

The Game 1671

[Chapter 1671 Hoverbike?\(1\)](#)

The soldiers were surprised to see Qin Lin.

From what they knew, this person was just a scientific researcher and should be a weak person. However, under the increasing pressure, they were already somewhat unable to take it. Who knew that this person could still take it?

The force was still increasing, and soon, some of the soldiers could not take it anymore. Their legs were so weak that they half-squatted on the ground. At this time, their blood vessels were already starting to expand.

He quickly pressed the button on the device on his body, and then he felt his body relax and return to normal, gasping for breath.

There were more and more Warriors like this. Even if they were super Warriors who had taken the body enhancement potion, they couldn't withstand the gravity anymore.

One by one, the soldiers fell to the ground and were finally sent out of the gravity room.

When the last soldier couldn't take it anymore, all the other soldiers looked at Qin Lin, who was still in the gravitational room, in disbelief.

This was simply unbelievable.

They all thought that they were the strongest. After all, they were Special Forces soldiers and had used body enhancement liquid. Their combat strength was already very strong, and their physiques were also very strong.

They all thought that even if the final winner wasn't them, it would be one of them. They just didn't expect that the last one to stay would be academician Qin.

How could the other party's physique be so strong?

Outside, team leader Chu and the others were in disbelief.

This was because the gravity in the gravity room had already reached 50.

пăндă Йовѐ1,còM This gravity was already 10 times that of what ordinary people could withstand. It was not something that ordinary people could withstand.

However, how terrifying was the physique of this academician Qin? It could actually withstand such gravity?

Team leader Chu was eager to try. He was a little curious about academician Qin's body and even wanted to study it.

In the gravity room, Qin Lin felt the gravity on his body. When he felt that it was about time, he removed the equipment on his body. All of a sudden, the gravity on his body disappeared.

In fact, he could still withstand this kind of gravity, and it was far from his limit.

However, he also felt that it was about time. There was no need to persist any longer. Otherwise, his physique would be too terrifying and scare the others.

Obviously, he didn't know that he had already frightened team leader Chu and the others outside.

When Qin Lin walked out of the gravity room, Minister Lu immediately went up to him. "Boss Qin, you've also taken the body-increasing medicinal liquid? Or did you use a body-strengthening potion?"

The soldiers couldn't help but look over. They were also curious. After all, they had all used the body-strengthening potion, but they weren't this strong.

Qin Lin immediately nodded. yes, it's the body-strengthening potion. It's just that I've broken through the limit.

This was nonsense.

After all, he had used the fruit of the tree of power.

However, these words shocked the soldiers. After taking the body-increasing potion, they felt that their constitution had reached its limit, and they thought that was all the potion could do.

He just didn't expect the body-strengthening medicinal liquid to be even stronger and break through the limits of the human body.

It seemed that they were not working hard enough and not strong enough. This made them suddenly excited and even more motivated.

After Minister Lu got the answer, he immediately looked at team leader Chu and asked, ""Leader Chu, what's the result of the experiment?"

Team leader Chu immediately said, " yes, the experiment was very successful. Moreover, the gravity output was very stable. There was no fluctuation at all. The gravity technology that academician Qin led us to complete was very perfect.

Minister Lu nodded and immediately took out his phone to make a call. leader, the gravity experiment was a success, and the gravity output was perfect. The Chinese Academy of Sciences can make preparations. When the time comes, we can transport specialized researchers to that planet to build a large gravity room so that our people can live normally on that planet. Then, we can carry out the transformation of the entire planet.

The person on the other end of the phone was obviously very excited and immediately urged, ""Xiao Lu, give us a plan as soon as possible. We have to carry it out as soon as possible."

Qin Lin didn't care about what happened after that. He left Linlin's laboratory and returned to Linlin Manor.

Not long after they arrived at Linlin Manor, Chen Li came looking for them.

This surprised him. Xian Chen, you're a rare guest. I haven't seen you in a long time.

"Boss Qin, didn't you say that he wanted to invite you?" Chen Li immediately said. Our you city's airport is about to be built, and we'd like to invite you to cut the ribbon."

In fact, he had indeed stopped coming to Linlin Manor recently, because he had been really busy.

After the matter of the city promotion was confirmed, the inspection team came. Moreover, this inspection could not be done in a short time. It was a long-term assessment that needed a year of observation period.

During this period, he would have to run all over the place if the team asked any questions.

"Is the airport built?" Qin Lin couldn't help but be surprised.

He knew that you city was going to build an airport, but he didn't expect it to be so fast.

Of course, he didn't know that he was the reason you city was able to build the airport so quickly.

Naturally, Chen Li was aware of this. Therefore, he immediately sent an invitation the moment the airport was built.

Qin Lin shook his head. Xian Chen, you know I don't like this kind of event. Don't make me embarrass myself at this kind of event.

Chen Li sighed. He knew boss Qin's character. He would not participate in this kind of thing.

[Chapter 1672 Hoverbike \(2\)](#)

However, he came because of a matter of courtesy. If he was polite enough, he couldn't force boss Qin if he didn't want to attend.

Chen Li left after that.

However, you City Airport was completed and opened to the public. Such a big event couldn't be hidden from people even if there was no publicity. It didn't take long for people to find out that there was a direct flight to you city.

Moreover, someone even posted the flight tickets online.

This also quickly surprised the people on the internet.

Because you city was only a County, it was really hard to build an airport directly. More importantly, someone even went to film you City Airport. The scale really shocked everyone.

It was so big that it was even bigger than some of the first-tier cities' airports.

This would make many cities feel ashamed.

In a school.

Chen Xue had already packed some of her luggage. Naturally, she was going to start her internship.

The place where she interned was Linlin Scenic Area. This was a qualification that she had long possessed, and she did not know how many people would be envious of her.

However, she was from you city, so she could work part-time in Linlin Scenic Area during the winter and summer breaks.

After packing up, she left the dormitory. The sisters had already finished their dinner last night and had gone their separate ways today. They also had to go to the place where they were doing their internship.

Her flight time was almost up.

However, when she left the dormitory and went downstairs, she heard many students discussing it.

"Your city's airport is completed and it's open to the public."

"I've seen the news about your city building an airport. It's finally done. There won't be a traffic jam when we go to your city next time, right? "

"I don't think so. There's a fast lane from the airport to Linlin's Scenic Area."

".."

These words caught Chen Xue's attention.

Linlin Scenic Area was now the number one Scenic Area in the country, and it was often on the hot search. Most of the students in their school knew about it.

Moreover, students loved to play, right? Many students couldn't help but go to the Linlin Scenic Area to take a look when they saw something new.

There would be a lot of discussion about anything that appeared in the Linlin Scenic Area.

To be honest, it was a great success for a scenic spot to attract so many people.

Chen Xue couldn't help but be curious when she heard this. She immediately took out the ticket booking software to check. After a while, she really saw the direct flight to your city.

This made her pleasantly surprised.

She knew very well that her hometown was only a small County, and it was very troublesome to transfer cars and planes to go to school. Now that there was a direct plane, it was much more convenient.

She opened the ticket booking app without hesitation and refunded her ticket. Then, she booked a direct ticket to your city.

Although this would cost her a lot of money, she was happy to experience the flight that had just taken place in her hometown.

Moreover, she realized that she had just booked the ticket a second ago, and the next moment, the page showed that the tickets were sold out.

Not long after, Chen Xue took a direct flight from the study city to your city.

It was her first time flying back to her hometown, and it was a different experience for her.

Even the tourists on the plane were in high spirits.

After all, this was your Cheng's new flight. As long as it was his first time, and it was something he was interested in, many things, no matter how small, would make him excited.

After a long flight, the plane finally landed at you City Airport, and Chen Xue went numb.

Because the exit of the airport was blocked, there was almost a long queue.

It was obvious that everyone was swarming to buy direct flight tickets to you city.

People always liked to join in the fun.

Chen Xue could not help but sigh.

However, no matter how many people bought the tickets like a swarm of bees, the number of passengers was always limited. When they entered the waiting area and the taxi drove into the fast lane, everything would be fine. Everything returned to normal.

Chen Xue also took the lane that led directly to Linlin's Scenic Area.

There were two fast passages on the plane. One was directly to Linlin Scenic Area, and the other was directly to you city.

When they arrived at the Linlin Scenic Area, Chen Xue was very emotional after getting out of the car. Her hometown was really changing more and more with each year. Sometimes, it was so fast that people could not react in time.

She hadn't come back after studying for a while, so she couldn't recognize what her hometown looked like.

The internet was naturally filled with news about you City Airport, and it was very popular.

It could be said that as soon as you City Airport was opened, it seemed to become an internet celebrity's card-checking place. There were people who took a direct plane to you city just to take a photo of you City airport's logo.

It had to be said that there were many people in the world who had nothing to do.

Qin Lin naturally didn't pay any more attention to this matter. After he returned to his office, he looked at the screen in his mind and controlled his game character to start his daily tasks.

Of course, he did not gain anything from today's Daily mission. Therefore, he locked the office door and entered the game with a thought.

Instead of controlling the game character to go to ore town to explore the plot, it would be better to enter the real world and explore the game. There would be many unexpected gains in the entire town.

Qin Lin strolled along the streets of ore town that he had not seen for the whole day. He really did come across a place where he could watch the fun.

There were a lot of people there, and it was very lively. It seemed that someone was promoting something.

"Everyone, take a look. This is the hovercar I made." A young man was speaking into a microphone. He even took out a pedal-like vehicle and stood on it to cover up his identity.

Surprisingly, the hover car actually floated up. However, as soon as it floated up, the person who was demonstrating fell down. His face was swollen and he was crooked. It was obvious that he didn't have a balancing system.

After the young man got up, he said awkwardly, "there are still some flaws in this technology. However, the technology is not a problem. As long as I have enough research funds, I can develop a real hovercar.

that's why I'm here to get investments. Whoever is willing to invest in me, I'm willing to share the technology of the hover car with them.

The people around him booed at his words.

tsk, what a joke. It turns out to be a lie.

that's right. I thought it was an acrobatic performance.

let's go, let's go. I'm not watching anymore. It's a scam.

".."

These words stunned the young man and made him feel helpless. No one was willing to invest money in his research on this technology. It was really frustrating to have no money.

Qin Lin was also stunned. What kind of joke was this?

No one had invested in the technology for the hover car. Were the people in this game brainless?

He then thought of doctor Gao. It seemed that every country would be fighting to invest in his research, but no one would.

Perhaps, this could only be said to be the game's amazing mechanism.

Thinking of this, Qin Lin walked over to the young man with a smile. "Sir, I'm willing to invest in you. How many gold coins do you need?"

The young man looked at Qin Lin in shock and asked, ""Sir, didn't you hear them call me a liar? You're actually willing to invest in me?"

"That's because they don't have a good eye," Qin Lin said with a smile. "I believe that you can make a hovercar."

These words made the young man very happy, and he immediately said, ""Sir, my name is lie MA. If you are willing to invest in me, I will definitely share the technology with you after I have developed the hovercar. I only want 5 million gold coins."

Qin Lin looked at his hundreds of millions of gold coins and couldn't help but sigh. This was really cheap.

He had decisively chosen to invest in these horses.

Not long after, he received a hoverbike. Of course, it was incomplete and looked a little like a child's toy. There was also a stack of technical information on the production of this incomplete hoverbike.

Naturally, he had invested 1 million. As long as Lima had completed the research, he would send the technology to his email.

Qin Lin got the items and immediately logged out of the game in high spirits. He took the hoverbike to the sports field of the manor. There were dog tooth grass everywhere. Even if he fell down like the horses, it would be fine.

Qin Lin pushed the hoverbike out of the office and ran into Minister Lu, who came in excitedly. "Boss Qin, the experiment in the gravity room is a complete success. It's really incredible. Yi ..."

Minister Lu's eyes were suddenly attracted by the hoverbike.

[Chapter 1673 774-Everyone's Shocked! Another Technology That Transcends The Era!](#)

Minister Lu saw Qin Lin pushing the hoverbike, and his face was full of disbelief. Boss Qin, this bike, how is it possible?"

With that, he squatted down in disbelief and even reached his hand under the hoverbike to make sure he didn't touch any wheels or anything.

The car was really floating.

After he confirmed it, he looked at Qin Yang in shock. "A hover car. You ... You've also made this thing?"

Then, Minister Lu seemed to have reacted. that's right, magnetic levitation is related to the Earth's magnetic field. The planet's gravity technology can also be linked to the magnetic field. If you can create a planet's gravity system, you can naturally create a hovercar.

"Boss Qin, you're the genius of this era."

"Boss Qin, can this hovercar carry people?"

Minister Lu's face was full of curiosity and curiosity. He didn't even want to think about other problems.

Which country had the worst transportation in the world? Their country was definitely one of them. It wasn't that their transportation was inconvenient, nor was it that the roads were bad.

Take you city for example, it was a small County. The sixth Ring Road had already been repaired, but sometimes there would still be traffic jams.

This was because their country was developing too well and the people were rich. Every family could afford to buy a car.

Ten years ago, who would have thought that this day would come? Who would have thought that cars had become a necessity for everyone?

Sometimes, one would even have the illusion that if a family didn't have a car, they wouldn't even be able to live a well-off life. Naturally, this was a special case.

However, if they could create the hover car from the sci-fi movies, it would definitely greatly improve the traffic conditions of their country.

If they could make a floating train, would transportation still be a problem?

Minister Lu couldn't help but stop Qin Lin and ask him more questions.

Qin Lin had no choice but to answer. Minister Lu, I just made this hoverbike. I'm not sure if it'll work. Now, we have to try it.

He could only make it up. After all, he couldn't say that he knew everything about this thing, right?

Minister Lu became interested when he heard this. "Boss Qin, can you let me try? I'm willing to sacrifice myself for scientific research."

His words sounded nice, but he actually just wanted to give it a try.

This might be the first hover car. As the first test subject, his name could be recorded in the books in the future.

They were also participants in historical scientific research events.

The textbook would record that academician Qin designed and developed a hoverbike, and the person in charge of the Chinese Academy of Sciences at that time would be the first person to ride a hoverbike.

Qin Lin laughed when he heard Minister Lu's words. He thought of lie Ma's demonstration of the hovercar's bruised and swollen face and said, " Minister Lu, I advise you to be careful. After all, I can't be sure that there won't be any problems with this car.

boss Qin, I'm serious too, " Minister Lu said seriously. I'm not afraid of scientific experiments.

"..Qin Lin had no choice but to give in to Minister Lu's determination.

In any case, he had already said that he didn't know if he would succeed. He couldn't just suddenly tell him that the floating train's balancing system was actually not working, right?

This was a little contradictory.

In any case, he wouldn't die from falling on the lawn. The most serious injury would be a bloody nose and a swollen face.

If there was someone else to fall for him, why did he have to fall himself?

Thinking of this, he also started to flatter Minister Lu."Alright, since Minister Lu is so dedicated, how can I not fulfill your wish? Come, I'll teach you how to operate it ..."

Qin Lin began to teach chief Lu how to operate the hoverbike, which was no different from an ordinary electric bike or gasoline bike.

Other than acceleration and braking, there was an additional floating operation facility.

It was easy to operate, so Minister Lu learned it very quickly. However, after learning it, whether he could ride it was also a problem.

Therefore, after Minister Lu got on the car, he started the hoverbike according to Qin Lin's instructions. The whole bike started shaking, and then, as one could imagine, Minister Lu directly fell to the lawn.

Fortunately, the dog's tooth grass was soft enough, and only little yang and little lion would eat it in the manor. The grass was not consumed and grew thick.

The fall would hurt, but it was not a big deal.

Seeing this, Qin Lin immediately pretended to be confused and explained, " Minister Lu, it seems that there is still a problem with the balancing system of this car. It seems that the technology is not perfect.

Minister Lu didn't feel dejected when he heard this. Instead, he became even more excited. boss Qin, this is already very impressive. You have to know that the levitation technology can really drag people up.

although the Western countries have been boasting about their own hover technology, everyone knows what it's like. They didn't come up with a hover technology at all. Instead, they're just bluffing.

you've really created the levitation technology. Just now, this car could really bring me into the air. Now, all it lacks is the balancing system.

"I know that the magnetic levitation system is very difficult to research. After all, this is a new topic. But boss Qin, you can even solve the gravity technology of the planet so quickly. What is this suspension balance system?"

I believe that you will be able to complete the magnetic balancing technology very soon and promote the hoverbike throughout the country. When the time comes, there is no need to hide this technology. You can show it to the Westerners directly.

[Chapter 1674 It's Another Technology That's Beyond The Times! 2](#)

"When that time comes, the whole world will be shocked. We can let the whole world know how advanced our country's technology is now. While they were still fantasizing about hover cars in the movies, we had already made one."

Minister Lu became more and more excited as he spoke. He was so excited that he was about to clench his fists like a general who was about to go to war.

Or to him, he was the general of scientific research, and the researchers in the Chinese Academy were his soldiers. His sword had always been aimed at the Western countries.

He had always been on the battlefield.

However, this battlefield was about scientific research, technology, exploration, and the future ...

This battlefield was different from ordinary battlefields.

But even if it was different, it was still a battlefield. They had to draw their swords and win.

"You're so confident in me." Qin Lin couldn't help but shake his head when he heard Minister Lu's impassioned words.

He didn't know anything. He wouldn't be able to create this technology even after hundreds of years.

"Boss Qin, I can choose not to believe in myself, but I can't choose not to believe in you!" Minister Lu said seriously.

"..Qin Lin was really flattered.

At this moment, Minister Lu had already held onto the hoverbike and started operating it again.

Obviously, Minister Lu's dictionary still had the words "tenacious" and "unwilling to admit defeat."

A hoverbike without a balancing system was not impossible to ride, but it required a lot of agility, strength, and flexibility.

This wasn't something an ordinary person could do.

The strength of his wrist alone was not enough to withstand the force of the throw.

Minister Lu obviously couldn't do it, so after a while, he fell down again, but he didn't admit defeat and got back on the hoverbike.

This scene was seen by academician Hao and the others who came in, but they were all wearing the uniform of the scenic area's staff.

Ever since the Chinese Academy of Sciences 'branch was built in the science fiction Technology Park, the three old academicians had been working there. In order to hide their work, they were wearing the uniform of the scenic Area.

Academician Hao was even treated as the project's gatekeeper, and many tourists asked him for directions.

In addition to the three old academicians, there were two other old people who were also academicians. They had just arrived in your city not long ago, but they were also stuck in the project.

Although their project was not as important as academician Hao and the other two seniors, it was enough for them to be in the Chinese hospital.

In terms of status, the Hua * Yuan's sub-hospital was higher than the Hua * Yuan.

Therefore, to a certain extent, an academician who could come to your city must have a high status, and the project he was responsible for must be very important.

The academicians in the Chinese Academy of Sciences who could apply for the top-secret laboratories might not necessarily be qualified to work in the Chinese Academy of Sciences.

These people came in just in time to see Minister Lu fall to the ground.

The few of them were shocked and surrounded him, not knowing what was going on.

However, when they got close, they saw a shocking scene.

The bicycle was actually floating.

This really shocked them.

Although they weren't in the field of research, they knew how amazing hover cars were.

Now, such a thing was actually placed in front of them.

This made them look at Qin Lin subconsciously, and then they looked at each other.

They naturally knew that this technology was definitely created by academician Qin.

This was truly unbelievable.

They had just received the news that the research on the planet's gravity technology had been successful. This technology had been completed under the leadership of this person, and it had not taken much time.

Academician Hao and the other two were even more emotional.

It was unknown how long their deep space rocket technology had taken to complete the initial stage.

However, how long has it been since this academician Qin brought people to study the planet's gravity technology?

Now, team leader Chu and the others were already convinced by this academician Qin junior. In all kinds of internal group chats, they didn't talk about academician Qin junior.

They would say, "you don't know how amazing academician Qin is. We were completely convinced when we followed him in his research."

Then, several doctors and expert researchers involved in the gravity research of the planet began to boast about academician Qin.

Then, the whole group was full of topics about academician Qin.

To be honest, when the strategic weapon research was completed, the chief engineer didn't boast like this.

It could be said that this time, academician Qin's reputation had risen a lot.

At the same time, it also proved that academician Qin's research was really amazing.

He just didn't expect that not long after the planet's gravity technology passed, this academician Qin actually came up with a suspension car technology.

Although Minister Lu fell off the bike again, the hover car was indeed capable of carrying people.

This was definitely something that transcended the era.

It seemed that the research he was doing was never small, but the kind of research with great significance.

"Aiya!" Minister Lu fell again.

This time, he let out a cry of pain. Clearly, he was still in pain.

Minister Lu could only shake his head. forget it. I still don't have the ability. Let's wait for boss Qin to get the balancing system out first!

Qin Lin smiled, took the hoverbike, and sat on it.

It was expected that Minister Lu couldn't control the hover car.

Although the hoverbike's balance system wasn't working, it wasn't impossible to control. After all, even if there was no balance, it could still be very balanced in the hands of some acrobatic Masters.

All of this required one to master the technique.

Other than techniques, if one had enough strength, agility, and body flexibility, they could also be mastered by force.

Therefore, he had to master it by force and become the first person to ride a hoverbike.

Qin Lin got into the hover car and started it. As the hover car started and rose into the air, the hover car immediately became a little slanted.

It was obvious that he could not control the balance.

However, Qin Lin had consumed two fruits of the tree of strength, so his body was strong to a certain extent. Even so, the hover car was still firmly in his hands.

Just now, Minister Lu was directly thrown out of the car due to the bumpy ride.

However, Qin Lin controlled the motorcycle steadily and started driving. He accelerated and leaned forward. The acceleration was so fast that he crossed the lawn in an instant. His speed was even faster than an ordinary motorcycle.

Gradually, Qin Lin managed to master some balance and the hoverbike was not as difficult to control as before. He just had to adjust the bike's body to the bumps when making turns.

Then, he made a quick turn and drifted away, making the car turn around and drive back. Then, he accelerated again.

At the same time, the hover car could be seen rising rapidly to a certain height.

however, the hoverbike had limited equipment and the height it could float at was also limited. It could only reach a height of two meters, which was already very incredible.

This undoubtedly increased the number of travel routes.

Minister Lu didn't even care about the pain in his waist. He took out his phone and started filming.

It was the same for old academicians like academician Hao.

The scene in front of them was probably going to be recorded in history.

After Qin Lin had completely familiarized himself with the hover car's system, he immediately controlled the hover car and began to perform various difficult movements in the air.

Minister Lu's eyes lit up. Although the hovercar technology had not been completed yet, he could already see how amazing it would be when the hovercar was promoted in the future based on Qin Lin's performance.

At that time, their country's roads would not only be connected to the ground, but also to the sky.

As long as there were no obstacles in the sky, roads could be built.

The first ring in the sky, the second ring, and the third ring.

Thinking about it, it was a shocking thing.

After shooting a few videos, Minister Lu couldn't help but pull out an encrypted mobile email and send out the video he had just shot. There were a few words on it: The leader quickly watched the video.

A moment later, in an office in Beijing.

A leader received Minister Lu's email. As soon as he saw the words, he immediately opened the email and clicked on the video.

Then, the leader stood up in shock.

[Chapter 1675 775-Getting The Mysterious Stone Book Again](#)

As a leader, he naturally knew about the country's road problems. In a city where land was already scarce, it was extremely difficult to widen the streets in many places.

If he wanted to expand the street, what about the buildings on both sides? The only option left was to build an Outer Ring Road, but building an Outer Ring Road was a huge loss.

Therefore, the road problem was also a big problem for a city.

If he had a hover car, he could make use of the space in the air.

This would greatly reduce the problems of the city's roads, and could even completely solve the source.

The leader did not hesitate and immediately called several other leaders in the traffic Department.

Soon, in a conference room, a few traffic leaders arrived. At the same time, the video he had received was played in the multimedia office.

When the traffic police officers saw Qin Lin leaving the ground on his hoverbike, their jaws dropped in shock.

"Is that academician Qin? I've seen him in the news."

"This is a hovercar?"

heavens, this demon even made this thing appear? "

".."

The leaders were all shocked.

It must be known that in this era where traffic was so terrible, they had never thought of using this new mode of transportation to solve the traffic problem.

After all, this kind of technology was too far away.

Who knew that they would suddenly see such a video?

They were all in the transportation industry, so they naturally knew how big of a traffic problem this hovercar could solve.

At that time, the terrible traffic situation could be solved immediately.

"Leader, the hover car is out?" One of them immediately asked.

"Yeah, is the hover car out yet?" Another person asked.

The leader shook his head and said, " not yet. I heard from academician Hao and Minister Lu that the technology for this hovercar isn't perfect yet. The balancing system isn't done yet. If we don't have strong power, we can't control it.

"That's a pity."

"Yeah, it's not done yet."

".."

The few traffic leaders sighed.

However, the leader said, " don't look like that. Don't forget that it's academician Qin Junior's research. There are some things that I can't tell you. However, if it's academician Qin Junior's research, you'd better make the relevant preparations immediately. Otherwise, I'm afraid you'll become a joke like you Cheng.

Upon hearing this, the traffic leaders were stunned.

They had naturally heard of you city's incident. Linlin's experiments often caused too many tourists to go, and you city's traffic couldn't be handled in time. It could only cause serious traffic jams, which was constantly ridiculed by netizens.

Even though you city had been building an Outer Ring Road since then, it still couldn't keep up with the development speed of Linlin Scenic Area, so traffic was often blocked. This was often ridiculed by netizens, who said that you city was dragging Linlin Scenic Area down.

Now that the hover car had appeared, if they didn't come up with a plan in time, it might be a mess.

The leader continued, " the relevant plans must be made first, especially since the hovercraft is related to the roads in the air. The roads in the air must be divided into levels. Moreover, the levels of protection must also be done well. For example, the lower the level of protection measures, the lower the height of the roads in the air ...

The leader said a lot, but most of them were suggestions. However, the leaders of the traffic Department took note of them.

In the next few days, there were people in the traffic Department on the streets of the capital. They measured the area in the air and planned the roads in the air.

They had already started to take action before the levitation technology was out.

This also showed their trust in academician Qin.

After all, no matter who the leader was, as long as the final product was not out, no one would receive such treatment.

However, that was academician Qin, so it was different.

They completely believed in academician Qin.

He believed that academician Qin would be able to produce this technology.

Naturally, the traffic movement couldn't be hidden from some people, and some people began to inquire about this news.

Moreover, with such great fanfare, it was naturally not difficult to find out some news. Many people were a little shocked after finding out this news.

"What? How did they come up with such technology?"

"A hover car? It's impossible!"

"How did they manage to develop such a technology?"

".."

Many people were in disbelief when they heard the news. After all, a hover car was not something that could be found now.

Such things should only exist in science fiction movies.

Now, such a thing had actually been created.

This kind of thing should only exist in science fiction movies now.

Unfortunately, your city seemed to have become very dangerous, and a lot of information could not be obtained.

America.

In a laboratory.

Adoxi leaned back in his chair comfortably. He was basically lying flat now, and had no mood to fight for power at all. In any case, the missions given by those big shots were basically impossible to complete.

So, what was there to work hard for?

Since he couldn't work hard at all, he might as well not care about anything and be more relaxed.

A golden-haired man in a suit suddenly ran in and asked anxiously, "ADOS, take a look at this news. Sir wants to ask if it's true. After all, you've targeted that country a few times. Although you didn't succeed, you still know that country the best.

[Chapter 1676 775-Obtaining The Mysterious Stone Book Again](#)

Adoxi subconsciously took the information and saw the information about the hover car.

The moment he saw the message, he subconsciously said, " this must be true. I didn't expect them to be able to make this so quickly.

"You're so sure, ADOS?" the golden-haired man asked, puzzled.

because they have Linlin's laboratory, " Adolphus answered directly. and there must be a God of scientific research in Linlin's laboratory. His ability in scientific research is terrifying. Only under the leadership of such a person can such results be achieved.

"I had a premonition before, but I didn't get much information about them. I only know that they have a very young genius called academician Qin. He developed a very terrifying technology."

but I'm also very clear that the young man is just a smokescreen. From the information we've gathered, he didn't graduate from a scientific research major.

so, the people from that country are very smart. They used this young man as fake news to confuse us. The key is that the people from their country actually believed it. As expected, if you want to deceive others, you must first deceive your own people.

but they can't lie to me. So, if we don't find that person, get him, or destroy him, in the future, that Eastern country might have already entered space, and we can only look up at the sky.

The blond man frowned when he heard what adoxi said.

According to what aldoussy said, the other party might really have a God of science. Although this kind of monster was human, the results of their research were comparable to the power of gods.

He left in a hurry to meet an important figure in America and told him what adossi had said.

When the Big Shot heard what adoxi said, he frowned.

He felt that what adoris said was not without reason. If there really was such a person, it would definitely be a disaster for them.

In Modern Warfare, Wars involving scientific research were one of the main battlefields.

If the other party had such a person and they even pushed out a young man to confuse them, then they would face a terrible situation in the future.

The Big Shot immediately left the office and hurried to find ADOS.

When he saw Adolphus, he immediately asked, " adossi, I have a question to ask you.

"Sir, please ask." Adoxi looked at this Big Shot in surprise. This person had just been promoted recently, and he didn't expect to see him.

The Big Shot immediately asked,"ADOS, was what you said before true?" Could there really be a God of technology in that Eastern country?"

Upon hearing this, adoxi said decisively, " I can be sure. I can tell from the recent series of actions in that Eastern country.

The important figure frowned and said after a moment, " ADOS, I'm going to give you a mission now. You'll be in charge of setting up a special Department to investigate who the other party is and find him. If you can get him or destroy him, can you take this mission? "

Upon hearing this, even adoxi was stunned.

Previously, he had risked his life for a little bit of power, but in the end, he didn't get any benefits.

He didn't expect that this time, because of this unexpected information, this Big Shot would actually take the initiative to come to him and give him this authority.

This was truly an unexpected surprise.

However, he had chosen to lie flat, alright?

A moment later, adoxi immediately said, ""Sir, I'm very willing to do so."

Even if he lay down, he couldn't give up the opportunity when it was in front of him.

When the Big Shot saw this, he immediately nodded and said, " ADOS, I hope you can find that person as soon as possible. You won't let me down.

Without any hesitation, he followed the Big Shot to go through the procedures and then went to pick talents from everywhere.

The establishment of this special Department was related to the future scientific research situation, so the Big Shot had given him the greatest authority.

He wanted to find the most powerful talent, and then find the God of science in the eastern countries.

The other party didn't think that they could escape his eyes just because they found a young man to cover for them.

In order to obtain the other party's technology, he had already failed several times. Each time, he had lost all confidence.

This time, he had to find the other party and let him die in his hands.

When the time came, his name would be known to the whole world, and that country would hate him for the rest of their lives.

This would make him a hero in the future and leave his name in the history of this beautiful country.

The more he thought about it, the more motivated he became.

.

In Linlin Manor, Qin Lin didn't know that adoxi and the others had set up a Department to target him. He didn't know that this Department was targeting him, so he was the first one to be excluded.

After all, he was still too young. No one believed that he had accomplished those achievements.

In the office, Qin Lin looked at the screen in his mind. He had completed his daily task, but he still didn't gain anything from it.

Qin Lin could only helplessly control his game character to stroll around ore town, trying to see if this could trigger the plot mission.

After all, this was how he triggered the plot missions in the beginning.

This time, he controlled his game character to walk around ore town. When he arrived at the library, he made a surprising discovery.

Mary actually walked out from the counter and stood outside.

Another plot mission had been triggered.

He could now obtain another mysterious stone book.

Qin Lin immediately showed a look of surprise. He controlled the game character to click on Mary, and then a conversation appeared.

As expected, it was still the question-and-answer section. However, the question this time was a little different from the previous ones.

It was no longer the questions that she had answered before, she had to do them again.

Basically, every question had not been answered before.

Fortunately, the questions could be repeated.

Therefore, even if he answered the wrong question, he could always get the correct answer by repeating it. Then, he could pass the task and get the reward.

He had to praise the designer for this.

This was good. He was happy to get a reward.

It wasn't like some missions that were meant to make things difficult for people.

He suspected that the game designer of this plot mission and the game designer of some plot games were not the same person.

Qin Lin repeatedly answered the questions and recorded the answers of each question. After repeating this, it took some time for him to finally answer all the questions and get a reward.

[congratulations on answering all the questions correctly. You have received a special gift. This is for you!]

[congratulations, you have obtained a mysterious stone book!]

Qin Lin's face lit up when he saw the notification.

He controlled his game character to return to the farm and entered it immediately. As expected, he saw the note. The attributes of the stone book were the same as before. It could also be copied. After using it, he could obtain all the knowledge in the book.

Without hesitation, Qin Lin logged out of the game and went online again. He searched for a series of books about animal genetic research and then found a book publisher.

He didn't go to the previous one. After all, he went to the same person every time, afraid that the other party would make a wild guess.

"Hello, how may I be of service to you?" After adding each other on WeChat, the book seller immediately contacted them.

"Hello, I need to print a book." Qin Lin said as he sent the 50 books he had found to the other party. He then sent another message. "I need to link these 50 books together and print them into a whole book."

When the book merchant first started printing one book, he lost interest. When he saw that 50 books had been released, he became a little interested. Did you know how troublesome it was to print 50 ordinary books?

"Sir, your request is a little difficult for us to fulfill," the book merchant immediately refused.

"100000 Yuan for completion." Qin Lin.

"Deal!" The book merchant said decisively.

Then, Qin Lin paid the deposit and left an address. Of course, the address he left was not the Linlin Scenic Area, but the address of the first-class house.

If he sent the book to the scenic Area, he was afraid that it would be noticed. If he sent it to the house he bought in your city, he could bring it directly into the game, and no one would care.

Then, he entered the game again, went to the house in the farm, and took out two bones.

These two things had been in his possession for so long, and they could finally be put to use.

[Chapter 1677 776-A Threat! Find The Person In The Dark!](#)

These two pieces of bones were the bones of the ancient Brachiosaurus and the ancient Sadhu.

The two pieces of bones were basically fossils, but the genes of these two ancient dinosaurs still existed in them. The genes of these two dinosaurs could be extracted for genetic research.

It was a pity that he wasn't good at animal genetic research, even though the outside world had always been saying how amazing his animal genetic research was. The fact that he had created a crocodile like little yang was equivalent to creating a new species.

However, he was the only one who knew what was going on with yang. He had brought yang out of the game and had nothing to do with him.

Moreover, he didn't even have the basic knowledge of animal genes.

Although he had learned a lot of scientific knowledge from the mysterious stone tablet, he was still famous for his animal gene research.

Now that he had obtained another mysterious stone book, he had to learn all the knowledge related to animal genes. 50 books was no joke.

Moreover, out of these 50 books, a few of them were already one meter thick and contained all aspects of animal genes.

If it wasn't for the fact that the book could only be bound to one type of book, he would have taken the world Encyclopedia in one go and made a book that could circle the earth.

How shocking was it to learn it that time?

But even so, if it wasn't for the mysterious stone tablet, it would be impossible for him to learn so much knowledge from these 50 genetic research books, even if he were to spend his entire life.

Or rather, even an expert specializing in Animal Genetics couldn't fully digest all of this knowledge in their lifetime. At most, they could only choose one direction to research.

This was the case for many aspects of research.

No one could grasp all of this.

Therefore, most of the time, large-scale research required the cooperation of many experts. Each expert was responsible for the part that they specialized in.

For example, deep space rocket technology.

Academician Hao and the other two were each proficient in a part of it. Then, the three of them would lead the team and find experts in this area to cooperate with them. Those experts would also be proficient in a small part of it.

This way, they could work together to solve the large-scale research.

Now that Qin Lin had the mysterious stone book, once the 50-in-one book arrived, he could obtain the knowledge of animal genes without any worries.

It was just that when the time came to research the dinosaur genes, if the dinosaurs were to be made out, it would definitely be a very shocking thing. This was similar to the gravity technology of a planet, a group of people needed to be able to withstand pressure ...

If he was alone, it would really cause people to be suspicious and investigate. If he led a group of people to do it, just like before, everyone would only praise him for being amazing and not do much research.

After all, just like before, team leader Chu and the others were helping to attract attention.

Thinking of this, Qin Lin dialed Minister Lu's number.

Minister Lu picked up Qin Lin's call immediately. He didn't dare to delay, for he didn't know if boss Qin was going to cause trouble again.

"Boss Qin, I subconsciously felt that you have some good news to tell me when you called me," he said as soon as the call connected.

Qin Lin went straight to the point. Minister Lu, I've got two pieces of good stuff here. I want to conduct animal genetic research. It's not a small research project. I want you to help me gather some experts in animal genetic research and form a team to complete this task.

"Animal genetic research?" Minister Lu was stunned when he heard this.

After all, animal genetic research wasn't very important in the Chinese Academy of Sciences.

But at this time, he also remembered that boss Qin was also very good at animal genes. After all, boss Qin had also created a new species, the crocodile little yang.

Even when the Phoenix had appeared, he had subconsciously thought that it was boss Qin's research.

However, boss Qin did not admit it, so he gave up on the idea.

After all, boss Qin had already acknowledged yang, so there was no need to reject Phoenix.

yeah, " Qin Lin continued, " Linlin's laboratory doesn't have any talents in this field, so we can only ask for Minister Lu's help.

When Minister Lu heard this, he immediately replied, ""Okay, don't worry, boss Qin. Leave this to me. I'll help you set up a team of experts in Animal Genetics as soon as possible, and then send them to Linlin's laboratory to help you."

Minister Lu agreed and hung up the phone after chatting with Qin Lin for a while.

After that, he immediately called his Secretary and ordered, " go to the hospital and send an internal message. Tell the experts in animal genetic research to write an application to go to Linlin's laboratory to assist in a large-scale animal genetic research.

by the way, maybe the experts in the hospital are not enough. Contact other well-known Animal Genetics experts in the country and ask them to help, " Wang Yao said.

The Secretary got to work immediately.

Soon, the animal Genetics research Department in the Chinese Academy of Sciences received the news. This made everyone in the Department boil with excitement.

Although there were confidentiality regulations in the Chinese Academy of Medicine, some rumors couldn't be hidden. For example, team leader Chu and the others kept flattering academician Qin in the internal group.

[Chapter 1678 776-A Threat! Find The Person In The Dark](#)

There was also the matter of team leader Chu and the others getting special medals as rewards.

Although they still didn't know what team leader Chu and the others were researching, the fact that they couldn't disclose the research project and information after receiving the medal showed that what they were researching wasn't simple.

Otherwise, he wouldn't be more mysterious and get medals.

It was also because of this that it was enough to show that the team leader, academician Qin, was very powerful.

Moreover, they had more or less heard of the name of academician Qin little. Many people knew that this young man was a monster and was good at all kinds of research.

In terms of animal research, it was rumored that he had created a kind of herbivorous crocodile, which was now in Linlin Manor.

Now that Minister Lu had called them animal researchers to Linlin laboratory for assistance, it might be academican Qin's research.

This time, the other party was studying animal genes.

Otherwise, Minister Lu wouldn't have to make such a big fuss.

This made many animal gene research experts tempted. They wanted to find out what was going on and then wrote their applications.

It wasn't just the animal Genetics experts in the Chinese Academy of Sciences, many well-known Animal Genetics experts in China had received the relevant invitation.

These people had naturally heard of academican Qin junior. After all, the internet said that he was a genius, and the Chinese People's Hospital had also acknowledged this.

But to them, they didn't know much, and they were unwilling to admit this.

After all, there was no first in literature and no second in martial arts.

They were unwilling to admit that others were much stronger than them without knowing them well. That would be a self-denial.

Therefore, they were even more disdainful of this so-called help.

If they were, would they still need their help? That meant that the other party's ability was limited, and the so-called 'demon' was probably just a Bluff.

Unfortunately, these people did not know how much regret they would have in the future.

If they knew the internal Department as well as Minister Lu, they would know that boss Qin could solve a difficult problem by himself in a short time.

This was boss Qin's solution to this problem.

If boss Qin still needed to form a team to study it, the results of the study would definitely be extraordinary. It might even be beyond the era. This was the law.

If he could get a ride at this time, not only could he help boss Qin with his research, but it was also a good opportunity to farm for achievements.

Naturally, these people did not know this.

However, this news also caused some undercurrents to surge in some places.

In an Animal Genetics Laboratory in the East of the city, sun Tao walked out of the laboratory. As one of the top Animal Genetics researchers in the country, he was well-known in the laboratory.

Moreover, the people in the laboratory were very respectful to him. They all greeted him respectfully when they saw him.

As soon as he left the laboratory, he received a message on his phone.

Seeing this message, his face showed a cautious expression and he immediately looked around in a hurry.

Then, he sent a message cautiously and got into a taxi carefully. They went to a building together.

This building was actually a company from a beautiful country in the West.

When sun Tao got out of the car, a man in a suit was already waiting for him.

Mr. Sun, you're here, " he said immediately. Black Star has been waiting for you for a long time.

Sun Tao didn't want to answer when he heard the other party's words. He went straight to the elevator and pressed the button for the first floor.

The elevator went up, and sun Tao soon arrived at an office.

A golden-haired middle-aged man was sitting inside. When he saw sun Tao, he smiled and said, ""Professor sun, I've been waiting for you for a long time. Please have a seat,"

Sun Tao sat down with a frown. Black Star, may I know why you suddenly called me over? " There's been a change in the previous experiment, and I need to think of a new strategy before I can carry out new research."

As he spoke, he also frowned. To be honest, he did not know much about this Black Star. He only knew that the other party's real name was kuriel.

However, the other party had asked him to call him Black Star every time, as if this title was very powerful. Only he felt that this title was really annoying.

However, Black Star waved his hand and said, " it's not the laboratory from last time. We need you to do something. You should have heard that Linlin's laboratory has a large-scale animal genetic experiment and needs some animal genetic experts to assist. We hope that you can go to Linlin's laboratory and cooperate with us to investigate some things. With your ability and identity, you will definitely be selected by Linlin's laboratory.

"Linlin's laboratory?" Sun Tao's expression turned ugly.

Of course, he had heard of this matter before. Furthermore, he knew some inside information because he had some connections.

He knew that Linlin's experiment was not simple.

However, he did not expect Black Star to be looking for him for this.

Black Star, " he immediately said, " my experiment isn't completed yet. I'm afraid I can't go to Linlin's laboratory.

He understood some things. If even someone like black Star had his eyes on this experiment, it was likely that the experiment was not simple. Rashly participating in it would not benefit him at all.

Furthermore, it was impossible for Black Star to simply ask him to participate in the scenic Area.

If they dared to get involved in such a matter, the consequences would be unpredictable.

Black Star seemed to know that sun Tao would say this and immediately teased, " professor sun, you don't seem to understand. I'm asking you, not negotiating with you. After all, we signed a contract, so you have to agree to this request and help us do something.

Sun tai fell silent and did not speak.

He had to admit that he had fallen into a trap with that contract.

Black Star seemed to understand what sun Tao was thinking and immediately said, ""Professor sun, you have to know that some genetic experiments are illegal in this country, especially the research on the combination of human and animal genes. It's absolutely forbidden. If someone does this kind of research, not only will their reputation be ruined, but they will also be imprisoned. We don't have enough videos here."

Sun Tao's expression changed when he heard this.

It was the worst thing that the forbidden research had been discovered. Now that the other party had recorded a video of the research, it was even worse.

From the very beginning, he knew that it wasn't a good thing for the other party to provide him with resources to help him with his research. However, he clearly knew that there was a trap, but he still jumped into it. He was too eager for success and was too persistent in his own genetic research.

The topic of human and animal genetic experiments was too tempting. He felt that this topic might be able to solve the mystery of the human body and release some kind of power from the human body.

"I know." Sun Tao finally sighed and agreed.

For one thing, the evidence was in the hands of the other party. For another, he really wanted to continue his research. Only the other party would support his research and find the research materials he needed.

He wanted to succeed and leave his name in history. This was the only way he could continue his research.

Hearing sun Tao's words, Black Star smiled. "Thank you, professor sun,"

This was good, and this was the answer he wanted.

Black Star, " sun Tao sighed. may I know what you need me to do? "

Black Star smiled and said, " help me figure out a problem. There's a monstrous genius behind Linlin laboratory. His research abilities should be very monstrous. Many of Linlin's research projects were completed by him. I need you to find this person.

Sun Tao was stunned when he heard this. Wasn't that person the famous academician Qin on the internet?

This was something that everyone knew, yet the other party still wanted him to go through so much trouble to find it?

Black Star clearly saw sun Tao's confusion and smiled. professor sun, I know you're confused. We're not looking for that young man. He's just a person who has been removed to attract attention. His purpose is to protect the God of science.

Sun Tao was stunned by her words.

It wasn't that academician Qin.

These words suddenly made him feel enlightened.

He used to think that academician Qin was incredible, but the people from the Chinese Academy of Medicine spread rumors about him too much, making him seem like a god of science.

But now, it didn't seem to be the case.

After all, since Black Star and the others had said so, they would definitely not be wrong.

[Chapter 1679 776-Active Performance! Skill Storing Complete! 1](#)

After sun Tao received the order, he left the building immediately and left in a taxi. Although his identity would not be paid special attention, if he had frequent contact with foreign capital, it would attract attention for too long.

He didn't want to be noticed now.

After sun Tao returned home, he turned on his phone and began to search for news about academician Qin on the internet.

There was quite a lot of news about this person on the internet.

However, since he knew that this person wasn't the person behind the research, the person who would be in contact with this person would definitely be the person behind the research.

At that time, he would have to pay more attention to people in this area.

As sun Tao thought about it, he opened the document from the Chinese Academy of Sciences that was for research assistance. There was an application inside.

After filling out the application form, he would send it to the Chinese Academy for review. As long as it passed, he could go.

Furthermore, this was also the reason why Black Star was in such a hurry to find him.

After all, with his status in the country's animal genetic research, he would definitely be able to go.

Also, this wasn't enough. He still needed to fight for a certain position in the research team.

With his knowledge and ability, this was not too difficult.

As he thought about it, sun Tao had already filled in the application form, and then clicked send.

Sun Tao then waited. In the following time, the people from the Chinese Academy of Medicine would probably start to look up his information, honor, and standard, but they would send him an invitation. They must have known about this long ago, and would only confirm it according to the procedures.

As for other things, the Chinese People's Hospital was not a professional, so they would definitely not be able to investigate.

The key was that the research project was not the Chinese Academy of Sciences' own project, so they would not pay much attention to it.

Even if he was noticed, Black Star would definitely have made arrangements for him to make this move. Otherwise, the other party would have been finished long ago.

Sun Tao didn't have to wait too long before he received a response. Sure enough, he had passed the review.

Therefore, when the meeting date arrived, he also took a plane to Beijing. The Chinese People's Hospital had already arranged their accommodation.

He also met the person in charge, Minister Lu.

He had seen this person many times. After all, their laboratory had a little cooperation with the Chinese Academy of Sciences and they still needed some approval from the Chinese Academy of Sciences.

"Professor sun, we meet again," Minister Lu also greeted sun Tao warmly when he saw him.

He was not familiar with sun Tao, but he had a rough impression of him.

However, after reading professor sun's information, he knew that professor sun was an expert in Animal Genetics in China.

Such a powerful expert should be able to help boss Qin.

Of course, he also hoped that boss Qin's research could be completed as soon as possible. He was also curious about what animal genes boss Qin wanted to study so seriously.

It was rare for him to see boss Qin so serious.

That was why he took the initiative to greet an expert like sun Tao.

He had done all this for boss Qin, and it could be said that he had done his best.

Sun Tao saw Minister Lu's enthusiasm and immediately responded politely, " yeah, we meet again, Minister Lu. It's my honor to be led by Minister Lu this time.

Minister Lu immediately said, " professor sun, you're being too polite. Also, I'm not in charge of this research. You have to cooperate with academician Qin. He's your leader.

Oh, then I do want to meet this academician Qin. I've been communicating with him for a long time. Sun Tao said with a smile on his face, but in his heart, he was already complaining.

It seemed that Minister Lu really did his best to protect the person behind the scenes. He even called academician Qin little.

If he didn't know that academician Qin was just covering for him, he would have believed it.

However, this academician Qin didn't lose out. Although he was a shield, he really had a reputation and enjoyed all the fame.

Minister Lu was naturally very happy to hear sun Tao's words, ""Academician Qin will be very happy to have an expert like you working in Linlin laboratory."

Sun Tao set off with Minister Lu the next day. They had booked a private plane to you City Airport.

There were quite a lot of people going to Linlin's laboratory this time. In fact, many of them were Animal Genetics experts from the Chinese Academy of Sciences.

These people started to chat as soon as they got on the plane.

"I didn't expect to have the opportunity to research with academician Qin!"

that's right. This time, he's gathered so many animal geneticists. I think he's up to something big.

it's really rare to be able to participate in research of this scale. This is also an improvement for us. We should thank academician Qin!

".."

Everyone around was also praising those academician Qin juniors.

This made sun Tao feel inexplicably emotional.

Minister Lu had done a good job. Not only did he deceive outsiders, but he also deceived his own people. This was probably the most powerful deception.

However, there was one thing that Minister Lu did not expect. His trick could fool ordinary people, but it could not fool professionals.

The professional analyzed the situation and came to a conclusion.

However, sun Tao also did not know that the current leader of Black Star was not a professional. It was just the imagination of someone who had suffered a few blows.

Sun Tao quickly followed the team to Linlin's laboratory. Then, it was time for the laboratory arrangements. This was because the research of animal genes had to be carried out in several groups, and each group had to choose a leader.

[Chapter 1680 776-Active Performance! Skill Storing Complete! 2](#)

In order for his plan to go smoothly, sun Tao applied to be one of the team leaders without hesitation.

This would make his future actions more convenient.

There was no doubt that he was qualified to be one of the group leaders with his ability, and he was successfully selected.

Next, he should be able to carry out his mission better.

..

Linlin Manor office.

Qin Lin had also received the news that Minister Lu had arrived with Animal Genetics experts.

Minister Lu wanted him to go over, but the book he ordered hadn't arrived yet, so he didn't know anything about Animal Genetics. Therefore, he directly said that he had something to deal with.

Minister Lu naturally didn't have much suspicion. He knew that once boss Qin got serious, the research would be huge. He might even be writing a related genetic research plan now.

Therefore, he didn't force Qin Lin to come.

Finally, while waiting, Qin Lin received a call from the courier. The book had arrived.

The first thing he did was to drive to you city. When he got downstairs, he saw a courier speechlessly driving a delivery car. There were three other couriers following him.

He asked the booksellers across the street to provide delivery services. The deliverymen had to help him move the books home. Otherwise, he couldn't bring the books into the game in public.

Therefore, delivering this kind of goods should be the last thing a courier wanted to do, because it was troublesome.

When Qin Lin arrived, the deliverymen immediately looked surprised.

"Academician Qin!"

"It's really little Qin!"

"Little Qin, is this your stock?"

".."

A few of the deliverymen suddenly became excited and asked in disbelief.

This was really a pleasant surprise for them. After all, the person in front of them was a big Shot. He was too famous. Ordinary people wouldn't be able to meet such a person in their entire lives, right?

Qin Lin looked at the deliverymen and immediately said, " don't take a video. I can take a photo with you after you deliver the things.

Upon hearing this, the deliverymen nodded one after another. It was already very good to be able to take a photo together. They could post it on their WeChat moments to make their friends envious.

People always had to understand each other. After all, there were only a few lunatics like those who took photos of famous people's faces with their mobile phones at the airport.

Sometimes, I often see some people at the airport getting scolded by celebrities for taking photos with them. I can only say that these people deserve it.

In particular, brother Jing's scolding was a classic.

At the very least, even if most people liked a celebrity, they would definitely not do such things.

Soon, a few deliverymen helped Qin Lin take the packages out of the car. When the books were taken down, Qin Lin was a little dumbfounded. They were too thick. They were more than 30 meters in thickness.

This was after he had asked the book merchant to make the font smaller as soon as possible ...

"Be careful," Qin Lin didn't forget to remind him, for fear that he would break the book and it wouldn't be a whole book anymore.

A few couriers carefully brought the book upstairs. As the book was too long, they could not take the elevator, so they could only take the stairs.

One of the delivery men asked curiously, ""Academician Qin, what's in your package? it seems to be a book."

"Yes, it's a book," Qin Lin also satisfied the other party's curiosity.

The courier said in surprise, "then there must be a lot of books since it's so long, right?" Did you read it yourself?"

Qin Lin nodded. yes, I read them myself. There are more than 50 books.

There was no need to hide this.

Seeing that Qin Lin was easy to approach, the deliverymen began to chat happily.

"Academician Qin is really amazing."

yeah, I can't even finish one page if I read by myself, let alone more than 50 books.

"So, academician Qin is so amazing, and you're just a delivery man."

These words were a little hurtful, but at this time, no one would care about this.

Several deliverymen moved the book inside. Before they left, Qin Lin took a photo with the deliverymen.

After that, the deliverymen left happily and posted the photo with little Qin on their WeChat moments. It really attracted a lot of likes and comments from their friends.

Naturally, there were also people who posted their group photos on the Short Video platform.

Qin Lin didn't ask them to do this, and it wasn't like they couldn't do it. Even ordinary people would post photos with celebrities. In addition to sharing, they also wanted to show off. For them, this was something to show off.

Therefore, the Short Video was soon followed by several couriers and Qin Lin's group photos, which made many people envious.

Academician Qin Junior's reputation was very big now, bigger than any celebrity. Moreover, his achievements, even if it was the smallest, were still incomparable to those celebrities.

Naturally, the most attractive thing was the video that was shot after the group photo. It was a very long express delivery item with the words: These were books, more than 50 in total. They were the books that academician Qin wanted to read.

This was what attracted people.

Who would have thought that a person like academician Qin would order so many books at once?

After all, academician Qin had already made great achievements in scientific research. Even the teachers in the school couldn't order so many books at once.

How could he continue to watch?

This video quickly became a hot topic, then a super hot topic, and everyone on the internet knew about it.

Naturally, it was the power of the government.

The officials would intentionally or unintentionally promote some positive and meaningful things.

Now, people like academician Qin had to order so many books to read. What reason did other people have to say that they didn't have time to read, didn't have time to study, and didn't want to read?

This was a model of endless learning.

You say you're busy, but you're busier than academician Qin?

You say you've succeeded, and your achievements are higher than academician Qin? He had made so many research results.

You said you wanted to read and study, what right do you have to say that? Even people like academician Qin have to read and study, what qualifications do you have to be lazy?

In fact, this could even be compiled into an article and put into teaching materials.

Hence, the education editorial department quickly wrote an article and uploaded it to the internet. It would be included in the latest Chinese language textbooks next year.

The general content of the article was:

"Academician Qin little has loved to study since he was a child, and his grades have always been very good, so when he grew up, he became a scientist. Moreover, after becoming a scientist, academician Qin little has been seriously reading and studying. Once, he bought 50 books, and the express delivery stacked them into a long line of more than 30 meters.

In the beginning, the deliverymen didn't know that it was a book and began to discuss it. When they found out that it was a book, they were shocked. Academician Qin was actually so eager to learn.

Therefore, children should study hard. As long as you study and gain knowledge, you can become a great person like academician Qin."

When this article came out, it was reposted and countless people commented:

"Take 'rivers and skies', 'heroes xxx'. .. After removing the book incident from these articles, the editorial department finally did something."

"Well done this time. We don't want our child to learn from celebrities or internet celebrities, but people like academician Qin."

"The editor also knows that he can't use celebrities and internet celebrities to disgust us. That's good."

"Supporting academician Qin's story!"

I can't even Continue reading one of the 50 books. I really admire academician Qin!

".."

Qin Lin didn't know any of this. He had already brought the book into the game.

The 50 books combined into one. When he opened the package, it was extremely shocking. The long pages were densely packed. It was truly terrifying.

Fortunately, with the mysterious stone book, he didn't have to learn the content of the book by himself.

[do you want to use the mysterious stone book to copy the contents of this book? Who was it? [no?]

Qin Lin did not hesitate and chose to copy the book. A moment later, the book quickly dissipated into light spots and flew towards the stone book.

In an instant, Qin Lin received a notification.

[congratulations, the stone book has been copied!]
