himself.

control the game character to enter the 40th floor of the lake mine and continue mining.

After digging on the 40th floor, perhaps because his luck had gotten better or because he had just reached the 10th floor, he saw a special notification after digging for a few times.

[congratulations, you have discovered a special meteorites!]

Meteorite?

Qin Lin was a little confused. What the hell is this?

He knew about diamonds and Jade. They were all expensive things.

He had never heard of this profound insect stone.

He continued to control the game characters to dig, but other than the gold, silver, and copper ores, the special profound insect stone appeared again as if it was trying to make its presence known.

[congratulations on obtaining a special meteorites!]

"Ran ran." Qin Lin was just talking about the story. Again?

Continue digging!

[congratulations on obtaining a special meteorites!]

...

[congratulations on obtaining a special meteorites!]

After receiving this item four times in a row, Qin Lin was completely speechless.

"....."

What's with this lousy game producer? It was the 40th floor of the lake mine that led to the meteorite's home.

He was not in the mood to dig anymore.

He was so angry that he controlled his game character to go back to the farm. Then, he entered the game with a thought. He wanted to see what the hell this thing was and how special it was!

[(rare) special meteorite: extremely precious!]

Seeing the rare and extremely precious remarks, Qin Lin wanted to curse. We've already dug up four of them on the same floor, and you're still rare and extremely precious?

However, when he saw the following remarks, he was completely dumbfounded.

[this is an extremely precious special stone formed by a special meteorite falling process. There aren't many of them in the world, and it has a special effect of rubbing against the soles of your feet: Channel unblocking +2, stimulating Yingxiang point for gastrointestinal health +2, stimulating yinbai point for spleen health +2, stimulating Shangming point for bladder health +2, stimulating Yongquan point for kidney health +2 for Xuanyuan comfort +2, special scientific effects +2!]

It had a special effect when used to rub against the soles of one's feet?

He was dumbfounded by the list of health care effects.

Although the foot bath Industry had always promoted that there were many degrees on the sole of the foot that covered the whole body, the special effect of the special meteorite was too special, right?
