

## The Game 1801

### [Chapter 1801 Give Me Whatever You Want!](#)

There was still a need to go through the necessary signing and verification procedures. After all, the nature of this thing was too big. It would be easier to explain it clearly if he reported it.

Otherwise, if something happened at any part of the process, it would be a big problem.

Mr. Lu had spent two days to complete this procedure for the missile, and this was the speed after the leader had given the instructions.

Otherwise, this speed would probably be delayed for a long time.

If it wasn't for the boss, the review process might not even be completed in half a year or a year.

After the review process was completed, Mr Lu also applied for an escort vehicle and escort team as soon as possible, and then directly transported the items to the airport.

Then, it was transported to You City by a private plane and finally sent to Jinglin's laboratory.

When Qin Lin received the news, he rushed to Jinglin's laboratory as soon as possible.

It was impossible to make the Falcon flying device without this material!

With this material, he could build a semi-cold nuclear fusion power device, and then he could carry out other steps.

As for the other materials, Jing Lin's laboratory should be able to buy them, so there was no need to trouble Hua University of Science and Technology.

"Boss Qin, the materials you need are here." Mr. Lu said as soon as he saw Qin Lin.

"Mr Lu, sorry to trouble you." Qin Lin also expressed his gratitude to Mister Lu.

"Boss Qin, you're too polite. There's no need to be polite between us." Mr Lu also smiled and waved his hand.

After that, he did not ask Qin Lin what research he wanted to do. After all, it was enough to know that it was about motivation.

Before the finished product came out, perhaps even Boss Qin himself didn't know what he wanted to study.

After all, Mr. Qin's previous research was all on a whim, and it was very short. It seemed that he would do whatever he thought of. There was no unified plan at all. He even suddenly became interested in watching a movie and made a Batmobile.

Sometimes, the best way for such people was to not ask. When you got the results, you would know what they were researching.

Mr Lu quickly left and returned to the capital.

He still needed to deal with the electromagnetic pulse bomb technology in Beijing.

Although the technology for this thing had been given to the fire department, it was impossible for them to produce it.

Not only did this technology require a new mold production line, but it also required the synthesis of some materials. Naturally, it was impossible for the fire department to know.

Therefore, this technology had to be perfected by the Chinese Academy of Sciences before they could build a production line for the fire department.

This thing would be of great help to the fire protection industry. It could change the history and situation of fire protection. Therefore, it had to be produced as soon as possible and promoted throughout the country.

In Qinglin's laboratory.

However, Shen Li hurriedly mobilized the laboratory's security elite and guarded one of the laboratories.

He really didn't expect that Minister Lu would send this kind of material.

Whether it was a nuclear barrier or a nuclear container, they were both strategic weapons.

To be able to use such a thing, the thing his boss was researching must not be simple.

In the laboratory.

Qin Lin looked at the materials and began to draw the design.

This design was naturally the blueprint for making the mold for the power plant components.

After he finished drawing the mold designs, he called the old Shen Li and handed the blueprints to him. "President Shen, find the mold department and produce these molds for me. We'll set up a production line."

Shen Li naturally did not ask too much about Qin Lin's instructions. He immediately took the blueprint and went out. At the same time, he called the relevant people to arrange this matter.

Moreover, the mold and production line that the boss wanted naturally had to be completed as soon as possible.

Qin Lin started working on a computer again. He was still drawing.

Since he was going to make the mold, he had to make the other parts of the Falcon flying device. When the time came, he would make the mold together.

After giving the second batch of designs to Shen Li, he started to make a list.

This list was a list of materials that were needed to make various parts of the Falcon flying device.

After that, he gave the list of materials to Shen Li and asked him to arrange the purchase. These materials were all normal scientific research materials that could be bought as long as one had the money.

For the next month, Qin Lin spent most of his time in Qinglin's laboratory, making the Falcon flying device.

During this month, You City had also undergone some changes.

You City had opened up five special passages for hover cars. When the residents of You City went out, they would occasionally see people wearing helmets and riding hover bicycles flying through the air.

This scene made countless people envious.

The hover car had already been promoted to You City's market, and there were already specialized stores in You City. However, there was a restriction to buying a hover car. One had to have an identification card and a hover car driver's license to buy it.

Therefore, only the first batch of people who had taken the driver's license examination were qualified to buy a hover car. There were very few of them.

The key was that the hover bike could only be driven on open air roads. Even if he bought the hover car, he could only drive it in You City. After all, other cities had not opened air roads yet.

This was also specially done by the higher-ups.

You City's reputation was internationally renowned. The higher-ups also wanted to make You City an internationally renowned city, especially since You City had already registered as the number one international tourist city.

#### [Chapter 1802 Give Me Whatever You Want!](#)

You City had also entered the final stages of upgrading, so naturally, it had to be made more unique.

When You City's hover car was fully popularized, which city in the world could compare to You City?

Compared to the news about You City's hover car, there was another piece of international news that received more attention. It was the mountain fire in Aulia that was trending.

This was because the mountain fire in Aurelia had been burning for more than a month, and it did not show any signs of extinguishing.

Therefore, Aurelia had no choice but to ask the whole world for help. That was why this news was trending in the country.

In the news, one could see the scorched earth that had been burned for more than a month, as well as the homeless animals, especially the koalas. Their helpless eyes and the despair of being burned were really touching.

Everything had spirituality.

However, facing that raging fire, it was not something that ordinary people could deal with. They could only watch and mourn in their hearts.

Didn't they see that the entire world didn't dare to accept Olia's request for help? Even the other party's good big brother, the beautiful country, had become a coward.

After all, a mountain fire like Aurelia was not that easy to put out.

Otherwise, the fire protection technology of each country was not much different. If it could be destroyed, Aurelia would naturally have been destroyed long ago.

Therefore, even though Beauty Nation was powerful, it was hard to say how many firefighters would be sacrificed and how much energy would be consumed to eliminate this kind of mountain fire.

This situation was small. Even if some people wanted to go to the rescue, they would not be able to pass the proposal.

Therefore, he could only leave Aurelia to fend for himself.

This was also what the various countries thought.

However, at this moment, a piece of news spread throughout the world.

The Eastern Country actually released news that they were going to rescue Aurelia?

Heavens, was the other party crazy?

You must know that big brother Olia is very beautiful. Who can't tell that you guys are at daggers drawn?

Now that the local underlings are in trouble, you actually helped them?

Soon, some people understood the evil intentions.

Wouldn't that be like putting Beauty in a volcano and roasting her?

At that time, Aurelia would think, 'If I'm in trouble, my big brother won't say a word. Instead, the people who used to oppose me helped me. Will I still oppose them in the future?'

Obviously, this plan was also an overt scheme. This was also the purpose of the country.

Since they had produced so many fire extinguishing tools in the past month, they could also show off their scientific research muscles to the world.

This time, Beautiful couldn't sit still anymore. They had seen through their motive, so they immediately released the news that they were going to support Aurelia in putting out the fire. Firefighters had already been arranged and were about to set off.

They even released a piece of news that they had developed a new dry ice rain fire extinguishing technology. They wanted to compete with the eastern countries to see whose fire extinguishing technology was better.

At this moment, everyone was paying attention to this news.

Beautiful actually declared war on that eastern country on fire extinguishing technology.

It was obvious that there was something interesting to watch.

This kind of big melon was hard to see.

When Qin Lin saw this news in Qinglin's laboratory, his first thought was: Wasn't he looking for abuse?

On the other side, in a beautiful laboratory.

In the Research Strategy Department, Jaris saw a blonde professor. " Professor Sweenley, this time, Aulia's fire extinguishing support will depend on you. The funds you need will be fully provided. All you have to do is use your technology to put out that damn fire and then win against that Eastern country. "

They had already lost to that eastern country in scientific research several times. The key was that they still could not crack the other party's technology.

Therefore, he had to seize this opportunity.

Originally, they did not want to care about Olia. It was too costly. Now, that eastern country had jumped in to help Olia put out the fire. It just so happened that Professor Svenley in their laboratory had developed a special dry ice rain extinguishing technology.

This was already the world's most advanced fire-extinguishing technology. It would definitely be able to defeat the other party and regain its reputation.

#### [Chapter 1803 You Will See The Power Of God!](#)

Professor Sweenley immediately promised, " Ms. Grace, you won't be disappointed. I've already asked the laboratory and factory to hurry up. Trust me, when we set off for Aurelia, it will be the time for us to receive glory. "

Hearing Professor Sweenley's words, Jaris nodded with a smile.

No matter what, their own underlings were in trouble, but they asked the other party to be a good person to help them. That was a ruthless slap to their faces.

The mountain fire in Aulia became the focus of the world.

This was actually a very strange thing ...

Previously, not many people paid attention to the Aurelia Mountain Fire. Just because the Eastern powerhouse and Beautiful announced at the same time that they were going to rescue the people, they immediately attracted attention.

This was like a matter. It was originally a small matter, but when two super popular internet celebrities started to argue about it, it would immediately attract everyone's attention.

It seemed to have the same effect.

Beijing.

Mr Lu naturally attached great importance to this matter.

He also knew why the higher-ups had decided to help Aulia.

After all, the mountain fire in Aurelia would cost a lot of money even if they used electromagnetic wave bombs to support it.

Moreover, with this batch of electromagnetic wave bombs supporting Ollie, the promotion of fire protection in his country would have to be delayed.

However, sometimes, some things had to follow the situation.

Therefore, this matter had to be done, and they had to deal with it.

Fortunately, they had produced a lot of electromagnetic wave bombs during this period of time. Otherwise, they would not be able to gather so many electromagnetic wave bombs at the last minute.

"Mr Lu, everything is ready." A man in his fifties came to Mr Lu and reported.

"Academician Tao, I'll have to trouble you to make the trip this time." Mr Lu smiled and nodded.

There had to be a team leader in charge of Aurelia's support.

He definitely couldn't go. Those of too high a rank couldn't go. Therefore, he had to find someone with enough weight and qualifications to lead the team to Aulia and be in charge of this matter.

The person in front of him was suitable. Although he didn't have any position, he was an academician, and an academician in the field of fire protection.

This electromagnetic wave bomb was researched by Boss Qin. The realization, including the production line of the mold, were all completed by Academician Tao. He was also the most familiar with the structure of the electromagnetic wave bomb.

Not long after, Academician Tao brought his people and set off for Aulia. They were transported by a private plane.

After all, how could he let outsiders transport the electromagnetic shock wave bomb?

They could only feel at ease if they were escorted by their own people. Otherwise, if the electromagnetic shock bomb could not be safely transported to Aulia, it would be a huge disgrace.

At the same time, Academician Tao's team also had people who could report what happened in Aulia in real time.

..

When Academician Tao and his people alighted from the private plane, the official reception team of Aurelia was already waiting for them. Moreover, the reception was very grand, almost the same as when they received the people from Beautiful.

In the past, Ollie had already treated Pretty Woman as his father. The people from Pretty Woman were always treated better than those from other countries.

However, this time, he had made a surprising change.

Obviously, Aurelia's people weren't fools. They naturally knew that when they first sought help from Pretty Woman, Pretty Woman kept rejecting them. It was obvious that she wanted to stand by and watch.

However, when the eastern giant announced that he would help them, Beauty immediately announced that she would help them as well.

Not even a fool would understand the tricks involved.

Hence, no matter what, Aurelia was grateful to the Eastern Giant. If it wasn't for them, Beautiful wouldn't have done anything.

Even if the eastern giant could not provide any substantial help to their mountain fire this time, they still had to express their gratitude.

At the same time, it was also a form of goodwill and a way to tell Beautiful that he wasn't a fool.

Academician Tao didn't understand the twists and turns of this. When he saw Aurelia coming to receive them so ceremoniously, he was very enthusiastic and felt that he had to help them put out the fire.

However, many people smiled when they saw the broadcast. The reason why they took action was because they had the Electromagnetic Vibrobomb. Most importantly, it was also meaningful in this aspect.

If he could win over all the beautiful and hardcore followers, it would be of great significance.

After all, he had already risen up. Who would be willing to be a small one or a second-in-command?

Everyone wanted to be the leader and the leader of the ball.

"Academician Tao, we've prepared a place for you to stay. There's also a professional chef and waiter..."  
The people from Aurelia warmly welcomed Academician Tao and the others.

However, the mountain fire in Oria was serious, so they didn't have much time to waste. After eating, Academician Tao and his group were invited to the conference hall of Oria Center.

When they arrived, the people from the Beauty Department had also arrived. Sweenley also saw Academician Tao. The two of them looked at each other in surprise.

"Tao, it's actually you!" Sweenley was shocked.

"Sweenley." Academician Tao was also stunned.

"Tao, I didn't expect to meet you here. Looks like you're going to use your fire extinguishing skills."  
Sweenley suddenly started to tease, his words carrying a hint of ridicule.

Not only did he know Dongfang Tao, but he was also his classmate and had the same teacher.

Moreover, he was very clear about Dongfang Tao's ability. When they were classmates, Dongfang Tao was already far behind him. He had always been hanging behind him.

#### [Chapter 1804 You Will See The Power Of God!](#)

This time, the eastern giant had actually sent the other party over. Needless to say, the other party had lost all face this time.

Dongfang Tao's creation could never be better than his, nor could it surpass his.

Academician Tao looked at Svenli's confident expression and knew what he was thinking. He smiled and said, "Sweenley, some things are not what you think."

This made Svenley laugh again. "Tao, I know that you weren't convinced when we were studying together. That's why I invited you to be my assistant, but you weren't willing to come. So, you don't know how big the laboratory I'm in charge of now is, how much money I can earn every year, and how big my villa is."

Academician Tao frowned when he heard this. "Sweenley, my purpose for studying is different from yours. I study to serve the country. I'm not like you who study for my own benefit or to make money."

He knew that Sweenley was very capable, but he also looked down on him. The scientific research that was surrounded by the stench of money was not pure. He did not think that his current research would be weaker than the other party.

After all, he wasn't the only one behind him now. There was a group of like-minded researchers who wanted the country to be strong.

However, with Academician Qin's electromagnetic wave bomb, their research was useless.

Moreover, they were very impressed by Academician Qin's Electromagnetic Vibrobomb.

They really couldn't imagine how Academician Qin was able to develop such a thing. Even though Svenley was very capable, he couldn't have developed a technology that was more powerful than Academician Qin's.

"Tao, is that what I wanted to tell you?" Svenley teased. You don't seem to understand. What I mean is that your ability has always been inferior to mine, so this time, you're going to lose face. Are you mentally prepared?"

As he spoke, Svenley walked out.

Academician Tao went out as well. They were going to take a closer look at the situation of the mountain fire.

At the same time, in Beautiful China, Jiayis had also seen the confrontation between the two. They had also arranged for people to broadcast it and know what was going on.

Jiali also quickly found out about Academician Tao and sent it to the few gentlemen behind her.

When the few gentlemen saw the information that Jiali had sent over, they immediately smiled.

This Tao guy and Svenli were actually classmates.

The key was that the other party had always been suppressed by Sweenley and was not Sweenley's match at all.

Therefore, now that he was the person in charge of the Eastern Giant, he was definitely in charge of the research. He was naturally not a match for Sweenley.

There couldn't be someone more powerful who developed a product and let the other party take the limelight, right?

That was impossible.

No one would be so stupid as to give their honor to others.

..

Aulia.

Outside, Academician Tao realized that he was surrounded by countless reporters.

With the Eastern Giant and Beauty in a situation similar to a competition, the reporters from all over the world naturally wouldn't stay idle. They wanted to get first-hand news and wanted to know who would win this time.

After all, Beauty had always been the leader of the ball and wanted to meddle in everything. Moreover, the other party was powerful, so the others did not dare to resist and could only endure silently.

However, there were people that Beauty couldn't do anything to, and that was the Eastern Giant and the big white bear.

This was all because Beauty was helpless. She couldn't intimidate him, and she didn't dare to make a move.

Therefore, this could also be regarded as an invisible confrontation.

Sweenley was a little excited when he faced the reporters. He answered their questions with a smile.

It was the attitude of a winner. This came from his studies. He had crushed Academician Tao and gave him unlimited confidence.

One of the reporters asked, ""Professor Sweenley, are you very confident in helping Aulia put out the mountain fire this time?"

Sweenley immediately smiled. " Sir, I think you've asked the wrong question. We must be very confident. The ones who are not confident should be the others. "

The reporters naturally knew what Swinley was referring to. One by one, they began to take pictures of Swinley.

When the reporters were about to interview Academician Tao, he had already left.

They were not keen on such things.

Outside, Academician Tao said to the people from Aulia," We need some transport helicopters to transport our fire extinguishing products. "

The person from Aurelia nodded and said, ""Don't worry, sir. We've already prepared the helicopters. You can use them at any time."

At this moment.

Svenli had already brought his people over. He looked at Academician Tao and the others and made a provocative gesture.

This was probably the habit of the beautiful people. Arrogance was their original sin.

Sweenley also asked for a transport helicopter from Aurelia's side. They transported special ammunition onto the helicopter.

That was the ammunition needed for their special dry ice rain technology, which was also their latest technological success.

This success would bring them great glory this time.

Soon, after both sides were ready, the first batch of transport helicopters took off at the same time.

Moreover, the helicopters of both sides were headed in the direction where the fire was the most serious. Their purpose was self-evident. They wanted to prove that they were stronger.

Behind them, there were also interview helicopters following behind them, frantically taking photos of the helicopters of both sides.

The scene was also sent back to their own country.

One of the interview helicopters was from China, so countless people in China saw this scene.

After the competition between the beautiful team and them, countless people in the country were looking forward to it.

After all, they already knew that Academician Qin had developed the Electromagnetic Wave Bomb and knew how powerful it was.

So, wasn't the beautiful one asking to be humiliated?

They were all looking forward to the scene of the beautiful woman being dumbfounded.

The transport helicopters from both sides had arrived at the place where the fire was the strongest.

It had to be said that Aurelia was a country with many mountains, but their forest fire belts were really terrible.

Even if their fire protection zone was not satisfactory, the mountain fire could not have burned so badly that it could not be extinguished for a whole month.

When Sweenley reached the sky where the fire was at its highest, he said excitedly, "" Quick, start reloading. Let our rain cannonballs fly into the sky and turn into a special dry ice rain to destroy these mountain fires. "

Under Sweenley's orders, the people he brought with him started to move. In a moment, cannonballs shot into the sky, and then a bright explosion erupted.

Then, the cannonballs turned into white clouds. After a while, the dry ice effect was produced, cooling and solidifying the water droplets. Then, a rain fell crazily.

This scene was filmed by the interview helicopters and forwarded to the world.

Moreover, it could be clearly seen that the fire had obviously weakened under the rain. This meant that the technology was effective, and the effect was very strong. As long as there were enough cannonballs, they could completely extinguish the mountain fire in Aulia.

Even the people from various countries who saw the news broadcast could not help but be shocked because the scene was really shocking.

This kind of scene would only appear in movies, right?

No wonder the beautiful woman was so confident this time. With such skills, she must be confident.

Seeing that his product was working again, Svenley said again, "" Increase the number of drops. Let them see the power of our technology. "

Very soon, the transport helicopters on Beautiful's side were launched again. The fire weakened again under the dry ice rain.

On Academician Tao's helicopter, the people from Aurelia looked at the scene and couldn't help but sigh. "Their technology is really powerful. The effect is unbelievable. It's much better than our fire extinguishing technology."

Academician Tao smiled and said, " Mr. Dotya, if you think that this kind of technology is incredible, wait a moment. Perhaps you will think that you have seen the means of God. "

#### [Chapter 1805 Assembling The Falcon Flying Device!](#)

Aboard a helicopter, Aurelia's men were already attracted by the beautiful dry ice rain technology.

In their eyes, Beautiful's skills were already very impressive. At least, she was much better than them.

Therefore, they were very surprised.

Presumably, no country in the world had better fire-extinguishing technology than Beautiful.

What was the meaning of this Eastern Giant?

They had skills that were even better than Beautiful.

The power of a god?

Was this for real?

Academician Tao didn't care what the other party was thinking and immediately ordered, "Throw the electromagnetic pulse bomb."

As soon as he gave the order, the transport helicopters responded.

Then, the doors of the transport helicopters opened.

Electromagnetic bombs were thrown out one after another, falling into the raging fire below.

This scene was naturally captured by the interview helicopters.

The falling electromagnetic bombs were also captured.

Sven also saw this scene and sneered.

No matter what skills he had, the other party could not compare to him.

The electromagnetic bombs quickly fell into the sea of fire.

Academician Tao ordered again, "Activate the Vibroblast Bullet!"

Beside him, someone had already taken out a remote control and pressed it one after another.

When these electromagnetic wave bombs were brought over, they were specially numbered and equipped with special remote controls.

The moment they pressed the remote control, special electromagnetic waves appeared in the sea of fire and spread rapidly.

The moment the special electromagnetic waves appeared, the flames seemed to freeze and then disappear into thin air.

That's right, it had disappeared into thin air.

The raging fire disappeared without a trace in an instant.

If it wasn't for the faint green smoke, it would have been as if there had never been a fire here.

Following the effects of the Electromagnetic Vibrobombs, the flames also disappeared into thin air.

Academician Tao smiled proudly when he saw this.

This was their technology. He didn't know how Academician Qin thought of using this research direction and even developed a finished product.

When the Aurelia men saw the flames disappear, their jaws dropped.

This ... This was too terrifying.

He immediately thought of the other party's words.

The power of God.

It seemed that this terrifying scene really did resemble the power of a god.

How could a mortal do such a thing?

On the other side, when Svenley saw the flames disappear, his eyes widened in shock. "That's impossible... Absolutely impossible. What just happened?"

He had wanted to see the other party make a fool of himself. He felt that the other party's skills were definitely far inferior to his.

Who knew that the ball that the other party had thrown out would have such a terrifying effect?

The gap between them and the other party was too great.

Suddenly, he was struck by a blow.

This also made him think of what he had done in the interview just now and the ridicule he had given the other party.

This made him feel an inexplicable sense of shame.

Why was this happening?

At this moment, the reporters in the interview helicopters were also shocked.

He subconsciously felt suffocated by the scene just now.

A Western reporter even exclaimed at the live broadcast, "" Oh my god, what did I just see? Those ripples seemed to be some kind of magic that instantly extinguished the flames. "

The reporters from the western countries were all shocked.

They also thought that Beauty Nation's technology was already very impressive.

Who knew that Beauty Nation's technology was nothing at all.

Compared to the fire-extinguishing scene just now, Beautiful's skills were nothing.

Academician Tao gave the order again, and electromagnetic bombs were thrown into the sea of fire.

As he controlled it, the subsequent electromagnetic vibration bombs exploded crazily. The continuous vibration waves extinguished the sea of fire.

The sea of fire disappeared, and the temperature that had been rising in the surroundings began to drop.

Faced with such a terrifying fire extinguishing scene, only the people watching the live broadcast in China could remain calm. After all, they had long known that Academician Qin had developed such a terrifying fire extinguishing technology.

Beautiful Research Strategy Department.

Seeing the images from the livestream, Jaris's body started to tremble slightly. She was obviously agitated and angry.

"Damn it, why is this happening? Didn't Professor Sweenley say that his skills were the best in the world?" Jiali Electronic was a little mad. She had specially invited a few heavyweight gentlemen over for this.

Who knew that this would be the result?

This time, they had lost to the eastern giant. They were going to lose face in front of the whole world.

At this moment, a series of cold snorts sounded.

The few heavyweight gentlemen stood up one after another, their faces clearly filled with anger.

" Hmph, Jaris, how many times have you made a mistake? "

"That's right. You misjudged the situation time and time again."

"I don't think she's any better than Adolf."

His words made Jaris's expression turn ugly.

Of course, she knew who Adolf was. She had even complained to her subordinates that Adolf was a good-for-nothing. She had led so many operations, but they had all failed. There had been no results at all.

Now, these gentlemen were actually comparing her to Adolf and even said that she was not much better than Adolf. This meant that these gentlemen were very dissatisfied and angry.

#### [Chapter 1806 Assembling The Falcon Flying Device!](#)

However, she suddenly realized that perhaps Adolf was not as bad as she had thought. After a few times, she had also felt a deep sense of helplessness towards the Eastern Giant.

It seemed that no matter what he did, he would always be a little off.

Hadn't Adolf felt the same way before?

Elsewhere, in a laboratory, a golden-haired man was lying comfortably on a chair with a cigarette in his hand.

Adolf suddenly yawned. He felt like someone was missing him.

He felt that it was better not to have people think about him, especially those big shots. If they asked him to do something difficult, he would have to expend all his effort, not be pleased, and take the blame again.

He was completely lying flat now and did not care about anything.

.

Other countries had also seen the scene of the electromagnetic wave bomb extinguishing the fire. Everyone who saw it was shocked.

No one dared to imagine that the current fire extinguishing technology could actually achieve such a level?

All the countries were dumbfounded. Then, their fire departments only had one thought, and that was to obtain this technology.

With this technology, what was there to be afraid of?

But then, they were troubled again. The people from the eastern country had never authorized such technology. Perhaps they could not obtain such technology at all.

Aurelia's people started cheering when they saw that scene.

On the transport helicopter, the man from Aurelia shouted excitedly, "" Tao, this is amazing. This is unbelievable. Your skills are like the power of gods. "

Academician Tao and his men threw the electromagnetic bombs, and more than half of Olia's mountain products were quickly destroyed.

The area of flames that they had destroyed had also completely become an isolation zone, preventing the flames on the other side from spreading over.

This made the firefighters and Aurelia's people cheer. They had worked hard for a month to put out the mountain fire. They had sacrificed countless people and expended countless fire-extinguishing materials, but in the end, they could not put out the mountain fire.

Now, the mountain fire was extinguished in such an unbelievable way and speed.

But on the other side, the beautiful Svenley had also brought some people to create some effect, but it was still far from extinguishing the fire.

However, as long as they were given time, they could obviously do it.

Unfortunately, compared to the electromagnetic wave bomb, it seemed that Sweenley's dry ice rain technology was nothing. It was like garbage.

Since Svenley had been dealt a blow, he wasn't in the mood to extinguish the fire, so his efficiency naturally began to drop.

Aurelia's officials naturally obtained this result as quickly as possible.

They really didn't expect that the one who could save them in the end wasn't Beauty, but the Eastern Giant.

No matter what, under such circumstances, not a fool would know who to ask for help.

Therefore, the officials of Aurelia rushed to Academician Tao and pleaded, "

"Tao, please continue to help us put out the fire!"

"That's right. Without your technology, our mountain fire would not have been completely extinguished."

"Please save us."

Academician Tao didn't know how to answer.

This was because the Electromagnetic Vibrobombs he brought were calculated based on the number of fires he had destroyed in Aurelia.

However, the higher-ups had sent him a message. He needed the Aurelia officials to take the initiative to contact them.

He knew that the higher-ups definitely had a motive. He did not understand this, so he could only pass on the message to these people.

Aurelia's people weren't fools. As soon as Academician Tao reminded them, they immediately contacted the Eastern Giant.

No one knew what the two sides talked about. After that, Academician Tao did his best to help Aurelia put out the fire. Svenli and the other beautiful people had already left.

Before this, Aurelia had many more industries related to the Eastern Giants, and both sides had many collaborations.

Seeing this scene, everyone guessed something.

It seemed that this time, Pretty Woman had really suffered a huge loss.

As for the structure of the competition, it was also a hot topic on the internet. The key was to vent their anger.

One had to know that if Beautiful took the initiative to cause trouble and wanted to compete with them, the final outcome would definitely be very satisfying for them.

Qin Lin did not pay any attention to this matter.

After all, he had left the electromagnetic wave bomb technology to Mr. Lu.

Moreover, he had been in seclusion for the past 20 days. He didn't even have time to explain when Zhao Moqing called him to ask why he didn't go back.

He had been supervising the research of the Falcon device's power component in Qinglin's laboratory for more than 20 days.

The Falcon flying device was something from Marvel.

As everyone knew, Marvel was a sci-fi universe, and many of the technologies in it were decades ahead of reality.

Although the Falcon flight device did not seem to have any technical content in the movie, the semi-cold nuclear fusion power alone had surpassed the real world for many years.

Therefore, this technology was not easy to come by.

Qin Lin was also afraid that something would happen. After all, it was related to nuclear research. He even wore thick protective clothing during the research.

The same was true for the researchers who were transferred to assist. Nuclear energy research was not right and not cautious.

However, their faces were filled with excitement. It was obvious that they trusted their boss very much. After all, their boss was the God of Science.

It was unknown when this title had spread, but it was recognized by everyone.

At the side, exclamations and cheers sounded one after another.

" This is incredible. This nuclear fusion ability is even stronger than the current nuclear energy. "

" Yeah, this semi-cold nuclear fusion power is too terrifying. "

"I don't know how Chairman Qin came up with this kind of research. We followed his steps and actually succeeded."

".."

Semi-cold nuclear fusion power research was very complicated. It required too much data to be recorded and experimented on.

Qin Lin did not have the time to waste, so he only wrote the experiment plan and threw it to the researchers.

These researchers followed his experimental plan strictly and easily developed the semi-cold nuclear fusion power.

This was definitely not something that modern society could have in terms of nuclear power, and it was also the foundation of the Falcon flying device.

The next step was to create a container that could carry the power of the semi-cold nuclear fusion.

The materials that Mr Lu had sent over from the Chinese Academy were also going to be used.

"Use those molds to make the supporting props." Qin Lin ordered.

All the researchers in the laboratory started to move.

A production line that had already been assembled was activated. The molds and parts were produced one by one.

After that, the relevant researchers began to install these parts to form a special container.

It could be used as the outer shell of the power battery.

Now, he was going to put the semi-cold nuclear power material into the battery and make it into a semi-cold nuclear fusion power battery.

As the researchers in Qinglin's laboratory took action, a semi-cold nuclear fusion power battery was soon produced.

"I'm not sure." Qin Lin immediately instructed, "Is the inspection strict? Is there any leakage? Is there enough earthquake resistance?"

He came down one by one to make requests.

These were the basic requirements. Otherwise, it would not be able to meet the combat requirements of the Falcon flying device.

However, the technique was complete. As long as he followed the steps, there would definitely be no problems.

Soon, the results of the test reports were also summarized to Qin Lin.

All the skills were up to standard, and there was not a single one that failed.

In other words, he could now make the entire Falcon flying device.

"Take out the other parts." Qin Lin ordered again.

Then, the researchers began to move again. They already knew what Director Qin wanted to study. If that thing could be made, it would be even more shocking than the Transformers.

After all, Transformers only had similar appearances and did not have intelligence.

However, this thing could fly. Moreover, the weapons that could be assembled inside could destroy the current stage of Transformers.

One by one, the components were carried out. They were the various components of the Falcon Hunting Flight Device.

In the process of completing the semi-cold nuclear fusion power, other components that were not technically difficult were also in progress, and they were all produced.

[Chapter 1807 That Looks Like The Falcon Flying Device!](#)

..

In Jing Lin's laboratory, Qin Lin directed the researchers to quickly assemble the Falcon flight device components.

Moreover, with Qin Lin here, these people were very active and serious. They quickly assembled the parts of the Hunter Flying Device one by one. Soon, they could see the prototype of the Falcon Flying Device.

However, the Falcon Flight Device still had many subtle components that required special attention.

These parts were not only related to the connection and safety of the various parts, but also related to the ability to perform various dangerous and difficult movements during battle.

If a part did not pass the test, it was possible that a slightly dangerous action during battle could affect the entire flying device.

That was very dangerous.

If it was like the situation in the Marvel movies, where the Falcon flew at an altitude of 10,000 meters to fight the aircraft carrier, then there would be no chance to hold a banquet in the village if it fell.

At that time, he could only replace it with a piece of clothing.

Therefore, Qin Lin was very concerned about this.

However, there was nothing he could do. After all, it was his first time making it. Even if he had a complete part design, there would still be mistakes.

Some parts still did not match. They were either 0.1 mm wider or 0.1 mm narrower.

Don't underestimate 0.1mm. With such high-precision technology, this effect was very large, so it had to be absolutely matched.

Those parts that didn't meet the standards made the researchers feel very ashamed. They all buried their heads in hard work again.

Qin Lin did not blame him.

It was inevitable for this kind of product to be produced for the first time. It was not that these researchers were lazy, or anything else. It was entirely possible that the machine was worn out during production.

After all, they weren't robots, so they couldn't keep an eye on them all the time. Moreover, they didn't have the technology to completely monitor them.

Even though there were some hiccups, the Falcon flying device was still produced.

"Chairman Qin, now that the Falcon flying device has been successfully developed, we will be conducting experiments next." A researcher immediately reported to Qin Lin.

"Okay, let's carry out the experiment." Qin Lin nodded. Before it was given to a human, the Falcon Flying Device naturally had to be tested with special equipment to test its various skills. Only after it was confirmed to be perfect could it be given to a human to try.

The testing instrument was also specially made. When the Falcon flying device was made, this testing instrument had already been made.

"Chairman Qin, all the data is normal."

"Shockproof, pressure-resistant. The mechanical structure is also completely normal. There's no problem at all."

".."

The researchers carried out more than a dozen specialized tests in a row. After all the tests were done, they immediately reported to Qin Lin.

When the test was completed, it meant that the Falcon flying device had been successfully developed and met the requirements.

"Chairman Qin, now that the Falcon flying device has been successfully developed, who will be sent to do the next human experiment?" A research director asked Qin Lin.

"Transport the flying device to Jinglin Manor. I'll test it myself." Qin Lin ordered the researcher.

"Okay, Chairman Qin!" The research director replied.

After that, Qin Lin also left Jinglin's laboratory and went to Jinglin Manor.

The person in charge of the research also arranged for the Falcon flying device to be transported into Jinglin Manor as quickly as possible.

Although he didn't quite understand why Chairman Qin wanted him to experiment with the flying device, he didn't ask further.

When working in Jinglin's laboratory, especially when assisting Chairman Qin, everyone knew one rule. If you didn't understand, don't ask, because that would make you look ignorant. Chairman Qin naturally had his reasons for doing so.

Soon, the lover received a warm welcome flight device. In fact, there were still many functions that the warm welcome flight device did not have. For example, the Falcon flight device had not been equipped with weapons. After all, their country's current 5G technology was very large and they had not asked Mr. Lu Xun for help.

The most important thing was that the Falcon flying device was one of the more famous special weapons in Marvel, and it was different from the ones he had studied before.

It was like a special toy. When he had not played with it before, he did not intend to share it with others, let alone give it to others.

It was a strange feeling, but there was nothing strange about it.

Because many people would have this feeling that the difference between people was that they cared about different things and focused on different things.

Some people liked Ultraman, some people liked One Piece, some people liked Dragon Ball, and some people liked silica gel toys, which were one-to-one adult toys.

Perhaps he liked to watch difficult movies when he was still studying. After all, Marvel movies were indeed very good at that time, unlike his current self, who was as rotten as a pile of shit and made people lose their desire to watch them.

At that time, Marvel movies, especially The Avengers, could still make people's blood boil.

So now that he suddenly obtained this technology and made this Falcon flying device, there must be a special kind of mentality at work.

In any case, he could play for a few days before asking Mr Lu for the weapon installation, or he could just throw the item to the other party and let him install the weapon system himself.

#### [Chapter 1808 That Looks Like The Falcon Flying Device!](#)

After all, it was impossible for this thing to be promoted in the real world. This was a war weapon, so he could only hand it over.

Moreover, if this thing was paired with the Batmobile, it would be a perfect match.

The road was being attacked with unstoppable force, and the sky was also being attacked without restraint. Who could stand up to this?

At least, they didn't use any strategic weapons. Anyone who encountered them would be killed or surrender.

Qin Lin originally wanted to bring the Falcon flying device into the game.

After all, the game world had been turned into reality. He could fly above the ore town without fear, just like how he had flown above the ore town in the Batmobile.

However, he suddenly thought of something, and that was the flying stone.

The flying stone he had obtained previously allowed him to fly to wherever he had been.

He had not only been to China but also to the beautiful country.

That was when he was still in university.

Naturally, with his financial ability at that time, there was no way for him to be beautiful.

It was all thanks to his old classmate Huang Xin's care.

When he was in his first year of high school, he had wanted to go to Las Vegas for the summer vacation. Then, he had to drag a few of his brothers from the dormitory and take care of everything.

Then, they went together.

In just three days, this guy lost 500,000 yuan.

She heard that after she came back, she was beaten up by her family and could not get out of bed for three days.

After that, this guy got together with his teacher and was expelled. Then, he left with his teacher in a romantic and unrestrained manner.

Now, this guy had opened a perfume company in You City. With the formula he had given him, it was also flourishing and making people envious.

On the contrary, the story of him fooling around with his teacher in school and bringing her away was also dug up. It became his love affair and was even admired by many people.

Qin Lin immediately looked at the screen in his mind and took out the flying stone to see if he could fly to Las Vegas.

What surprised him was that he could clearly see that the area of Las Vegas was lit up on the map.

In other words, he could indeed use the flying stone to get there.

It wasn't that he had to go to this place, but it was just a bad taste.

After all, this Falcon flying device was a product of their country. If they went to their country to show it off at this time, wouldn't they misunderstand and think that it was made by their country?

At that time, they might even publicize and show off, but that would only be a joke.

After all, he would never be able to go to a place like Beautiful in his life. Otherwise, he would definitely not be able to come back. Therefore, it was not bad to wander around in this way. He would treat it as a seasoning in his boring life.

Thinking of this, Qin Lin brought the Falcon flying device into the game. When he exited the game, he locked onto Las Vegas with a thought through the flying stone.

His target this time was the toilet of a casino in Las Vegas.

Due to the function of the flying stone, he disappeared on the spot with a thought. When he reappeared, he was in a toilet.

However, when he arrived here, he was stunned.

He had made a mistake in locating a cubicle in the men's washroom. Who knew that he would end up in the women's washroom?

There were two blondes who looked at him in shock.

Qin Lin also looked at the two blondes in shock. They were hugging each other, one around the other's waist, and then they were doing something very intimate.

Was this a f \* cking woman?

When the two women saw Qin Lin's sudden appearance, they were instantly shocked.

Was there such a man just now? The other party seemed to have appeared out of thin air.

Qin Lin rushed out of the toilet and appeared at the casino outside.

The entire casino was very lively. People from all over the world gathered here.

This was almost a paradise for gamblers, but it was also a paradise for rich people to seek pleasure. They could see lucky people who won money and cheered, and also unlucky people who cried and lost their souls.

Qin Lin was eager to try. After all, he had the book of 100 consecutive wins. He had already spent some time helping the football team win the game, but there was still a lot left.

If he was willing, he could provoke them and bet all his money with the casinos in Las Vegas. He felt that he could win the entire Las Vegas with the Book of Consecutive Strikes.

However, thinking about it, it was not worth it. After all, he did not lack money. When the time came, he would be exposed.

Therefore, he didn't linger in this colorful world and walked straight out of the casino.

It was still daytime in China, but it was already night in Las Vegas.

Soon, he turned into a building and walked straight to the rooftop of the building.

After finding a roof that was impossible to be built on, he entered the game with a thought.

When he arrived at the ranch, he went straight to the ranch house and put on the Falcon flying device.

In order to conceal his identity, he even added a special smart hood to the Falcon flying device.

This hood was a hint from the Batmobile, and it also used the technology of the Batmobile.

Therefore, if he used the skills he obtained from the game well, he could also integrate these skills.

After putting on the Falcon Flight Device, he logged out of the game and appeared on the rooftop again.

In the next moment, the metal wings of the flying device unfolded on his back.

The metal wings were made of a special metal material. Although it couldn't compare to the metal material of the Batmobile, it could still block bullets.

Think about what Falcon did.

With the two wings in front of him, he faced the robbers' submachine guns at close range. Then, the wings blocked all the bullets.

Then, the wings began to tremble. Then, they slowly spread their wings and began to rise into the sky.

This was the first time Qin Lin was controlling the Falcon Flight Device. However, when he received the technical information, there was also information about the control aspect. Therefore, he was able to control this thing with ease, as if he had operated it countless times.

Qin Lin flew to a certain height and immediately felt a sense of weightlessness, but at the same time, he felt a sense of flying elegantly.

He finally experienced what it felt like for humans to fly at high altitudes.

This made him look forward to the Iron Armor even more. He wondered when the goblins would be able to make the Iron Armor. Flying in the sky with that thing would definitely make him look forward to it.

Las Vegas was a city that never slept, and there were hot beauties from all over the world, which made many people want to peek.

Two young Caucasians were hiding in a tall building, using binoculars to peek at the beautiful women on the streets.

One could even see some men hugging beautiful women in the dark alleys, rooftops, or on the balcony of private houses.

This was the norm in Las Vegas.

Some gamblers who won money in Las Vegas might be approached by a hot beauty as soon as they went out. Then, they might make a deal and go somewhere.

This was normal. Those who were familiar with this place knew what was fun and what was not.

A hundred people inadvertently raised their binoculars a little higher. Suddenly, their eyes widened as they saw an incredible scene through the binoculars. "What's that? Oh my god, there's actually a person flying in the sky." "Sam, stop joking. How can someone fly in the sky?" The person beside him did not believe it at all. Instead, he aimed his binoculars at a balcony.

There was a beautiful scene there. It was so big, so beautiful.

Seeing that his companion did not believe him, the other hundred men immediately grabbed the other party's binoculars and lifted them in one direction.

At that moment, his companion exclaimed, "Oh, Dean, God, he ... Who was he? He's actually flying in the sky."

Both of them exclaimed as they saw the incredible figure through the binoculars.

A person actually had a pair of wings and was flying in the sky.

"Sam, don't you think the thing that person is wearing looks familiar?"

"Dean, you're right. It looks like the Falcon flying device from Marvel!"

### [Chapter 1809 The Impact Of A Prank! There's Really A Superhero!](#)

The two white men were shocked.

As people from the beautiful country, they were very familiar with the quality of some of the movies and animation products in their country, especially the big IP movies like Marvel. They had watched almost every movie, so they naturally recognized that it was the Falcon flying device.

They could see it clearly through the binoculars. The only difference was that the Falcon flying device had an additional hood.

This was simply unbelievable.

Was there really a superhero in reality? Was there really an Avengers Alliance?

That was indeed a falcon.

He suddenly thought of something.

That was because there was news about Batman previously.

That batman drove the batmobile and destroyed a group of armed forces.

At that time, they had also seen the news.

However, they felt that the news was fake and that the person who published it had taken them for fools.

How could there be such things in the real world?

Those were just movies adapted from other people's mangas. There were even people who were stupid enough to go to the parade and say that they wanted to see batman. Wasn't that brainless?

But now, they suddenly realized that they were the brainless ones.

If Falcon existed in this world, if the Avengers existed, then why couldn't there be Batman and the Justice League?

"Dean, we seem to have discovered something extraordinary."

" Sam, you're right. There really is a superhero in this world. He flew away. Where did he go? What is he going to do? "

Qin Lin did not know that he had been discovered.

He flew directly to a place because it was very lively there. There were many people gathered there, and there were even police cars gathering there. It was very obvious in the night.

Clearly, something big had happened there.

Qin Lin controlled the Falcon flying device to go to that place.

As soon as they arrived in the sky, they saw a group of people surrounding several masked men. They even held a hostage, so the police didn't dare to make any moves.

The main reason was that the hostage was a Caucasian girl. She was wearing branded clothes and was obviously not an ordinary citizen.

The robbers had obviously noticed the other party's fear and were rather unscrupulous. First, they took out their weapons and fired. Then, one of the leaders even threatened, " Send us a car. Don't talk nonsense, or I'll kill the hostages. "

Obviously, the leader didn't expect that he would be so unlucky to be blocked by these Fo Bo Le. Now, he could only hope that the other party would let them leave because they were worried about the hostages.

In the sky, Qin Lin saw this scene and couldn't help but sigh. As expected of the beautiful country. It really had the style of the beautiful country. No wonder those movies always started with such a plot. Wasn't it a unique culture?

In China, it was absolutely rare to encounter such a situation.

When Qin Lin saw this scene, he rushed down and decided to save them.

It wasn't that he was righteous, but that he had fun and bad taste. He also left these people a wonderful and magical night.

The robbers threatened, but someone suddenly shouted, ""What's up there?"

When the surrounding people heard this shout, they all looked up at the sky and discovered an unbelievable scene.

At that moment, everyone who raised their heads widened their eyes.

What was that? It flew down.

It seemed to be a birdman.

No. It seemed to be ... Falcon?

What kind of joke was this?

Was this true?

The robbers were confused by the people around them. They hurriedly looked up and widened their eyes. They saw a figure quickly diving down from the sky.

The leader was even more shocked because the other party was coming for him.

Before he could react, the Falcon appeared behind him. Then, he felt his arms being grabbed by a pair of hands. Without giving him any time to react, he found that his entire body flew up and smashed into the car behind him.

That kind of power shocked him. The other party had directly thrown him like a ball. How much power did this require?

One of the robbers who was close to him subconsciously pointed his weapon at Qin Lin and fired wildly.

Qin Lin also instantly used his wings to block in front of him. When the bullets hit him, they basically only sent out a series of sparks. They did not cause any damage at all. Instead, Qin Lin rushed forward and directly sent the robber flying with a punch.

The remaining bandits wanted to attack, but the Fo Bo Le didn't give them any chance.

You still had the chance to surrender in your country, and you still had human rights to talk about. But here, you had none.

In China, there were even television dramas that would have the first shot fired, but why would they continue to fire?

In Great Beauty, they would give you as much firepower as they had, until they could not give you any firepower, even if they had to turn you into a sieve.

Qin Lin felt that this was actually a good point. To be honest, if someone really committed such a crime, why should they be given a chance? What if they were given a chance to cause harm to others?

Why should he give this kind of person a chance at the expense of the safety of other innocent people?

Therefore, those who talked about human rights at this time were really stupid.

A moment later, the robbers were all taken care of. Then, everyone looked in Qin Lin's direction in shock.

The discussions around them rang out.

" He's really a falcon, just like in the movies. "

[Chapter 1810 The Impact Of A Prank! There's Really A Superhero!](#)

"How did the people in the movie come out? I only said that the scriptwriter had seen a real hunter. Are those movies based on reality?"

" I thought that the previous version of Batman was fake. Now that I've seen this, I know that perhaps that Batman is real too. "

".."

No one dared to believe that something like this would happen. Something that should not exist in reality had appeared before their eyes. It was as if their entire worldview had been shocked.

"Sir, may I ask who you are?" One of them couldn't help but ask Qin Lin.

However, Qin Lin did not want to pay attention to him at all. He glanced at him and activated the Falcon flying device again. Then, he instantly flew into the sky, getting higher and higher.

In the blink of an eye, his figure disappeared from everyone's eyes.

Qin Lin had returned to Jinglin Manor through the flying stone.

He also took off the Falcon flying device and put it in the internal workshop.

After that, he took a shower and left the inner area to stroll around Jinglin Manor.

What happened just now was very exciting for him. Now, he needed to take a break.

Time passed.

In the beautiful country of Las Vegas, it was a complete sensation. A Short videos began to spread quickly on the Internet.

These videos were naturally about Falcon appearing in Las Vegas, saving a white woman and killing a group of robbers.

The moment the video appeared, it spread across the internet of this beautiful country in almost a short period of time.

At the same time, the video of the previous batman was pulled out again.

Previously, many people had doubted the video of Batman. They even felt that it was photoshopped or man-made.

But this time, Falcon's video was real. There were so many forbos as witnesses, and there were even many onlookers at the scene.

Moreover, after the robbery incident broke out, there were many news reporters broadcasting it live.

Therefore, the Falcon incident this time could not be faked.

In other words, the video was real.

This caused the entire country to be in an uproar, and more and more people believed that the video of Batman was real.

So, did they really have a batman and a falcon?

Wouldn't there really be the Avengers Alliance and the Justice Alliance?

With such speculations, countless people even went to Marvel Studios and DC-TV to ask about it, wanting to find out.

The people from the two companies were a little confused.

How could the fake characters created by their company appear in reality one after another without any warning? It was impossible.

However, the truth had happened.

The two companies still wanted to defend themselves, but they realized that the attention their companies received was rapidly increasing. After their market value increased, their thoughts were different.

Marvel Entertainment even found an old notebook that recorded that the artist who painted the Falcon character had actually encountered a flying character similar to the Falcon when he was young.

The original version of the Falcon was not even like the ones in the movies and comics. It was modified to fit the flying character that looked like a falcon, just before the new version of the Marvel animation was released.

Oh my god.

This news was even more sensational.

The people of the beautiful country believed that Falcon was real.

Just like with the previous batman, there were people who started to protest and call for the falcon to be seen. Then, they set up a special website like the batman.

The beautiful country felt that it had risen.

Especially after Aurelia lost the fire extinguishing competition, they were furious. They felt that their country's science might not be as good as that eastern country's.

But now, they realized that their country's superhero seemed to be real. They were also the strongest in the world.

One had to know that their superheroes were all very powerful and terrifying. They were not something that modern technology could compare to.

Besides, Falcon and Batman were already here. Was Iron Man still far away?

Perhaps Iron Man would appear at any time.

And who was Iron Man? In addition to being a superhero and a millionaire, he was also a super scientist.

As long as Iron Man was around, their scientific research technology could instantly surpass the world level.

Therefore, in Beautiful China, there was a craze to find Iron Man.

Even the actor who played Iron Man in the movie had been blocked by countless people several times. He had even been stripped naked. Only after he was confirmed to be not Iron Man in extreme shame did he survive.

This had also caused him extreme trauma. He did not expect that the Iron Man he played actually existed.

After that, the people of the beautiful country also reacted.

The real Iron Man couldn't be an actor. He was a rich man and a scientist with a big technology company that sold weapons.

This caused many people to start screening. They eliminated the rich one by one, and then they really got three people who could exist.

These three tycoons were all in their prime and were good-looking. They were all playboys and bosses of technology companies. Most importantly, they were all engaged in research.

Wasn't this going against Iron Man?

The three tycoons were being followed and monitored.

Surprisingly, none of the three tycoons came out to clarify. After all, the value of the company's shares had been rising. Only a fool would come out to clarify.

Naturally, the craze of the beautiful country quickly spread throughout the world, shocking everyone in the world. They couldn't believe that such a thing really happened.

The things in the movie had appeared in reality?

Wasn't this nonsense?

However, after many inquiries, they were completely certain that this was true.

Falcon's incident could not be faked at all. The witnesses were not only from the beautiful country, but also from all over the world.

This ...

Qinglin Manor.

Qin Lin woke up early in the morning. When he walked out of the inner area and arrived at the lobby, he saw the waiters curiously watching the news in the lobby.

The news was about the beautiful country.

" A falcon appeared in the beautiful country. It's almost exactly the same as the one in the movie. He appeared and saved..."

The news was about the surprise that Qin Lin had left for the beautiful Chinese.

However, the content of the news that followed shocked him a little. The people of the beautiful country had become so fanatical because of his bad taste. More and more people began to look for Batman and Falcon.

They even started looking for Iron Man.

It could be said that the situation on Beautiful's side was a little chaotic. Many people were starting to have headaches.

Especially for the Research Strategy Department.

They knew that the batman was a fake, that it was the technology of that eastern country.

What about the Falcon now?

This falcon also belonged to the other party?

That shouldn't be possible, right? This was completely different from the batman, and it was a completely different technology from the batcar.

What if the Falcon was theirs?

After all, there was no Falcon related technology in that eastern country.

Who knows?

Qin Lin did not expect that his prank would lead to such an outcome.

"Sigh, I didn't expect Beauty Country to have such a thing. " Master Lin was only a chef, but he had watched such movies with his grandson before. He could not help but feel a little emotional.

He wasn't the only one. The netizens in the country couldn't believe it either.

They didn't know about the Batmobile, and now they all really thought that there was a bat and a falcon in the beautiful country.

"Sigh, we thought that with a scientist like Academician Qin, we could complete the great recovery. I didn't expect that there would be such an existence on Beautiful's side."

"I thought those superhero movies were fake, but now this proves that superheroes really exist? "

"Is there a possibility? Just like in the novel, our world has undergone a change. The characters in the movie began to appear, and then as the game progressed, more and more characters from the movie appeared?"

More and more people agreed with this statement, believing that it was possible.

Beijing.

Mr. Lu and the other leaders saw the news related to Falcon and were all silent. They looked at each other with an inexplicable expression on their faces. They all looked like they wanted to say something but hesitated.
