

The Game 671

[Chapter 671 318-Every County Is Anxious!](#)

you city.

United town had always been an important place for food production.

The terraced fields here were even more famous. It had been built into a terraced field Scenic Area and received many tourists every year.

There was a paddy field in Lianhe town that had long been fenced up. Some people were busy inside. There was a sign next to it that said 'Linlin's laboratory experimental field, unauthorized people are not allowed to approach'.

A car stopped not far away.

Chen Li got out of the car. He knew that Linlin's laboratory was going to try growing Xiangshui tribute rice, so he personally went to the various contracted areas of Linlin's laboratory to check.

After the terrible incident at Xiazhai village, he was really worried that something similar would happen.

Jiang Weisan, the mayor of United town, also came down with them.

Chen Xian, these are the paddy fields that Linlin's laboratory has contracted. Jiang Wei pointed at the surrounded paddy field and said, "After our town received the notice, we did our best to cooperate."

Chen Li nodded. "Cooperate well. If Linlin's laboratory's experiment here is successful, you'll benefit from it in the future."

Jiang Weisan naturally understood. Chen Xian didn't need to remind him about this. After all, in addition to the cultivated land stipulated by the state, Linlin watermelons could also be grown on other lands in their town.

It was their turn next.

Everyone knew how profitable it was to grow Linlin watermelons.

However, he still had to pay close attention to it. After all, the bad news of Xiazhai village had long spread throughout the county, and Linlin's laboratory had blacklisted it.

Right now, the people of Xiazhai village were filled with regret. It was said that many people of Xiazhai village were using their connections to move to other villages.

This was possible in the past. After all, the relocation of households in the countryside was very serious.

But it was completely different now. The household register was linked to the land!

Now everyone knew how valuable the land in You City Town was. A family with 10 mu of land could earn a salary that they couldn't even earn in a year working in an international metropolis like Xia City.

Therefore, many people who had originally moved out of the countryside wanted to move their accounts back.

Unfortunately, it was very difficult to move back now.

In other counties, it was the county residence that made people envious, but in your city, it was the village residence that made people envious. It was the complete opposite.

Jiang Weisan had already learned from Chen Xian what Linlin's laboratory was going to test.

If the planting was successful, they would be able to grow watermelons and rice in Lianhe town. Their rural residence would probably be the envy of many people in big cities.

When Chen Li saw that there was nothing going on in Union town, he immediately got into the car and asked the driver to head to the next location.

...

Linlin Manor.

A desolate land was also bustling with activity.

During this time, Yu Shui and the planting department's staff went all out, opening up some paddy fields and fertilizing them.

Out of the 5000 mu of land that Linlin villa had contracted, 1500 mu was used to build ranches, plant watermelons, and grow beautiful cucumbers, and 3500 mu was still empty.

Other places still needed to be tested, but Linlin Manor didn't. The Xiangshui tribute rice seeds in the game had mutated and adapted to the environment of the manor.

Even the surrounding areas of Linlin villa were almost the same.

Qin Lin planned to contract more land outside to grow Xiangshui tribute rice.

As for the land that he had contracted previously, he still had to reserve some.

After all, there were so many seeds planted in the experimental field of the laboratory, and some of them might have undergone genetic mutation.

By then, the land could be used to grow these crops and turn into a plantation.

Moreover, the crops in this plantation could not be found outside, so it was not a bad idea to let the tourists pick up the ingredients and cook by themselves.

In the paddy field that had been fertilized, Li Kai was already busy with Yu Shui and the others. They were naturally sowing and growing young.

Li Kai was personally in charge of the artificial fields in the villa. He would personally carry out the breeding and then record it. As long as the seedlings in these fields were successful, they could be planted on a large scale.

Qin Yu felt that he could skip this test, because he knew that it would definitely work around the villa, but he could not say it out loud. According to the normal procedures, Li Kai's method was not wrong.

After the seeds of the Xiangshui tribute rice were planted, Li Kai would go there every day to observe and record.

Professor Ren and academician Li went there every day.

The two of them were also very concerned about the Xiangshui tribute rice.

In just a few days, the Xiangshui tribute rice seeds planted in the villa had all sprouted, and as expected, there was no situation where they could not germinate.

When Li Kai saw this, he immediately went to Qin Lin and told him the news excitedly.

The others were equally excited.

In the Deputy County Office of the first Bureau of Ning City, Liang Cheng had been reading some information about Xiangshui tribute rice these days.

All the counties had found out about Linlin's laboratory contracting land for experimental planting, and they had also found out that Linlin's laboratory was testing Xiangshui tribute rice.

The city of Liang had been reading this information every day, and the more he read, the more he knew how amazing the Xiangshui tribute rice was.

As the only person who had poached Linlin's leisure tea from your city, he was naturally also thinking about the water tribute rice.

Your city's growing of Linlin watermelons was enviable. If they could grow Xiangshui tribute rice, it would be more impressive than growing Linlin watermelons.

However, after reading the information, he knew that Xiangshui tribute rice could not be grown as and when he wanted to.

This rice was too harsh on the environment.

In many places, even if they were planted, they wouldn't sprout. Therefore, the research team led by elder Yuan had failed.

Now, even if Linlin's laboratory had improved and grown them in your city, the restrictions should be huge. Otherwise, Linlin's laboratory wouldn't need to contract land in various counties to test planting.

[Chapter 672 318-Every County Is Anxious!](#)

The seeds in Xiangshui could not be planted outside the county.

Whether or not they could plant it in Peace City would depend on whether the heavens would give them the opportunity.

As Liang Cheng was thinking, the phone on the table rang.

He picked up the phone and stood up subconsciously when he heard the news. "really? Linlin's laboratory's experimental plots have sprouted?"

After hanging up the phone, Liang Cheng hurried out of the house. Soon, he arrived at the experimental paddy field contracted by Linlin's laboratory in a village.

When he saw the tender shoots emerging from the paddy field, his face also revealed a happy expression.

The Xiangshui tribute rice could actually sprout in their ning city.

There seemed to be a chance.

Now, it all depended on the condition of the rice after the seedlings grew. If it was as the information said, sour, bitter, and without any nutritional value, then it would be useless.

However, since it could already germinate, anything was possible before it bore fruit.

You city.

In Lian he town.

Once again, Chen Li and Jiang weisan arrived at the experimental plot of Linlin's laboratory. They also saw that the plants in the paddy field had sprouted.

Chen Xian, " Jiang weisan said excitedly, " the environment in you city is not very different. The Xiangshui tribute rice can sprout here, which means it can be grown in our Lian he town.

"En!" Chen Li also nodded with an excited expression.

He had almost gone to all the experimental paddy fields in you city that Linlin's laboratory had in you city. Almost all the experimental fields could germinate.

According to Jiang weisan, the Xiangshui tribute rice could be grown in you city. Even if the quality was a little bad, it shouldn't be too far off, right?

chen li immediately returned to you city and told the good news to sun xian.

When sun Xian heard the report, his face was full of joy. this is indeed good news. Go and calculate the cultivated land of all the villages in the county first. We also have to make some preparations. By the way, let's forget about the farming in Xiazhai village, so as not to cause dissatisfaction in Linlin's laboratory!

"En!" Chen Li understood.

Most of the free land in you city had been used to grow Linlin watermelons. However, the country's regulations forbade people from growing other crops on the land, even if many people stopped farming and would rather go out to work.

This rule was sometimes quite strict, so some elderly people didn't have the strength to farm and used the stipulated cultivated land to grow peanuts. They were fined 10000 Yuan.

The reason was that cultivated land could not be used to grow cash crops without proper procedures.

So, it's fine for you to keep the grass, but you can't plant anything else.

however, if all the counties could grow xiangshui tribute rice, then all the cultivated land in you city could be used. according to boss qin's 1500 catties per mu yield, the total amount of xiangshui tribute rice that could be planted in the entire county every year would be close to one billion catties.

The key was that this was Xiangshui tribute rice!

By then, there would definitely be countless farmers who went out to work and returned to farm.

The population and economy would increase greatly.

At that time, he could grow Linlin watermelons and Xiangshui gongmi at the same time. When he found a girlfriend in you city, he would have a rural residence and land.

...

Linlin Manor.

Li Kai, professor Ren, and academician li went to Linlin's office together.

The three of them were obviously happy.

"Brother li, professor Ren, and academician li," Qin Lin said with a smile, "it seems that you have some good news for me."

Li Kai immediately took out a document and handed it to Qin Lin. Brother Qin, take a look for yourself. This is the result of the Xiangshui tribute rice test in each county of Ming city.

qin lin immediately took the documents. this was what he wanted to know the most.

After reading the information, his face also showed joy.

The Xiangshui tribute rice seeds planted in the experimental plots contracted by Linlin's laboratory in various counties had already sprouted.

This was definitely good news. Even if the Xiangshui tribute rice grown in Ming city's counties was not as good as in you city, the quality would deteriorate, and there was a high possibility that it would produce ordinary Xiangshui tribute rice.

Academician li couldn't help but say, " boss Qin, the seeds in all the counties can germinate. This alone is better than the seeds in Xiangshui. After all, once the seeds are out of the county, they may not be able to germinate in the nearby counties.

" if the xiangshui tribute rice can be grown in all the counties in ming city, that would be amazing. the key is that we haven't tried it in other areas of min province. maybe it can work too. "

Li Kai also said, " I didn't think that the whole of Ming city could germinate. I thought it would be as harsh as Xiangshui. It wouldn't work outside of Youcheng County. Now, President Shen has left Ming city to contract new experimental paddy fields.

Qin Lin nodded.

It was already impressive enough that the entire Ming city could produce Xiangshui tribute rice. If there were other places in min province that could produce Xiangshui tribute rice, it would be amazing.

How much Xiangshui tribute rice could he grow?

Qin Lin was sure that the production rate could not be estimated.

Naturally, with more production, the price of Xiangshui tribute rice would drop greatly. The tribute rice that ordinary people couldn't eat in the past could now be tasted often.

The Xiangshui tribute rice was rich in nutrients and anti-aging substances, which were of great significance.

However, it would definitely have a destructive impact on Xiangshui, and he didn't know if it was a good thing or a bad thing.

However, Qin Lin didn't care about this, because it didn't affect him. In the future, if Xiangshui tribute rice was great, then it could be divided into three levels. normal, quality 1, quality 2.

Ordinary Xiangshui tribute rice would be sold at the People's price.

A Grade 1 one would still be sold at the original price of 500-1000 Yuan per 500 grams.

[Chapter 673 318-Every County Is Anxious!](#)

as for the quality 2 one, it was the best, and he still had to decide if he wanted to eat it.

Of course, that was what he had expected. The final outcome would depend on the planting situation of the Xiangshui tribute rice in Ming city and the situation in other areas of Min province.

...

Time passed.

Night soon fell.

Today, Qin Lin, Zhao Moyu, and Lin Fen didn't leave Linlin Manor, because the interior of the manor had finally been decorated and could be moved in.

Tonight would be the first night of living in the manor.

Qin Lin went to Zhao moyin's office before he got off work. When the two of them left the Linlin villa office area, Lin Fen was already waiting with wangcai.

Red hair was on wangcai's head.

In the beginning, Wang Cai didn't let the red hair on his body and the two sides even fought over it. The conflict lasted for a long time, and in the end, the dog obviously compromised.

Next to wangcai was snowy the white fox. She was wearing a toot Princess dress, which Lin Lanzi had asked the multimedia department staff to dress her up.

After such a long time, snowy was already familiar with the office. Even if she was timid, she was not afraid of the employees.

When Snowy saw Qin Lin and Zhao Mochen coming out, she pounced on Qin Lin and climbed up his legs, falling into his arms. She looked at him with her big eyes for a while, then rested her head on his arm comfortably.

"Let's go. We'll stay at our new home tonight." Qin Lin said with a smile and took Zhao Moxi, Lin Fen, and the others to the manor.

The manor had two entrances.

One was the entrance to the main hall, and the other was on the other side. There was a small courtyard that was specially circled out, surrounded by a fence and some quality 2 green Willow trees. It was very artistic.

This entrance was specifically for entering the inner region.

Zhao Mochen stepped forward and entered the password on the door. The next moment, the door opened.

Only the three of them knew the password to this door. In the future, even if they asked the waiter to clean it up, they would have to agree to enter.

Behind the door was an elevator that led directly to the second floor.

After the elevator entered the second floor, it opened. A very wide hall came into view. It was about twice the size of the first-pin house in your city.

There were all kinds of furniture in the hall. There were casual items such as hanging chairs, tea tables, autumn rings, basketballs, and naturally, there was also a special pet room.

Qin Lin brought Snowy, Wang Cai and Red Hair into the pet room and said, "From now on, this will be your bedroom."

The three pets were all very intelligent. They obviously understood the meaning of the bedroom. They immediately barked and ran into the pet room.

The pet room wasn't small, and it was fully equipped with all kinds of pet facilities.

As for the rooms upstairs.

After Lin Fen went upstairs, Qin Lin came to Zhao Mochen's side and said with an evil face, let's go to the bedroom too. It's our first experience tonight!

His words made Zhao Moxi blush and he rolled his eyes at him. This guy was a bit of a b * stard. This time, he did something indecent in the bedroom.

Qin Lin couldn't wait to pull Zhao Moxi upstairs into the bedroom.

Their bedroom was equally big, but there was some strange-looking furniture in the bedroom. The surface of the furniture was not small, and it seemed to have some special function.

In the middle was a large bed, which was wide enough to roll around a few times.

When Zhao moyin saw this, her pretty face turned even redder. Her husband was getting more and more overboard.

After the door was closed, Qin Lin pressed a switch. The normal lights dimmed, and a moment later, a special atmosphere light was turned on.

The atmosphere light had a pink aura, which could obviously increase the ambiguous atmosphere and make men and women have the urge to have sex.

"I'll go take a shower first." Zhao mochen's face was full of shyness as he rushed into the bathroom.

Qin Lin didn't have time to catch up, so the door closed.

actually, the bathroom was also very big. it had a bathtub, a dressing table, a sink, and other facilities. he could try out all the teaching skills of the teachers.

Seeing the door close, Qin Lin had no choice but to lie down on the bed. Then, he looked at the light screen in his mind. He simply controlled his game character to stroll around and try his luck. Maybe there would be a plot task triggered.

Moreover, Qin Lin's luck was really good tonight. When he controlled the game character to appear in front of the TV, there was actually a TV show.

It was even a shopping show on TV.

moreover, there was a familiar person on tv. wasn't that jean who was getting married last time? The perfume that had been used to liven up the atmosphere last time was developed by this Qin to please her fiancé.

Now that she had appeared again, could it be that she was auctioning off that kind of aphrodisiac perfume?

Previously, when Zhao mochen had used that perfume, he would be more excited and energetic every time.

It was just that there was too little perfume, and Zhao moyin had already used it up.

Did the system know that it was his first time staying here tonight, so it wanted to add something to liven things up?

[Hello everyone, I'm Jean. I'm already married to my fiancé. I've developed a perfume that has done a great job for my husband and me, so I'm sharing the secret recipe of this perfume with all of you. If you buy the secret recipe, not only will you get the secret recipe, but you'll also get a sample!]

Qin Lin's eyes lit up when he saw the conversation on the TV.

This was really to liven things up for him.

Moreover, it was only perfume last time. This time, it was the secret recipe?

[I CAN ENTER THE GAME](#)

[Chapter 674 The Perfume's Attributes Have Been Improved!](#)

Qin Lin clicked to buy the secret recipe for sale, and a message immediately appeared in the game, "delivery ready, please pay attention to receiving."

Then, Jean's figure also disappeared from the television.

The TV program changed to a weather forecast.

When Zhao moyin came out of the bathroom with a towel wrapped around him, Qin Lin wanted to go forward evilly, but Zhao moyin said in disdain, "You go and take a bath first."

Qin Lin had no choice but to go into the bathroom and wash up. Just as he was about to wrap himself in a bath towel and go out to find Zhao moyin to do something, the game in his mind prompted again.

It was a delivery for television shopping.

qin lin immediately locked the bathroom door and entered the game with a thought. he saw the delivery.

The package was still the same yellow paper, but it was a little bigger. When he opened it, there was a small box labeled 'formula'.

There were also two bottles of perfume wrapped in foam in the package.

he picked up the recipe box and opened it. inside was a piece of paper with the recipe's ingredients written on it:

[Qin's special perfume formula: quality 1]

[this is a special perfume formula. It's an improved perfume developed by the beautician Jean to please her fiancé. She can seduce and please her fiancé.]

[do you want to use the perfume formula?]

Qin Lin decisively chose to use it. In an instant, a stream of information quickly imprinted itself into Qin Lin's mind, allowing him to fully obtain the detailed information about the production of this perfume.

After that, he picked up the two bottles of perfume in the box.

[Qin's special perfume: quality 1]

[this is the second version of the perfume improved by the beautician Jean to please her fiancé. After spraying it, it has a special effect: Alluring fragrance +1, charm men +1, make men happy +1, make men * impulsive +1, make men **+1!]

The remark made Qin Lin a little dumbfounded.

This was a little different from the last time.

If the last time was just a euphemistic way to liven things up, this time, it was a bit more blatant.

Whether it was seducing a man +1, making a man happy +1, making a man impulsive +1! Making a man's ***+1, wasn't this the same effect as a special drug?

He felt a little embarrassed.

However, this meant that the perfume could only be used at home. No woman would use it outside.

Of course, this was with the exception of certain types of secretaries and women with special professions who were in need of sex.

Qin Lin also noticed the word "improved" in the note.

he could only say that this gundam was f * cking awesome. it could even improve the attributes of the previous perfume.

If this woman was more proactive, he would be a man who couldn't be controlled.

Therefore, a man must protect himself well when he met this kind of woman.

Qin Lin was eager to try and see the effect.

he directly logged out of the game with the two bottles of perfume, then opened the bathroom door and walked out, handing the two bottles of perfume to zhao moyin. " "Honey, here's a gift for you."

Zhao moyin saw the two bottles of perfume and glared at Qin Lin.

She didn't even need to think to know that the perfume must have some strange effects.

However, she still took the perfume, put down one of the bottles, opened the other bottle, and sprayed it on her.

The smell was very good.

But when Qin Lin got close to her, he felt a special perfume entering his nose, and then he had an impulse to **.

He hurriedly pulled Zhao Mo to a piece of furniture.

This house was a little special, which made Zhao Mo feel embarrassed.

The family has a stage, if one kneeled and whined

...

the next day.

Qin Lin went to you city to buy some materials.

last night, with that perfume to liven things up, it was really fun to have indescribable sex with zhao mo.

The key was that if he obtained this secret recipe, he would be able to make this perfume himself.

He had to quickly make some remarks on this thing so that it would not be out of stock.

To be honest, Qin Lin felt that Jean was trying to suck up to the dog girl. Otherwise, why would she specially prepare this kind of perfume to please men?

Making perfume required special tools, such as refined water, beakers for measuring, glass rods, a boiler, an empty perfume bottle or a spray.

In addition, Jean's perfume also required a lot of materials.

Some things were hard to buy in your city, and they had to go to several places to buy them.

It took Qin Lin some time to buy all these things and then he brought them back to the manor.

Back at the manor, Qin Lin brought his things and entered the inner area.

He had set up a special workshop in the inner area just so that he could test out the production of such an in-game item.

The process of making perfume consisted of preparation, mixing, aging, freezing, filtering, and other steps.

The most difficult steps were the mixing and aging steps.

With different ingredients, different ratios of mixture, and different aging times, once there was a mistake, the entire perfume would have a completely different smell.

Moreover, different master perfumed perfumes would be different.

With the same formula, a perfume made by an ordinary person naturally could not be compared with a perfume master.

Because of the system, Qin Lin had not only obtained information but also muscle memory. At least, he was a master of the perfume that was used to make Jean.

Therefore, after cleaning the tools and arranging the materials, Qin Lin skillfully made the perfume.

It took a long time to make a perfume, especially the aging step. For Jean's perfume, it took three weeks to complete the production.

However, it didn't matter. With the game system, he could finish the perfume in less than half a day.

[Chapter 675 The Perfume's Attributes Have Been Improved! The Academician's Fixed Point Of Recuperation! 2](#)

Half a day later.

A container filled with perfume was placed in front of him. The fragrance was indistinguishable from the perfume made by Jean.

After bringing it into the game, he also saw the remarks of the perfume.

The remarks were exactly the same as the two bottles given by Jean.

Qin Lin also smiled.

This way, Zhao Moyu would not be afraid of running out of stock.

Moreover, if this perfume was mass produced, it should be popular with the majority of women, right?

Many women would become women after marriage, and their husbands would have less interest in them. With this thing, they could be brides every night.

But this was just a thought.

The effect of this thing was a little too embarrassing. It was especially effective on men. If someone were to take it seriously, they would think that it was a product that aided one's sexual desire. It was a low-class product.

This was somewhat inconsistent with the high-end route of Linlin's company.

Once this was promoted, it might get a title like 'women's friend'.

he didn't want to carry such a glorious title.

Looking at the perfume he had made, he thought of Huang Xin.

After all, the other party had invested 100 million to open a perfume company. The key was that the perfume they developed was very ordinary, and it was very likely that they would suffer a crushing defeat after being listed.

And the perfume he made was many times better.

however, thinking about Huang Xin's confidence in his own perfume, he was afraid that if he suddenly took out a perfume and said it was better than the other party's, the other party might not accept it.

After all, he was a rich second generation who could practice with 100 million Yuan, so he would have some pride.

Therefore, he had to find an opportunity to talk to Huang Xin again. Otherwise, he would keep it for his own private use.

in the following period of time.

Linlin's laboratory had gone to Ming city and started contracting paddy fields for trial planting.

With the Linlin laboratory's current reputation in Min province, no matter which city or county it went to, the local people would pay great attention to it.

as such, the results of the tests in other parts of Min province came out very quickly.

The Xiangshui tribute rice grown in other cities was obviously different from the experimental ones in Ming city. It was not only that the germination time was slower in some places.

Even some cities that were really far away from your city had signs of crops not being able to germinate.

Qin Lin knew the reason.

Li Kai, professor Ren, and academician Li also knew.

Even if the game was a product and the chance of it adapting to the environment was limited, the conditions for it to adapt to the environment were still harsh. If it exceeded a certain range, it would obviously be impossible to grow it.

However, at the moment, they had more seeds than Xiangshui. At least, they could germinate in most places in Min province.

If they could be planted successfully, even if the quality was only ordinary, the yield would still be very high.

Moreover, Shen Li immediately sent people to apply for more paddy fields to be contracted for those places that could sprout normally. They started to plant a batch of seeds in batches. Then, when they were ripe and harvested, the results could be finally determined.

The county's person-in-charge was naturally very happy that Linlin's laboratory had applied to contract a large number of paddy fields.

Although he didn't know if he could grow Xiangshui tribute rice in this place, at least they had passed the first step of the experiment.

As for Linlin Manor, they had already started to plant them in batches, because they were sure to grow Xiangshui tribute rice here.

Therefore, Li Kai also got busy, because Xiangshui gongmi had temporarily put aside his research on low-temperature experiments.

Professor Ren and academician Li, on the other hand, followed Li Kai almost every day out of their concern for Xiangshui gongmi. It was as if they had become free workers at Linlin laboratory.

In the blink of an eye, it was already November, and the weather in the south began to cool down again.

Linlin Manor's main hall.

Qin Lin leaned back on the sofa leisurely.

he was holding a slightly old Chinese medicine book in his hand.

He had bought this Chinese medicine book at a high price.

Chinese medicine was difficult to learn, even more so by self-study. However, Qin Lin thought that he had a thorough understanding of the herbs in the previous formulas.

It could be said that there was no one in the world more familiar with these medicinal herbs than him.

Therefore, when he looked at this kind of Chinese medicine, he could understand the knowledge related to these medicinal herbs with one look. It was very easy for him to self-study.

It wasn't that he was bored and wanted to self-study Chinese medicine, but he had to hide it.

After all, he didn't have Li Kai's true talent.

Now, whether it was the Chinese medicine formulas or herbal cuisines, they were all related to Chinese medicine. Minister Lu felt that he had a deep understanding of Chinese medicine.

Therefore, he had no choice but to self-study. At the very least, he had to dabble in some knowledge so that he would have the ability to fool others in the future when he had such medicinal herbs.

Of course, he purposely came to the lobby to show his face to people like academician Li and professor Ren. He wanted them to misunderstand that he was really researching Chinese medicine.

As long as these people thought so and endorsed it, no one would doubt it.

A moment later.

Academician Li and professor Ren came down from upstairs.

When they saw Qin Lin, the two of them were surprised.

"Boss Qin, are you studying Chinese medicine again?" professor Ren greeted him.

Academician Li also smiled and said, "This is also what I admire about boss Qin. He has such great achievements at such a young age. He can still calm down and study Chinese medicine books. No wonder he can make such good herbal dishes.

Duanmu Ruiyang, who was standing behind Academician Li, looked at boss Qin with admiration.

[Chapter 676 The Perfume's Attributes Have Been Improved! The Academician's Fixed Point Of Recuperation!](#)

He was a practitioner of Western medicine and knew the effects of Traditional Chinese Medicine cuisines. He had also tried to read some Traditional Chinese Medicine books, but it was difficult for him to calm down.

Chinese medicine was too bitter and difficult to understand. It gave him a headache without anyone to explain.

Perhaps it was just like what Academician Li and professor Ren said, there was a reason for boss Qin to have such achievements at his age.

To be honest, there was no other person of the same age in the country who could do what boss Qin did.

If it was anyone else with such achievements, they would have been standing on the stage of glory and enjoying the glory of a successful person.

However, the truth was that boss Qin had always kept a low profile.

Other than the internet celebrity identity of the horse tamer, little Qin, no one else knew that he was the boss of Linlin company.

The only confirmed fact was that the owner of Linlin villa was a middle-aged man close to 50 years old, and the photos were all over the internet.

He didn't know if this news was deliberately made by boss Qin in order to keep a low profile.

Qin Lin also smiled and greeted Academician Li and professor Ren.

He smiled when he heard the two of them and greeted them.

By meeting them every day, Academician Li and professor Ren's understanding of each other would be deeply rooted.

At that moment, Tang Xiuwan and Lin Ran walked out.

Tang Xiuwan said to Academician Li and professor Ren, "You two, you can go for the examination now."

Academician li and professor Ren nodded and followed Tang xiuwan and Lin ran to the recovery room.

Previously, because they didn't have the relevant equipment, they had to ask academician li to go to you City Hospital for a check-up. However, the manor was used to welcoming high-end guests, so they couldn't keep sending them to you City Hospital for check-ups.

the manor must have its own equipment, and the manor application process also allowed the purchase of medical equipment.

These days, the manor had purchased all the relevant medical equipment.

Furthermore, he had spent a large sum of money.

Tang xiuwan and Lin ran had already done a test on all the staff in the manor and confirmed that they could be used. That was why they helped academician li and professor Ren with the test.

The two of them were the first users of this batch of equipment.

Tang xiuwan and Lin ran were the only two doctors in the treatment room, but there were a few more nurses.

after tang xiuwan led academician li and professor ren into the recovery room, she asked lin ran to take professor ren to the examination room while she examined academician li.

One was healthy, while the other had stomach cancer, so the test results were naturally different.

There was no way to get the data immediately.

However, professor Ren's results were relatively fast. The results were out by the second day. However, when professor Ren's results were out, Tang xiuwan, Lin ran, and Duanmu ruiyang Dou were all a little surprised.

Because professor Ren's experience data was like that of a strong man in his Prime. He didn't look like someone his age at all.

This was clearly the result of long-term use of Medicinal Food. The medicinal Food's health, strength, blood, Qi, and immune system attributes were taking effect.

When academician Li's test report came out, it was even more surprising. This time, academician Li's recovery was even better than before.

This time, the stomach cancer had shrunk even more. It was as if the stomach cancer had improved to a certain extent, and the treatment effect was faster and better.

Moreover, his physical condition was also very good. He did not look like an 80-year-old man with stomach cancer at all.

Duanmu ruiyang directly sent their medical reports to Minister Lu.

When Minister Lu saw academician li and professor Ren's medical reports, he was naturally very surprised, especially when he saw that academician Li's stomach cancer was improving faster. He asked

someone to send some yellow croaker fish and old turtles to Linlin Manor that they had purchased recently.

This thing was really effective after boss Qin made it into a medicinal cuisine.

Then, Minister Lu took out an application document and put in the physical examination reports of academician Li and professor Ren.

Every year, the Chinese Academy of Sciences had a designated place for recuperation. Every academician who made a contribution could be arranged to go to a designated place for recuperation.

He was planning to apply for Linlin Manor to be one of the designated nursing homes. The recovery effects of Linlin Manor had been proven to be much better than other designated nursing homes.

However, there was a reason why those nursing homes could become fixed locations. He had no other way to change them, so he could only apply for one more.

Moreover, if there were only two regular quotas, it would not be a problem. Those guys would not offend him for these two quotas.

Minister Lu sent out the application document and it was approved the next day.

This speed was naturally abnormal. Under normal circumstances, it would take a long time to send people to investigate and investigate.

One of the reasons why Linlin Manor was able to recover so quickly was because of the good recovery effects. The test reports from academician Li and professor Ren had already proven this.

Of course, the most important thing was the help boss Qin had given him in the body-increasing medicinal liquid and the medicinal liquid for treating intestinal cancer. The leader would remember it in his heart.

therefore, there was no need for some procedures and it was directly approved.

What Minister Lu didn't expect was that his application for Linlin Manor to be a fixed recuperation place was approved.

Two academicians came looking for him.

The two academicians would also be sent out for recuperation this year.

As soon as the two of them entered, one of them said, " Minister Lu, when is the next time Linlin Manor has a sanatorium quota? can you arrange my sanatorium quota this year? "

Another academician nodded and said,"yeah, there's also mine." &Nbsp;

" ? ? ?"Minister Lu was puzzled. How did you know that I applied for a fixed treatment at Linlin Manor?

The two academicians were stunned. How would they know about this?

They were good friends with academician Li, and they knew how academician Li was recovering at Linlin Manor. Academician Li often shared videos with them.

They knew about all the medicinal cuisines, fine wine, good tea, good environment, good fish therapy, good fruits and Kasaya, and so on.

Academician Li's description made them look forward to it.

Also, they knew what kind of person academician Li was. If it wasn't for the fact that Linlin Manor was really good, academician Li definitely wouldn't brag about it like this.

Therefore, they naturally wanted to go and take a look.

So, he came to ask Minister Lu about the next quota.

[Chapter 677 320-Do Something Meaningful! An Extremely Awesome Emperor's Medicinal Cuisine!](#)

Time flew by.

Li Kai's research on the Xiangshui tribute rice seedlings had also reached a stage, because he had a happy event coming.

Tang Xiuwan was pregnant.

So, he brought Tang Xiuwan to Qin Lin and asked for leave.

Since Tang Xiuwan was pregnant, he had to bring her home to meet his parents and tell them the good news.

After all, his parents were old and had been very worried about his marriage.

Brother Qin, we'll just be going back to Ming city for a few days. It won't affect anything. The smile on Li Kai's face could not be concealed.

Having a child with the person you like should be the happiest thing in the world.

"Boss, Lin Ran's medical skills are pretty good. He's been fine for a few days." Tang Xiuwan was embarrassed.

If it was before, she wouldn't be in such a mood when her daughter had contracted the Sima disease.

But now, it was different.

His daughter had already been injected with the second dose of the medicine.

This medicine was specially sent over by the Chinese Academy of Chemistry to thank senior brother Li. It was very effective.

Therefore, she cherished senior brother Li's child even more now.

Qin Lin laughed when he heard their conversation. Of course, he had to ask Tang Xiuwan to take leave. He even personally sent them out of the manor and sent a driver to send them back to Ming city.

Finally, old brother Li made a move.

To be honest, ever since old brother Li got together with Dr. Tang, he had been drinking the Linlin medicinal wine a lot. In fact, he had been drinking more than Chen Shengfei and the others.

Chen shengfei and the other two had made their wives pregnant.

if this old brother li didn't move, he would have suspected that there was something wrong with his body.

After sending the two off, Qin Lin was surprised to see a domestic car from Ming city driving towards the manor.

The car stopped.

a person who surprised him got out of the car.

It turned out to be Minister Lu, with two people with him.

"Boss Qin, we meet again." Minister Lu didn't expect to see Qin Lin as soon as he got out of the car. He immediately greeted him with a smile.

"Minister Lu, welcome!" Qin Lin also welcomed Minister Lu into the manor with a smile.

Moreover, he knew that Minister Lu's sudden visit must be for something.

As soon as Minister Lu entered the manor, he stopped, took a deep breath, and said, "Boss Qin, the air quality of your Manor is really amazing. I really hope that professor Li Kai's research will produce results soon."

Qin Lin wasn't surprised that Minister Lu knew about the purification grass. After all, academician li, professor Ren, and the doctor from the Chinese Academy of Sciences, Duanmu ruiyang, were here.

Duanmu ruiyang would report academician li and the manor to Minister Lu without thinking.

After all, academician li was staying in the manor to recuperate, so Minister Lu couldn't just ignore him.

Minister Lu asked again,"by the way, where's professor Li Kai?" I want to know more about the air purification from him."

Naturally, after he heard Duanmu ruiyang's explanation, he knew the significance of this powder mix grass that could purify the air.

He just didn't know what professor Li Kai's research results would be.

director Lu, " Qin Lin explained, " that's really unfortunate. Dr. Tang is pregnant. He took Dr. Tang's leave and went home.

" that's a pity. we won't be able to see him this time. " Minister Lu shook his head and followed Qin Lin to his office.

qin lin took out a grade 2 wild tieguanyin and made a pot of tea to entertain minister lu and the other two people.

After drinking a cup of tea, Minister Lu sighed, " boss Qin, everything here is really good, even the tea. No wonder the academicians are asking me to come to your place next time.

After tasting the cup of tea, the two retainers also found that the mellow fragrance and taste of the tea were simply too perfect. There was also a lingering fragrance after a sip.

Although they were not good at making tea, they knew that this tea was definitely good.

Minister Lu also took out a document and handed it to Qin Lin, saying, "Boss Qin, take a look at this document."

Qin Lin took the document and was surprised to see the contents. "Fixed time for recuperation?"

It was a document from the Chinese Academy of Sciences.

In other words, two academicians who had made great contributions to scientific research would be sent to the Chinese Academy of Sciences for regular treatment.

"Academician Li's recovery effect is too good," Minister Lu explained. "So, for the health of the older generation, I have to ask Boss Qin for help."

The Linlin Manor's application for a fixed point treatment had been approved, but the specific effect still needed to be signed by Boss Qin.

After all, Boss Qin obviously didn't receive many people, which was equivalent to giving the Chinese Academy of Sciences two spots.

Qin Lin naturally wouldn't refuse this and immediately said, "Minister Lu, this isn't a problem. I should be the one thanking the Chinese Academy of Sciences for their trust."

To be honest, his Manor was a high-end one, and he didn't have any intention of making money. Those academicians were definitely high-end guests.

Moreover, this was actually a kind of official certification.

No matter how big a sanatorium was, as long as it was in China, it would not refuse a fixed treatment place like the Chinese Academy of Sciences.

Qin Lin was the same. To be honest, he was more willing to receive an old man like Academician Li than those rich people.

However, the recuperate at a fixed place was not something that could be done just by talking about it. After that, he had to sign a special contract.

Boss Qin, "Minister Lu said, "I'm here to ask for your help in addition to the scheduled recuperate."

[Chapter 678 320-Do Something Meaningful! An Extremely Awesome Imperial Medicinal Cuisine](#)

"Minister Lu, is there anything I can help you with?" Qin Lin asked, puzzled.

Minister Lu explained, "It wasn't because of the formula of the body-strengthening liquid. The leader and I suggested to pay more attention to Chinese medicine. The suggestion was passed. So, now the higher-ups are also researching a new strategy for Chinese Medicine Research. At least, we can't let Western medicine control the research."

in addition, I've also found some old Chinese medicine practitioners with superb medical skills to enter the Chinese Academy of Sciences and set up a Chinese Medicine Research Department for the time being. There's also an old Chinese medicine practitioner who is from a very famous family of Chinese medicine inheritance. He didn't want to come out at first, but his family has changed their business to medicinal cuisine.

I've convinced the other party with my sincerity. During this period, the higher-ups have found some Chinese medicine secret recipes and have proven their effectiveness. They're currently in clinical trials. The effects of similar drugs can save a lot of money compared to Western research.

"That's: good thing!" Qin Lin was happy for the Chinese doctor:

Recently, he had been studying Chinese medicine. With the information he had on the medicinal herbs, he realized that Chinese medicine was very useful.

However, with the development of society, due to various reasons, Chinese medicine no longer had any ground to survive. Letting Western medicine take control of Chinese Medicine's research was actually putting shackles on the Chinese medicine doctors 'throats.

Previously, he had seen a news article about an old Yao Doctor Who had been treating illnesses for more than 60 years. Even when there were not many Western doctors in this country, he had already saved countless people (true story).

However, with the development of Western medicine and the implementation of a certification system, those who practiced medicine without a license had to be shut down and fined.

This old Yao doctor's medical skills were recognized by the local people. Many people even said that if the hospital needed to treat thousands of illnesses, he could cure them with a few hundred Yuan from drinking Chinese medicine.

however, not only was the old yao doctor ordered to close down, but the local medical department even took her to court.

When the person in charge of the court was about to deal with the old Yao doctor's matter, he met a woman who had been bitten by a poisonous snake on the way.

this kind of venomous snake would definitely not be treated in time if it was sent to the hospital. even if it was treated, there would be residual effects.

However, in the end, the woman was sent to old Yao's clinic. She was easily cured by someone using some medicinal herbs. Only then did the person in charge of the court realize that old Yao's skills were really good. Even the doctors in the hospital could not compare to her.

Everyone must have thought that after this incident, the result would be a happy one, right?

Unfortunately, it wasn't.

In the end, although the person in charge of the court said that he could give old Yao doctor a chance to practice medicine, he asked him to get a medical qualification certificate.

For an old and uneducated old Yao doctor, wasn't it difficult to ask him to read Western medical books and take the Western medical theory examination?

When the old Yao doctor heard this request, she rejected it immediately and announced that she would no longer be able to save people, nor would she teach her disciples.

After that, people often heard that the illnesses that old Yao could cure had to be treated with surgery in the hospital. Many of them spent a large sum of money but couldn't be cured.

But now, because of the body-increasing medicinal liquid, it had given Chinese medicine a ray of hope. It might not be too late to pay more attention to Chinese medicine.

After all, those old Chinese doctors with superb medical skills were not extinct yet. There were still families of Chinese medicine inheritance. They were just disdainful of the current qualification examination method.

If all of these people were gone, Chinese medicine would be a thing of the past.

Qin Lin, on the other hand, felt that there was a bug in the game, doctor Dott, and he could also contribute to Chinese medicine.

To be honest, money didn't matter to him now.

It would be nice if he could use the system and the game to do something meaningful.

Of course, this did not only refer to Chinese medicine.

or, for example, cultivating purification grass to control the air quality of his own country, or waiting for cola fruit to get rid of the two money bags that the stargazing empire was trying to make money from his country.

the hoshino was truly disgusting.

On second thought, there was a type of wind sand grass in the story of ranches that could survive in the desert.

Our desertification area is close to 1 million square kilometers.

He just didn't know if he would have the chance to get this sand grass from the game.

Naturally, with such thoughts, he felt that he would be criticized for being brainless.

After all, this was a society that was becoming more and more selfish.

However, just like the angels in white who did not turn back in the face of disaster, or the doctors who accepted the call one after another, humans would always do something meaningful if they had the ability.

Moreover, he believed that many people would have the same thought. They couldn't do it because their abilities were limited.

minister lu then took out a piece of paper filled with medicinal herbs and handed it to qin lin, saying, "Boss Qin, this is a Traditional Chinese Medicine recipe. This is the recipe I wanted to ask you for."

this recipe was found in a Museum. It seems to be a recipe specially provided to the Emperor in ancient times.

those old Chinese doctors are arguing about this recipe. Some think it's a medicinal recipe, and some say it's a medicinal cuisine recipe.

but there's no reason for me to mix the ingredients. So, I brought this secret recipe along with me to show you.

Qin Lin took the recipe in surprise.

Naturally, he knew that there were some secret recipes in ancient times that were specially provided to the Emperor.

Only the Emperor could enjoy these things. If others dared to make them, they would be committing a crime.

He didn't reject this.

It was a secret recipe specially given by the Emperor, and there was also a dispute between the old Chinese medical doctors that Minister Lu had found. This secret recipe might have a surprise.

[Chapter 679 320-Do Something Meaningful! An Extremely Awesome Emperor's Imperial Medicinal Cuisine!](#)

Qin Lin said, " Minister Lu, I'll do some research on this. You're here just in time. I was going to make turtle and yellow croaker for academician li this afternoon.

Minister Lu's eyes lit up when he heard this."That's a good relationship."

He had heard a lot of reports from Duanmu Rui Yang regarding these two medicinal cuisines. In any case, all sorts of fancy words were used to express how delicious they were. After that, it was the effects.

Needless to say, academician Li's recovery was the best proof.

Therefore, he was very curious about this herbal dish. He was going to freeload a herbal dish from academician li.

At noon, Qin Lin cooked again. He made a quality 2 big turtle and a quality 2 big yellow croaker medicinal dish. He also made a quality 2 Xiangshui tribute rice egg-fried rice.

The deliciousness and texture of this meal were both +3.

With Minister Lu's position, he had even attended state banquets before.

However, after he ate the herbal dish and the egg-fried rice, he said in surprise, " "Is this the herbal dish that boss Qin made?"

Because it was so delicious, even the food made by the chefs of the state banquet was far from this taste.

Not to mention the effects of this medicinal cuisine, just the taste alone was amazing.

Academician Li smiled and said, " Minister Lu, this is what boss Qin made. Boss Qin combined medicinal cuisine and cooking. I've never eaten anything more delicious than boss Qin's cooking.

Professor Ren added, " boss Qin's cooking skills are very good. There's a Top Chef in Western food called lasda. After eating boss Qin's medicinal cuisine, he didn't even have the courage to compete with boss Qin in cooking. He's now staying at the restaurant at Linlin villa as a head chef.

"It's that powerful?" Minister Lu was surprised, but he also agreed with what he said.

After Qin Lin had received Minister Lu, he brought the secret recipe back to his office. He wrote the content of the secret recipe again, printed it out, and brought it into the game.

Minister Lu said that this was a secret recipe copied by the museum and supplied to the Emperor in ancient times. As for whether it was true or not, they would need to rely on doctor Dott's BUG to know.

when he returned to his office, the first thing he did was to look at the screen in his mind. he controlled his game character to head to ore town to look for doctor dott, and then he analyzed the options of the repair formula and placed the printed formula in the box in his backpack.

[analyzing the repair formula, please wait patiently.]

qin lin waited for a while.

Soon, the content of Dr. Dott's conversation appeared.

[the secret recipe has been analyzed and restored. Congratulations, you've found a very good secret recipe this time. It seems to be a medicinal cuisine secret recipe that was specially provided to the emperors of the eastern countries in ancient times. I've written a new secret recipe and removed some useless content!]

[you've received a secret recipe for a medicinal cuisine personally written by Dr. Dott!]

Qin Lin's face lit up when he saw this conversation.

The recipe that the museum had copied down was actually for the Emperor. Furthermore, it was a secret recipe for a medicinal cuisine.

Qin Lin immediately entered the game and saw the notes of the secret recipe written by Dr. Dott:

[special Imperial Cuisine cooking recipe: [Grade 2!]

[this is a kind of Imperial medicinal cuisine specially provided for a long-lived Emperor in ancient Eastern countries. The Emperor lived on this medicinal cuisine for nearly 90 years. After using the secret recipe, one can obtain the special cooking skills of the Imperial medicinal cuisine. When combined with other ingredients, the medicinal cuisine has a special effect: [special taste +1, special taste +1, special medicinal fragrance +1, body strengthening +2, yang boosting and kidney nourishing +2, treatment of weak body and energy +2, longevity +2!]

Qin Lin looked at the secret recipe in surprise. This secret recipe was specially provided for the Emperor, and it was actually a quality 2.

Moreover, he had a rough idea of who the Emperor who was close to 90 years old was. It could only be that one, who was still very playful even at the age of 70 or 80 ...

This Emperor was lustful, but he had a long life. It seemed that it had something to do with the secret recipe of the medicinal cuisine.

Not to mention the body strengthening +2, yang enhancement +2, this gave him the capital to be lecherous. This Emperor was already 66 years old and could still take a young beauty as his concubine.

If it were any other Emperor, they would have already been lying on the bed at this age, ready to die at any time.

not to mention the +2 healing effect, this lecherous emperor had a lot of concubines. moreover, each of these concubines was not the kind that other emperors would occasionally have fun with, but the kind that could play with three young concubines at the age of 66.

Therefore, it was certain that one's body would be weak when playing like this, and this attribute was needed.

The most important thing was the +2 longevity attribute.

This guy was so lecherous and playful, but he still lived to nearly 90 years old. That was really unbelievable. Everyone knew that lecherous people had short lives, and lecherous emperors had even shorter lives.

Therefore, the herbal dish was really awesome!

[Chapter 680 Try And Test To Increase The Attributes Of Medicinal Cuisine](#)

[do you want to use the secret recipe of medicinal cuisine?]

A system notification appeared!

Qin Lin immediately chose to use it.

After a while, the cooking skills information about the herbal dish were all printed in his mind. There was still information about the Chinese medicine, medicinal properties, and related cooking skills.

This herbal dish required a lot of herbs. Moreover, the herbs required for this herbal dish couldn't be too old. This meant that the price would be very expensive.

After getting the relevant information, Qin Lin went online to check the price of these herbs. They were really not something ordinary people could afford.

On the other hand, the secret recipe of the medicinal cuisine for Emperor Qianlong could be used to make a wide variety of ingredients. In other words, as long as the Emperor could eat most of the exotic delicacies, it could be made.

That's right, that Emperor was Emperor Qianlong, the Emperor who was said to have the longest lifespan and the most fun.

He remembered that a TV drama also talked about how the Emperor did have a special health-preserving secret recipe that allowed him to live so long. The secret recipe was obtained by chance when he was traveling to Jiangnan.

It was rumored that the martial Empress had used this secret recipe before, and it was given out of the palace by one of her male companions and ended up in the Jiangnan people's hands.

After logging out of the game, Qin Lin went online to read a few books about the secret records of Traditional Chinese Medicine cuisines.

These were all posted on the internet by the Chinese Medical Association. There were many useful things that had not been verified.

However, in a secret recipe for emperors, Qin Lin did manage to find a relevant fragment of the record by comparing the names of the medicinal herbs.

However, the types of herbs in this record were more complicated than what Dr. Dott had analyzed and repaired.

However, combining this recipe record with the one that Minister Lu had brought over, Dr. Dott's analysis and repair of the recipe's medicinal herbs were all in these two recipes.

this seemed to be another method of recording, or even a combination of methods.

It was to split a recipe into two parts, and then record the two parts using the method in Fang Fang's way.

This kind of record was simply too difficult.

If it wasn't for the BUG in the game, doctor Dott, who could have researched this secret recipe?

Didn't you see that even the highly skilled Chinese medicine doctors that Minister Lu found couldn't do anything?

Or rather, the decline of Chinese medicine was largely due to external reasons, but there were also many personal reasons.

He was too fixated on his sect's status and closed his own door.

There were all kinds of tricks like passing it on to the son and not the daughter, only to the direct disciple, and still keeping a hand in it.

Therefore, Chinese medicine, which was difficult to begin with, was not learned by many. As time passed, it was inevitable that it would decline.

If Chinese medicine hadn't done all this when Western medicine didn't exist in this land, or if it hadn't been impacted by Western medicine in modern times and made great changes, the ending might have been different.

Qin Lin didn't immediately inform Minister Lu about the secret recipe. After all, it would take time to study the recipe.

In addition to being arranged to live in the manor, Minister Lu also followed professor Ren to the laboratory every day to learn about the body-increasing potion and the experimental status of the athletes and soldiers.

Qin Lin was also trying.

what would happen if he planted the herbs needed for the herbal dish in the game and then used them to make the herbal dish?

He checked the herb seeds that were open in the herb garden and found that a portion of the herbs in the recipe could be grown in the level 2 herb garden.

As for the other medicinal herbs, the reason was that the producers only got these seeds. The seeds that were not available in the store might be able to be planted, and they could be tried.

Therefore, Qin Lin began to try planting these seeds in the herb garden.

It took him three days to plant most of the herbs.

moreover, the medicinal herbs planted in the game were basically at the level of grade 1. this should be able to increase the quality of the medicinal cuisine.

For example, the quality 2 fish banquet produced by the game was obviously not comparable to the ordinary wild fish outside.

Qin Lin bought some other herbs and brought them to the kitchen of the manor before informing Minister Lu.

Minister Lu also went to the kitchen immediately. When he saw Qin Lin, he asked in surprise, " "Boss Qin, is there a result from the research?"

Qin Lin explained, " there's a result. This is indeed a medicinal cuisine specially used by the Emperor. Emperor Qianlong and Empress Wu should have used this kind of medicinal cuisine before. I've checked a few books on medicinal cuisine and found records of this in one of the emperor's Imperial Cuisine secret recipes.

moreover, I've analyzed the recorded prescription and the one you brought, Minister Lu. I've come up with the best ratio of medicinal ingredients and obtained a secret recipe for a herbal dish.

As he spoke, he handed the three pieces of paper with the secret formula to Minister Lu.

One of them was brought by Minister Lu.

the other one was a copy of the secret recipe for the emperor's imperial herbal dish. he had written down which page and which paragraph it was for minister lu.

The last one was naturally taken from the medical book.

In this case, he didn't need to blindly fool them.

After all, this thing really had a source. It was just that there was no external modification, so no one could find out where it came from.

However, once they discovered it, it would be like a puzzle game. They would feel that it wasn't that difficult.

"It's really the secret recipe of a medicinal cuisine!" Minister Lu took the three formulas and began to compare them. Qin Lin had marked the relevant herbs, so he could see them very directly.
