

The Game 1591

[Chapter 1591 A Shocking Idea 1](#)

"Manager Gu, you're too kind." Lin Lanzi said immediately after shaking his hand.

"President Lin, about the movie project, how about we go and talk about it?" Gu le immediately said.

"Yes, manager Gu, please!" Lin Lanzi nodded and invited Gu le to the office in the villa.

When they reached the office, Gu le took out the script he had prepared and handed it to Lin Lanzi, saying, " President Lin, take a look at this script. It's a script specially prepared by our national style science fiction company. We hope to cooperate with Linlin company.

Lin Lanzi already knew the other party's intention when he came. At this time, she also took the script and started reading it.

This was her first time reading a script, but it didn't stop her from judging whether it was good or bad.

After all, when she was in charge of the multimedia Department, she needed a lot of paperwork to shoot a lot of videos.

Furthermore, words could attract and resonate with people.

As he read, he found that the script that Gu Yue had taken out was really good. There was nothing melodramatic about it. Instead, the words between the lines were touching.

This script was very good. She also praised, " manager Gu, you've put in a lot of effort. This script is very good.

"CEO Lin, if we work together on this movie project, our national style sci-fi is willing to share a large portion of the profits," Gu le added immediately.

Lin Lanzi did not think about this for the time being. Instead, she said, manager Gu, I can't give you an answer about this national style Transformers yet. After all, our boss didn't give any suggestions. I need to make a phone call to him.

Gu Yue's eyes lit up when he heard this. The boss of Lin Lin company had always been a legend. There were many legends about him on the internet.

If he could meet the boss behind this, it seemed that it would not matter even if the film project was not successful.

Linlin Manor.

At that moment, Qin Lin was also meeting Shen Li. After Shen Li heard about the situation from professor Lin, he immediately went to find Qin Lin and told him about the car company he had founded.

"Those sedans!" Qin Lin only noticed this point after hearing what Shen Li said.

After all, he wasn't very keen on making money now. Now that he heard what Chen Li said, he realized that it could indeed be done.

After all, the cars made in the National style sci-fi were really cool and in line with fashion aesthetics.

Moreover, as the original car of the transformer, even if it didn't have the functions of the transformer and only retained the functions of the car, the performance of the car would definitely be very strong.

The steam would definitely be very popular.

By then, his Linlin car would definitely be popular. A car company would be able to build it.

Thinking of this, Qin Lin said to Shen Li, "director Shen, there's no problem with the car company. However, since the demonic bull King transformer has been created, we can do some publicity first. After all, it's a display of our nation's culture. When the time comes, there must be a way to prove that the demonic bull King is stronger than Optimus Prime and the others. This can also promote the car. After that, we can make some bridges for inspection and then try selling it.

When Shen Li saw Qin Lin agree, he immediately said, President Qin, that's easy. You can ask the sci-fi film company to make one or two special effects videos. After all, they're good at this. Once they promote it, it will be popular.

As Shen Li was speaking, Qin Lin's phone rang.

When he saw that it was Lin Lanzi's number, he immediately picked up the call. When he heard what Lin Lanzi said, he immediately said to Shen Li in surprise, "President Shen, what a coincidence. President Lin said that the representative of the National sci-fi genre is in the villa and he still hopes to collaborate with us on the National Transformers movie. He called the other party over and you can have a discussion with him.

Shen Li's eyes lit up when he heard this. Chairman Qin, this seems to be a good idea. Transformers, cars, Short Video, and movies can complement each other.

there are many cars that became the model of Transformers because they sponsored them. Their sales have soared. Moreover, once the National trend of Transformers becomes popular, it will also promote the movie. By then, the box office of the movie will definitely be high. We can even make a series of cars. This project can be invested in by the car company when it's established.

Qin Lin nodded. Although he wasn't interested in money and money didn't mean much to him, he didn't mind paying attention to the money that could be earned. His subordinates had already made arrangements.

In the villa.

After Lin Lanzi hung up the phone, she also said to Gu Yue, "manager Gu, what a coincidence. Our boss seems to be very interested in this movie project. I'll take you to meet him.

"I'll listen to you, chief Lin." Gu le's face lit up with joy.

In their country, meeting the boss of Linlin company was no less important than meeting Big Boss MA and the other big bosses.

One had to know that if people of their level could see Big Boss MA and the other big bosses, they would definitely be able to brag about it when they went back.

And now, to be able to meet the boss behind Linlin company, it was even more worth bragging about.

After all, the boss of Linlin company was really mysterious.

Big Boss MA often appeared in the media, but the boss of Linlin company had never appeared in the public eye.

It was as if there was some kind of power controlling it. Furthermore, this power was definitely stronger than Big Boss MA and the others. Otherwise, it wouldn't be able to do this.

[Chapter 1592 A Shocking Idea_2](#)

Gu le followed Lin Lanzi out of the office with an uneasy mood and went to the manor together.

Even when they were outside Linlin Manor, Gu le still felt a little uneasy and expectant.

After all, Linlin Manor was also a magical place that the rich people talked about. There was even a saying among many rich people: If you are so capable, go to Linlin Manor.

One must know that this was a place where even the big shots and wealthy people couldn't come.

Gu le found it hard to describe the feeling of entering Linlin Manor for the first time.

He didn't know if others were as shocked as he was.

However, he was absolutely shocked. He didn't know how to describe the shock. He only knew that after seeing the situation inside, he seemed to understand what granny Liu felt when she entered the Grand View garden.

Lin Lanzi's introduction from time to time had an even greater impact on his heart.

Lin Lanzi introduced the place as they walked. She even pointed at the pavilion and said, that Pavilion and long corridor are made of aged yellow Rosewood and red sandalwood. It's probably the only one in the country, or the world.

Gu Yue looked at the large pavilion and wide corridor in a daze, his face full of disbelief. He had heard of red sandalwood and yellow Rosewood, both of which were expensive and famous.

Moreover, older red sandalwood and yellow Rosewood were hard to come by. Even big Boss MA would find it difficult to get a set.

Now, the boss of Linlin company was using wood to build such a large pavilion and corridor.

If the outside world were to know about this, they would definitely be moved by what a luxurious life was.

His sci-fi had become more and more valuable because of the National Transformers movie. If he were to sell it, it would definitely be worth a lot of money.

However, looking at the pavilion, he realized that even if he sold his company, he wouldn't be able to build it.

The three academicians of the Chinese Academy of Medicine were working in the Linlin Manor's lobby.

Gu le's arrival had also put MA Hong and the others on guard.

Seeing this, Lin Lanzi also reminded Gu Yue, " manager Gu, there are three academicians working here. These guards should be protecting them.

In fact, she didn't know that the three old academicians were actually researching rocket technology.

But even so, Gu Yue was still amazed.

To have so many guards, what level was the academician at? he was probably a senior to those strategic weapons academicians.

No wonder those rich people couldn't come to Linlin Manor even if they wanted to.

With such an academician here, no matter how big the business was, what qualifications did he have to come here? If they let some businessmen in to recuperate with these academicians, it would lower their status.

Gu le suddenly felt lucky. After all, he was not a rich man, just an entrepreneur. His National Science fiction was just a small shrimp in front of those big companies, the kind that could destroy a large area with a single wave.

But the key was that he was lucky and had been blessed by the heavens to have a relationship with Linlin company. Now, he was even lucky enough to enter the Linlin Manor and would soon have the opportunity to meet the boss of Linlin company.

Gu le quickly followed Lin Lanzi into the manor's work area and arrived at Qin Lin's office.

As soon as he entered the office, he saw the two of them and he recognized them.

One of them was president Shen from Linlin laboratory. He often spoke on behalf of Linlin laboratory and could be considered a Big Boss. After all, he had already received 5% of Linlin laboratory's equity reward.

Although Linlin's laboratory wasn't listed, everyone knew that the technology in Linlin's laboratory would be no less valuable than those giant companies if it were listed.

Especially after something like da Bai was created, as long as the public version was promoted, even if it wasn't on the market, it would still be a super giant.

For example, if there was a National Business conference, even if President Shen was only a small shareholder with 5% of the shares, his position at the conference would definitely be on the same level as boss MA.

Although the attraction's CEO Lin was also a high-level executive in Linlin company, there was still a big gap between him and CEO Shen. Even the other CEO Deng Guang of Linlin company couldn't compare to CEO Shen in terms of status and power.

After all, Linlin laboratory had great potential and momentum.

He also knew the other person. It was academician Qin from Linlin laboratory.

This academician Qin was even more amazing. Although he didn't manage any of the companies in the Linlin Department, he supported more than half of the entire Linlin laboratory.

Many of the research in Linlin's laboratory had been done by him.

The other party was still the idol of countless young people on the internet. He was handsome, could ride a horse, and had such profound knowledge, making him shine brightly.

Now that the times had changed, internet celebrities and celebrities were no longer popular. The young people nowadays might not know any celebrities, but when it came to academician Qin little, everyone knew him.

Some people even had whimsical thoughts, thinking that if they poached academician Qin, then they would be able to create another Linlin laboratory.

Unfortunately, academician Qin and the boss of Linlin company were in the same boat.

If the boss of the Linlin department's company didn't like them, academician Qin would come up with something to make the products of the other company.

The air conditioning company that had gone bankrupt was the best example.

After all, that air conditioner company had been the leader of the industry in the beginning. If they knew that this would happen when they tried to scam Linlin Scenic Area, would they make a new choice?

[Chapter 1593 A Shocking Idea \(3\)](#)

Unfortunately, there was no medicine for regret in this world.

Then, Gu le saw an even more shocking scene. He saw that CEO Lin walk to academician Qin and say, "Chairman Qin, this is CEO Gu from the National science fiction movie. He wants to discuss a film collaboration with us. Moreover, his script is very good.

Gu le's mouth fell open when he saw the scene.

Perhaps at this moment, he knew why academician Qin and the boss of Linlin company were in the same boat. They were the same person.

"Manager Gu, it's our first time meeting!" Qin Lin nodded and said to Gu Yue.

Gu Yue immediately reacted and said respectfully, "Chairman Qin, I'm really sorry to disturb you."

Qin Lin said, "Mr. Shen is very interested in the movie project. Also, Mr. Shen has a collaboration to talk to you about. But now, we can go to Linlin's laboratory together and see the bull Demon King.

Gu le was a little flattered to hear this, especially when he heard that President Shen had a cooperation to discuss with him. Being able to discuss business with such a Big Shot would bring him great benefits.

Then, he realized something and immediately said, ""Chairman Qin, did you just say bull Demon King? Is it a transformer?"

Qin Lin nodded. yeah. Speaking of which, the shape of this bull Demon King transformer is a product of your national style sci-fi.

"Ah ... You've done it so quickly?" Gu Yue was completely shocked.

He had been wondering when Linlin's laboratory would be able to make the National-style Transformers, and even thought that it would be good if they could make it before the movie came out. Who knew that they had already made it, and even had a finished product?

This speed was too inconceivable.

He seemed to know nothing about the power of this place.

Qin Lin got up and walked out of the door.

Shen Li instead looked at Gu Yue and invited, manager Gu, let's go and take a look at the research on the National style Transformers.

This made Gu Yue feel even more flattered, and he immediately followed behind Shen Li respectfully.

To be invited by this President Shen, it would be something worth bragging about when he went back.

Soon, they arrived at professor Lin's laboratory where he studied Transformers and saw the real body of the bull Demon King transformer.

When professor Lin saw Qin Lin and the rest, he immediately ordered his men to operate the bull Demon King transformer and fight Optimus Prime.

Naturally, Optimus Prime's performance was inferior, and without its martial arts system and AI system, it was no match for him.

" manager Gu, " Shen Li said to Gu Yue, " do you have any way to make a special video with cool special effects for the battle between these two Transformers and then promote it? "

yes! gule nodded immediately. boss Shen, with such a physical battle, it's very easy to reverse-mold the video. Just give my team some time.

Shen Li nodded. that's good. Our Linlin laboratory wants to start an automobile company. When the time comes, the automobile company will also cooperate with the National-style science fiction film project.

Gu le's eyes lit up when he heard this, because this meant that the movie project was stable. He secretly decided that this video had to be done well, and it could even be used as a preview of the movie.

When Lin Lanzi saw the bull Demon King transformer, her eyes revealed an unusual glow.

One had to know that she had not been able to find any good ideas for the sci-fi Park project in the scenic Area, but when she saw the bull Demon King transformer, she suddenly had an idea ...

Furthermore, it would definitely be a very shocking idea.

[Chapter 1594 Mechanical Flaming Mountain! Mechanical Water Curtain Cave! 1](#)

manager Gu, I'll leave the special effects Short Video to you guys. Shen Li chatted with Gu Yue for a while before shaking her hand.

To promote the bull Demon King's Transformers and sedans, it was not enough to just rely on the battle between the bull Demon King and Optimus Prime.

Therefore, if the video publicity was added with special effects, it could even have the effect of a movie trailer. That would definitely be more shocking.

Therefore, this was the specialty of national style sci-fi. Of course, they would directly invite the other party.

After all, the other party had created the bull Demon King's appearance because they wanted to start the Transformers movie project.

"President Shen, don't worry. My team will definitely do the best." yes! Gu Yue immediately replied. How was this cooperation to him?

This was a chance for him to curry favor with the big boss.

Under normal circumstances, he wouldn't even be able to meet a Big Shot like Shen Li.

Now, not only could he hug her legs, but he could also drool on her.

boss Shen, " he said, " I also hope to film some battle scenes between the bull Demon King and the Transformers. That way, there will be more room for manipulation when the special effects are designed.

no problem. Shen Li nodded. I'll ask professor Lin to cooperate with you.

"Chairman Qin, I have an idea for the development of the sci-fi Park!" Lin Lanzi also said to Qin ran at this time.

"Mr. Lin, what's your idea?" Qin Lin asked curiously.

The sci-fi Park had a very large area, because the contracted land was ten thousand mu, which also included another barren mountain.

It was just that the sci-fi Park was only doing some basic development now because there was no progress on the internal projects.

Since it was a sci-fi Park, it must be filled with sci-fi elements. It couldn't be developed just because one wanted to.

Lin Lanzi immediately explained,"Chairman Qin, this is the bull Demon King, right?" The bull Demon King had a flaming mountain, right? We can create a flaming Mountain Project scenario and place the bull Demon King in it. At the same time, we can also use this bull Demon King as a prototype and then create a smaller bull Demon King as an ox demon."

as long as there are enough of them, it'll definitely be very shocking. At that time, this will be the flaming mountain ornamental garden.

Qin Lin's eyes lit up when he heard this.

Why didn't I think of this?

He immediately asked professor Lin, "professor Lin, is there any problem with the bull Demon King who made this Smurf?"

that's not a problem, " professor Lin said immediately. it's just that it'll consume a lot of metal materials. It'll be a huge sum of money.

Shen Li said, " professor Lin, we don't have to use the current metal. The Transformers are made with this material for combat. In fact, President Lin's Scenic Area project can be replaced with other materials.

"That's not a problem," professor Lin nodded.

That was indeed the case. The scenic Area was just for tourists to admire. There was no need to use the current metal materials. If substitute materials were used, the price would not be so expensive.

Qin Lin chimed in. Mr. Lin, that's a great idea. It's also inspired me. If the bull Demon King can do this, what about the great sage, heaven's equal? what about the Erlang immortal? "

the great sage, heaven's equal has the huaguo mountain and the shuilian cave, and the Erlang immortal has the guangjiang river mouth and the plum mountain. All of these can be used to make smaller Transformers. More importantly, there's also Zhu Bajie's fire cave in Journey to the West. There are also many special monsters. If we can make all of them, we can make a viewing attraction.

although Journey to the West is a myth, the characters in it are all mechanical bodies now. It can be called a science fiction!

Lin Lanzi's eyes lit up when she heard her boss's words. Chairman Qin, it's too boring to only have the characters of 'Journey to the West'. We can also make other things, such as characters like Athena, Lu Bu, Wu Zetian, and so on. When the time comes, we can also make a small version of it. We can also make it a viewing attraction. We can also often write plots and let these forces fight each other for the tourists to watch.

moreover, if we can let Sun Wukong and God Erlang have an easy time fighting the bull Demon King today, we can let Sun Wukong and the bull Demon King have an easy time fighting God Erlang tomorrow.

Qin Lin felt that Lin Lanzi's words were acceptable.

However, putting Sun Wukong, Yang Jian, Wu Zetian, Lu Bu, Athena, and the others together seemed like a game that was a waste of youth?

Then, he looked at Gu Yue and asked, " Mr. Gu, I wonder if your sci-fi has any way to produce other Transformers for the Journey to the West, as well as the Transformers that Mr. Lin mentioned. These Transformers have to be unique.

I'm really not good at these exterior design problems. I still need external help to give me inspiration.

How could Gu Yue hesitate when faced with such a question? President Qin, if you leave this to our National sci-fi film company, we will definitely do our best to complete it. We definitely won't let you down.

His face was filled with excitement.

If this kind of thing happened to their national style sci-fi, it would be equivalent to them finding a long-term backer. Then, their national style sci-fi would be able to grow rapidly, and it would not be a problem for them to become the largest special effects company in the country.

If the filming went well, they could even take the opportunity to enter the film Market.

but our national style sci-fi is a small company. We need to expand to complete these tasks. It's just that we don't have enough funds. I hope Linlin company can invest in us, " he added.

[Chapter 1595 Mechanical Flaming Mountain! Mechanical Water Curtain Cave! 2](#)

The investment was naturally shares.

He was very clear about it, and was even willing to give Linlin company a big share.

With a powerful backer, it was equivalent to having unlimited resources. Shares were not that important anymore.

Just like that President Shen, who only owned 5% of the shares, but he had the qualifications to be on equal footing with people like big Boss MA.

Sometimes, shares didn't mean everything. It was more important to have the value of life and status.

Shen Li was very interested in science fiction, so he smiled and said, " President Shen, that's not a problem. You can discuss it with me in detail. We're already working together, and we can work even closer in the future.

When Gu Yue heard this, he followed the thread and said, " alright, President Shen. We'll talk about it in detail later. Then, he immediately turned to Qin Yang and said, Chairman Qin, I'll organize some people to carry it out as soon as I get back. I have a suggestion, and that is that the National style transformer doesn't have to be in the form of a car.

we can also use animals, such as rats, rhinoceros, leopards, and so on. I just don't know if there will be any problems with the design on Chairman Qin's side? "

that's no problem at all. Use your imagination and imagination to the fullest. Qin Lin said immediately.

He was not worried about this at all.

After all, Elba's father should be the one in trouble.

All he had to do was to pass the video to Elba, and with Elba's character, he would definitely let his Goblin boss do it.

When the time came, he would just have to cheat Elba of the design.

Moreover, he felt that the term " Ancient Music " was somewhat familiar. Was there an anime that came about like this in the past?

The few of them discussed some other issues and had probably made things clear.

After that, everyone went off to do their own things.

Professor Lin immediately called for a meeting with the researchers. At the same time, he also asked someone to help Gu le film some combat videos of the bull Demon King.

Although it wasn't difficult to make a small bull Demon King, it would take a lot of energy and effort to make a big bull Demon King according to the proportion.

Lin Lanzi also returned to the manor and immediately found the person in charge of the engineering Department. Then, she told him about the plan for the science fiction garden.

Now, with the scale of Linlin Scenic Area and her status, she didn't need to personally handle the external project. She could just let the engineering Department handle it.

When the head of the engineering Department heard Lin Lanzi's words, he was in disbelief and even shocked. This was too whimsical.

However, he also thought of the Linlin laboratory.

With the help of Linlin's laboratory, things would indeed be different, and all of this could be done.

After all, their Scenic Area had such a strong backing.

After Shen Li returned to the company, he also called for a meeting with the management of the laboratory. Then, he talked about the car company and the cooperation with ancient style science fiction.

This was the first attempt of the laboratory's expansion, and the investment in ancient-style sci-fi also needed a meeting, and he had to inform the antiques.

After signing a Short Video Commission contract, Gu le also rushed back to his company.

As for the follow-up cooperation, there was no rush. They could sign the contract after the contract was finalized.

Qin Lin was the only one who returned to his office with nothing to do. He began to look at the game in his mind and began to control the game characters to do daily tasks. Then, he began to wander around, looking forward to the plot tasks in the kitchen.

Unfortunately, he did not trigger a single plot mission in the time that followed.

However, 10 days later, a video released by the National sci-fi film Academy attracted everyone's attention.

The most popular special effects company at the current stage was definitely the National style sci-fi.

After all, the National style sci-fi was the lucky one chosen by academician Qin.

Moreover, everyone had always been looking forward to the National-style sci-fi transformer.

The number of fans for the National sci-fi genre was also very high.

Naturally, people had to pay attention to the videos posted by the National style sci-fi film.

With such popularity, it quickly became a hot search.

As soon as the video started, a very cool black car appeared.

The car was immediately recognized. Those who followed the National style sci-fi naturally knew that this was one of the three national style Transformers that academician Qin had taken a fancy to, the bull Demon King.

As expected, the moment the bull Demon King appeared, he started to transform. Very quickly, he turned into the cool and domineering heavenly Grandmaster Grand Sage.

Furthermore, this heavenly Grandmaster Grand Sage was just as cool as the special effects in the previous videos.

But this time, the video didn't seem to be just about bull Demon King, because there was also a muscle car in front of him, which was Optimus Prime's model.

Optimus Prime also came to a sudden stop and began to transform. Everyone's attributes also appeared.

This scene shocked everyone who saw the video.

It was really unbelievable. After all, this was the first time the Transformers from two countries had met in such a way.

Now that the National style sci-fi had made this video, was it to put the National style Transformers on the same level as the old Transformers?

This might be the idea of academician Qin junior or Linlin company.

But what happened next was even more shocking.

After the two Transformers met, they began to look at each other. It was like the eve of a duel between two masters. The surrounding trees began to move without any wind, and the leaves began to fall.

The special effects were very artistic.

This was how a duel between experts should be.

Just as everyone watching the video held their breath, the two Transformers moved. Optimus Prime pulled out his great sword.

The bull Demon King also pulled out his giant axe.

As they looked at each other, the two Transformers charged at each other madly, and the battle began.

The battle between the two countries' Transformers was very intense, and everyone was watching intently.

However, everyone soon realized that Optimus Prime was no match for him. He was being forced to retreat. He was being suppressed.

He was even beaten to the point where he couldn't even get up.

This was really out of everyone's expectations. How was he putting the two types of Transformers together? This was simply a crushing defeat.

Suddenly, the bull Demon King seemed to have changed. He was a little different. His entire attack had become fiercer.

Then, an even more shocking scene appeared. The bull Demon King actually started to display his martial arts. Every single chop of his axe was very arrogant, as if it was a set of continuous moves.

All the axes landed on Optimus Prime's body. In that instant, flames burst out from Optimus Prime's body and scattered all over the ground. He was also sent flying and smashed into the ground.

After the sky pillar bull Demon King used his ultimate skill, he seemed to have been instantly killed. He lay on the ground with sparks flying out of his chest.

At this moment, everyone understood that they really had to flatter the bull Demon King.

However, the end of the video was thought-provoking.

Linlin sedan, I'll let you crush all the sedans. The bull Demon King will take you to gallop the world.

The words "Linlin car" were very dazzling.

Linlin's company doesn't have an automobile company, right?

Could it be that Linlin company was going to start a car company? This demon bull King's car model was the car that Linlin company wanted to get?

Was the National style sci-fi advertisement for the Linlin car?

This time, everyone was boiling with excitement.

To be honest, there were many domestic cars, but not many of them were high-end.

If Linlin's laboratory made a car, it must be of a high grade, right? The performance would definitely not be bad. This was the credibility of Linlin laboratory, and it was also worthy of everyone's trust.

What's more, the bull Demon King's car model was really cool and handsome. It wouldn't be worse than the Batmobile, which was popular all over the world, right?

It would be great if he could have this car.

Many rich people had even said on the internet that as long as Linlin's laboratory produced a car like the bull Demon King, they would buy it no matter how expensive it was.

Hence, the video of the battle between the bull Demon King and Optimus Prime quickly spread like wildfire.

But very quickly, there were protests.

The protest was against the National style sci-fi and Linlin company.

[I protest against the immoral propaganda of national style science fiction company and Linlin company. They defamed Optimus Prime!]

I protest against Linlin company's improper advertising. Optimus Prime and Transformers are the same culture. They should not be slandered!

".."

This sudden protest was clearly premeditated.

It wasn't until two days later, when the head of Universal Pictures's domestic branch held a press conference, that many people finally understood what was going on.

He was obviously unwilling to be stepped on.

But soon, no one paid attention to this matter, because some people were shocked to find that the car of the bull Demon King appeared on the road of you city, exactly the same as in the video.

Moreover, Optimus Prime's car model also appeared.

This scene happened to be captured by the tourists and was uploaded online.

This caused a stir because this was too much of a coincidence!

[Chapter 1596 Bull Demon King And The Little Ones \(1\)](#)

The sudden appearance of Optimus Prime and bull Demon King's car on the streets of you city naturally attracted everyone's attention.

In particular, the two car models were very eye-catching. Furthermore, for some reason, Optimus Prime and bull Demon King seemed to be looking for something as they kept walking around.

This made him even more curious.

Just this alone caused quite a stir on the internet.

Many people's eyes were on you Cheng.

Suddenly, someone asked if the bull Demon King and Optimus Prime were looking for each other.

After all, the battle between Optimus Prime and bull Demon King had just appeared on the internet. Now that these two guys had appeared in you city at the same time, it would be difficult for them not to attract attention.

Linlin Manor, Lin Lanzi's office. Looking at the results on the internet, she also called Linlin's laboratory immediately.

Once the call went through, she said, " professor Lin, the effect of this publicity is very good. The popularity on the internet has completely gone up. So, we can proceed to the next step of publicity.

Professor Lin's voice was also heard. alright, President Lin. I'll get the operator to make the arrangements immediately.

That's right, all of this was Lin Lanzi's hype.

After all, the video of bull Demon King fighting Optimus Prime had gone viral online. Under such circumstances, it would be unreasonable if he didn't cause some trouble.

What she did also attracted all the popularity and traffic.

After calling professor Lin, she immediately gave Chen Li a call.

"Chief Lin, what are your orders?" Chen Li's voice was immediately heard.

Lin Lanzi immediately said, "County Chen, we'll have to trouble you again. We're going to carry out the second round of publicity."

you're too kind, President Lin, " Chen Li said with a smile. we've already explained it to the traffic police.

"Many thanks, Chen Xian." Lin Lanzi then hung up the phone.

If she wanted to carry out that kind of publicity, she naturally had to inform the county to avoid a storm.

After that, Lin Lanzi called Gu le and Shen Li respectively.

After all, there was a series of collaborations. If one party promoted it, the other parties would gain popularity. Naturally, they had to take the opportunity to promote it together.

Time passed, and the next day.

Many people in you city saw Optimus Prime and bull Demon King's car models appear again.

What was even more shocking was that the two cars appeared on the same street.

The two cars, one on the left and one on the right, seemed to have noticed each other and stopped.

This was noticed by the surrounding people, and there were shouts.

"It's Optimus Prime and the bull Demon King!"

"It's really their car model. Is this real?"

"It should be true!"

".."

Just as everyone's eyes were on them, Optimus Prime's voice suddenly rang out. "Who are you?"

"Who are you? An outsider." The bull Demon King's voice rang out again.

The two voices were very loud, and everyone around heard them.

Even the cars on both sides stopped subconsciously and opened their Windows to take a look. This immediately caused a traffic jam.

Therefore, this was also the reason why Lin Lanzi had to call Chen Li to inform him.

Not long after, the traffic police appeared. They looked around, but they didn't care about anything else because they had already been briefed.

At this moment, Optimus Prime began to transform. He stood up and transformed into a transformer.

Its eyes were fixed in the direction of the bull Demon King.

At this moment, the demonic bull King's car also changed. Then, the demonic bull King slowly stood up.

At this moment, everyone exclaimed in shock.

"It's really the bull Demon King."

the bull Demon King transformer isn't just a video!

"That's amazing!"

".."

When they had made a video of the National style sci-fi film, the bull Demon King transformer was already amazing. After all, they had been talking about the National style transformer before, and Linlin laboratory had also announced that they were going to make it.

Now, it seemed that Linlin's laboratory had already made the transformer.

Moreover, the National culture in real life was so domineering and cool.

In terms of appearance alone, the bull Demon King was not inferior to Optimus Prime.

However, he didn't expect that Linlin company would allow the National style Transformers to meet in such a way.

Did he want bull Demon King to fight with Optimus Prime like in the video?

"Who are you?" I've traveled to many planets in the universe, " Optimus Prime said. I've never encountered a creature like you. You look so similar to us.

However, the bull Demon King opened his mouth coldly, ""I'm the great sage equal to heaven, the bull Demon King, the master of the flaming mountain. My brother is the great sage equal to heaven, the master of the water curtain cave. You should be glad that you didn't meet my brother. Otherwise, you would be a pile of trash now."

anyone who dares to enter the ancestral star that we protect will be punished by us. You will pay the price.

These words caused a commotion among the surrounding people.

This conversation seemed to have revealed too much information.

The outsiders were definitely Optimus Prime and the others.

The ancestral star that the bull Demon King was guarding was talking about earth. He even mentioned the great sage, heaven's equal. This reminded many people of the three Transformers in the National Science fiction.

One of them was the great sage, heaven's equal.

Why did it sound like a movie trailer, where The Guardian of the ancestral star was going to fight against the foreign Transformers?

But thinking about it, it wasn't impossible. After all, there were already rumors that they were going to cooperate with Linlin laboratory to develop a Transformers movie.

[Chapter 1597 Bull Demon King And The Little Ones! 2](#)

Could it be that this was the direction of the movie's future development?

At this moment, Optimus Prime couldn't stand the bull Demon King's arrogance anymore. He drew out his sword and pointed it at the bull Demon King. Sir, you're too arrogant. I, Optimus Prime, have met many enemies, but they have all fallen under my axe.

The bull Demon King did not seem to be used to Optimus Prime's temper. He said coldly, "it just so happens that I want to see what you're capable of. Today, I'm going to attend my brother, the great sage, heaven's equal's banquet. Tomorrow at this time, at the end of the fifth ring outside you city, see you there.

if you're afraid, you don't have to come. But in the end, you'll be finished. After bull Demon King finished speaking, he ignored Optimus Prime and turned into a car, leaving in a hurry.

There was a traffic jam on the road, but once it was impossible to pass through, he transformed into his transformer form and jumped over.

The bull Demon King left, leaving only Optimus Prime.

A moment later, Optimus Prime also turned into a car and left.

However, everyone was in an uproar.

The people at the scene seemed to have experienced a real movie experience, and they all exclaimed in surprise.

Soon, what happened at the scene was also quickly spread on the internet.

All of a sudden, the entire internet was in an uproar.

While they were still marveling at the video of Optimus Prime and bull Demon King's battle, you Cheng had already arranged for it.

Furthermore, the bull Demon King and Optimus Prime had made an appointment to fight at the end of the fifth Ring Road tomorrow.

All of a sudden, countless people thought of the battle of the full moon on the summit of the Forbidden City.

Wasn't this scene a little similar?

No matter what, many people on the internet were attracted and one by one, they booked tickets to you city.

Even if they knew that this was only a plot arranged by Linlin company, it was still attractive. What could they do?

After all, Linlin company had such means.

This was something that others could not learn. Who could make such a transformer?

In you City County.

Chen Li and sun Xian also called for an emergency meeting.

Naturally, they had received the information and data from the station. The number of people who booked tickets to you city had increased in a short time, and there were no more direct tickets.

Who knew how many cars and people would come by themselves?

In other words, you city was going to be full again, but 5 ring points might not be enough, and there would be a traffic jam.

"Linlin's laboratory is the only one who can cause trouble." Sun Xian said with a smile.

He still hoped for more of this kind of trouble. After all, at this time, you city would be the focus of everyone and it would also promote you city's reputation.

You Cheng was once again shortlisted for a new assessment regarding the city promotion.

Time passed. The next day, as expected, you city was stuck in traffic again, especially at the 5th ring.

Since it was an act, you city had to create a good situation for them.

After noon, the area around the 5th Ring Road was packed with people. Even the surrounding buildings and mountains, as long as they could see the 5th Ring Road, were packed.

It was like the movie Summit of the Forbidden City, where Ximen chuixue and ye gucheng fought, and countless martial artists came to watch.

Under everyone's expectant eyes, the bull Demon King arrived from afar.

Immediately after, Optimus Prime also appeared and stopped not far from the bull Demon King.

The two sides were in a stalemate again.

Immediately after, Optimus Prime transformed.

The bull Demon King also transformed.

"You're here?" The bull Demon King said.

"They're here." Optimus Prime.

"Very good, very courageous." The bull Demon King.

"Let's see what you're capable of," Optimus Prime.

As the two of them conversed, they drew their weapons at the same time, their great sword and great axe aimed at each other.

In that instant, both parties started fighting.

It was Optimus Prime who charged at the bull Demon King first, the great sword in his hand slashing down fiercely.

Seeing this, the bull Demon King was not in a hurry. He raised the giant axe in his hand to block the attack.

The two weapons collided, instantly producing intense sparks.

"It's just so." The bull Demon King snorted coldly and began to wave his weapon to counterattack.

At this moment, all the onlookers were attracted and couldn't take their eyes off him.

However, very quickly, something shocking happened. Everyone realized that it was just like the video on the internet. Optimus Prime was being suppressed by bull Demon King. He wasn't his match at all.

The bull Demon King burst out laughing. "What other abilities do you have? How dare you appear in our ancestral star, you are too bold."

"Damn it, why are you so strong?" Optimus Prime seemed to be in awe.

These were the words of the operator behind the scenes, and everything was going according to the script.

However, this still made everyone's blood boil. In their eyes, this was a real battle between the National style Transformers and the Western style Transformers.

Now, it was a reality-made transformer battle.

Even the Western film companies and Transformers fans couldn't refute this fact.

After all, they couldn't make a transformer, and Linlin's laboratory could do whatever they wanted.

The battle between the bull Demon King and Optimus Prime went on for a long time. Optimus Prime was constantly being suppressed. Soon, he was hacked by the bull Demon King's axe, and sparks flew.

Suddenly, the bull Demon King's speed became faster. Just like in the videos on the internet, the bull Demon King had used his ultimate move.

The martial arts intelligence system was activated, and the giant axe in his hand swung out one after another, attacking like a rapid combo.

Optimus Prime could only block the attacks helplessly. After a series of afterimages, he was hit by the axes one after another.

Immediately after, Optimus Prime seemed to have suffered a huge impact. His entire body was sent flying by the impact, and he crashed heavily onto the ground.

Optimus Prime had been defeated completely, just like in the video.

Devilox's giant axe pointed at Optimus Prime. you dare to come to the ancestral star with such strength?
"

These words were very domineering, and everyone filmed it. It made the blood of those who had long been looking forward to the National style Transformers boil.

However, unlike the previous videos online, Optimus Prime did not completely lose his mobility after being defeated. Instead, he stood up again and said, " Sir, I admit that you're very powerful, but you only defeated me. You didn't defeat all of us.

After saying that, Optimus Prime transformed into a car and drove off into the distance. At the same time, he did not forget to shout his slogan, ""The Warriors of cybertan will never admit defeat."

This slogan stunned everyone.

What the hell?

However, the bull Demon King didn't give chase. Instead, he muttered to himself, " Cybertron, it seems like there are still quite a few of you. I'll find you one by one. I'd like to see where you're hiding!

Suddenly, bull Demon King raised his palm and aimed at the sky. Then, a signal flare was shot out and exploded in the sky, forming a signal icon.

The icon was in the shape of an axe, and it was flashing.

Everyone who saw this scene was shocked.

One cloud piercing arrow, and thousands of soldiers and horses came to meet.

The axe gang?

What the hell?

But soon, another shocking scene happened. Not far away, a small car drove over.

This car was a little mini, as if it was for a child to drive.

Moreover, there were quite a number of cars, and the key was that they looked exactly the same as bull Demon King's car.

This made everyone puzzled.

What did these people mean?

These mini-sedans were very fast. They rushed to the bull Demon King's surroundings, and in that instant, something unbelievable happened.

The mini sedans began to transform. Then, mini demonic bull Kings appeared in front of everyone, standing in an orderly manner.

These alt account bull Demon King knelt down in unison again and shouted in unison, ""Greetings, my King. What are your orders?"

Tourists!

"You city's residents!

Passerby A.

[Chapter 1598 The Bull Demon King Wants To Flatten Linlin Scenic Area](#)

You city.

On the fifth ring.

The appearance of the young bull demon Kings immediately attracted the attention of countless people.

These young demonic bull Kings were much smaller than the demonic bull King, so they looked less domineering and more cute.

These were, of course, miniature Transformers that professor Lin had rushed out. They were not made of the original metal, but a cheap substitute material.

From the scene in front of them, it could be seen that these small bull demon Kings were playing the role of small demons.

After all, as the heavenly great sage and a Demon King, the bull Demon King naturally had many small demons under his command.

Now that the bull Demon King had used a cloud piercing arrow, these young bull demons naturally rushed over.

At this moment, the bull Demon King also raised the huge axe in his hand and shouted at the young bull demons, ""Small door, go and find them. I want to know where those outsiders are hiding."

Upon hearing this, the young bull demons also shouted, "

"Yes, my King!"

"Great king, let's go and find the other party!"

".."

The young bull demons responded and transformed into mini-cars, driving toward both sides of the fifth Ring Road.

This scene stunned all the tourists.

All of a sudden, it had become like a scene, a completely immersed experience.

Not only did the bull Demon King come out, but the group of flaming mountain's bull demons also came out. Now, the bull Demon King was chasing after Optimus Prime and the other Transformers.

This scene was also filmed by someone and uploaded to the internet.

Originally, the videos about the bull Demon King and Optimus Prime were very popular on the internet. Now, they were even more popular.

In reality, the bull Demon King and Optimus Prime were fighting each other. Furthermore, it was obvious that the bull Demon King was stronger.

The sight of Optimus Prime being beaten up by the bull Demon King and fleeing in a sorry state made the blood of many people boil.

This was the victory of the National style, the Transformers, and the embodiment of the power of their own country.

Therefore, the video spread at an incredible speed, not only in China but also abroad.

After all, Transformers were not only famous in China, but also abroad, especially in Western countries.

As soon as the video was spread to these countries, it caused an even greater sensation. Naturally, it also caused a lot of strong dissatisfaction. After all, Transformers accompanied countless Westerners during their childhood and were a product that countless people loved.

This was just like how a well-known and popular character like Sun Wukong in China was pranked by a foreign country. For example, a simple evil spirit in the West could press Sun Wukong to the ground and crush him. The people in China would definitely be unhappy.

Many people in the West were feeling the same way.

They couldn't say anything about the fact that the eastern country could produce Transformers. After all, their country didn't have the ability to do so.

However, this was definitely not allowed.

How could that bull-headed monster defeat Optimus Prime?

Many of the Transformers fans united and protested again. This time, their protest was even louder.

But obviously, the Linlin laboratory wasn't moved at all, and the people in the country were just watching the show.

After all, these Westerners couldn't make Transformers, but Linlin's laboratory could. So, it was up to them to make the better one.

In the future, when Linlin's laboratory produced the great sage, heaven's equal and true Lord Erlang, they could easily beat up the Transformers like Optimus Prime and Weizhentan.

Therefore, the Westerners could only watch helplessly and get angry.

Of course, under this kind of popularity, on the National style sci-fi side, Guyue also announced the establishment of the National style Transformers movie project at the fastest speed. This naturally caused a sensation. Everyone was guessing whether the plot of the movie was related to the background revealed by the battle of bull Demon King and Optimus Prime.

At the same time, a public announcement from Linlin's laboratory attracted everyone's attention.

Linlin sedan officially enters production!

It wasn't easy to set up a car production line, but it was very easy for Linlin's laboratory to set up a small production line to produce a sample car. Moreover, it was thanks to professor Lin's previous laboratory that Linlin's laboratory could produce the bull Demon King car so quickly.

Because the design of the bull Demon King transformer had a car model, the mold production line had car modules. As long as it was modified to become a pure car part, the mold could be produced.

As for the automobile production line, he could only purchase the production line.

No matter how fast Linlin's laboratory was, the internet was in an uproar after seeing the news.

It was true. News about this National-style transformer was really coming in one after another.

Many people had even started to ask about the demonic bull King's car.

However, that was not all. Some people also expressed their opinions on the internet: Now that the bull Demon King was here, would the great sage equal to heaven and Erlang immortal master be far away? Don't forget that there are three sci-fi Transformers models that academician Qin has taken a fancy to. The models of the great sage, heaven's equal and Erlang immortal are also very good looking. Are you sure you don't want to wait and express your opinions?

These words reminded many people.

Even Shen Li was reminded.

That's right, there was more than one transformer. What about the cars of the great sage equal to heaven and Erlang immortal master?

At the thought of this, he immediately went to the Linlin Manor and went to Qin Lin's office.

Qin Lin knew Shen Li's purpose when he saw him. After all, he had also checked the news on the internet and knew that everyone was calling for the great sage equal to heaven and Erlang immortal master.

[Chapter 1599 The Bull Demon King Wants To Flatten Linlin Scenic Area](#)

Therefore, without waiting for Shen Li to speak, Qin Lin took out the designs of the great sage equal to heaven and Erlang immortal master and handed them to Shen Li, "director Shen, these are the newly designed great sage, heaven's equal and Erlang immortal master. You can bring them back to professor Lin and ask him to produce the new Transformers as soon as possible.

To professor Lin, with his previous experience, as long as the entire Linlin laboratory cooperated, the seven heavens great sage and Erlang Immortal King's Transformers would be produced immediately. However, this was not what Shen Li was concerned about. He immediately asked, "Chairman Qin, do the great sage, heaven's equal and Erlang immortal master have car designs too?"

Qin Lin nodded with a smile. yes. Also, in the future, let's see what kind of Transformers the National style sci-fi team will design. As long as they can make it, they should have a design sketch.

Chen Li's face was filled with joy when he heard this and immediately said, ""Sure, sure. I'll go back and ask professor Lin to make the two Transformers."

However, as soon as he left Qin Lin's office, he immediately took out his phone and called Gu Yue. As soon as the call went through, he said to Gu Yue, " President Gu, I'm telling you, you need to put in more effort on the design of the National style Transformers. No matter how unrealistic, cool, or impossible it is, just design it as unbelievably as it can be. Don't worry that President Qin won't be able to make it.

After hanging up the phone, Shen Li immediately revealed a sinister smile.

As long as gule music could get more incredible car models, Linlin car would have more incredible car models in the future, which would definitely attract people's attention.

It was just that this might have to trouble Chairman Qin. After all, it would take more effort to make the Transformers, right?

As he thought about it, Shen Li left the Linlin Manor proudly.

Qin Lin didn't know about Shen Li's thoughts. If he knew, he would definitely say that this guy was overthinking.

He also looked at the light screen in his mind and completed today's Daily task. Then, he controlled the game character to leave and wander around the game's maps, trying to trigger some plot task.

Unfortunately, his luck was not good. He did not trigger any plot mission. There was nothing at all. Even if there was an in-depth conversation, there were only two more sentences.

In the end, Qin Lin decided to get up and take a break. He left the office and went to the hall.

An excited voice rang out at this moment and spread throughout the hall, "

"Great, success!"

"Yes, that's great. We've succeeded."

the new rocket has been successfully driven. We have taken another step forward in our space dream.

".."

It was the Research Institute arranged by academician Hao, the three seniors, and the manor.

After the effects of the moonstone were activated, the three old academicians had an epiphany under the effects of the moonstone. They began to frantically calculate and research. In the end, Minister Lu personally brought people to cooperate with the three academicians and personally oversaw the research to ensure that the academicians 'research was successful.

After all, space rocket technology was related to the future of the country and the rise of the nation. It was related to whether they could be completely left behind in the world in the future.

As long as they conquered space one day, that would be the time when they would be above the world.

If they could build spaceships and space carriers, they would have the power to destroy any country at will. By then, they could only compromise.

At that time, they were the only ones who could speak loudly. When the time came, they could say who else was there and no one would dare to talk back.

Minister Lu ran to Qin Lin excitedly, hugged him and said, "boss Qin, did you know that the power of the space rocket has been completed? our space rocket has taken another big step forward. No, I have to tell this good news to the leader immediately.

As he spoke, Minister Lu ran to the side excitedly and took out his mobile phone to make an encrypted call.

It was a call from a higher-up. As soon as the call went through, he said, "leader, space rocket technology has taken another big step forward. The power drive problem has been solved.

In a special office in Beijing, an old man also stood up in surprise and asked, ""Is this for real?"

He had a look of disbelief on his face. After the collapse of that country, many countries had been trying to make space rocket technology. There hadn't been much progress in the past few decades, but who knew that academician Hao and the others would make a breakthrough after going to Linlin Manor? and they made two breakthroughs in a row.

It seemed that this house really had a magical power. As the academician of the Chinese Academy of Sciences had said, the environment there was very good for quiet thinking.

Academician Hao and the others were already the best proof.

After hanging up the phone, the leader immediately made another call and ordered, ""Draft an application for the Linlin Manor to be listed as a key historical site protection. We'll allocate funds to maintain the Linlin Manor every year, and then confirm the application for a fixed treatment for an academician of the Chinese Academy of Sciences."

Obviously, this was to lift Linlin Manor to the sky.

How long had Linlin Manor been built? Historical remains, my ass, important historical remains.

This was because they were afraid that someone would destroy the Linlin Manor and affect the layout of the manor, which would cause a deeper impact and cause the Linlin Manor to lose its current effect.

The people on the internet did not know about this. Their eyes were still on the bull Demon King and Optimus Prime.

However, after the continuous popularity, the bull Demon King did not seem to have any new actions. This made the people on the internet itch to know what happened next.

However, there was no movement from the bull Demon King. Instead, there was movement from the Linlin Scenic Area. The area around the gate was cordoned off, not allowing tourists to approach.

This made many tourists a little confused, not knowing what Linlin Scenic Area was doing.

At this moment, the bull Demon King's figure appeared on the streets of your city again, attracting everyone's attention.

They had to pay attention to it. After all, this Street had been cleared out by the traffic police in advance. There were no other cars, only the cool car model of the bull Demon King appeared there. It was difficult not to attract attention.

The bull Demon King was the focus of the internet's attention. Many visitors had already taken out their phones to take pictures.

look, demon ox! It's here again!

"It's really the bull Demon King!"

".."

The bull Demon King transformed into a transformer and appeared in front of everyone. At the same time, he raised the gun in his hand and aimed it at the sky. Another signal bullet was fired.

The signal flare exploded in the sky, revealing a dazzling signal and the Phantom of an axe.

It was the same cloud piercing arrow. Next, it should be the little bull demon's turn to meet him, right?

Sure enough, just as everyone had expected, the sound of concentrated motors rang out, and then they saw mini devil ox sedans driving over. Moreover, there were surprisingly many of them. They were densely packed, and there were many more than the last time.

Naturally, it was produced by Linlin's laboratory under the orders of professor Lin.

Moreover, with the use of replacement materials, these young bull demon Kings were easier to make.

Then, the dense group of small bull demon Kings began to transform into mini bull Demon King Transformers.

The number of people was neat and tidy, as if they had been trained. It was really shocking.

Then, the young bull demon Kings knelt down in front of the real bull Demon King and shouted, "

"Greetings, my King!"

"Greetings, my King!"

"Long Live the King!"

".."

This time, there were even more of them, and the shouts were even louder.

The people around them smiled knowingly. They had long guessed that this would happen. This was the beginning of an immersive plot.

The bull Demon King also shouted at this time, "little guys, have you found those outsiders?."

Upon hearing this question, the young bull demon Kings also shouted out one after another, "

"Reporting to the king, we've found their tracks. They're hiding in a place called the Linlin Scenic Area."

"That's right, that seems to be their base camp."

I also saw two big guys standing guard at the door. There should be a lot of those guys inside.

".."

The little bull demon Kings also answered their King's question like little demons.

When the bull Demon King heard these words, he immediately gathered his huge axe and shouted, ""Linlin Scenic Area? Little ones, follow me there and trample that place flat."

[Chapter 1600 The Bull Demon King Occupies Linlin Scenic Area](#)

..

"Little ones, come with me to trample the Linlin Scenic Area!" The bull Demon King shouted his slogan. The young bull demon Kings, who were playing the role of bull demons, also shouted one after another, "

"Flatten Linlin Scenic Area!"

"Flatten Linlin Scenic Area!"

"Flatten Linlin Scenic Area!"

".."

The little bull demon shouted more and more vigorously and loudly. He really had that kind of aura.

The surrounding tourists and residents of you city were all affected. Although they knew that this was a real plot experience and arranged by Linlin company, they couldn't help but want to join in the fun.

There were even some tourists who followed suit and shouted, "

"Flatten Linlin Scenic Area!"

"Flatten Linlin Scenic Area!"

".."

Very soon, the commotion was a little huge.

It didn't take long for a tourist to post the video on the internet. A hot topic called " trampling on Linlin Scenic Area " swept the entire internet.

Chen Xue and her best friend were loyal fans of Linlin Scenic Area. She was from you city and had been doing her internship at Linlin Scenic Area during the holidays. She would be working there in the future.

Her best friend also liked the Linlin Scenic Area very much. Every time there was a new project at the Linlin Scenic Area, she would take her best friend back to visit it.

As soon as she entered the classroom, she heard many students talking about the Linlin Scenic Area.

it's really interesting. Only Linlin Scenic Area can have such publicity, right? "

that's right. If we edit these videos, we can watch them like a movie.

I'm so envious of the tourists at the scene. The real experience is so good.

".."

Chen Xue knew about the bull Demon King. These people should be talking about this, right?

After the Transformers, Linlin company had launched their National-style Transformers movie so quickly.

After Chen Xue sat down, she immediately took out her phone and went online to check the hot spots about the bull Demon King.

He immediately saw the title of "trampling on Linlin Scenic Area."

"Isn't this just a publicity stunt?" Chen Xue was speechless.

Nowadays, there were really a lot of clickbait titles on the internet. They dared to say anything to create hype.

Even if they wanted to flatten Linlin's Scenic Area, they would still have to see if the authorities would let them.

With the development of the Linlin Scenic Area, it had not only become the number one Scenic Area in the country, but it was also becoming more and more famous overseas. Many foreign tourists were attracted to it.

Even on many foreign websites, Linlin Scenic Area was one of the must-visit international scenic spots.

If anyone dared to touch this kind of scenic spot, the officials would find trouble with them first.

However, when she clicked on the video, she was surprised that it was not just a title.

She saw the bull Demon King and a group of young bull demons shouting loudly, "The slogan of "trampling Linlin Scenic Area"

That scene was both comical and shocking. It was unbelievable.

Chen Xue's intuition told her that it was unbelievable. This must be the doing of Linlin Scenic Area. She didn't expect Linlin Scenic Area to be so fun.

She immediately realized that there should be a new project coming up in Linlin Scenic Area soon.

Chen Xue immediately turned to her close friends and said, it seems that we have to go to the Linlin Scenic Area again. There will definitely be a new project there soon.

His words attracted the attention of the students around him.

They knew that Chen Xue would be an employee of Linlin Scenic Area in the future, so they were sure that she was right.

This also made them eager to try.

He wanted to go to Linlin Scenic Area to play.

There were many people on the internet who had such thoughts.

.

You city.

The bull Demon King led the young bull demon Kings to shout slogans along the street, so that more and more tourists would know.

Finally, when they reached an intersection, bull Demon King transformed back into his car form and drove out of the county.

Those young bull demon Kings also turned back into their car form and drove out of the county town. They had a rather mighty aura.

And that was the direction of the Linlin Scenic Area.

This scene attracted the curiosity of all the tourists, and many of them began to rush to the Linlin Scenic Area.

Those who had cars already started driving. Unfortunately, they had only driven a short distance before they found that the road was completely blocked.

Clearly, many people had the same thoughts as them.

Linlin Scenic Area.

The area around the gate was isolated, which attracted the attention of many people.

The tourists here didn't know the purpose of Linlin Scenic Area.

However, some people realized that the only transformer at the entrance was Megatron, and Optimus Prime was missing.

But Linlin Scenic Area would not do such things for no reason. There must be a purpose.

Just as everyone was puzzled, they saw the front of a car driving in their direction. It was none other than Optimus Prime's car. The front of the car was covered in scratches and seemed to have suffered a lot of damage.

This caused many tourists to take out their mobile phones to take pictures, and they obviously found that something was wrong.

Optimus Prime also transformed into a transformer, but its body was also covered in wounds.

This made many tourists think of the Optimus Prime who had fought with the bull Demon King. Wasn't he just injured?

The tourists finally realized that the injured Optimus Prime was the one who had fought with the bull Demon King.

At this time, they remembered the saying on the internet that the battle between the bull Demon King and Optimus Prime was a real experience in a movie.

Only Linlin's company could arrange such a realistic drama, and it was also one of a kind.

Many people were envious of those who were present at the scene, as they could see it so directly.

Was it the Linlin Scenic area's turn now?

More tourists reacted and immediately took out their mobile phones to film.

That's right, the plot of the Linlin Scenic Area was designed, so how could the final destination not be the Linlin Scenic Area?
