

## **The Game 1581**

### [Chapter 1581 Big White Versus Big White, I'm Going To Throw It Away \(2\)](#)

Minister Lu and academician Guo were involved in the big white, and he was completely an outsider. He had reported Minister Lu before because of this.

Therefore, he felt that he was not a human at all.

On the other side, Trone and the head of Robotics Research from America had arrived at the lounge.

The two of them had already walked to a big box that was tightly sealed.

The box contained da Bai, who they had brought to the exhibition.

At that moment, the staff had already started to open the boxes.

Mr. Terang, it's time to surprise the people from the eastern country. The person in charge said with a smile.

A look of anticipation appeared on Tim's face as he looked at white.

In the exhibition hall.

The representatives from various countries who had been invited had already transported the auxiliary robots from their respective countries to the exhibition hall. Technology reporters from all over the world were present at the exhibition hall.

The reporters weren't stupid. The eastern countries held this exhibition with impure intentions, so these reporters also hoped to gain some news.

The auxiliary robots displayed by the various countries were naturally the ones that these reporters paid the most attention to.

It was just that the auxiliary robots displayed by the various countries were really very strange, but the auxiliary robots of the paste country received a lot of attention.

After all, the beauty's appearance, the silicone material, and the fact that she wasn't wearing any clothes.

All of a sudden, the robots from the plaster nation were shrouded in flashes.

They were very good at manufacturing auxiliary robots in this area.

It was also at this moment that a commotion was heard. Many people exclaimed, "

"Ah, it's da Bai!"

"Has the beautiful nation made big white yet?"

"That's amazing."

This attracted all the reporters.

Sure enough, a snow-white robot was pushed out of the display stand in the United States. It was da Bai.

All the reporters were attracted to it.

When he got closer, he heard the American representative start to talk non-stop. as you can see, this is our newly developed healing assistance robot, big white. That's right, we've been researching in the direction shown in the movie. Although it's impossible to develop resin and polyethylene, one thing is for sure: it already has the ability to walk independently, conduct preliminary blood tests, measure body temperature, and chat with others. It's already the most advanced healing assistance robot in the world.

As he spoke, the person-in-charge turned on da Bai, and a familiar voice sounded. Hello everyone, I'm da Bai. How may I be of service? "

This voice was made by a movie dub actor, so it gave people a strong sense of immersion, and it made the surrounding people exclaim in surprise.

On the internet, the audience watching the live broadcast also saw this scene. For a time, the comments were like a tide.

it's unbelievable. The United States actually made such a thing.

it's really great White. My girlfriend has two great White pillows.

sigh, it seems like the robots from America are going to be in the limelight this time.

". "

Who wouldn't be surprised to see a movie product like da Bai?

This made the people on the internet curious about the robots in their own country.

After all, they were the founders of the country.

Many people began to look for videos of the exhibition locations of their own countries, but in the end, they only saw a box on the stage.

This made many people puzzled. There were no robots.

Or is the robot in the box?

The box was different from the one in the movie, so no one thought that it was da Bai.

In the venue, special video cameras began to appear on the big screens. They took turns to show the robots from various countries, so that people could see them more clearly.

When the robot from the plaster country appeared on the video, the people and reporters watching at the scene all smiled knowingly.

Soon, the display stage of the Chinese Academy appeared on the screen.

Just now, many people at the scene did not notice the exhibition platform of the Chinese Academy. After all, there were no robots on it.

However, when the video was released, everyone noticed that there was only one box in the video.

This caused everyone to be puzzled.

Could it be that the robot displayed by the eastern countries was just a box?

Just as everyone was looking at the box in shock, they realized that the box moved and slowly opened.

At that moment, a shriveled white object popped out of the box. It was still slowly expanding.

This scene made many people's eyes widen slightly, because many people felt that this person looked familiar.

Soon, as the White object expanded, an incredible object appeared before everyone's eyes. It was none other than da Bai!

Moreover, da Bai's appearance was even more shocking than the American one, almost exactly the same as the one in the movie.

Da Bai's voice also rang out. Hello, everyone. I'm da Bai. How may I be of service to you? "

It was also at this moment that the box split open, and da Bai walked out on his own.

This was also specially designed. After all, the artificial intelligence system was not good enough, and they couldn't use a machine to pick da Bai out of the exhibition.

Following this, da Bai actually made his way to the display stand and said to the man closest to him, ""Hello, I'm da Bai. Do you need me to check your body? Answer yes or no, and I'll serve you."

The man was taken aback by the question, but he replied with interest, ""Yes!"

"Okay, I'll check your body now." After da Bai spoke, rays of light shot out from his body and began to scan the man's body.

This was basically the same as the movie.

The man was immediately surprised. He felt that it was unbelievable. Moreover, the scanning light had no effect on him at all.

A short moment later, da Bai's voice sounded again. Sir, your cholesterol is a little high. It has already exceeded the standard line, so you need to take some medicine ...

As he spoke, da Bai listed out the names of a few more medicinal herbs as if he was very familiar with them.

However, this completely shocked the man. He exclaimed, ""It ... It's really amazing, my cholesterol is really high, and the medicine it mentioned was the same as the doctor's."

This time, the surrounding people were completely shocked.

Another beautiful girl couldn't help but step forward, and da Bai also asked, ""Hello, I'm da Bai. Do you need me to check your body? Answer yes or no, and I'll be at your service!"

The pretty girl didn't hesitate and immediately answered "yes."

A moment later, da Bai also began to scan her body, and he came to a conclusion. beautiful lady, there seems to be a problem with your heart. You may need to pay more attention to it ...

Following that, da Bai described many things that beautiful girls needed to pay attention to, as well as things they couldn't do.

The woman couldn't help but cover her mouth in shock. "It ... It's really incredible. It was right, I do have heart disease. Can I buy one in the future?"

A few more people stepped forward, and da Bai was able to determine their condition with a scan.

The noise could no longer be suppressed.

This was the real da Bai.

The big white from America was simply too different.

The netizens were also in disbelief.

6666, this is how great White should be.

"This big white looks exactly like the one in the movie."

it's unbelievable. This is so much more awesome than the big white dog in America.

".."

At the venue.

Trang and the head of the American robot research team were completely dumbfounded. They couldn't believe this was real.

At this time, they finally understood why the people from the eastern country wanted to hold this exhibition.

Damn it, they had actually created a da Bai that was even more powerful than them.

However, just as everyone was in a state of shock, da Bai suddenly stopped in his tracks and walked toward the center of the display stand. Then, something even more incredible happened.

Da Bai slowly raised his hands and made a martial arts starting gesture.

Martial arts?

Everyone was stunned!

#### [Chapter 1582 This Da Bai Is Different](#)

Many people must have played house when they were young and played those heroic characters, right? Fang Shiyu? Yang Guo? Fu Kangan? Zeng zhibing ...Wait a minute.

As a result, when da Bai made his starting stance, many people recognized that it was martial arts.

Naturally, all of the foreign reporters also pointed their phones at da Bai. They had also heard of Eastern Kungfu.

It was just that Eastern Kungfu did not have a good reputation in the outside world, and was even regarded as fancy moves.

In any case, da Bai's actions were extremely attractive.

Following that, everyone could see da Bai performing all sorts of martial arts moves. Even though his body was quite cute, he was able to execute all sorts of martial arts moves with great ferocity.

This shocked everyone at the scene.

The people who could attend this robot exhibition were basically people who had some understanding of robots. The reporters also had some understanding of the technology in robots.

Therefore, they all knew how unbelievable this was.

With the current robot technology, other than the Transformers in the eastern countries, no other country's robots could do such a flexible thing.

This Eastern country seemed to have completely mastered the technology of mechanical bone armor.

On the internet, the netizens who saw this scene were also shocked.

Most of the netizens in China had watched the movie "super Marines" and knew that da Bai had a program that allowed him to use karate to deal with bad people.

However, from the looks of it, this martial art was obviously more impressive than karate.

At this moment, a few people in special outfits went up the stage. They were obviously robbers, who were arranged by Minister Lu to pretend to be them.

The purpose was naturally to show people da Bai's more important skills.

The robber was still holding a knife in his hand, which was extremely sharp. He even deliberately cut off a piece of wood as proof.

A short while later, da Bai was engaged in battle with the bandits.

As the battle continued, one of the bandits could be seen hacking at da Bai's identity card with a sharp knife.

Under normal circumstances, many people would have thought that da Bai was definitely going to deflate.

However, da Bai was clearly as good as new, and he hadn't suffered any damage at all. However, da Bai waved his hand and sent one of the robbers flying with a single strike.

It was clear that da Bai was very strong. Fortunately, the person who had disguised himself as the robber had protected himself, otherwise, he would have been injured.

Da Bai quickly defeated the group of robbers.

At this moment, everyone also turned to look at da Bai. They could see that da Bai had been slashed many times, but not a single wound had been left behind.

This was quite an amazing feat, and everyone was once again in disbelief. They were all curious as to what materials da Bai had been made of.

At this moment, academician Guo Tao walked up to the platform and began to introduce, ""I'm sure everyone has seen the DA Bai we made. Its functions are completely replicated from the movie."

it can be said that whatever function it has in the movie, the big white we made will have the same function. More importantly, our big white will be made from the same materials it was made from in the movie.

for example, it's made of resin and polyethylene. Therefore, even a sharp knife can't cut through da Bai's skin!

This was the real show-off of skills.

It had to be known that the materials of resin and polyethylene were only science fiction conjectures in movies. Various countries had not even researched the slightest bit of them. In fact, many countries had even given up on researching these technologies, thinking that it was impossible to research them.

Now, this Eastern country had actually developed this technology.

This was too unbelievable.

Moreover, these reporters were very clear on one thing, and that was that this ethanol resin could be moved into space.

impossible! This is absolutely impossible! The head of the Robotics Research Department in America had a very ugly expression on his face.

This was a huge blow to him.

One must know that he was in charge of this technology, but in the production of the same product, he was so far behind others.

He couldn't describe this feeling.

It was as if a new era had been born.

Even Trang's face was very gloomy.

Even he knew that this time, he didn't get to see the eastern country lose face. Instead, he wanted to see the other party's glory end.

666, you still have to watch the Chinese martial arts!

after the Transformers, we created da Bai. It's like the Westerners helped us imagine these characters.

"I can only say this much. Is there anything we can't make?"

"It's a pity that they don't have the characteristics of our own country."

".."

It could be said that with the appearance of da Bai in China, the exhibition became a one-man show. The robots from other countries were all overshadowed. Even da Bai, who was originally from a beautiful country with high technology, became a comparison and was like a dancing clown.

The only robots that could still maintain their uniqueness under da Bai's light were the robots from the jiangyao nation.

After all, their robots were very alluring. Moreover, their robots' functions did not overlap with the robots from other countries.

The key was that there were both male and female robots.

#### [Chapter 1583 This Da Bai Is Different \(2\)](#)

While Great White was in the limelight, the people of the paste nation were introducing the heating function of their robots. As for what the processing function was for, many people already understood.

After the robot exhibition ended, the representative from America left dejectedly.

However, Great White's incident quickly swept the world, especially in China. Many people woke up, ate, and went to bed ... He could see Great White's news anyway.

Everyone was also discussing da Bai.

It was as if a science fiction world had really arrived.

As for why the Transformers didn't give off such a feeling when they came out, it was because not everyone could come into contact with Transformers. After watching the video of the pirate being abused by the Transformers, everyone knew that the Transformers couldn't be used for civilian use.

However, da Bai was different. Not only was it a healer robot, but it was also a companion robot, so it could possibly be used for civilian use.

Only when it could be used by the people could it become popular and spread among the people.

There was nothing wrong with that.

Thus, da Bai became the focus of everyone's attention.

Under such circumstances, it did not take long for the Chinese People's Hospital to make an announcement that attracted everyone's attention. That was, Great White was about to be mobilized to all hospitals in the country to assist in the operation of the hospital.

Once the news was out, it caused another uproar and shock.

Moreover, in the video of the announcement, one could see many snowy white machines being displayed.

It was obvious that with da Bai's complete technology, creating da Bai wouldn't be a difficult task. However, it was naturally impossible to perfect all of da Bai's functions.

For example, da Bai, who had been transported to the hospital, only had the function of a medical support. Even its material was not a complete resin, but only a semi-resin.

It was a semi-finished resin, and the difference between it and the real thing was huge.

This was naturally for the sake of technical confidentiality. Besides, da Bai was used in hospitals, and it was only used most often for its scanning function.

The resin was something that could be moved into space, so he couldn't give the enemy any chance.

In the future, if the civilian version of da Bai was released, the semi-finished resin that was made of ethanol would not be used. They would only replace it with other silica gel materials.

After all, the country was peaceful and there was no danger. The civilian ones only had simple medical functions and companion functions.

Da Bai, which had all its functions as an army unit, could only be used in the Army.

Moreover, the Chinese Academy of Sciences had also come to an agreement with Linlin laboratory. For the sake of technical confidentiality, only the higher-ups could produce the full-functional big white. All other versions of big white would be produced by Linlin laboratory and operated by Linlin laboratory for civil use.

Da Bai's discussion became a hot topic.

In Linlin's laboratory office, Qin Lin was looking at the mental screen again, because Elba had appeared in the farm again.

He understood that this Goblin was definitely here to give him da Bai's artificial intelligence system chip.

He immediately locked the office door from the inside, and then entered the game with a thought, where he saw Elba.

"Friend, this is for you." When Elba saw Qin Lin, he handed him a few artificial intelligence chips covered in special Goblin runes, while saying, "after I told dad that the artificial intelligence chip was broken, he made me a bunch of them. These are for you. You can store data. If one is broken, you can copy the information to the other. In that case, you can change the chip and you'll still be the original big white.

Qin Lin nodded, knowing what he meant.

Didn't da Bai sacrifice himself in the movie? But in the end, it gave the chip that copied the information to the protagonist, and the protagonist didn't get it back with the chip.

"Friend, I'll take my leave first." Elba said goodbye to Qin Lin and left the farm in a hurry.

Qin Lin immediately logged out of the game with a thought. Then, he made a call to Shen Li and asked him to send a da Bai to the inner area of the manor.

He put down his phone and walked out of the office to the inner area of the manor.

As soon as he entered, he saw Zhao mochen, Lin Fen, and little Qin Feng watching the news.

Da Bai was on the news.

Seeing that Qin Lin had returned, Zhao mochen immediately said, "Honey, when will big white be here?"

She knew that her husband had given birth to Great White. Great White was so adorable, so she naturally hoped that there would be one at home.

"Daddy, I want big white!" Little Qin Feng also waved at Lu Feng expectantly.

Qin Lin picked up little Qin Feng and said, " yes, Great White will be here soon. Besides, our Great White is one of a kind. It's not like any other Great White.

"Really? Only our family has it?" Little Qin Feng was overjoyed and clapped his hands.

Because of his fetus-beneficial genes, the little guy developed faster than the average child, but no matter how fast he was, he still had the heart of a child.

"Hubby," Zhao Moyu suddenly said, "add a learning supervision function to da Bai. In the future, da Bai will supervise our son's learning."

"Ah. Daddy." When little Qin Feng heard this, he immediately looked at Qin Lin anxiously and kept shaking his head at him. The meaning was obvious. He didn't want to.

His mother had already hired a teacher for him to be in charge of his homework, yet he still needed da Bai to supervise him. He could only look at Qin Lin helplessly.

#### [Chapter 1584 This Da Bai Is Different](#)

Qin Lin smiled. I didn't create da Bai's AI system, so there's no way I could add this function. After all, this isn't what our Lin Lin laboratory is good at.

Little Qin Feng seemed to understand what he said. He hugged Qin Lin's cheeks and kissed him.

This scene of a loving father and a filial son made Zhao moyin shake his head. He wanted to pull Qin Lin's ear and tell him not to dote on the child so much.

However, after thinking about it, she decided to forget it. She had never dared to do such a thing in her life.

It didn't take long for Shen Li to send a brand new white to the inner area of Linlin Manor.

After the big box containing big white was opened, Zhao mochen brought little Qin Feng forward immediately and gave the box an excuse to charge it. In the movie, this box containing big white was used to charge big white.

After charging big white, Zhao moyin also turned on big white under Qin Lin's guidance.

After a short while, da Bai puffed up his chest and stood up.

Hello, I'm da Bai. How may I be of service to you? "

Da Bai's voice also sounded.

Qin Lin stepped forward and pressed down on a spot on da Bai's body. A crack appeared on da Bai's body, and a groove popped out.

This was where da Bai installed the chip. Usually, there would be a password set by the owner, and only the owner could open it.

Da Bai didn't have an owner, so it didn't need a password.

Qin Lin immediately removed the chip that da Bai was originally using, and the light in da Bai's eyes instantly dimmed. Then, he installed one of the Goblin rune chips that Elba had given him.

A moment later, da Bai's eyes lit up again.

Hello, I'm da Bai. How may I be of service to you ...

It was the same words, but this time, not only Qin Lin, but Zhao Moxi and Lin Fen could also hear the difference. Da Bai's voice had been stiff before, but now it was very clear, as if there was a kind of emotion in it.

Qin Lin made some settings in da Bai's system and pointed at little Qin Feng. Da Bai, he'll be your little master from now on. Your mission is to accompany and protect him.

"Yes, sir." Hearing this order, da Bai stepped out of the box and walked over to little Qin Feng. When he was in front of him, he said, " Hello, little master. I'm da Bai, and I'll be by your side as you grow up.

"Da Bai?" Little Qin Feng looked at da Bai in surprise.

Da Bai immediately replied, ""Little master, do you have any orders?"

Little Qin Feng did not have any instructions. Instead, he thought for a long time and could not think of anything."I want to drink fruit juice."

These words made Zhao mo and Lin Fen speechless.

They had watched the news and knew about Great White's capabilities. According to the publicity, Great White couldn't possibly do something so intelligent.

However, something shocking happened.

"Alright, please wait a moment, little master." Da Bai made his way over to the refrigerator and began to check the drinks inside.

"This is orange juice. It contains elements that are not conducive to children's growth. Little master can drink it." Da Bai looked through the contents of the fridge one by one, and it was only after a short while that he finally found the Cola fruit juice. "This is a fruit juice that has the same taste as coke. It'll be very beneficial to little master."

As it spoke, it brought over a glass of Liu Chan fruit juice and handed it to little Qin Feng.

This scene stunned Zhao mo and Lin Fen.

#### [Chapter 1585 Lifting A Rock To Smash One's Own Foot](#)

They had been paying a lot of attention to Great White these days. After all, it was made by Qin Lin, so it was hard for them not to pay attention to it.

However, how could the big white on the news be so smart? On the contrary, he was very wooden.

Now that they were looking at da Bai, were they sure it was a robot and not a human?

Its actions were exactly the same as in the game, okay? They were practically the same person.

Da Bai passed the Liu Chan fruit juice to Qin Feng.

After little Qin Feng accepted the fruit juice, he immediately put it in his mouth and began to drink it. He hugged Great White even more happily and rubbed his little face against its soft skin.

"Mommy, can I take da Bai to kindergarten in the future?" Qin Feng asked.

A kindergarten was still too early for Qin Feng's age.

However, they had already hired an education expert to teach little Qin Feng. They still had to listen to the expert's words. They felt that little Qin Feng could enter kindergarten to learn in advance. After that, he could even skip a grade. His education could not be followed by common sense.

Skip a grade? to ordinary families, it was difficult to make their children skip a grade. The system was very strict now.

However, it was a small matter for Qin Lin and the others.

In the end, Zhao Moyu couldn't help but ask, ""Hubby, isn't this big white a little different from the big whites on the news?"

Qin Lin nodded. yes, it's very different. It's very smart, and it's the only one of its kind.

Zhao mo responded with a smile. She knew it would be like this.

This was what da Bai was showing.

Over the next few days, da Bai, the true artificial intelligence, displayed more and more functions and intelligence.

Even when little Qin Feng fell, it would immediately pick him up and blow on the areas where he rubbed against the skin. When little Qin Feng wanted to eat melon seeds, it would use a special method to peel them for him.

This was the true accompanying function.

Zhao mochen wanted one just by looking at it.

Qin Lin was naturally not stupid. Why would he make one for Zhao Moxi? wasn't it enough to have his company?

The outside world didn't know that Qin Lin's family had a real big white. Their attention was still on the big white promoted by the Hua \* Yuan.

Moreover, not long after the news was broadcast, the first batch of hospitals was also distributed.

He had thought that this would solve some of the hospital's medical problems and speed up the treatment of patients.

However, when Minister Lu received the report, his face turned pale.

Hua hospital.

Minister Lu's office.

The Secretary was reporting to Minister Lu, ""Leader, the first batch of da Bai's on-the-spot experiments didn't go very well. The three hospitals in Beijing that received da Bai all said that da Bai wasn't flexible enough and often tested the wrong patients in the wrong order."

a few hospitals in the southwest also said that Great White was too stiff and didn't have the awareness to serve patients, or that Great White wasn't flexible enough. Another hospital said that Great White's power was cut off halfway through treatment.

a few hospitals in the South have also expressed that there's a big problem with big white. Moreover, the unfavorable situation of the experiment has been spread all over the internet.

everyone seems to be a little disappointed in Great White now. They're no longer as confident and enthusiastic as they were in the beginning. After all, there are so many hospitals that have proven that Great White can't make it.

This made Minister Lu frown. Things were out of his expectations. Something was wrong, very wrong.

He had never thought that da Bai would encounter such a huge problem after using its current state.

However, if there was a problem, it should be solved. Otherwise, it would be a joke to the foreigners. After all, they had just made a name for themselves. If that happened, the joke would be doubled.

Therefore, Minister Lu called Qin Lin immediately.

Linlin Manor, inside the inner area.

Qin Lin was also watching the news about da Bai.

Zhao mochen, Lin Fen, and little Qin Feng were also there. The whole family was there.

Little Qin Feng was also watching the TV, but his little body was leaning against Great White's lap, and his little face was filled with enjoyment from the softness.

Not too far away, little yang was staring at da Bai with a hint of hostility in his eyes.

Because after having this big white fellow, little master seemed to ignore it more.

Animals can get jealous too.

This made it crawl carefully toward da Bai.

It was still very timid, but for the sake of its little master, it could always muster up some courage.

Little yang arrived next to Great White and opened his mouth before biting down viciously on Great White's leg. Great White noticed the tremendous force behind his bite.

However, it was clear that its teeth could not harm the resin.

Da Bai glanced at little yang with a confused expression before scanning him with a medical scanner. Mr. Gator, is there anything you need da Bai to do for you? "

Who knew that the Ray of medical scanning would scare little yang so much that he fled to a corner and hid away. His timid character had not changed at all.

The television was broadcasting the problem with Great White, and some hospital leaders even came out to personally explain that Great White might have hidden dangers.

Da Bai, who was carrying little Qin Feng in his arms, mumbled, "I'm fine. Although those big whites are stupid, they're definitely fine."

When Qin Lin heard this, he had a thoughtful expression on his face.

Indeed, da Bai was a product of the game, so it was impossible for there to be any problems with it. So, what was the problem?

Just then, Qin Lin received a call from Minister Lu.

#### [Chapter 1586 Shooting Oneself In The Foot \(2\)](#)

As soon as the call went through, Minister Lu's call came through, "Boss Qin, I'm here to ask for your help again. Da Bai's experiment has some problems."

"Minister Lu," Qin Lin asked, "is it because of the problems in the hospital?"

yes, it's a problem with the hospital's experiment, "Minister Lu said immediately. after all, the hospital is a place to treat and save people. There can't be any mistakes. If there's a problem with da Bai, we still have to actively improve it."

Qin Lin laughed when he heard the question. Minister Lu, first of all, you have to figure out if there's a problem with da Bai.

"Boss Qin, what do you mean?" Minister Lu was stunned.

"Minister Lu, you've never been to a hospital outside, have you?" Qin Lin asked with a smile.

yes, "Minister Lu said. we have a special hospital for examination. Family members of our rank can also enjoy the special benefits of the military hospital."

Qin Lin smiled. that's right, Minister Lu. I suggest you go to the hospital outside to see the patient first. You can also do a series of examinations and listen to the patient's voice.

Qin Lin didn't say anything else. However, the hospitals had said that there was a problem with Great White, so they should give him a warning.

He directly called Shen Li's number, and as soon as the call went through, he immediately said, "President Shen, please make an announcement to the public that our Linlin laboratory is going to implement a plan to share da Bai with everyone. Da Bai will join the most complete medical system. At that time, everyone will only need to pay one Yuan to have da Bai check their bodies for free."

as for whether big White's scan is accurate or not, we can let the patients verify it themselves. After all, the patients have been seen in the hospital, so there will always be test results. We'll know when these results are compared with big White's scan.

He was obviously trying to pull the carpet out from under those hospitals. After all, if everyone in the country were to verify whether there was a problem with da Bai, everyone would be able to compare it. By then, those hospitals would have nothing to say.

When Shen Li heard this order, he probably knew the reason. After all, he had also seen the comments on the internet.

If there was a problem, it would be fine. If there wasn't, then Chairman Qin wasn't an easy person to talk to.

"Alright, Chairman Qin." okay! Chen Li replied and hung up the phone. He immediately made arrangements for the matter.

..

Time passed.

After hearing Qin Lin's suggestion, Minister Lu came out of a hospital, exhausted.

This was the third hospital he had been to, but what he had experienced had really shocked him.

Usually, they and the higher-ups didn't pay much attention to the hospital's problems because they had specialized hospitals for examination and services. They didn't even need to register and queue.

However, this time, after he went to the hospital, he found out that a simple illness required more than 10 tests. He remembered that he only needed to go to a Specialized Hospital for simple treatment.

More importantly, after more than a dozen examinations, this simple illness would cost 4000 to 5000 Yuan. The final conclusion was that it was a simple illness.

He asked the doctor, "after so many examinations, is this a simple illness?"

However, the doctor answered that he had to do so many tests before he could be sure that it was the disease. Otherwise, there was no way to be sure. He said that he should be glad that he could be sure that his body was fine with only 4000 to 5000 Yuan.

Hearing this, he spat out a mouthful of blood. As a Doctor Who could graduate and register for treatment, it was impossible that he could not even see this kind of illness and had to rely on so many tests.

Some of the doctors who treated them were also very young. How could they tell so easily?

Naturally, he had asked many patients and had a rough idea of the hospital's situation.

This was an income-generating project of the hospital. The doctors received so many patients every day, so how could they not know what the diseases were?

Minister Lu could only sigh with emotion. Da Bai had hindered their interests.

With Great White, the hospital would be able to do a lot less tests and patients would be able to save a lot of money.

This was something that the hospital was not allowed to see, which was why there were so many groups of people boycotting Great White.

Minister Lu finally understood what was going on, but these hospitals must have underestimated the use of Great White and its significance to the progress of society. It was not something that they could stop.

Therefore, he returned to his office and started to write his application. He specifically wrote about da Bai's experiment and the current situation of the hospital. Finally, he applied for approval for more funds for Chinese medicine in the new year and reduced the approval for Western medicine.

As the higher-ups had promoted Chinese medicine before, Western medicine had been restrained in many aspects.

However, this was obviously not enough, so he had to use more force.

No industry could be dominated by one company. They had to compete with each other. Only then could they truly take out their attitude to serve the public and not let themselves be at the top.

Those hospitals were resisting Great White because of their interests, and just as they were feeling happy about boycotting Great White, they suddenly received extremely bad news.

Linlin's laboratory had made an announcement that they would be implementing a shared da Bai project. The shared da Bai only had one medical scanning function. As long as one paid a dollar for a scan, they could get da Bai to treat and scan for diseases.

At the same time, the public would also be able to test da Bai's ability to scan for illnesses.

As soon as the news came out, the hospitals panicked. They boycotted Great White and seemed to have forgotten about Linlin laboratory.

The people from Linlin's experiment were not to be trifled with, and now they seemed to be targeting them.

If they shared Great White like this, how much less income would their hospital earn?

However, they had no way of cracking this trick. After all, this had to be verified by everyone. They couldn't deliberately give the patient the wrong illness and let the patient do a comparison, right?

There would definitely be problems. Once it was confirmed that there was no problem with da Bai's medical scan, then it would be their hospital that had a problem. Wouldn't that be a confession without a reason?

This was difficult to handle.

If he had known this would happen, he wouldn't have used this trick, or he would have given Linlin laboratory a heads up in advance.

However, those hospitals soon realized that this was not the most serious problem. This was because the higher-ups quickly released an announcement. That was, the approval of medical funds from the higher-ups would greatly increase the strength of Chinese medicine, while the strength of Western medicine would decrease.

This seemed to be targeting him.

Western medicine wasn't stupid, so they naturally knew the reason very quickly. Da Bai was a technology that transcended the times and was ahead of the world. While the whole world was shocked and envious, someone who suddenly jumped out to undermine them would definitely be severely treated.

The point was that they weren't telling the truth when they said there was a problem with da Bai. They were just slandering him ...

Many people realized the seriousness of the matter.

However, this was not the end, because two hospitals immediately received the notice of reform and reorganization from the higher-ups.

In an instant, all the hospitals in the Western medical world began to panic and were at a loss.

Naturally, all of this was quickly made known to the public.

After all, there was no lack of big names on the internet who had analyzed the whole story of the matter. It could be said that those Western medicine hospitals had shot themselves in the foot.

This made many commoners clap their hands and cheer.

However, while the outside was in an uproar, Linlin Manor was quiet. Academician Hao, academician PEI, and academician Zhu went to the pavilion as usual.

After all, the three of them had their first epiphany about rocket research in this Pavilion. However, they had been here for a long time. Although they had some insights under a calm state of mind, they were still far from an epiphany.

However, the three of them didn't know whether they could have an epiphany or not. When they would have an epiphany still depended on Qin Lin.

If Qin Lin didn't take out the water from the goddess 'spring, he wouldn't be able to comprehend it.

However, after such a long time, Qin Lin also planned to take out the water from the goddess's spring to let these three old academicians have a breakthrough.

Moreover, after such a long time, the National style Transformers should be online. After all, it was something that really belonged to their country.

He would at least feel a sense of pride if he could get this thing out.

This was probably the influence of the self-confidence of the ethnic culture!

[Chapter 1587 Even A Dog Will Do! Bull Demon King! 1](#)

At night.

Linlin Manor regained its peace.

Academician Hao, academician Zhu, and academician PEI also returned to the manor's restaurant to eat.

Qin Lin, on the other hand, was in the work area in the inner area. He entered the game with a thought, got a bucket of water from the goddess 'spring, and logged out of the game.

After that, he took the bucket of water from the goddess spring to the man-made spring where the moon Stone was and poured it in.

After he was done, he casually put the bucket aside and walked into the manor's Hall as if nothing had happened.

When he walked into the dining room, he saw that academician Hao, academician Zhu, and academician PEI were also eating. When they saw Qin Lin, the three of them warmly greeted him.

"Boss Qin, let's eat together!"

"Come and have a seat, boss Qin."

Qin Lin nodded. He originally wanted to ask academician Zhen, academician Zhu, and academician PEI to wait at the gazebo. Since the spring water of the goddess 'spring had been taken out, he couldn't waste it.

The three academicians would definitely be enlightened.

After Qin Lin sat down, academician Hao said, " boss Qin, this time, many people will benefit from the Great White that you created. Those hospitals have bad intentions towards Great White, so they've made the wrong decision.

furthermore, there's a Chinese medicine hospital now. So, this can be considered a lesson for them. It'll be much more convenient for everyone to treat patients in the future.

if Chinese medicine can develop in the future, with the help of da Bai's anticipation scan, it can compete with Western medicine.

Qin Lin smiled. it's you who gave it to you, Minister Lu. If you didn't give it to you, the two hospitals wouldn't have been reorganized.

Minister Lu, you have done a great thing this time.

The three academicians nodded in agreement.

When the waiter saw Qin Lin sitting down, he came over to ask and gave Qin Lin a pair of chopsticks and a bowl.

Qin Lin ate a little, then invited the three academicians, ""Academicians, let's go to the pavilion and have a chat after we're done eating,"

The three of them nodded.

"Sure, I also want to talk to boss Qin!"

"That's right, I also want to understand boss Qin's thinking."

".."

After the meal, the sky outside had almost turned dark.

At the man-made spring, the fluorescent light of the moonstone had already lit up, illuminating the surroundings.

The three of them walked into the pavilion and felt the fluorescent light. They immediately felt that the fluorescent light was a little different.

It was clearly the same light, but there was a strange feeling.

They walked into the pavilion. Qin Lin didn't think about anything, nor did he want to study anything, so he didn't feel anything.

After all, in order to gain enlightenment, one had to do something first, and then encounter a bottleneck in this matter. Only then would the moonstone be triggered.

Otherwise, if your head was filled with sh \* t and the moonstone could help you gain enlightenment, then even a dog would be able to do it.

However, academician Hao, academician Zhu, and academician PEI were all thinking about rocket technology, so they naturally reacted to the moonstone's effect.

I thought of it! I thought of it! So the formula can be like this! academician Hao suddenly exclaimed.

As he spoke, he hurriedly took out a pen and notebook.

This was also what he had been carrying with him these few days. He was afraid that he would suddenly have some insights and have no place to write them. Now, wasn't he using them immediately?

After all, now that the pavilion had been renovated, he could no longer write formulas on the ground as he pleased.

They couldn't just scribble and draw on those pergola made of yellow Rosewood and red sandalwood, could they?

Academician Hao immediately took out a pen and quickly wrote in his notebook. Formulas and symbols quickly appeared on the notebook.

Academician Hao's actions obviously attracted the attention of academician Zhu and academician PEI.

The two academicians also looked at the formula in their notebooks. With the help of the moonstone, they were in disbelief when they saw the formula.

This was because they saw academician Hao's formula and had an epiphany. They quickly understood it.

"This is indeed feasible,"

"Then let's do the verification."

The two of them immediately picked up their own pens washi and began to write.

Symbols and formulas began to appear in their notebooks.

Their formulas were similar to academician Hao's, but most of them were different because they were in different areas.

The three of them had already entered a state of selflessness. They only cared about writing in their notebooks and had forgotten about Qin Lin's existence.

Academician Yan even took out his phone and made a call.

This time, other than the three of them, there were also support personnel. They had brought along auxiliary computer equipment, which they needed now.

As soon as the call connected, academician Hao shouted, "'Hurry, hurry up and bring the equipment over."

After that, he hung up the phone again and started to write in his notebook.

Soon, the special equipment was brought over, and the three academicians began to operate it.

One by one, formulas and data were entered into the equipment for safekeeping and then calculated.

Seeing this, Qin Lin also went back to his office, locked the door, and took out the design drawings of three National-style Transformers.

The great sage equal to heaven, the bull Demon King, and Erlang immortal master. He had to think about which one to get first. After all, with the ability of academician Lin's team, they could only get them one by one.

As he thought about it, he also selected some soldiers and generals. He didn't expect that the bull Demon King would be selected.

The bull Demon King was actually a big character in Journey to the West.

After all, he was the leader of the seven great saints and was known as the great saint of peace.

It was just that Journey to the West had been shot into a TV series, and the main character was Sun Wukong, so the bull Demon King had less space.

Otherwise, the bull Demon King would cause more trouble than Sun Wukong, and it would take Erlang Shen, Sun Wukong, and Nezha to subdue him.

It seemed that it was for this reason that Elba's father had made the bull Demon King very domineering, which could be seen from its appearance.

Since he had already chosen it, he would ask academician Lin to come over tomorrow.

.

The night passed.

The next day, Qin Lin woke up and left the inner area after having breakfast. He found that the manor Hall was very lively and a group of people were busy with something.

Even MA Hong and the others were called out to patrol around the manor. It was as if the manor had been cordoned off.

Others might not notice this, but he had taken two fruits of the tree of strength. Not only had his body strengthened, but his five senses had also become sharper.

So, he felt it.

Qin Lin walked into the hall and saw Minister Lu and some men in the uniform of the Chinese Academy of Sciences.

Minister Lu had dark circles under his eyes. He seemed to have rushed over overnight.

"Boss Qin," Minister Lu's face lit up when he saw Qin Lin. He ran over to him in a hurry. let me tell you some good news. Did you know that academician Hao and the other two had a major breakthrough last night? "

"Do you know what this breakthrough means? It means that our aviation technology will be ahead of the world by more than 20 years."

that's why I rushed over as soon as I received the news.

Qin Lin knew that academician Hao and the others had made a major breakthrough, and it was all thanks to the moonstone.

If you still can't achieve anything under the effects of the moonstone, then you might as well put a dog under the effects of the moonstone to do some arithmetic.

Academician Hao and the other two were engrossed in the equipment and kept shouting at the people around them.

After hearing Minister Lu's words, Qin Lin probably knew why the manor had become so cordoned off.

For Minister Lu and the others, this breakthrough in rocket technology was indeed a technology that transcended the era, so it must be kept strictly confidential. Once this news was leaked, the world might be nervous.

At that time, they might become the public enemy of the world.

After all, no one wanted a country to be above everyone else. While everyone was playing on earth, you were already in space.

It was like when the Qing Kingdom was still holding swords and sabers in the past, they already had flintlocks, trains, and cannons.

Now that their rocket technology had made such a breakthrough, the situation was reversed from the Qing Dynasty.

Just like now, the countries around the world didn't know that they were already developing small planets. If they knew, they might launch an attack, and a World War might break out again.

Therefore, it wasn't strange for Minister Lu to arrange for MA Hong to be under martial law.

Seeing this, Qin Lin smiled and said to Minister Lu, "Minister Lu, this is indeed good news. I'm sure the three academicians have made a breakthrough this time, and the spaceship is not far away.

but I have good news for you. The design of the National style transformer is almost complete. I've designed one, the bull Demon King!

"Bull Demon King?" "You can design this?" Minister Lu was stunned.

"Yup," Qin Lin nodded and said, "and, after making it, the bull Demon King transformer will be very domineering."

Minister Lu's attention was immediately attracted and he asked curiously, ""Boss Qin, can I take a look at the demonic bull King's design?"

Qin Lin nodded with a smile and handed over the design to Minister Lu.

Minister Lu took the design and looked at it immediately. He was a little embarrassed at first because he couldn't understand it at all.

However, as he flipped through the pages, he understood the design of the outer appearance. Moreover, he also wanted the overall design of the bull Demon King.

Just by looking at the design, he could tell that this bull Demon King transformer was definitely very domineering and handsome.

Especially when the bull Demon King transformer was carrying a big axe.

"This is the feeling I want." Minister Lu said excitedly, "this is the National culture I want. The real national culture. Optimus Prime and Megatron are not as domineering as this bull Demon King. Boss Qin, hurry up and make this bull Demon King.

"Mm, alright!" Qin Lin nodded. He immediately took out his phone and called professor Lin, asking him to come over and get the design so that he could make the bull Demon King first.

#### [Chapter 1588 Bread Grows On The Tree 1](#)

Professor Lin quickly arrived at Linlin Manor. He was also shocked by the manor's formation. By the time he arrived, MA Hong had already informed Chen dabeai to transfer a team of retired soldiers to the inner area of the scenic Area.

Academician Hao, academician Zhu, and academician Lin had already taken some researchers to the pavilion and made it their workplace.

The auxiliary computers of the equipment were already operating madly, and the drawings were scattered all over the ground. When the wind blew, they were scattered everywhere. The other researchers immediately got up and picked up the drawings.

If others were to see this, they would definitely find it hard to imagine that they were conducting a cross-era rocket technology research. This research breakthrough could not only be used on rockets, but also on spaceships.

And such an experimental research was completed in such an environment.

Of course, a piece of equipment also had a video function and a special data transmission function. The data could be transmitted back to the Chinese Academy for them to conduct simultaneous experiments, make molds, make mold parts, and confirm.

Next to the pavilion, there was a camera recording this scene.

This kind of major experimental scene, the recording staff at the Chinese Academy of Medicine naturally had to record it.

Perhaps after a hundred years, this image would be made public and even appear in history books. At that time, this Pavilion would also become a famous historical site, right?

Minister Lu was already on the phone. "Okay, okay. Don't worry, leader. There won't be any problems."

This research was so important that even the higher-ups were very concerned about it. Therefore, they called him in real time.

After professor Lin came in, he asked Qin ran in confusion, ""Chairman Qin, do you have any instructions for me?"

Qin Lin immediately passed the design of the bull Demon King's transformer to the other party and said, " professor Lin, take some people with you to make this bull Demon King transformer first. I'll come up with other designs after that.

Professor Lin immediately took the design. He was experienced and could see the difference in the design. He couldn't help but ask in surprise, " Chairman Qin, your design this time is amazing. It's obviously more complicated than Optimus Prime and Megatron, and it's more flexible. Look at the sliding parts of this mechanical bone armor. Compared to before, there are obviously four more sliding corners. This seems to allow the transformer to perform more movements, right? "

Minister Lu nodded. He couldn't understand what was going on, but he couldn't help but praise, " as expected of professor Lin. He can actually tell all this with one look.

Qin Lin nodded with a smile. He knew nothing about these things, but professor Lin had personally created Optimus Prime, Megatron, and Bumblebee.

Even if the design wasn't designed by professor Lin himself, he still had to practice making them. He also had to understand the process of making them.

It could be said that professor Lin was the person who knew the most about Transformers on earth.

don't worry, Chairman Qin. With the complete design, I'll immediately go back and arrange for someone to make this bull Demon King. Professor Lin immediately put away the design and left in a hurry.

It was obvious that he was very serious and rigorous in his work.

In other words, he was very serious and solemn with his boss's instructions.

The boss's orders must be completed with all their might.

He was planning to sell his life to his boss. After all, he had just received the academician candidate's information. Because of his ice-sealing and snowfall technology, as well as his participation in the production of the Transformers and da Bai, he was qualified to be an academician.

After submitting the materials, he would become an academician. Although he couldn't directly become an academician like his boss or academician Li, the selection process would be set in stone.

Therefore, he was working very hard for his boss now.

After professor Lin left, Qin Lin and Minister Lu went to the side to chat.

The topic of their conversation naturally could not be separated from scientific research.

Qin Lin didn't want to talk about this because it would easily expose him. However, he had learned about the profound problems of plant genes through the mysterious stone book.

Therefore, he directly brought up the in-depth question of plant genes and chatted with Minister Lu.

Minister Lu was just a manager. He didn't know much about research. He didn't know anything about professional and profound problems.

All of a sudden, he felt that there was no point in chatting and took the initiative to stop.

Time passed.

In the following time, Linlin Manor became lively.

Academician Hao and the other two researchers placed the rocket research directly in the manor. As the research progressed, the people from the Chinese Academy of Medicine sent more and more people.

This was because the research was getting more and more complicated.

Also, for such a major research project, the higher-ups were afraid that they would lose the inspiration of academician Hao and the other two.

Therefore, he could only stay still and let them continue their research in an environment of enlightenment.

After that, the people at the Chinese Academy of Sciences put the theories of the three academicians into practice and produced the parts, the higher-ups paid more attention to it.

Since Minister Lu was not in the capital, a leader made the decision to send several teams of soldiers to the manor for protection.

Moreover, these soldiers were all armed, which attracted the attention and curiosity of many tourists.

Not far from the manor.

A drone slowly appeared and was aimed in the direction of Linlin Manor. Two tourists were operating the drone and looking at the image taken by the drone in their hands.

They were just curious. After all, there were so many soldiers surrounding the manor. It was obvious that there was a secret.

In the past, tourists could use drones to film the situation of the manor. Now, there was no such thing as a ban, so they were naturally curious.

As the drone rose higher, the images became clearer and clearer. They could already see the situation inside the manor. However, just as the situation inside the manor was about to be captured, they suddenly realized that the drone had suffered a violent impact. The image suddenly lost contact and turned black.

The two visitors were shocked. They didn't have time to react to the sudden change and immediately went to check what was going on.

However, at this moment, the two tourists noticed several specially dressed security guards walking towards them.

MA Hong furrowed his brows when he saw the two tourists.

From the two's vigilance and state, he immediately knew that the two were ordinary tourists, not spies or the like.

He felt helpless when he encountered such a situation.

After all, with the manor's current situation, even if it was a tourist spying on them, they had to deal with it. Otherwise, they would be done for.

The two visitors who were captured were dumbfounded. They had no idea why this happened.

However, MA Hong had ordered his men to bring the two visitors to the security room. He had to give them a warning.

He also took the damaged drone to find Minister Lu.

The drone had been shot down by a soldier.

MA Hong soon saw Minister Lu in Qin Lin's office. He was making tea with Qin Lin.

Before academician Hao's rocket technology research was completed, Minister Lu would be in charge of this project and would stay here for a long time.

It could be said that during this period of time, the Linlin Manor was a branch of the Linlin Manor.

MA Hong walked in, placed the drone on the table, and reported, "two tourists used drones to spy on the manor and were shot down by us. Those soldiers have instead attracted more attention to our Manor.

sigh, someone made a random decision. I'll apply for it. Minister Lu frowned.

Indeed, MA Hong and the others had been enough for the manor. After all, there were linlong, the two super soldiers who had used the potion and had special combat uniforms.

With such power, who could take any information from the manor?

Besides, no one would know that Linlin Manor was conducting such research. Who would have thought that this Manor's research on rockets had surpassed the world's by decades?

Now that they had sent soldiers to guard the place, it would instead attract people to spy on them and make them curious about what was here.

It was like an ordinary Pearl that didn't attract any attention in the dark, but you had to inject a ray of light into it to make everyone pay attention to it.

Wasn't this nonsense?

However, this was a decision made by the other leaders. He had to communicate with them first before applying.

"Boss Qin, shall we go out for a walk in the manor?" Minister Lu also invited Qin Lin.

Qin Lin nodded and followed chief Lu out of the office. When they reached the living room, Gao yaoyao ran over in a hurry. "Boss ... Boss, that ... That ... It's too unbelievable ..."

Gao yaoyao seemed to be in a great shock, and she couldn't even speak properly.

"Yaoyao, what's wrong?" Qin Lin immediately tried to comfort her. Calm your breathing first, and then tell me what's going on!"

Gao yaoyao immediately took a deep breath and said, "'Boss, the tree that you asked yushui to plant has bread growing on it."

Minister Lu was stunned. "Bread on a tree?"

He suddenly felt that this was a fantasy.

How could there be bread on a tree?

Qin Lin instantly understood. It was a fruit that looked like bread. The skin was soft and the flesh was loose. It tasted very good and was similar to fruit bread.

After he let Yu Shui plant it, he didn't care about it anymore. Now, the stamen fruit had obviously ripened.

Judging from Gao yaoyao's shocked expression, she was obviously shocked by the sand pistil fruit. After all, who had ever seen bread growing on a tree?

"Boss Qin, what kind of magical plant have you developed this time? Shall we go and take a look?" Minister Lu immediately ordered Qin Lin.

Qin Lin nodded. He also wanted to see the difference between the real-life and in-game salamander fruits.

The group walked straight to the corner of the manor where the sand pistil fruits were planted. Soon, they saw the sand pistil fruits.

From a distance, they could see the fruits on the sand stamen fruit tree.

When he saw the fruit, Minister Lu ran towards the sand stamen fruit tree in shock. Then, his face revealed a look of disbelief. "This ... This was actually true. How could such a thing happen? It really grew bread ..."

Minister Lu was experienced and knowledgeable, but he still opened his mouth wide in surprise when he saw this scene.

#### [Chapter 1589 Making The Bull Demon King! 1](#)

Bread growing on a tree had appeared in many cartoons, such as Mei yang yang, Briar, and Briar.

However, in a cartoon, it was not strange for bread to grow on a tree, because in a cartoon, anything was possible, as long as you had enough imagination.

However, it was different in reality. Who had ever seen bread grow on a tree?

That was a fantasy.

But now, the most impossible thing was happening right in front of his eyes.

"Boss Qin, how did you do it?" Minister Lu asked in disbelief.

Qin Lin didn't dare to say how he did it at this time.

This was taken out from the game!

He could only make up a story. this is also by chance. I only know that the genes of this tree have mutated. I didn't know that there would be such a magical mutation.

He could only make up an excuse.

If he could push the mutation of the stamen fruit to a random genetic mutation, he would be able to push all of this aside.

Minister Lu nodded and believed him. that's true. It's possible for such a thing to appear randomly. It's all thanks to your amazing skills, boss Qin. Otherwise, it would be impossible for such a mutated species to appear.

Then, Minister Lu asked again, "boss Qin, this should only look like bread, right?" And, it's not poisonous, right?"

Qin Lin naturally didn't dare to answer directly. If he confirmed it, wouldn't he be telling everyone that there was a problem?

"Minister Lu, we still need to verify this," he could only make it up.

Qin Lin then called Shen Li and asked him to come over.

Sometimes, it was necessary to do unnecessary things.

Not long after, Shen Li arrived and saw the sand pistil fruit trees. The dense concentration of fruits on them made his face reveal a look of disbelief. "Chairman Qin, is this bread?"

Qin Lin nodded. it does look like bread. However, it's not bread since it's grown on the tree.

Shen Li nodded his head and felt the same way. However, the fruit of this tree could actually grow into the shape of bread. This was definitely unbelievable.

After that, Shen Li immediately plucked a sand pistil fruit in front of the mountain. It was soft and almost no different from real bread.

He also took the sand pistil fruit to Linlin's laboratory as soon as possible. Then, he found a team that specialized in testing the fruit and handed it over to them.

The laboratory team was obviously stunned when they received the sarira fruit.

"President Shen, is this bread?" A researcher asked with a puzzled look.

Shen Li knew what the other party was feeling, so he said, it might be hard to believe, but this is not bread. It grew on a tree, so I want you to quickly test the ingredients.

Although the researchers were stunned, they knew that President Shen would not joke about this, so they took the sand pistil fruit for testing with doubts.

The speed of testing this kind of fruit was very fast. The next day, the researcher handed the test results to Shen Li. He said in disbelief, "director Shen, you may not believe it, but this is indeed a fruit. It has the taste of bread. The key is that it is very nutritious and is not harmful at all.

After Shen Li received the results, he immediately went to Linlin Manor.

Minister Lu had been in the hall early in the morning helping academician Hao and the other two arrange the schedule through video transmission to cooperate with the experiment at the Chinese Academy of Medicine.

Moreover, the most important point was that he had asked for the withdrawal of the soldiers protecting Linlin Manor, so they would not attract attention for no reason.

"Academician Hao, I'll have to trouble you guys for the next step." As soon as Minister Lu and academician Hao finished their conversation, Shen Li came to the manor in a hurry.

He thought of something and immediately followed Shen Li into Qin Lin's office.

"Minister Lu!" When Shen Li saw Minister Lu coming in with him, he immediately greeted him and then said to Qin ran, "Chairman Qin, the breadfruit's test data is out."

Qin Lin took the test results and pretended to look at them. He knew the condition of the sand pistil fruit, so he handed the report to Minister Lu and said, " Minister Lu, take a look at the test results. They're really unexpected.

Minister Lu took the test report and was surprised to see the results.

The bread-like fruit really didn't contain any harmful substances. It was also very nutritious. It was simply a very good food.

"Boss Qin, there's nothing wrong with the breadfruit. Let's go and try it," Minister Lu immediately invited.

Qin Lin nodded and led Minister Lu to the area where the sand pistil fruit tree was.

Minister Lu reached out and picked a piece of fruit from a tree. It was soft and felt like a piece of bread.

He immediately tore off a piece and put it in his mouth. The fruit was actually like bread.

Then, he put the piece of flesh into his mouth.

However, the next moment, he said in surprise, "this fruit is not only like fruit-flavored bread, but it also tastes very good and delicious. This thing is amazing. It might sweep the breakfast market.

Minister Lu immediately determined the use of the stamen fruit.

After all, it was already very rare to find a food that was rich in nutrients. If the taste and texture were good, it would definitely become mainstream.

Moreover, the breadfruit was just like bread. It was delicious. Once it was planted, it was needless to say that many people would eat it for breakfast.

All he had to do was plant the sand stamen fruit tree and wait for the harvest. Then, he could pick a breadfruit from the tree every morning. How convenient would that be?

Qin Lin also picked a piece of the Shayla fruit and put it in his mouth. He had to admit that the Shayla fruit was not as delicious as those other delicacies, but it was definitely better than the bread on the market.

Minister Lu quickly finished a piece of the stamen fruit and said in surprise, ""Boss Qin, you've developed another amazing plant. If this news gets out, it'll definitely shock everyone."

Qin Lin nodded. The breadfruit tree's seeds were not planted by the fruits, but by transplanting the sprouts.

Then, some people asked, "how did the first sand stamen fruit tree come about without planting?"

This was actually meaningless.

Wasn't it the same as asking the question of whether the chicken or the egg came first? what was the difference?

Therefore, he had to eat these sarin fruits anyway. He might as well use them as an event to inform the public of the results of his research.

Now, his attitude had changed. He no longer wanted to hide the things that he had researched. Instead, he wanted to spread the news and let everyone know.

To a certain extent, this would increase National confidence, and it could also bring fame and popularity to Linlin's company.

The key was to increase his own reputation.

With that thought, Qin Lin called Lin Lanzi over.

When Lin Lanzi arrived at the manor, she was just as shocked when she saw the stamen fruit. She looked at the bread growing on the fruit tree in disbelief.

"Chairman Qin, What's this?" Lin Lanzi immediately asked curiously.

Qin Lin explained with a smile, " it's a mutated plant that can grow this bread-like fruit. But it's really a fruit, just that it tastes like bread. It's very delicious. In the future, our Linlin company will cultivate this fruit tree and promote it. Oh, let's call this fruit tree breadfruit.

Lin Lanzi was also very shocked when she heard Qin Lin's words. Her eyes brightened up because she knew very well how shocking the breadfruit would be when it came out.

When this thing appeared, everyone would be in disbelief. After all, bread growing on a tree was a scene that only existed in animations. Now, it had actually happened in reality.

Lin Lanzi didn't hesitate either. She took out her phone and started taking pictures of the breadfruit tree.

For her now, this was something that she was very familiar with.

Soon, Lin Lanzi left with the video and handed it to the editor of the multimedia Department. Soon, a video was done and uploaded to the internet.

The video posted by the official account of Linlin Scenic Area naturally attracted the attention of tens of thousands of fans.

Everyone was in disbelief when they saw bread growing on a tree at the beginning of the video.

"Don't tell me this is real."

it shouldn't be fake. That is indeed bread, but the bread is actually growing on the tree.

it shouldn't be fake. Linlin doesn't need to use this method to attract attention. Don't forget that they have academician Qin and academician Li Kai.

"Yeah, but this is too shocking."

".."

But very quickly, the following content of the video let everyone know that it was real.

academician Qin has developed this breadfruit tree, which can produce nutritious breadfruit with a very good taste. Linlin Scenic Area will take out a batch of breadfruit for a lucky draw. The winner can taste this breadfruit for free to verify the authenticity of the breadfruit ...

This caused a huge commotion.

Bread growing on a tree, even with the explanation of the Linlin Scenic Area, still made everyone suspicious.

Now that Linlin Scenic Area was holding breadfruits for an event, it was possible to eat them. They were the first batch of breadfruits.

If this thing was delicious and grew directly from a tree, it would definitely be popular in the future and could solve the breakfast problem of many people.

Countless tourists had rushed to the Linlin Scenic Area because of this event, making the area even more lively.

Moreover, the tourists who had arrived at the scenic Area had all seen the breadfruits on display everywhere.

It was indeed bread. More importantly, they saw plant nodules on the bread. They were connected to branches and there were leaves on them.

This meant that the bread was really grown from a plant and not real bread.

Many people took out their phones to take pictures. More and more videos and pictures were uploaded to the internet, making it even more popular and shocking.

Naturally, the foreign tourists who had arrived at the scenic Area were even more shocked.

At first, they didn't know what was going on. Seeing that the place where the breadfruit was displayed was lively, they went over and asked around.

Then, a series of "Oh my God" sounds could be heard.

It was unbelievable that the people from the eastern country had cultivated a tree that could grow bread.

While the breadfruit was making a big deal on the internet, professor Lin and his team were producing the mold parts of the bull Demon King transformer, based on their previous experience in making Transformers.

#### [Chapter 1590 That's Impossible 1](#)

On the mold production line, the parts were produced one by one. It could be seen that the parts this time were rounder and more complicated.

After these parts were produced, professor Lin immediately got someone to control the machine and start assembling it.

Due to their experience in producing Optimus Prime and Megatron, everyone was satisfied with the production of the bull Demon King.

As time passed, the overall image of the bull Demon King began to slowly appear. Soon, the bull Demon King's entire body slowly took shape. It was black all over, with metal armor and huge horns.

Professor Lin and the other researchers all heaved a sigh of relief.

The bull Demon King that he had seen on the blueprint was indeed domineering, but a blueprint was a blueprint after all, and it couldn't represent the real thing.

They were also afraid that the bull Demon King they produced would not be able to compete with Optimus Prime and Megatron.

Now that the overall image was out, he could finally heave a sigh of relief. Just the appearance alone was more domineering than Optimus Prime and Megatron, as if he was the omnipotent great sage.

"Quick, enter the martial arts program." Professor Lin immediately ordered.

This time, the National style transformer was different from Optimus Prime and Megatron. It had an additional martial arts system, which was the difference between Optimus Prime and Megatron.

Moreover, this martial arts system didn't need to be controlled by humans. It was activated with a single button and then performed by intelligence. Moreover, the level of intelligence was very high.

This was definitely something that transcended the era. It could make the bull Demon King consciously display a combat state in that short period of time.

It was hard to imagine that if there was an artificial intelligence for a transformer, it would definitely be a real transformer.

It was useful to see academician Guo, who was previously involved in the research of Intelligent Systems.

It was probably academician Guo's academician, Chairman Qin, who upgraded the transformer.

Not long after, another researcher reported.

"Professor Lin, I've finished typing." A researcher said immediately.

yes! professor Lin nodded and said, "start it immediately and try to run it.

"Alright," he said. The researcher nodded and immediately took out his walkie-talkie and began to report.

A moment later, the sound of an AI being activated was heard.

As it started, bull Demon King's body also began to move because there was already an operator wearing a sensor device controlling it.

In terms of the sensors, bull Demon King's control was no different from Optimus Prime and Megatron, so the operator did as he wished.

After that, bull Demon King quickly squatted down and the parts on his body began to move quickly. Soon, they fit together and reassembled quickly, turning into a black car.

The car was very domineering and cool. It was made by a national style science fiction company.

There was no such car on the market before. Even car dealers couldn't produce the exterior of the car when the National style science fiction company produced it. However, one thing was for sure, car dealers could definitely produce it now.

Because Chairman Qin had a complete design of car parts here, even if he didn't make it into a transformer, he could still make a car based on the size of the parts.

Their laboratory seemed to be able to start a high-tech car company.

This was because the car designed by Qin Lin would definitely be popular. Not only would it have good performance, but the bull Demon King would also become popular with a special enhancement.

Professor Lin took out his phone and called Shen Li.

"Hello, professor Lin." Shen Li's voice came out from the phone, ""What's the matter?"

boss Shen, I have good news for you, " professor Lin immediately explained. our laboratory seems to be able to open a high-tech car company.

Shen Li's puzzled voice was heard,"Professor Lin, what's going on?"

Mr. Shen, " professor Lin replied immediately, " don't you know that Chairman Qin has designed a new national style transformer? he has also come up with the design of a car for it. It can be used to make cars.

"What? Really?" Shen Li's voice immediately rose as he subconsciously stood up.

Of course, he had seen the National style Transformers before and knew how domineering it was. He had also seen the shape of the car. It was indeed very cool and domineering.

yes, " professor Lin replied immediately. and it's very good. It's definitely not worse than those luxury cars.

"Professor Lin, wait a moment. I'll be right there." Deng Guang hung up the phone and went to the laboratory immediately. When he saw professor Li, he also saw the bull Demon King transformer.

At that moment, the bull Demon King transformer was fighting Optimus Prime. The battle was very intense.

When he entered, Optimus Prime was basically on the losing end.

At this moment, the operator who was controlling bull Demon King pressed a special button.

The button was activated by the intelligent system. As soon as the button was pressed, the bull Demon King suddenly accelerated his attack. Then, a set of messy cloak axe techniques was displayed, and axe after axe, it chopped down on Optimus Prime's body.

Furthermore, its strength and speed had also increased. Optimus Prime was forced to retreat in defeat, and the parts on its body fell to the ground.

This was definitely a very terrifying thing.

At this moment, the gap was unbelievably huge.

If he were to take a video and spread it out, telling everyone that the bull Demon King was more powerful than Optimus Prime and Megatron, the film company would not be able to refute him.

After all, they couldn't create a battle between the bull Demon King and Optimus Prime.

"Boss Shen, this demonic bull King's combat power is much higher than Optimus Prime's," professor Li said immediately."In terms of performance, it's definitely much better."

Shen Li nodded. yes. If it's something made by Chairman Qin, the same thing will definitely be upgraded the second time. It's impossible for it to stay in the same place.

Professor Lin nodded solemnly. He felt the same way.

His boss's ability was widely acknowledged.

professor Lin, let me see the design of the car! Shen Li immediately asked curiously.

Professor Lin personally went to get the design of the car. It was a part of the bull Demon King transformer, so it was top secret. Only he, the person in charge, could get it.

Shen Li immediately took the design and looked at it. He was in charge of research, so he understood the basic mechanical principles. Therefore, he immediately asked, ""Professor Lin, if you want to make a car, you should have a new design, right? Can you do it on your side?"

"As long as I can find an expert in auto machinery to help me, it's easy." Professor Lin nodded.

no problem, leave it to me. I'll go and apply for research in this area with Chairman Qin. Shen Li immediately left the laboratory in a hurry and headed to Linlin Manor.

What a joke, it was just a car expert, it was not that hard to find.

As long as there was news that Linlin's laboratory was going to make cars, many car experts would come to their doorstep.

.

On the other side, a car stopped at the Linlin Scenic area's parking lot.

Gu le and her assistant got out of the car.

He immediately called President Lin of the Linlin Scenic Area.

Their national style sci-fi film had been selected by Linlin laboratory and Hua Xia Academy, and their fans had been increasing crazily. The special effects of the Journey to the West Series were even more popular, which also brought them great commercial value.

The biggest benefit would naturally be the movie project.

Ever since the Chinese Academy of Arts 'announcement, countless film companies had wanted to cooperate with them to film this new Transformers movie. However, all of them wanted to make money by cutting leeks, and they were not sincere at all.

It was impossible for those people to make a script as if they were making money and then squander the things that they had worked so hard to make.

However, a movie project was indeed a good idea.

Therefore, their national style sci-fi had also been working on the script during this period of time. They had invited more than a dozen well-known scriptwriters and many web novel gods to participate.

After all, scripts were very important in a film project. However, the scriptwriters were very prone to melodramatic things, so they invited some web novel gods.

They had learned that these web novel gods were very good at avoiding melodramatic plots.

As for the funding, they didn't have to worry at all. There were already many rich people coming to them with a lot of money, asking them to spend as much as they wanted to and invest in them.

Therefore, money was not a problem at all. It all depended on whose money they wanted to use.

What they were worried about now was the issue of cooperation with Linlin company. If the script could not satisfy Linlin company, then the movie could not proceed.

Moreover, he was also prepared to give up a large portion of the movie's profits as long as Linlin company was willing to cooperate.

There was one more thing. He didn't know when Linlin's laboratory would be able to produce a foreign-style transformer.

It would be great if they could produce those National-style Transformers movies before the movie. That would definitely be a great help to the movie.

At that time, the National style Transformers movie would definitely be very popular. Even the movie would be very popular. By then, everyone would be like running water, buying tickets and providing box office sales.

However, he could only think about it.

Gu Yue knew very well that a movie shooting would take at most a year, and to redesign a national style transformer, that little time would definitely not be enough, right?

Who knew how much time that academician Qin spent on producing Optimus Prime and Megatron?

If academician Qin could still make those National-style Transformers in this short period of time, it would be really amazing.

At this moment, Gu Yue saw a beautiful woman with a slim figure walk out. He immediately went up to her because she was the chief Lin of the scenic Area, one of the most powerful senior executives of the company.

As long as he could convince Mr. Lin this time, the National style Transformers movie project would be a success.

"President Lin, it's an honor to meet you!" As soon as Gu le saw Lin Lanzi, he took the initiative to shake her hand and complimented her.
