

The Game 1441

[Chapter 1441 Linlin Rice Is On The Market! Hurry Up And Hug The Thigh 1](#)

Optimus Prime and Megatron's matter went viral on the internet for a long time before it began to drop. after all, the netizens would always get tired of paying attention to something.

Even if Linlin company had maintained its popularity all year round, it was only because of the continuous popularity of its products that Linlin company had become a fixed impression in everyone's mind. They would be reminded of Linlin company with just a thought.

This kind of inherent impression was more useful than any publicity.

However, Optimus Prime and Megatron's popularity was growing internationally. especially the people from america.

It seemed that because their own country's technology had been surpassed, the people of America were unwilling to admit it. Some people even began to organize demonstrations, hoping that the United States would quickly release the relevant robot technology.

in the hearts of these people, they obviously felt that if the eastern country could create such technology, their country could also do it.

After all, their country was the Overlord of technology.

this matter caused quite a stir, and the entire drifting country was abuzz with news.

In a laboratory.

As he watched the demonstrations in the news, he felt that there was something wrong with these people's brains. They didn't know anything and only knew how to hold back the demonstrations.

What the hell did these people know?

with optimus prime and megatron's technology, it would be difficult for america to produce them within 20 years. it might even be possible for them to produce them with a 30-year gap.

They even paraded, how embarrassing.

While Optimus Prime and Megatron were causing an uproar on the International stage, the domestic market had already quieted down because many supermarkets in the country had launched a product.

this product was very attractive.

huajing supermarket was a relatively famous supermarket chain in the south. it was powerful and had a good reputation. there were more than a dozen of them in the provincial capital of min province.

Today, after a notice from Hua Jing supermarket was played on the DLE and other display panels, the entire supermarket was in a rush to buy.

the first batch of Linlin rice is on the market today. Each person is limited to 5 catties, until it's sold out, "

Everyone knew about Linlin's tribute of rice a long time ago, but they also knew that it was not something that just anyone could eat. Once it was out, it would be sent to the capital in the first batch.

It could be said that ordinary people couldn't afford to eat this kind of rice, or even buy it.

But Lin linmi was different.

Previously, the new rice forest had gone viral on the internet. The peanut-sized rice grains had long attracted everyone, especially the new rice forest, which was an extremely famous landscape.

When the news first came out, countless people were shocked. People seemed small in front of the rice.

However, this Linlin rice was something that everyone could afford to eat.

Therefore, countless people were looking forward to it.

When this rice was completely popularized, it would be the time to realize Hexia's cool dream.

Now that the Linlin rice had appeared, it also meant that the 'he Xia's cool dream' was about to come true.

Most importantly, he wanted to try the Linlin rice immediately. After all, everyone would be eating this kind of rice in the future.

wang yang also returned home early in the morning to pick up su juan.

Su Juan had been waiting for a long time with her child in her arms. Once she saw him, she immediately said, " honey, hurry up. I heard that there's a long line at the supermarket. They might be sold out soon.

"Don't be anxious, I've already called for them. We'll go get them," wang yang immediately said.

As Lin Lin's agent, he and Lin Lin Rice's agent naturally knew each other, so he didn't need to line up. The other party would also show him some kindness, so he just had to give them a call.

although they were all linlin's agents, he was one of the earliest ones. more importantly, he knew chairman qin, which was something that no one else could compare to.

The other agents didn't even get to meet with President Qin.

So, no matter who the other agents were, they had to give him face.

When they arrived at Huajing supermarket, they saw a long line. It seemed that Linlin rice was really popular.

a moment later, wang yang saw a man in a suit walk out. this was the representative's employee.

This person walked to the side of Wang Yan's car, and respectfully said, " "CEO Wang, this is Lin Lin rice!"

He had no choice but to be respectful. Mr. Wang was very famous in min province. He might not be the richest, but because of his relationship with the boss behind Linlin company, there was no one on the internet who did not know about this 'brutal man'.

Furthermore, there was no one in the nightclubs of min province who did not know about this Prince-like man. The Hangover grass was one of his products.

It could be said that this man was even more famous than the richest man in min province.

After Wang Yan took the Linlin rice, he nodded to the other party and opened the trunk for the other party to put the rice in.

"Hubby, you're amazing!" Su Juan also gave Wang Yan a kiss without hesitation.

As someone who came from a nightclub, she was very good at acting coquettishly. Furthermore, Wang Yan's reputation in min province made her very proud.

For example, now, people had to line up to get this Linlin rice, but with a phone call from her husband, people would deliver it to her door.

This was the difference.

After Wang Yan closed the car trunk, he brought su Juan back home. Carrying the bag of rice, once they reached home, su Juan said happily, "hubby, I'll cook right away. Let's try the taste of this Linlin rice.

"En!" as soon as wang yang nodded, he received a message from jiang lingling, "brother Yan, Linlin rice is on the market today. I really want to eat it. Can you take me to buy some? I'll make it for you.

When Wang Yan saw this message, he sighed and could only reply with one message: "Wait for me!" He said.

[Chapter 1442 Linlin Rice Is On The Market! Hurry And Hug The Thigh \(2\)](#)

After sending the message, Wang Yan shouted at su Juan, who was inside, "i have something to do, so i'm going out."

"hubby, remember to come back for dinner," su juan immediately replied.

"Alright," he said. Wang yang answered and went out to pick up Jiang Lingling.

jiang lingling was still as sexy as ever. she gave him a gentle hug and a passionate kiss as soon as she saw him.

"sister lingling, where's your boyfriend?" wang yan immediately asked.

Jiang Lingling snorted. he's on a business trip. He'll only be back in a week. You can come over in the next few days.

wang yan didn't know how to respond to this.

He felt that he should break this relationship with her. After all, she already had a boyfriend.

Wang yang got into the car with Jiang Lingling, started the car, and headed to Huajing supermarket again. After making a phone call, the man in the suit came out with another bag of Linlin rice.

When the man saw that Wang Yan had another woman in his car, he wasn't surprised. After all, wasn't it normal for a Big Shot like Wang Yan to have another woman outside when he had one at home?

It was just that both of them were so beautiful and sexy that it made people envious.

He couldn't even find a boyfriend even if he wanted to.

Wang yang drove Jiang Lingling home after she got the Linlin rice.

brother Yan, come to my house for dinner later. Linlin rice just came out. I'll make it for you, " Jiang Lingling said after she got out of the car.

Wang Yan didn't know how to respond.

su Juan had already prepared dinner. just as she was about to refuse, jiang lingling said, " "Brother Yan, I'm pregnant. The child might be yours."

"Tsk tsk," he suddenly didn't know what to say.

When he realized what was going on, Jiang Lingling had already walked inside.

This f * cking Kasaya

Not waiting for Wang Yan to think more, the phone rang again. It was Jia Nan, that sister.

This girl was the most difficult to deal with.

He subconsciously thought of something. It must be about Lin linmi.

He didn't want to answer the phone.

However, when he thought of the last time when he didn't pick up the call, the other party actually asked su Juan out to go shopping and play. He could only helplessly press the answer button again.

which woman would be as bold as this sister jia nan? The key was that the other party could play very well with su Juan, just like best friends. This was a little difficult to describe.

or rather, he didn't understand this girl's thoughts at all.

wang yan picked up the phone, and as expected, a voice came from the other side."brother yan, linlin rice is on sale today, can you take me to buy it? I really want to eat it!"

"Al." Wang Yan sighed deeply, then started the car and drove away. Soon after, he picked up Li Jia Nan, and also brought her to Hua Jing supermarket.

After another phone call, the man in the suit came out again.

"Chief Wang!" The man looked at the new beauty in Wang Yan's car, and was really envious.

ceo wang was the role model for all men, the goal that all men fought for.

If wang yang knew what he was thinking, he would definitely say helplessly that these people didn't know his pain. If they did, they wouldn't be envious.

Who could understand the pain of eating okra all day long, afraid of running out of Linlin medicinal wine?

After his family paid the public salary, he had to go to the office to be squeezed, and after the office was done, the other had to drag him to the car.

He felt that if this continued, his life would be shortened a lot.

Wang Yan drove Li Jia Nan back to her house.

Li Jia Nan said, " brother Yan, I'll make Jinlin rice for dinner tonight. You have to come. I know sister su Juan made it too, but it's different from what I made. If you don't come, I'll go to sister su Juan for a free meal and eat her Jinlin rice.

"Huahua," Wang Yan could only sigh deeply when he heard this and helplessly drive home.

It's difficult.

When she got home, she saw su Juan busy in the kitchen.

As he walked into the kitchen, he smelled the faint fragrance of rice.

The fragrance of the rice was obviously stronger than the ordinary rice he usually ate.

clearly, the linlin rice was superior to ordinary rice in this aspect.

Smelling the fragrance of the rice would at least increase one's appetite, right?

Not long after, the rice was ready.

Su Juan immediately took out the rice, filled it up, and passed it to Wang Yan,"Hubby, try it!"

Wang Yan nodded and took the rice to taste it. His eyes brightened slightly."Although this rice isn't as good as Linlin tribute rice, it's definitely more delicious than the ordinary rice."

When su Juan heard this, she immediately filled a bowl of rice for herself and tasted it. Indeed, she found that the rice was even more delicious. She immediately said,"It's really more delicious."

Perhaps it was because it was the first time they had eaten the Linlin rice, but they were very happy.

Wang Yan couldn't help but eat two large bowls.

After all, it was the first time he had eaten this rice, so the feeling was different.

After eating an extra bowl, wang Yang's stomach was a little full. At this moment, his phone started to vibrate.

He took out his phone and looked at it.

"Brother Yan, I'm done." Jiang Lingling.

"Brother Yan, when are you coming over for dinner?" li jia nan.

seeing this, wang yan's expression changed slightly, and he subconsciously rubbed his stomach. he had actually forgotten about these two, and now his stomach was a little full.

It wasn't just Wang Yan. Many people who bought Linlin rice also found the rice to be more delicious than usual after they made it. Their children ate more.

This also made the first batch of people who bought the Linlin rice go online and promote it, praising it.

Naturally, Lin linmi's feedback also made many companies nervous.

An tai Co., Ltd. Was one of the largest rice merchants in the country. They had their own rice planting base and had a wide market.

The owner of an tai Co., Ltd. Was called Li He. He was a man with great foresight, so when Lin linmi came out, he had someone buy some and send it to his house.

The first thing Li He saw when he got home was his wife making Linlin rice. Seeing him, he said, " wait a moment. Linlin's rice will be ready soon. You'll know how it is then.

Li He nodded when he heard his wife's words. She was very sensible and knew what he was thinking.

What he wanted to know the most was Lin linmi's condition.

He had been paying attention to the Linlin rice when the Linlin laboratory had first released it.

After all, with the gimmick of " he Xia's cool dream ", the attention was too high. It was hard not to know.

However, Lin linmi hadn't been fully released before, so he wasn't in a hurry.

After all, the growth of rice was not so fast if he had to cultivate the seeds.

But who knew that the promotion of the Linlin rice was beyond his imagination? the first batch of Linlin rice was sold so quickly.

He had no choice but to find out about Lin linmi's condition as soon as possible. It might affect the life and death of their company.

"It's done," His wife called out and brought out the Linlin rice that had been prepared.

The first thing Li He did was to fill a big bowl for himself and eat it. With just one mouthful, his brows furrowed tightly.

He was in the rice business, so he could naturally distinguish the difference between the rice.

He also knew the quality of the rice sold by his company. This Linlin rice was simply better than the best quality rice in his company. The taste was also better.

In other words, when Linlin laboratory promoted Linlin rice completely, da mi companies would be greatly impacted.

The Linlin rice not only tasted better, but it also tasted better. Most importantly, it was not expensive. At least, none of the rice in their company could resist the impact of the Linlin rice.

therefore, the only thing they could do at that time was to sit and wait for death.

This was because they didn't have the ability to do business with Lin linmi's laboratory, and they didn't have the financial resources to do so.

Just this "he Xia's cool dream" alone would be supported by the higher-ups to promote it. Under that kind of policy, whoever stopped them would become cannon fodder.

Naturally, if he didn't want to become cannon fodder, he could only acknowledge his big brother and hug his thigh.

so, there was only one way now, and that was to acknowledge linlin's laboratory as his big brother and quickly cling to this thigh.

If they could grab hold of this thigh first, then all the problems would be solved.

As he thought about it, he immediately called his Secretary. As soon as the call connected, he said anxiously, " hurry up and prepare the documents for me. I want to carry Yingluo. I want to apply for a cooperation with Linlin laboratory on Linlin rice!

[Chapter 1443 654-The Radish In The Fairy Tale!](#)

On the internet.

The Linlin Rice's heat had also reached its peak. Those who had eaten the Linlin rice all said that the Linlin rice was definitely more delicious than ordinary rice.

This made many people anxious, and many people did the same thing as Li He.

these people were all in the rice-related business.

After Lin linmi's appearance, they were all anxious. Those who were smart immediately made phone calls and took action.

But what these people didn't know was that this was just a trick of Linlin's laboratory.

Linlin Manor.

Shen Li found Qin Lin early in the morning and handed him a few application documents. Chairman Qin, most of the domestic grain planting bases and rice operating companies have sent applications. As I expected, as long as there is a small batch of Linlin rice on the market, those companies will send themselves to the door. These are the ones I specially selected with the best credibility.

Qin Lin nodded and started reading the documents.

They were both rice-growing bases and rice-operating companies, but the rice they sold was of the same grade, and there were definitely differences.

Rice of the same price, some were better, some were worse.

This meant that he was not as good as others? It might not be a fine grade.

If the Linlin laboratory wanted to promote the Linlin rice, they couldn't do it themselves. It was even more impossible to rely on the land in you city alone. It was too costly and troublesome to contract land all over the country.

The key was that rice was for the public's daily use, and there was a time limit to it. Linlin rice had just been produced, and only Linlin's laboratory had it.

in a few years 'time, it would be all over the country.

Rice was like this, unless Linlin's laboratory had to go to court with this and that, and it would never end.

There was no need for that.

He didn't seem very generous.

It would be better for Linlin laboratory to choose a company to cooperate with from the beginning and promote the Linlin rice together. First, they could complete the "he Xia's cool dream" as soon as possible, and second, they could control the price of Linlin rice.

Linlin's laboratory could already make a lot of money with Linlin's tribute rice, and no one would say anything about it.

At most, people would say that rich people had too much money and had nowhere to spend it.

Therefore, there was no need to think about making money from the ordinary Lin linmi. It was only for a few years. It was better to be more generous and affordable.

President Shen, since you've already made your choice, just pick these few shops," Qin Yu said. but I still have one request. We don't want to make a lot of money from this Linlin rice. We just want to complete the 'he Xia's cool dream' as soon as possible!

! I understand! Chairman Qin!" Shen Li nodded!

He knew this better than his boss. Although the Linlin laboratory hadn't been developed for a long time, it was definitely one of the most powerful laboratories in the country.

Therefore, sometimes, there was no need to be too entangled with unnecessary interests. It was better to gain reputation for yourself.

After Shen Li left, Qin Lin also put on a mask and a hat and left Linlin Manor, planning to go to the scenic Area for a stroll.

Although he didn't care about the management, he still felt a sense of achievement when he saw the scenic Area he had created.

After he left the manor, he went straight to the area where the giant crops were.

Now, the giant crop area in Linlin Scenic Area was also very popular, and almost all tourists wanted to go and take photos with those giant crops.

There was a saying now that if one didn't take photos with the giant plants at Linlin Scenic Area, one wouldn't have been to Linlin Scenic Area.

When Qin Lin passed by, he found that there was a wave of shouting coming from the giant crops area and it was surrounded by people.

The staff of the giant crop project was directing two teams that were obviously tourists' children to compete. There were also tourists' parents cheering on them.

Next to it was a banner: "little rabbit radish-pulling competition. The winning team will get a free rabbit doll as a reward!

There were seven to eight children in each group. Each of them was pulling a radish's leaves and pulling them out.

It could be seen that these children had used all their strength, but the almost two-meter-long radish was buried in the ground and obviously very difficult to pull out.

The parents at the side were watching this scene with great interest. Firstly, their children were happy, and secondly, the parents were all immersed in their memories.

"I didn't expect that the fairy tale would be true."

yeah, I saw a fairy tale about a rabbit pulling out a carrot in the fourth grade textbook before. I thought it was a children's story.

I think so too. I was cheated in the past, and now my child is also cheated.

it's indeed a scam. If little Qin hadn't developed such a giant crop, how could there be such a big radish?
"

"....."

Obviously, this was another attractive and interesting event.

However, this was only suitable for children to play with, and those radishes could be pulled out by children for a long time.

qin lin found it interesting and subconsciously took out his phone to take a short video to share with zhao moyin.

Then, he went to the ranch.

On the farm, a few short happy elephants with big fan-like ears were walking around carefreely. When they passed by tourists, they would even make them laugh.

the happy elephant was originally locked in a cage, but after a long period of observation, it was found that the happy elephant's temperament was really gentle and would not hurt people. after the inspection, it was no longer locked in the cage and was allowed to be released.

Naturally, the inspection was conducted by a professional organization.

Qin Lin walked past, wearing a hat and a mask, so the tourists couldn't recognize him. The happy elephants seemed to recognize him, and one by one, they surrounded him and acted cute.

Qin Lin smiled and patted the heads of these happy elephants, playing with them for a while.

at the same time, he received a call from minister lu.

Something must have happened if he called.

Minister Lu's voice was heard as he answered, " "Boss Qin, I've arrived at your Manor. I have a surprise for you."

Qin Lin was surprised that this person had arrived at the manor without a sound.

Moreover, since the other party said that it was a surprise, there must be a surprise, right?

He immediately went back to Linlin Manor. As soon as he arrived at the Linlin Hall, he saw Minister Lu and academician Fang discussing something.

There was another person beside him, and a box was placed by his feet.

When minister Lu saw him, he hurriedly said, "Boss Qin, come on, I'll show you something good!"

He then asked the person next to him to pick up the box and dragged him to academician Fang's room.

When they arrived at academician Fang's room, Minister Lu asked the person next to him to open the box. There were two pieces of clothing inside.

Qin Lin looked at the two pieces of clothing and seemed to think of something. This should be the technology made from the fiber material of the Goblin Gloves, right?

boss Qin, these two clothes are made with the special fiber technology developed by professor Wang, "Minister Lu confirmed immediately. they are matched with special bulletproof technology. You can't imagine how effective these combat suits will be when they are used with soldiers who have used body-enhancing liquid.

as he spoke, minister lu took out his phone and showed qin lin a video.

Qin Lin looked at the video and was a little shocked. He saw a soldier wearing a combat uniform in a box getting shot several times in a row. In the end, he even got up as if nothing had happened.

Although this warrior had taken the body-enhancing potion before, it could only be said that it was really amazing.

If he were to wear this combat suit, as long as he wasn't hit in the head by any weapon, no one would be able to do anything to him. After all, he still had the hot spring in the game, which could quickly recover from any injuries.

If he really couldn't, he could just hide in the hot springs in the game.

"Boss Qin, where's Zhuang long and Li Xiang?" Minister Lu asked again. These two battle armors can only be used to their full potential if they are given the chance to wear them, and they even have a special effect!"

zhuang long and li xiang were the two special warriors who had taken the body-increasing liquid medicine and were sent to linlin manor by minister lu.

As soon as the two of them arrived, they caught the number one assassin of the plaster country, Yamamoto Kazuo.

After that, the two of them registered at Linlin Manor and became security guards. They mixed in with the crowd and listened to Ma Hong's orders.

Soon, Zhuang long and Li Xiang were called over. As soon as they arrived, Minister Lu said to them, "Try on these two sets of armors."

Zhuang long and Li Xiang knew the identity of Minister Lu, so they immediately nodded and put on the two combat suits.

The battle suit was very fitting, but what surprised the two was that there was a hood on the battle suit. after putting on the mask, he seemed a little unsightly, like a robber.

However, the two of them still obeyed the order and put on the two hoods.

A man beside Minister Lu pressed the waistbands of the two men after they put on their battle suits.

In an instant, Qin Lin saw Zhuang Long's and Li Xiang's battle suits begin to change color. They gradually became one with the colors around them.

Although he could still see it at a close distance, if he was a little further away and didn't know where the two of them were, he would really miss it.

Moreover, if the environment was more complicated, it would be even more difficult to tell.

"Boss Qin, this is the effect of the color changing factor of the color changing tree cultivated by professor Li Kai after infecting the combat uniform," Minister Lu added.

although it can't achieve perfect invisibility after being made into a battle suit, the camera equipment won't be able to work either. One thing is for sure, no one would think of using it in an ambush or in a specific environment.

Zhuang long and Li Xiang looked at each other in surprise. They moved subconsciously, but this movement affected the color of their bodies, which could be clearly seen.

As he moved, the color changed again.

it could be said that this combat uniform could quickly change in any environment.

boss Qin, " Minister Lu said proudly, " imagine this group of soldiers who have taken the body enhancement potion, coupled with Optimus Prime and Megatron's technology. What will happen if they are deployed on the battlefield? "

Qin Lin was stunned when he heard this. In the blink of an eye, a thought came to his mind. Under the circumstances of not using strategic weapons, wasn't this bullying?

He would directly beat her to tears, alright?

boss Qin, this is all thanks to your Linlin laboratory, " Minister Lu said. if it weren't for your Linlin laboratory, we wouldn't have achieved such technological results. These two suits are the only two pieces from the first batch. They will be given to Zhuang long and Li Xiang in the future.

this was minister lu's way of expressing his sincerity.

After all, the first and second pieces of equipment would usually not be handed over to private individuals. Instead, they would be handed over to internal staff to use and test.

But now, Minister Lu gave it to Qin Lin first. Naturally, he wanted to share the results with Qin Lin.

after all, to him, it was hard to describe the feeling of getting many magical things and techniques because of boss qin.

qin lin looked at the two combat uniforms and thought of one thing.

That was, he could also make such a suit himself. After all, he had the color-changing tree seed, because he had kept the seed of the color-changing tree.

As long as he planted the tree in the game, harvested it, and manually extracted the factors, the processing machine in ore town would have an additional ordinary fiber processing machine. By using the color-changing factor and the fiber to process it, he could obtain such a color-changing cloth.

what if there were additional game attributes? that would be even more awesome, right?

as for how awesome it was, that would depend on the product.

At this thought, Qin Lin called Linlin's laboratory, telling them to process a batch of special fiber and send it to Linlin Manor.

[Chapter 1444 Security Uniform: Superhero Suit?](#)

this combat suit was indeed impressive.

qin lin didn't need this kind of combat suit. he just wanted to make it himself.

After all, it wouldn't be worn by outsiders, and it wouldn't be circulated. At most, it would be used by Ma Hong and the others.

This can't be considered selling secrets, right?

after qin lin gave instructions to lin lin's laboratory, lin lin's laboratory moved very quickly. with the readily available fiber technology, it was very easy to produce fiber.

After only a day, professor Wang arrived with two laboratory security guards who were carrying fiber. Naturally, there were also bulletproof materials.

When he saw Qin Lin, he said, " Chairman Qin, these are the fibers you need. They are all made with special fiber technology. They also used the same compression technology as the Chinese Academy of Sciences. Patience and willfulness are stronger.

"Have people move it into the inner area! Qin Lin led the laboratory staff into the inner area of the manor and asked them to put the processed fiber into the workshop.

After that, Qin Lin told professor Wang something else.

The combat suit that Minister Lu brought had a function, which was to activate the color-changing tree factor's function fee after pressing a button. It should be a setting that blocked the detection of the color-changing tree factor, which was to block the detection of the color-changing tree factor through a special sound wave or some form.

The reason for this should be similar to the principle behind the isolated chameleon gene.

He needed professor Wang to crack the system so that he could make a combat suit for himself.

but after thinking about it, he still called minister lu, who had returned to the capital.

He didn't know how long it would take for professor Wang to crack it. He might as well ask Minister Lu. If he could get the technical blueprint directly, he wouldn't have to crack it in private.

Minister Lu asked immediately after he received Qin Lin's call, " "Boss Qin, what's wrong?"

Qin Lin directly stated his purpose. "Minister Lu, I'd like to research the technology for the special isolation buttons on the combat uniform."

"Sure, I'll send it to you immediately." Minister Lu said decisively.

The skills of the Chinese Academy of Medicine were naturally not given to others, but boss Qin was an exception.

He and the higher-ups were now sending this boss Qin to cook and tame beasts.

Lin fan's talent should be used in scientific research. Lin fan had unparalleled talent in this area. Now that he wanted this thing, he might be able to come up with something more useful.

At that time, if it was useful to them but not useful to the people, boss Qin would be very easy to talk to and would not be stingy with the technology ...

Moreover, compared to the technology that boss Qin had given them, what was this small technology?

As long as boss Qin used his talent on the right path, everything would be fine.

Minister Lu did not hesitate to give it to him. Within a few minutes, he sent the technical blueprint to him through a special email.

After Qin Lin gave the technical drawings to professor Wang, he asked him to leave with his people. Then, he entered the workshop again, locked the door, and brought the fiber into the game. He saw the note of the special fiber.

[special fiber: normal]

[this is a specially developed fiber that has been specially compressed. Its toughness, defense, skeleton, and other properties have become very strong!]

the note surprised qin lin.

this was because the combat suit made of this special fiber was too powerful. it didn't seem like an ordinary item at all.

However, the remark only showed the word 'ordinary'.

After some thought, he roughly understood.

Even though they were both of the same quality, some of them were trash while others were extremely useful.

Could a Grade 1 cucumber be better than a Grade 1 ginseng?

This was clearly impossible.

Although special fiber was of normal grade, it contained the word 'special', which was not something other fibers could compare to.

Its "ordinary" was only based on the grade of the special fiber itself.

Even a quality 2 fiber would not be able to compare to this ordinary special fiber.

Qin Lin then found the seeds of the color-changing tree that he had reserved from Minister Lu and planted them in the space.

The color-changing tree had the attribute of growing very fast, so the seed sprouted soon after it was planted.

Of course, the seeds of the color-changing tree were confidential to the outside world. No one could get them, except for Qin Lin.

Qin Lin had been paying attention to the visitors. The moment before the color-changing tree was about to mature, he entered the game with a thought and then transplanted two color-changing trees out of the game.

he naturally wanted to use these two color-changing trees as seeds.

with his method of keeping seeds, he could have more seeds than the hua yuan academy if he wanted to.

Not long after, the color-changing trees in the game had fully matured, and the dwarves had also harvested the color-changing trees and put them in the storage room.

qin lin also entered the game and began to collect the leaves of the color-changing tree. he collected several baskets and then took the leaves out of the game.

There was a special extraction device in his work room that could be used to extract the color-changing elements from the color-changing tree.

The extraction will take some time.

It took Qin Lin a long time to extract all the color-changing leaves and get the coloring that could be used for infection.

Professor Wang had the technology and design, and he quickly sent over the partition keys.

After all the materials were ready, he brought the color-changing trees into the game. After logging out of the game, he controlled his game character and took the special fibers and color-changing tree elements to the processing machine experience Hall in ore town.

[Chapter 1445 Security Uniform: Superhero Battle Suit?](#)

this fiber processing machine was a special processing machine, but he had never used it before. today, he could finally use it.

[do you want to use the processing machine to process these fibers?]

[yes! [no!]

Qin Lin directly chose "yes."

The next moment, another screen popped up on the selection interface. It was an icon with the appearance of clothes on it. There were fashionable ones, conservative ones, revealing ones, and even yoga suits.

these were all styles that could be processed with fiber, and they could also choose various colors. it could be said that the freedom was very high.

in other words, if he chose a figure, the product would be this thing.

Naturally, just like the wood processing machine, there was also a drawing that could be put in at the bottom, which could be put in one's own design and then processed.

He had to think about this carefully.

He definitely wouldn't choose the style in the game, so what was the point of making a special yoga suit?

As he thought about it, he logged out of the game and logged into a design website. He found a well-known fashion designer and contacted him.

"Hello, how may I help you?" the designer.

"help me modify a security uniform!" Qin Lin also sent a message.

okay, please send me the current style of the security uniform and the requirements for modification, " the designer said.

qin lin didn't waste any more time. he sent the linlin villa security guard's uniform design over and asked for their help to design a full-body suit, preferably a headpiece.

Even though wearing a mask over a uniform was a little dirty and indecent, the color-changing function couldn't be revealed at all, right? It had to be connected to the whole body.

However, after he sent the security uniform and the request, the designer did not reply to him. It seemed that he had caught a cold.

Qin Lin waited for a long time before he impatiently sent another message to the other party."are you there?"

the other party still didn't reply.

Qin Lin was a little speechless. He could only secretly say that this designer didn't know how to treat guests. Who would ask him to design something like this? How did the other party manage to become a famous designer?

But just as she was thinking, Lin Lanzi's call suddenly came.

Qin Lin frowned as he answered the phone. Who knew that Lin Lanzi would actually say, Chairman Qin, there's something that I think we should pay attention to. There's a pervert on the internet who wants to find a designer to modify our Linlin villa's security uniform and even request for a head mask.

the designer didn't dare to change the security uniform of our villa, so he tried to contact our media department's external contact number and even sent us the conversation. That pervert even needs a mask. He doesn't look like a decent person.

it's fine if someone wants to make a simple prank, but if they have other motives, we really have to be careful.

"Ran ran." Qin Lin was stunned when he heard this.

This correct word should be referring to him, right?

Did the designer think that he had an ulterior motive when he suddenly went missing and reported it to Linlin villa?

he didn't know if he should laugh or cry.

Did he look like a bad person?

However, this also showed that Linlin villa had been deeply rooted in the hearts of the people. After all, the designer had informed the Linlin Scenic Area about such a small matter.

Mr. Lin, please ask the designer to make the changes according to the other party's request, " Qin Lin said helplessly. it's Chen dabei who needs a few sets of security uniforms. He's already told me.

so it was manager Chen who hired the designer. I got it, I'll get someone to reply to him! Lin Lanzi also hung up the phone with a smile. She didn't really care much about the security Department.

After all, she knew that most of the people in the security Department were veterans, and special personnel like Ma Hong were more professional than her. She didn't want to get involved unless it was necessary.

But she did not understand what Chen dabei was trying to do. Why did he look for a designer to change his uniform? why did he have to put on a hood? why did he have to wrap his entire body?

He had never realized that the security Manager was so indecent before.

However, she didn't ask about this kind of thing. She told the Secretary to return the designer's call and express her gratitude.

...

linlin manor office.

Qin Lin looked at the chat box and waited for a while before the designer replied, " manager Chen, I'm very sorry. I didn't know it was you. I'll immediately help you modify your security uniform.

"well, sorry to trouble you." Qin Lin nodded and replied.

this designer was quite capable to be able to become famous. he sent over the draft in less than half a day.

"Manager Chen, are you satisfied with this design?" The designer.

qin lin actually didn't have any requirements for the security uniform. after all, he wasn't going to wear it himself. as long as it had the linlin scenic area's logo, it would be fine.

therefore, he was sure that he was satisfied. he paid and got the design for the security uniform.

After downloading the blueprints, he printed them out immediately and brought them back into the game. Then, he logged out of the game again and controlled his game character to operate the processing machine.

This time, he put the security uniform design he put in the game into the options box, then put in all the materials, and then chose black.

The Linlin Scenic area's security uniform was actually blue.

However, he felt that black was actually cooler. The batch of security uniforms he was going to make had nothing to do with the scenic Area, so there was no need to have a uniform style.

After making his choice, he clicked "confirm," and another prompt immediately appeared.

[the processing machine has started processing. Please wait a moment.]

Seeing this, Qin Lin also began to wait. Not long after, the system prompt appeared again:

[congratulations, you've completed a security uniform!]

Qin Lin immediately looked at the special fiber and the color-changing tree element. He found that these fibers and color-changing tree elements could be used to make more than ten sets of security uniforms.

he didn't hesitate and directly controlled his game character to make the rest of the materials into a security suit.

After the security uniforms were made, he immediately controlled his character to return to the farm. Then, he entered the game with a thought.

Thinking of the two combat uniforms that Minister Lu had brought, he was looking forward to the security uniform.

After entering the game, Qin Lin immediately saw the remarks of the security guards:

Special security uniform: normal

[this is a security uniform made of a special material. It is made of a special compressed fiber material. It always has a magical color-changing function and defensive power. The toughness and defense of the fabric itself far exceeds that of ordinary defensive fabric.]

although it was only of normal quality, from the remarks, it was obvious that the security uniform had the same defensive effect as the combat uniform that minister lu had brought.

He took out a knife and tried to cut the security guard's uniform.

the knife was very sharp, but the cloth didn't leave a mark. it really had a strong defense.

Then, he looked at the color-changing ability of the security uniform. After pressing the button, he found that it was no different from the two that Minister Lu had brought.

Qin Lin then looked at the other security guards.

[special security uniform: normal!]

...

[special security uniform: normal!]

.....

[special security uniform: Grade 1]

[this is a security uniform made of a special fiber material. Due to the mutation of the material, it has a special effect: Defensive ability +1, color changing and hiding ability +1!]

Qin Lin's eyes lit up when he saw the note. As expected, there was an accident, and a better quality one appeared.

He immediately tried it on the security uniform and was shocked to find that the security uniform changed color almost instantly after he pressed the button.

The key was that the security suit's color-changing and hiding function was better. It was much better than the one minister Lu brought. If he wasn't holding the security suit in his hand, he wouldn't have noticed it.

He tried to shake it, and even when he was in motion, the color-changing ability was faster and faster.

The +1 defense attribute was definitely stronger than the two that Minister Lu had brought.

This effect could probably be used directly as the battle suit of those superheroes, right?

[Chapter 1446 656-This Security Uniform Is Awesome](#)

The defense, toughness, and color-changing effects of Minister Lu's combat suit were already very strong.

Now that the grade 1 security uniform was even stronger in this aspect, it should be able to become the battle suit of the superheroes in the movie, right?

To be honest, even the previous versions of the Spiderman suit weren't this powerful, right?

thinking of this, qin lin looked at the remark of the other security guards.

[special security uniform: normal!]

[special security uniform: Grade 1]

[special security uniform: normal!]

...

Qin Lin finished reading the remarks of these security uniforms. There was another one with a quality of 1, and two out of more than a dozen of them had a quality of 1. Obviously, the probability was very high.

He picked up a quality 1 Security Guard Uniform and wanted to try it on, but he found an important problem. The clothes did not have specific sizes, so it might not fit.

However, when he tried on a quality 1 Security Guard Uniform, he realized that it fit him very well. The size was just right.

in other words, it would fit anyone who had the same height and muscles as him.

Then it should fit Ma Hong and the others.

After Qin Lin put on the security uniform, he walked into the house on the farm. He stood in front of the mirror and looked at the reflection inside.

Looking at himself in the security uniform, he felt that it didn't match his temperament at all, so he pressed a button on the security uniform.

Then, the security uniform changed color and went into hiding.

Even in front of the mirror, it couldn't be reflected, if it wasn't for the head that was exposed.

It was just that the mask was a little indecent, and he didn't want to wear it.

However, the invisibility effect was really amazing.

After he was done, Qin Lin took off the security uniform and put on his own clothes. Then, he took all the security uniforms out of the game.

he wasn't in a hurry to give the security uniform to Ma Hong and the others. he had to wait for some time. after all, he had the materials, and it would take some time to make the clothes.

So, after a few days, Qin Lin brought the security uniform to Ma Hong and the others.

When Ma Hong and the others didn't have any tasks to do, they would basically be in the manor's training hall.

Zhuang long and Li Xiang, who had taken the body-strengthening medicinal liquid, were also there.

Ma Hong and the others were envious of the two of them.

Ma Hong had applied to use the body-increasing medicinal liquid when he returned to Beijing. Although his application was successful, he had to queue up because there were too many special departments and local special departments who wanted to use the medicinal liquid.

In order to keep it a secret, the higher-ups had not used the body-increasing medicinal liquid on a large scale. It was only used within a certain range.

However, it was soon their turn.

But now, they were envious of the combat uniforms that Zhuang long and his partner were wearing. It was the first time they had seen such a defensive power and invisibility function.

Unfortunately, these two sets of combat uniforms were exclusively for Zhuang long and Li Xiang, so they had no chance to use them now.

at this moment, ma hong and the others saw qin lin walking in with a bag of clothes.

"Chairman Qin!" Ma Hong and the others immediately greeted him respectfully.

They didn't respect him because of Qin Lin's status or money. They respected him purely because of Qin Lin's talent and character.

As a member of the special department, he was sent to protect Linlin Manor, so he naturally knew that this Chairman Qin had done many admirable things.

Even the body-increasing medicinal liquid that they had been longing for was contributed by this Chairman Qin.

They were sure that if it was someone else who had such a good thing, they would definitely hide it for their own use or only give it to their family or related people to use. They would definitely not donate it without any reward.

This was the most basic human nature.

to be able to get rid of this kind of humanity, he was almost half a saint.

Of course, this was only what Ma Hong and the others thought. Qin Lin obviously had a cheat and wanted to spend as much as he wanted.

qin lin walked in and placed the security guards' uniforms on the ground. he then turned to ma hong and the others. "Captain MA, you guys try on these clothes."

Ma Hong was surprised to see the security uniform. What was so special about it? They were wearing security uniforms, but they were of the normal color. The ones that Chairman Qin brought were black.

However, they soon realized that something was wrong. The black security uniforms were one-piece, and there were the same buttons on their waists as Zhuang long and Li Xiang's combat uniforms.

this made them think of a possibility.

After all, it was impossible for Chairman Qin to change them into the security uniform for no reason, unless the security uniform was very special.

If it was someone else, it would be impossible to make that kind of combat suit by themselves, but Chairman Qin and Linlin's laboratory were different.

After all, the relevant technology and materials had originally come from Linlin's laboratory.

Ma Hong quickly picked up a security uniform and tried to press the button on his waist. The uniform changed color and began to hide.

it really is Yingluo! Ma Hong was surprised.

Zhuang long and Li xiangde, who were wearing their combat uniforms, were attracted by the scene, so were the security guards.

Just now, they were envious of Zhuang long and Li Xiang's combat uniforms. Who knew that Chairman Qin would send so many sets in the blink of an eye?

The only difference was that they all looked like security guards.

However, they were now hiding their identity as the security guards of the scenic Area, so the security uniform suited the occasion.

On the other hand, Chairman Qin really had to be admired. It had only been a short time, but he had already made these security uniforms.

"Change into them and try them on." Qin Lin said.

Ma Hong and the others immediately called for the others to get their clothes and then went into the changing room to change.

Not long after, these people changed into pure black security uniforms, and then pressed the button on their waists. A moment later, the security uniform on each of them began to change color and hide.

Ma Hong and the others didn't notice that they were wearing their own security uniforms, but Zhuang long and Li Xiang saw it very clearly. Two of their security uniforms instantly changed color and became invisible.

Their speed was definitely much faster than their combat uniforms, and the reaction of the security guards beside them was the best comparison.

Zhuang long and Li Li immediately said to the other two,

"The security uniform you're wearing is different!"

"That's right, the security uniform I'm wearing instantly went into color-changing concealment."

this made ma hong and the others turn to look at the two.

The two of them didn't realize that there was anything different about their bodies.

"are we different?"

"chairman qin, is there anything special about this security uniform?"

Qin Lin immediately nodded and said, " yes, two of the security uniforms were specially improved by me. They have stronger defense and better color-changing and hiding functions.

After getting Qin Lin's confirmation, Ma Hong and the others quickly tested it out. First, they tested the color changing and hiding function. They compared Zhuang long with the other security guard.

The difference was obvious almost as soon as he pressed the button.

The speed at which Zhuang Long's combat uniform changed color was almost the same as the speed at which the security guard's uniform changed color.

however, the security guard who was wearing a quality 1 security guard uniform instantly changed.

The difference in speed was so obvious that it could be seen with the naked eye.

For this reason, Ma Hong and the others had tried several times to confirm it.

What was even more surprising was that the speed at which Zhuang Long's combat uniform and the security guard's uniform changed color was far slower than that of the two security guards.

It was obvious that the security uniforms of the two security guards were of a higher grade.

Zhuang long and Li Xiang subconsciously stepped forward to check the defense power of the two security guards' uniforms, trying to compare it with their own combat uniforms.

to them, the comparison was simple, and there was a simple and brutal way.

he just had to take out a knife.

After a while, Zhuang long and Li Xiang could tell that the defense and toughness of the two security guards' uniforms far exceeded the combat uniforms they were wearing.

This Kasaya

previously, they had been very proud of wearing this combat uniform. after all, this was the only two combat uniforms from the first batch, and there were no such combat uniforms in the world.

Other people, no matter who they were, couldn't wear it even if they wanted to. Didn't you see how envious Ma Hong and the others were?

The combat uniforms they were wearing now were only comparable to a few security uniforms. The key was that they were not even as good as the two security uniforms.

This made them suddenly feel that their combat uniforms didn't smell good anymore.

They suddenly wanted to wear the two security uniforms even more.

With their bodies that had been strengthened by body enhancement potions, they could even pretend to be superheroes if they wore those two security uniforms, right?

spiderman might not be able to pass off as him, but night demon man should be able to, right?

After all, the night Demon Warriors might not be as physically strong as them, and their fighting skills might not be as good as theirs.

The security uniform that Qin Lin had brought with him had indeed shocked Ma Hong and the others.

After all, while they were still surprised by the two combat uniforms on Zhuang long and Li Xiang, Chairman Qin suddenly threw these security uniforms in front of them.

Seeing that Ma Hong and the others had finished their experiment, Qin Lin added, " " captain ma, although i made these security uniforms for a look, i don't think they can be circulated, so i'll give them to you. "

"alright, chairman qin." Ma Hong answered immediately, but he was a little surprised. After all, Chairman Qin said that it was just a casual dish, and it was actually better than that.

As expected of Chairman Qin.

After Qin Lin left, Ma Hong turned to the other security guards and said, "let's take turns using these security uniforms. the brothers at linlin's laboratory have to share them too."

Minister Lu had sent them here not only to protect the manor, but also to pay attention to Linlin's laboratory.

However, they wouldn't enter the interior area of Linlin's laboratory. It would be impolite and they were afraid of being misunderstood.

Therefore, their people would only pay attention to the outside area of Linlin's laboratory.

As long as they didn't let any suspicious people enter Linlin's laboratory, they would be protected.

then, ma hong thought of something and took out his phone to call zhuang long and the others.

He had to take a video and tell Minister Lu about the security uniform that Chairman Qin made.

After all, while they were protecting Chairman Qin and Linlin company, they also had this task.

It wasn't a small matter that this combat uniform had been upgraded by Chairman Qin.

...

Beijing.

Minister Lu was also paying attention to the battle suit. After all, the battle suit was ready, and it should be mass-produced in the future. At least a small group of Special Forces should be equipped with it.

He received a call from Ma Hong just as he came out of the laboratory.

He answered the call immediately. He had told Ma Hong that he had to report to him if there was anything important on boss Qin's side!

Ma Hong's voice came through the phone. He was shocked when he heard what Ma Hong said.

[Chapter 1447 Won't Lose? Giving A Chance Is The Best! 1](#)

After hearing Ma Hong's words, Minister Lu asked with uncertainty, "Captain MA, is what you said true?"

When boss Qin asked him for the button blocking technology, he knew that boss Qin wanted to study the combat uniform.

This was what he loved to see.

It was better for boss Qin to focus on the research of the combat suit than to waste his talent.

however, he didn't expect boss qin to improve the combat uniform in such a short time. even he couldn't stay calm.

it was true. because of this special combat suit, the chinese academy of sciences had also set up a special laboratory, and the researchers were all elites in the country.

It seemed like these people were only getting ready to start their research.

that's right, these people had just finished their preparations. they had come into contact with the combat uniform earlier than boss qin and had started working on it earlier.

Now that boss Qin had made improvements, they began to work.

Perhaps, he felt that there was a problem with the Chinese Academy of Sciences. The new generation of research institutes seemed to lack the spirit of hard work of the older generations.

It should be said that the current social atmosphere had affected generations of people.

he felt that he should apply to the higher-ups to make some changes.

he couldn't believe that these carefully selected and excellent researchers could be so far behind boss qin.

Boss Qin's talent was heaven-defying, but he had also become a monk halfway through his life.

The biggest possibility was that these researchers weren't in a hurry. He had seen their preparation during this period of time, so he was a little slow.

What he was afraid of now was that Linlin's laboratory would keep producing results. The laboratories abroad were stimulated and had burst out with great potential. The people of the Hua hospital would enjoy the results but neglect them.

After all, the recent major results were all more or less related to Linlin's laboratory.

This was not the right state.

Ma Hong's voice was heard again. Minister Lu, I've already taken a video of the experiment. I'll send it to you.

"Okay, I'll be waiting." Minister Lu answered, hung up the phone, and waited.

He really wanted to see the effect that Ma Hong had mentioned.

after a short while, ma hong sent the video to his email. he had also seen the video of the two security uniforms being compared.

The difference was visible to the naked eye, and Minister Lu couldn't help but look amazed.

Was boss Qin's talent really that heaven-defying? How was this an improvement? it was simply an upgrade of a whole level.

He subconsciously picked up his phone and wanted to dial Qin Lin's number, but he held back after thinking about it.

Since boss Qin had come up with such a skill, he would ask for it immediately. Boss Qin would give it to him, but this time, he wanted to use this opportunity to stimulate these people in the Chinese Academy.

As he thought about it, he turned around and went back to the laboratory that was specially set up for the combat suit.

Once they entered, the person in charge immediately went up to them and said, "Minister Lu, why did you come back?"

Minister Lu nodded and asked the person in charge to call the other research institutes. When everyone was here, he clapped his hands and asked everyone, "everyone, I'm sure you all know the importance of this battle uniform set. The current battle uniform set is already ahead of the world, but that's not enough. Sooner or later, others will also have this kind of battle uniform set, so we need to keep leading.

"I would like to ask everyone, how long would it take to improve this battle uniform to have a greater effect, or to have a stronger effect?"

The researchers looked at each other, not knowing why he suddenly asked this question.

Minister Lu, there are too many uncertainties in scientific research. Seeing this, the person in charge immediately replied, "we can't guarantee such an outcome.

the other researchers also chimed in, "

"yeah, there are too many uncertainties in scientific research!"

"We will do our best to study it."

"We'll get results as soon as possible."

"....."

All of them seemed to be making their guarantees.

However, his words made Minister Lu sigh in his heart. Really, this kind of promise to do his best and be as fast as possible was actually perfunctory. In the end, he didn't have the confidence to say how long.

most of the time, when someone promised you something, it was just a perfunctory promise. if you asked someone to do something and they told you that they would do it as soon as possible, then the time would be determined by the other party.

A day was fast, a month was fast, and for some people, a year was fast.

This actually meant that he wouldn't try his best. It would be best if he could do it, but if he couldn't, it would be the same.

So, the underlying meaning was that you should be tactful.

it was the same for their scientific research. they had to do their best as soon as possible. it seemed like a good guarantee, but in fact, these researchers had also given themselves a very, very relaxed area and left a very, very large comfortable space for themselves.

this was the difference between a new generation of researchers and a senior one.

How did they catch up with the world so quickly in the past? under such circumstances, those old seniors could make a military pledge and guarantee how long it would take to complete it.

he even stayed up all night for the sake of the military decree.

Once the time was up and they really couldn't complete it, they would take the initiative to give way and let the capable go.

Perhaps it was because it was a new era, and they lacked the spirit of these seniors to a certain extent.

Minister Lu thought about it and said, "boss Qin is also studying this combat suit. You know that he took one of our technologies. I hope you don't lose too badly to boss Qin.

His words seemed to have really provoked the researchers, and they began to talk.

[Chapter 1448 Won't Lose? Giving A Chance Is The Best! 2](#)

A younger-looking researcher immediately said, "Minister Lu, we know that academician Qin, but he's studying plant genetics, right? no matter how talented he was, he was only a beginner in this area of research, right? There are so many of us here, the elites of the elites. It's impossible for us to lose to him alone, right?"

Clearly, he was very young, so he was also very proud. He had the right to be proud. Among his peers, he was the pride of the heavens.

The others immediately nodded when they heard his words.

"that's right, minister lu. there are so many of us. we won't lose. "

"no matter what, we're still more professional."

"..."

Minister Lu didn't say anything when he saw how confident these people were. He directly connected his phone to a computer in the laboratory and played the video sent by Ma Hong.

The video was soon seen by the researchers, and their faces turned ugly.

"How is that possible?" The person in charge exclaimed when he saw the video.

you guys were the first to come into contact with the combat uniform, " Minister Lu said calmly. but while so many of you are still preparing, boss Qin has already made such an improvement!

"Actually, I'd like to see how long it'll take you guys to achieve the same improvement as boss Qin. A month? Two months? Half a year?"

Minister Lu's words made the person-in-charge and the other researchers look a little unhappy.

Especially the young researcher. He was so confident just now, but now he was clearly a little shocked.

Or rather, everyone's face was a little red.

Minister Lu didn't say anything more. He told the person in charge, "try your best to produce results. So many people can't beat one person. Don't be too embarrassing.

minister lu's words made the person in charge feel even more ashamed.

...

Linlin Manor.

Qin Lin left the office and went into the kitchen, planning to cook for himself. Sometimes, when one wanted to eat something, people who knew how to cook would want to cook a little by themselves.

Naturally, this was built on the foundation that he had enough free time.

Otherwise, he would be exhausted. Even if he was a chef, he would not think about cooking.

However, the moment he entered the kitchen, he saw Master Lin and the other chefs pouring soy sauce.

"Master Lin, what is this for?" Qin Lin asked, puzzled.

Chairman Qin, "Master Lin explained, "we're not wasting food. It's just that the soy sauce is too disgusting.

"What's wrong with the soy sauce?" Qin Lin was even more confused.

One day, soy sauce was a big domestic brand and everyone would use it. Why did Master Lin seem to be so resentful of this soy sauce?

Master Lin explained, "one day, the soy sauce company and the Cola Company are like virtuous people. They treat their consumers differently. Aren't they human?"

Qin Lin was even more confused, "like the Cola Company?" They also provide us with better soy sauce in China. Are you going to sell problematic soy sauce overseas? This is a good thing, giving him a taste of his own medicine!"

The Cola Company had sold Coke to America without any trace of carcinogen, but the coke sold to their country was all carcinogen.

This made them gnash their teeth in hatred.

If soy sauce was like this one day, it would be a good thing, right?

Master Lin snorted, "pfft, if that's the case, we wouldn't have poured their soy sauce. The soy sauce they sell abroad has no additives, but the soy sauce they sell to China has additives. If this isn't differential treatment, what is it?" "I won't need their soy sauce anymore."

"A domestic brand can do this?" Qin Lin frowned. He didn't expect such a thing to happen.

After all, in his understanding, no matter how bad a person was, you could harm anyone but your own people.

Once he had bad intentions for his own people, he was not human.

"It's the domestic brands that make us angry!" Master Lin said angrily.

Qin Lin was no longer in the mood to cook after hearing the news. He simply went out of the kitchen and took out his phone to check what was going on online.

It didn't take long for Qin Lin to see what was going on on the internet.

Because of this, the market value of soy sauce had evaporated by more than 100 billion one day.

One of the vloggers even explained the ins and outs of botian soy sauce very clearly.

To be precise, soy sauce did not violate any rules or laws one day, because soy sauce with additives was approved for sale in China.

The soy sauce sold abroad might be to increase its competitiveness abroad, so no additives were added.

According to domestic standards, soy sauce with additives was also qualified, which was the problem.

Since they were qualified, the merchants were profit-seeking, which could save them a lot of costs.

It was this method that made people very uncomfortable, and Qin Lin didn't know what was going on.

the first thing he felt when he saw the news was that it was disgusting. he didn't know the exact situation, so he just chose not to do it one day.

He didn't ask for the truth, nor did he ask if what he did one day was right or wrong, but he had the right to choose not to use this soy sauce.

Therefore, he also had the right to hate being a bystander one day.

Just as he was thinking about it, an unexpected phone call came in.

It was Zhou Chengjun.

This guy usually did his best to develop you Cheng sauce company and rarely contacted him. Other than attending special occasions like the annual meeting, he would usually only send him the business status of you Cheng sauce company at specific times.

To be honest, if the other party didn't call him, he might have forgotten about him.

However, he had to admit that the other party was a talent. At least you city-sauce company had developed very well with the help of you city's tourism style and was already a very well-known brand.

After eating the quality 1 sauce passed down by the Fang family, he knew that if this thing was developed well, there would definitely be a market.

Therefore, when the other party came to him for investment and made a business plan, he chose to invest 5 million and take 70% of the shares.

As it turned out, he had made a huge profit from this investment, even though it was nothing to him.

However, the other party had also proven himself.

She pressed the answer button and Zhou Chengjun's voice was heard. "Chairman Qin, can I have a word with you? I've come up with a proposal."

It was rare for the other party to call, so Qin Lin nodded and agreed. "Come to Linlin Manor!"

After all, the other party was also earning money for him.

Soon, a Panamera stopped in the manor's parking lot.

gao yaoyao was already waiting for zhou chengjun's order. when she saw zhou chengjun, she immediately went up to him and asked, " "Is this director Zhou?"

"Gao Yaoyao?" Zhou Chengjun called out Gao Yaoyao's name.

"Director Zhou knows me?" Gao Yaoyao asked in surprise.

zhou chengjun smiled and explained, " she's one of the most beautiful women in linlin scenic area. who in you city doesn't know her? that would be blind. "

Gao Yaoyao's impression of Zhou Chengjun improved after hearing this. President Zhou, you're exaggerating. Chairman Qin is waiting for you in his office. Come with me!

zhou chengjun nodded and was led to qin lin's office by gao yaoyao.

When he saw Qin Lin, he immediately went up and greeted him respectfully. "Chairman Qin!"

"have a seat and tell me your plan." Qin Lin invited Zhou Chengjun to take a seat.

After Zhou Chengjun sat down, he handed a document to Qin Lin and said, " "Chairman Qin, you should know about the soy sauce incident one day, right? our company hasn't done anything else for the past three years. we've been researching a type of soy sauce, which has been passed down in our family. it's just that my grandfather forgot the details of the production."

now that we've made it, and something happened to the soy sauce one day, this is an opportunity for our soy sauce. We can even compete with the market for soy sauce one day in a short time.

it's just that our company doesn't have enough funds right now, so I want to borrow 500 million from Linlin company to carry out soy sauce's marketing and grab the market.

Qin Lin looked at the plan in his hand and roughly understood Zhou Chengjun's purpose.

500 million in one go showed that the other party was very ambitious and wanted to take a bite out of it one day. As long as he succeeded, the profit would definitely be far more than 500 million, maybe ten times or even a hundred times.

Qin Lin didn't immediately agree after reading the plan.

500 million yuan was a small matter to linlin company, and it was also a small matter to him.

all of these were not important. the most important thing was the product.

"Let me see the soy sauce." Qin Lin said.

It was better to use the product to convince him. If the product was not good, he would not be interested no matter how great the opportunity was.

When Zhou Chengjun heard this, his face immediately showed excitement. For a person like Chairman Qin, as long as he was willing to give him a chance, it would be the best thing.

What he needed to do now was to seize this opportunity.

[Chapter 1449 658! An Obvious Contrast! The Revenge Of The Rich Man](#)

zhou chengjun did not hesitate and took out two bottles of soy sauce from his bag. one bottle was haitian soy sauce, and the other bottle was not labeled. it should be the product that zhou chengjun mentioned.

Obviously, Zhou Chengjun was going to compare the two products.

Zhou Chengjun turned to Gao Yaoyao and said, " miss Gao Yaoyao, could you please order some dumplings? "

Gao Yaoyao nodded. She left the office and headed to the kitchen.

There were still dumplings in the kitchen. Even if there were no dumplings, there were ingredients because the servants in the manor were on night shift.

there was a midnight snack on the night shift, and most of the time, it was dumplings.

After Gao Yaoyao informed Master Lin, Master Lin immediately prepared a bowl of dumplings and handed it to her.

After Gao Yaoyao brought the dumplings to Qin Lin's office, Zhou Chengjun immediately took out the soy sauce that he had made and opened it, placing it in front of Qin Lin.

Qin Lin picked up the chopsticks and dipped the dumplings in soy sauce to taste.

&Nbsp; it had to be said that soy sauce had its current reputation. The quality of the soy sauce was really good, at least it was better than the random brands on the street.

Unfortunately, this time, soy sauce made a wrong move one day.

Sometimes, once the public developed a sense of disgust, it was difficult to change this kind of disgust. The loss was hard to estimate.

Now that soy sauce had lost 300 billion in market value one day, the price to pay to get it back would be high.

Qin Lin made a pot of tea and rinsed his mouth to get rid of the taste of the soy sauce in his mouth. Then, he picked up the dumplings and dipped them in the soy sauce that Zhou Chengjun brought.

qin lin's eyes lit up as soon as he put the dumpling in his mouth.

The taste of the soy sauce brought by Zhou Chengjun was surprisingly good. It was definitely much better than the soy sauce he had bought some day.

this taste was similar to the sauce he had eaten at zhou chengjun's house. he could tell the difference immediately, especially the feeling of desire.

This soy sauce should also be a Grade 1.

Qin Lin was surprised.

What did Zhou Chengjun's family do in the past? so many things have been passed down? A Grade 1 soy sauce after a Grade 1 sauce?

This kind of good thing, ordinary families can't have it, right?

"how is it, chairman qin?" Zhou Chengjun asked expectantly.

qin lin nodded and said, " that's right. the soy sauce will definitely grab the market. i'll talk to president deng of linlin food company. you can just go and see him. "

Since the soy sauce was really good, and 70% of you Cheng sauce company's shares were his, it wouldn't be a problem for Linlin food company to loan 500 million Yuan to you sauce.

with this soy sauce's potential, if he developed well, he could easily return 500 million.

"Thank you, Chairman Qin." Zhou Chengjun's face lit up when he heard Qin Lin's words.

Qin Lin called Deng Guang in front of Zhou Chengjun and told him about the matter.

deng guang naturally agreed and let zhou chengjun go over to talk.

Qin Lin's phone call meant that he already knew about the soy sauce's situation. Deng Guang would not be stupid enough to say anything.

After that, he reported to Qin Lin about the development of you city sauce company, then left Linlin Manor.

he also went to the headquarters of linlin food company immediately to visit deng guangshang and discuss the 500 million loan with him.

After the discussion, he couldn't help but share the good news with his friends. However, he didn't talk about the 500 million Yuan loan. He only said that the new product would be released soon.

However, as soon as he posted it on his moments, he saw a like, and the person who liked it made him frown.

He was a person that he hated very much.

just as he was thinking, his phone rang. when he saw the number, he subconsciously felt disgusted, but in the end, he couldn't help but answer.

as soon as the call went through, a woman's voice came from the other side, " "Chengjun, I missed you."

Zhou Chengjun's face turned cold when he heard this. Mrs. Lu, I don't think you should say that. You should be thinking about your husband.

The woman on the other end of the phone sobbed and said, Chengjun, you don't have to be like this. I know I was wrong. I wasn't determined enough back then. I really regret it now. Really. If I can return to your side, I can divorce him immediately.

When Zhou Chengjun heard this, the sneer on his face became even more pronounced. "Will you pick up trash that has been used by others and use it again?"

after he finished speaking, he hung up the phone, feeling that it was ridiculous.

Back then, because he could not afford to buy a house in Xia city, the other party had given up on their four-year relationship in University. At last year's class reunion, the other party even said that her husband had a house in Xia city.

He was really proud of being a citizen of Xia city and even felt that he had made the right choice back then.

However, after knowing that he was the person in charge of you Cheng sauce company, the other party seemed to have other thoughts.

His thoughts were laughable.

What was even more ridiculous was that the other party kept saying that he would return to his side.

Even if the other party had really divorced him first before saying this to him, he would still be a little soft-hearted.

On one hand, she was maintaining her marriage with the other party's husband, but on the other hand, she was saying that she wanted to return to his side. He didn't know if the other party was ridiculous, or if he was a ridiculous person, or had society become so ridiculous?

he laughed at himself and drove back to his company.

since he had borrowed 500 million yuan from linlin food company, he naturally had to do his job well and not let chairman qin down.

[Chapter 1450 658! An Obvious Contrast! The Revenge Of The Rich Man](#)

...

Linlin Manor.

After Zhou Chengjun left, Qin Lin locked the office door and entered the game with two bottles of soy sauce. He saw the remarks of the two bottles of soy sauce.

He naturally wanted to verify it.

[soy sauce of a certain day: normal]

.....

"unknown soy sauce: Grade 1"

[this is a recipe passed down from an ancient gourmet family. It has a special effect when used: Appetite +1, deliciousness +1!]

Sure enough, just as he had thought, the soy sauce made by Zhou Chengjun was of Grade 1.

At the same time, he also knew why Zhou Chengjun's family had so many Grade 1 recipes. His family must have been a gourmet family in ancient times as mentioned in the remark.

To put it simply, he used to be a chef, like the inheritor of the royal chef.

However, it was likely that the legacy would end in Zhou Chengjun's generation.

If he had not discovered how good Fang family's sauce was, Zhou Chengjun would not have wanted to pass down the recipe. After all, Fang family's father had already given up on passing down the recipe.

he had eaten the sauce and asked to buy the recipe, and Zhou Chengjun had seen a business opportunity.

Qin Lin exited the game with another thought. He opened the office door and his phone rang again. It was Shen Li from the laboratory.

He picked up the call and immediately asked, "It's true. I'm all better now."

Shen Li immediately replied, "that's right, those spendthrift spendthrifts have completely recovered. Should we find some reporters to publicize it?" I'm sure the higher-ups are also looking forward to this result."

"President Shen, I'll leave this to you." Qin Lin didn't refute this. It was a good opportunity for the Western countries who had slandered tea to see the effects of this tea and make them regret it.

The spendthrift Shen Li was referring to was naturally the wealthy people who donated money to treat cancer.

These rich people were all extremely wealthy. Carlton alone had donated 6.3 billion US dollars, and all he had received for his treatment was a cup of tea every day.

On the other hand, the clinical testers in China were the family members of people who had made contributions to the country. The clinical trials were free.

this further reflected the spendthrift physique of Carlton and the others.

now that this batch of late-stage cancer patients had all been cured, the western countries could no longer question the effects of his tea leaves.

especially the tea leaf bandits, they were filled with regret.

After Shen Li had called Qin Lin, the first thing he did was to contact the reporters from all over the country.

The next day.

However, a restricted area in You City Hospital was bustling with activity.

This restricted area was actually very famous in You City Hospital, and it even attracted everyone's curiosity.

This area had been banned from entering at some point in time, and everyone knew that many patients had been transported in.

However, the doctors and nurses on duty in the area were very tight-lipped and had signed a confidentiality agreement.

However, there were also some smart people who guessed what was going on.

after all, linlin's laboratory had developed tea leaves that could treat cancer, and then there was the donation from a rich foreign person for treatment. there was a high possibility that this was a clinical trial for late-stage cancer.

At that moment, the area was indeed bustling with noise and excitement, or perhaps it could be said that the atmosphere was filled with happiness.

Those late-stage cancer patients, even wealthy people like Carlton, were all previously threatened by the Grim Reaper and were about to lose their lives very soon.

now that they had been cured by drinking tea, how could they not be happy?

Today was the last day they would be inspected together.

After today, if all the data was normal, they could be discharged. By then, cancer would no longer be a threat to them.

Carlton followed the other wealthy men out of the ward and followed the doctor to a special examination area.

On the other side, there were also many patients who walked out.

Upon seeing these patients, Carlton and the other wealthy men's faces turned a little pale.

This was because they had already inadvertently found out that the treatment of patients in these Eastern countries was actually free. They didn't need to spend any money.

however, each of them had to donate 10% of their assets to receive treatment.

This made them feel that it was unfair.

Especially Carlton, who had donated the most.

Therefore, after a while, the happiness on their faces disappeared and was replaced by gloominess.

These people from the bridal chamber country were really vampires.

They actually dared to oppress them like this, they were simply inhumane.

Colton snorted coldly. He already had the idea of revenge in his heart.

This idea had actually come into being after knowing that these people from the eastern countries were receiving treatment for free.

however, the most important thing now was to get checked and make sure that he had completely recovered.

Soon, the doctors involved in the clinical trials began to draw blood and perform various tests on Carlton and the others.

After that, all the staff in the area got busy.

Two days passed by quickly.

carlton had been suffering for the past two days. he wished that he could leave this damned hospital as soon as possible, and that he could carry out his plan as soon as possible.

However, before that, he had to make sure that he was completely cured. Only then could he act without fear. Even if he failed, at least he was cured.

while he was waiting, carlton saw a doctor walk in and hand him a report. " "Mr. Carlton, this is your report!"
