

The Game 691

[Chapter 691 This Time We've Won! Right? 2](#)

This service came from the storm caused by the boss and the lady boss.

They were very happy to hear this request from a young lady. Naturally, there were also aunties who would make this request, and most of them were aunties.

After all, pretty girls usually had boyfriends, and this kind of behavior was more restrained. It was different for aunties and single girls. Perhaps, many single girls would be flirtatious.

Out of professional ethics, they still had to greet him with a smile and keep talking about aunty.

Fortunately, the salary was very high!

As for pang Bo, the person in charge, he had a lot more free time. He was only in charge of checking the horses and checking the materials.

Qin Lin's sudden appearance naturally attracted the attention of many people.

"It's little Qin!"

"It's really him. Little Qin, can you take me to ride a horse?"

little Qin is so low profile. I haven't seen his video in a long time.

"....."

All of a sudden, the tourists around them became lively and took out their mobile phones to film.

After all, little Qin was an internet celebrity.

Qin Lin entered the race track. The little lion saw him and immediately ran over. It was as fast as a white shadow and soon arrived in front of Qin Lin.

Seeing this, Qin Lin did not hesitate and directly jumped on the back of the little lion. With the Mount's skill attribute, his movements were smooth and natural, very cool.

Then, the little lion also rushed out like a white arrow. Its speed was so fast that it made Qin Lin look even more confident on its back, like the wind.

This scene must have attracted the tourists again, and they all took out their phones to record the scene.

Qin Lin played with the little lion for a while and went back to the manor. Not long after he arrived at the manor's office, he saw Minister Lu coming to his door in a hurry.

Without waiting for him to speak, Minister Lu panted and said, " "Boss Qin, I really need your help this time. I hope you can help me."

"Minister Lu, what's going on?" Qin Lin asked, puzzled.

This was the first time he had seen Minister Lu like this. Moreover, Minister Lu had even used the word "beg".

This meant that Minister Lu really had an urgent matter, and it was very urgent. Otherwise, he wouldn't be like this.

Minister Lu immediately explained, "it's about the medicinal liquid and battilase. Previously, there was only one kind of Kasaya in our country that could treat cerebral infarction.

Minister Lu told Qin Lin everything.

Qin Lin was also stunned after hearing this. There was such a thing? was there something wrong with this Liu guy's brain?

He had seen people scolding this computer company on the internet, but he didn't expect them to do such a wicked thing.

Wasn't the other party afraid of being criticized behind his back after he died?

When this stupid computer company was suppressed back then, it was the support of the people of the country that brought this stupid computer company back to life. Now, the other party was using this method to repay him?

Qin Lin took out his phone to check the news, and it was true.

There were many Short Video scolding President Liu on TikTok, and the comments section below was also full of scolding.

This was unforgivable in everyone's eyes.

Naturally, there were also people who questioned why the fine was only 100 million, and they even thought they were smart enough to suspect that there was some kind of collusion.

this kind of person was also brainless.

the 100 million fine is because of the World Trade Organization. We are affected by some of its rules. Also, the raw materials for Battili are in foreign countries.

This was where the problem lay.

Naturally, there were also people who commented on why they didn't leave the World Trade Center. Alright, these people were even more brainless.

Qin Lin watched the news and asked Minister Lu in confusion, "minister lu, what can i do to help?"

"Boss Qin, you can be of great help!" As Minister Lu spoke, he took out his briefcase and took out a list of medicinal herbs 'secret recipes. He said, "the higher-ups are planning to teach Xiansheng pharmaceuticals and the Liu family a lesson, but the Western research Department at the Chinese Academy of Sciences can't do it in a short time.

recently, a few Chinese medicine formulas have also attracted the attention of the leaders. So, if we can find a useful formula from the ancient Chinese medicine formulas and release it at the same time as

Xiansheng pharmaceuticals 'Battili, then we can make Xiansheng pharmaceuticals' acquisition go down the drain. One hundred million isn't painful, but a few billion is a bit painful.

this way, the higher-ups will pay more attention to Chinese medicine. These are the secret recipes we found from the ancient recipes for treating brain parts. They might be related to cerebral infarction. We would like to ask boss Qin to help us research them.

qin lin understood minister lu's meaning. he immediately nodded and said, " Minister Lu, I need time to study this. I can study it now.

There were some things that should be done if one had the ability.

With Dr. Dott's BUG, he could easily tell if there was a cure for cerebral infarction among these recipes.

Since it was within his power, why not do it?

After he found out about this, he was very unhappy with Xiansheng medical company and that chief Liu.

Since he was a human, wasn't it better to do more? why did he have to do such inhumane things?

"I understand." Minister Lu nodded. thank you for your trouble, boss Qin. I have to rush back to the capital. I still have to deal with things there. You can send me a message when you have any results.

minister lu hoped that qin lin could study it as soon as possible, so he left immediately without disturbing qin lin.

Boss Qin agreed to give the recipe to the other party. All he had to do now was to go back and wait for the results.

[Chapter 692 This Time We've Won! Right? 3](#)

After Minister Lu left, Qin Lin also picked up the 20 or so secret recipes, printed them again, and deliberately brought them into the game as incomplete.

After exiting the game, he immediately controlled his game character to go to Dr. Dott to analyze the repair recipe.

He placed the recipes one by one into the frame and clicked confirm.

[sorry, ran ran]

...

[this is a worthless Kasaya.]

...

[congratulations, referee]

[sorry, referee]

...

[sorry, referee]

it took qin lin some time to get dr. dott to analyze and fix the secret recipes that minister lu brought. among the more than 20 recipes, three of them were actually useful.

the key was that two of the recipes really surprised him.

[brain blockage clearing powder: normal!]

[this is a special medicine used in ancient times to deal with cerebral infarction. You need to put the medicine on a wet and hot towel and apply it to the entire head. It will have a very good effect!]

From the name, one could tell what it was used for. It was a medicine specially used to treat cerebral infarction. Moreover, it had to be applied externally as stated in the note.

The quality was only ordinary.

However, according to his past experience, even if it was only of normal quality, it should not be much different from the normal medicine in the real world.

This thing was useful.

[nerve opening solution: Grade 1]

[this is an ancient herbal dish that can cure neurological diseases: Treatment of cerebral infarction +1, treatment of nerve tissue infection +1!]

This was a Grade 1 medicinal liquid, and it had the attribute of treating cerebral infarction +1, which was obviously more effective than the previous formula.

Qin Lin was relieved to see these two things. He could finally explain to Minister Lu.

However, he had to buy some time and create a time difference before giving the formula to Minister Lu. Otherwise, it would be too fast.

Qin Lin then looked at the third formula.

This formula wasn't for treating cerebral infarction.

[refreshing soup: Grade 1]

[this is a kind of leisure medicine used by the ancient nobles. It has a special effect: Refreshing mind +1! [clear the mind and nourish the brain!]

Clearly, this was another medicinal drink like the Linlin leisure tea.

If the Linlin leisure tea was used for the people who carried bricks, this refreshing soup was used for the elites who sat in the office and supervised the people who carried bricks.

If they could get their hands on this, it would be a good supplement for Linlin food company, and they could even have a new series of drinks.

However, he was just thinking about it. There was no need to do such a thing.

...

A few days passed in the blink of an eye.

In the newly established Chinese Medicine Research Department of the Chinese Academy of Sciences, Chu Qingfeng brought the old Chinese doctors to find Minister Lu excitedly.

As soon as he saw Minister Lu, Chu Qingfeng said excitedly, " "minister lu, we've found a secret recipe that's effective for treating cerebral infarction. it's called the cerebral infarction powder ... "

Minister Lu was overjoyed when he heard the news. "Really?"

He didn't expect these old Chinese doctors to be so fast this time, even faster than boss Qin. Boss Qin hadn't given him any news yet.

Chu Qingfeng smiled and nodded. we've worked together to analyze the medicinal properties and confirmed it. Now we just need to test it to know if it's possible. This is the only effective recipe we found. The other recipes are useless.

Minister Lu heard the news and said excitedly, " that's great! Senior Chu, hurry up and prepare it. I'll get someone to test it.

"Minister Lu, do you have any news about boss Qin?" Chu Qingfeng asked curiously.

The other old Chinese doctors also looked at Minister Lu.

This time, they finally didn't lose to that young man and gave them, the old guys, some face.

[Chapter 693 326-There Are Actually Three Types!](#)

After hearing Chu Qingfeng's words, Minister Lu also said honestly, " "There's no news from boss Qin's side."

Chu Qingfeng and the old Chinese doctors were comforted by his words.

It wasn't that they wanted to compete with a young man, but as old Chinese doctors, they couldn't help but have a strong sense of self-esteem.

At this moment, Minister Lu received a call from boss Qin. He immediately answered the call.

Boss Qin's voice came from the other end of the phone. Minister Lu, I've got the results from the secret recipe you brought. I'll send it to you on WeChat.

"Really? Boss Qin, you have news from your side?" Minister Lu was pleasantly surprised when he heard the news.

Although boss Qin had come up with the results together with senior Chu and the others, he was only one person. Wasn't that enough to show that he was powerful?

Chu Qingfeng and the other old Chinese doctors were also attracted by Minister Lu's words. That boss Qin actually came out with the results?

Minister Lu hung up the phone and immediately opened his WeChat. Sure enough, boss Qin had sent him three recipes.

Furthermore, there was a message from boss Qin: Minister Lu, there are a total of three useful formulas, but only two of them are effective for the cerebral infarction. One of them is a medicinal drink that has a very good refreshing effect, and the more effective one is a nerve-opening liquid medicine.

Minister Lu was surprised to see the message.

There were indeed three formulas inside: the spirit-awakening soup, the nerve-opening medicinal liquid, and the brain blockage Meridian-opening powder that Chu Qingfeng and the other seniors had developed.

Chu Qingfeng and these old Chinese medicine seniors had to work together to research the brain stem blood circulation pill from those secret recipes. They even said that the other secret recipes were no longer useful.

However, boss Qin had found three useful secret recipes at once, and one of them was the nerve-promoting liquid medicine, which was even more effective than the brain blockage removal powder.

It was the refreshing soup that caught his attention.

This is a formula for a medicinal drink. This formula should be useful for boss Qin's Linlin food company, right? it could be made into medicine and drinks.

Boss Qin had made Linlin leisure tea before.

He also knew that it was very difficult for a food company to make a new medicine with good effects. It would cost a lot of research funds.

In fact, boss Qin could have kept the recipe of the refreshing soup. After all, they didn't know about it at all.

however, boss qin had actually sent the recipe over. it was clear that he had a firm heart and was very open-minded.

"Minister Lu, did boss Qin also develop the cerebral infarction powder?" Chu Qingfeng couldn't help but ask.

boss Qin did develop the formula for the cerebral infarction powder, " Minister Lu said. but he also developed an even stronger nerve-opening solution.

"What? Are there any other useful recipes?" Chu Qingfeng, this senior, was shocked.

The old Chinese doctors were also in disbelief.

"there's another one?"

"How can this be? I don't know anything else about medicine!"

"How did the other party discover it?"

"....."

Their combined research had only managed to find the blood circulation cerebral infarction powder. Whether it was effective or not, they still had to test it to know. But now, in the same amount of time, they had found two.

Minister Lu didn't waste any time. He sent the photo of the formula to his assistant, Xiao He, and asked him to print the brainwaves unblocking elixir as well.

He didn't tell Chu Qingfeng and the other Chinese medicine seniors the formula for the awakening soup.

His assistant, Xiao He, also quickly sent the printed formulas over.

Chu Qingfeng and the other old Chinese doctors immediately took it and looked at the two formulas together.

The formula for the cerebral infarction powder was the same as what they had researched.

They then looked at the other nerve opening solution.

Seeing this recipe, they knew which secret recipe had been researched.

They carefully looked at the medicinal ingredients on the formula and compared them with the original medicinal ingredients. Then, they all came to a sudden realization.

" it's actually like this. three groups of compound medicinal herbs have been removed. "

indeed. We didn't notice that these three groups of medicinal herbs had compound medicinal properties.

it's clear now. The rest of the pharmacology works as expected.

"....."

Chu Qingfeng and the others were very surprised. They really didn't notice this point. After all, it was a prescription left behind from ancient times. They could only study it according to the medicinal theory.

however, this kind of combination of medicinal herbs was rarely used in traditional chinese medicine, so everyone ignored it and didn't find the problem.

It was like a puzzle game. Once the puzzle was solved, it felt very simple. These old Chinese doctors were very skilled. Now that the formula was in front of them, they immediately understood what was going on.

"Ah, this boss Qin is really amazing." Chu Qingfeng sighed. This old man was finally convinced.

The other old Chinese doctors nodded in unison.

Previously, they had already failed when they worked together to create the emperor's medicinal cuisine. This time, they had only managed to create one recipe while the other party had created two.

Minister Lu didn't want to waste any more time. He said to these people, " seniors, I'll have to trouble you to concoct this medicinal liquid. I'll get someone to test it immediately. The sooner we get the results, the better.

don't worry, Minister Lu, " Chu Qingfeng said immediately. leave this to us. If we don't do it well, we'll be embarrassed.

[Chapter 694 326-There Are Actually Three Types!](#)

The other old Chinese doctors also nodded and began to prepare the medicinal herbs. Then, they prepared the brain stem unblocking medicinal powder and the nerve cell opening medicinal liquid.

very quickly, the two medicines were concocted.

Minister Lu didn't hesitate to send the medicinal liquid for testing immediately. He also told his assistant, Xiao He, to keep an eye on it and wait for news.

after that, minister lu could only wait for the results.

Chu Qingfeng and the other old Chinese doctors were also waiting for the results. To be honest, this was what Chinese medicine lacked. They knew about the medicine and only wanted the medicinal properties, but they had no way to judge the specific effects.

After all, even in ancient times, miracle doctors like Hua Tuo and Zhang Zhongjing had to go through countless experiments to know the specific effects of some medicine.

However, in ancient times, many patients were tested by these godly doctors. In modern times, Chinese medicine had declined, and they had no way to find someone to test a formula that had never been used.

Therefore, if Chinese medicine really had a chance to rise again, they had to learn from it. It was indeed not good to be complacent.

The people from the Chinese Academy of Sciences 'testing department naturally knew about the promotion, so they quickly tested the data of the two drugs.

When Xiao He received the test report, he informed Minister Lu and then brought the report back immediately.

Chu Qingfeng and the other old Chinese doctors rushed over as soon as they heard the news. Then, they saw the bright smile on Minister Lu's face.

"Minister Lu, what's the result?" Chu Qingfeng seemed to know the result, but he still asked.

Minister Lu said with a smile, " seniors, it's a good time to share the good news. The brain blockage clearing elixir that you've found after your research is indeed effective for brain blockage. Moreover, the effect is not worse than that of battilase. It might even be better.

as for the nerve scattering drug, its effect is even stronger, far exceeding the effect of battilase. Now, we only need to go through clinical trials. If it succeeds, we can open it up to those patients with cerebral infarction.

Minister Lu became more and more excited as he spoke.

there was definitely no problem with the clinical trials. after all, there were no harmful substances or other problems detected.

The most important thing was that there was no research cost for these two drugs. If they were made into Chinese medicine and covered by medical insurance, the price of the medicine could be extremely cheap.

However, Battili was different. When Tobishi pharmaceuticals developed this drug, they had spent a lot of research costs. They originally sold it for 1000 to 2000 Yuan a tube.

On the other hand, Xiansheng pharmaceuticals had bought Tobishi and spent a lot of money to get the sole agency right in the country, monopolizing the raw materials. The price they had to pay was very high.

According to the information he had received, when Xiansheng medical company was about to be put on sale again, the price would increase greatly. Otherwise, he would not be able to break even.

at the thought of this, minister lu sneered.

You want to increase the price of the pharmaceutical industry first?

Boss Qin's nerve-restoring elixir had the same effect on medical insurance, but the price should not be a few dozen Yuan.

He wanted to get back his capital by raising the medicinal liquid and the Liu family behind him? There was no way.

This time, the huge amount of money that the other party had spent would go to waste, and it would be a huge lesson.

"Seniors, I'm going to see the leader first. You can study these two formulas later." Minister Lu said and left in a hurry.

The leader had been paying attention to this matter. Now that the results were out, he naturally had to report it immediately.

...

Linlin Manor.

in the office, qin lin controlled his game character to go to mount goddesses. after a while, he saw his game character come out with a honey nest above his head.

Qin Lin then controlled the game character to put the grade 2 wild honey into the storage room.

he could see that the grade 2 wild honey had already been piled up on several tables. his game character clicked to check, and the numbers behind it were stacked.

Qin Lin didn't know how much of this Grade 2 wild honey was available.

After all, the Linlin leisure tea and the Linlin medicinal drink could already replace the effect of the grade 2 wild honey, so the sales center of the villa could sell these drinks.

Therefore, the grade 2 wild honey had long been given away.

After finishing his daily tasks of fishing and chopping trees, Qin Lin picked up his mobile phone and scrolled through the Short Video news.

Who knew that he would see news about Xiansheng pharmaceuticals after browsing a few.

This time, it wasn't a video to scold Xiansheng pharmaceuticals. It was an official video.

This gentleman's pharmaceutical company announced that Battili had restarted production, and because it was a new generation developed by them, it had begun clinical trials and would be sold soon.

Naturally, the price rose.

So, even though this wasn't a video that was used to scold Xiansheng medical, it was a video that was trending.

What new generation medicine? anyone with a brain would know that this was a successful purchase and the price would increase. The new generation was just an excuse. The medicine would definitely be the same medicine.

wasn't this all a trick?

For many of these products, if the boss wanted to increase the price, he would say that it was a new generation, change the packaging, print a second-generation label, and then increase the price openly.

Therefore, in the video, Xiansheng medical company and the Liu family were being scolded badly.

Qin Lin sighed. These people were having a good time scolding Xiansheng pharmaceuticals, which was equivalent to bringing traffic to the video. No matter how much they scolded, Xiansheng pharmaceuticals didn't care, and neither did the Liu family.

The Liu family had been scolded for so many years, but what did they do?

On the contrary, when the traffic increased, more people or their relatives who needed the medicine would see it, achieving a better advertising effect.

[Chapter 695 326-There Are Actually Three Types?](#)

However, Xiansheng pharmaceuticals was only able to do so for a short while. According to Minister Lu, the other party had spent a huge price and money to monopolize this medicine.

Now that the higher-ups already had two medicines that could be used, if they struck with a heavy blow, Xiansheng medical company's expenses this time would be completely gone.

Such a loss would hurt the Liu family even if they had the Liu family's backing. They might even be killed.

Qin Lin continued to scroll through the videos. After scrolling through two videos, he found a video of himself. It was a video of him riding a little lion at Linlin's Ranch.

Who knew that this would also make it to the hot search? he could only blame his riding posture for being too handsome and cool, and his riding skill for being too powerful.

after scrolling through the video for a while, qin lin suddenly received a wechat message. it was from minister lu, and he received a file.

"Minister Lu, What's this?" qin lin sent a message to ask.

Minister Lu immediately replied, " boss Qin, this is a special document. I'm really grateful to you for developing the nerve opening solution. Remember to watch the news these two days, there's going to be a good show.

Qin Lin was puzzled. He opened the document sent by Minister Lu and saw that it was a gift for the refreshing soup.

Seeing this, he couldn't help but smile. This was giving him the refreshing soup directly.

He didn't expect the ownership of this thing to fall into his hands in such a way.

...

On the other side.

In Xiansheng medical's laboratory, the person in charge, Lin Tong, also welcomed an old man in his 70s. This was the famous chief Liu, who had been scolded by countless people on the internet.

Naturally, there were a few shareholders around President Liu, but they didn't have as many shares as President Liu's company. The shareholders were also President Liu's company.

chief Liu, there's definitely no problem with the clinical trial. It's just a matter of time to go through the process. After all, the medicine is still the original medicine. Some unrelated medicine has been added to increase the nutritional content. Lin Tong welcomed chief Liu into the laboratory and checked the latest data of the drug.

"Let's first look at your sales plan!" President Liu nodded. If he wanted to change his appearance and increase the price, he had no choice but to do this step. However, this was not important. What was important was the subsequent business situation.

Lin Tong nodded and handed a folder to President Liu.

But at this moment, a middle-aged man ran over in a hurry, his face full of panic. "chief liu, chief lin, bad news, bad news!"

"What's not good?" Lin Tong saw the person and asked.

Chief Liu was also very displeased. This person was a little insensible and rude. He didn't even know how to report?

The middle-aged man hurriedly said, " the Chinese Academy of Sciences announced that they're already conducting clinical trials for the first aid medicine for cerebral infarction. They also said that after entering the medical insurance company, the price of the medicine will be less than 50 yuan.

"What?" After President Liu heard this, his expression changed instantly. The shareholders beside him also looked very bad.

"How could this be? Where did they get the medicine?" Lin Tong exclaimed. They dared to do this because batroxon was the only medicine in the country.

If the Chinese Academy of Sciences could make such a drug, would the higher-ups still need to fine them with a 100 million Yuan fine?

And now, he was saying that the other party had this medicine, and the cost was less than 50 yuan? What kind of joke was this?

It's true. Not only is there a video on the internet, but the Chinese Academy of Sciences' official website has also announced it. President Lin, look. The middle-aged man handed over his phone, which was already open to the Chinese Academy of Sciences' external website.

Lin Tong's face turned pale when he saw the information the middle-aged man had.

'This is bad.'

They had spent so much money to get to this point, and the medicine had to be sold for thousands of dollars each to make money.

Now that he had offered 50 yuan, it was like a knife to their hearts.

Most importantly, they didn't even have the ability to fight back. They didn't even dare to fight back.

It was equivalent to all the money spent this time going to waste.

Lin Tong suddenly felt lucky. Although he was the person in charge, he didn't have anything to do with the money.

Damn it! President Liu gritted his teeth and cursed when he saw the news. The news hit him so hard that he was a little stunned. He couldn't suppress his anger. Then, he suddenly held his head in pain and fell down.

"Chief Liu, what's wrong?"

"Chief Liu, are you alright?"

"This symptom seems to be a sudden cerebral infarction!"

All of a sudden, the entire laboratory was in a mess.

[Chapter 696 The System Can Also Make A Mistake? Impossible!](#)

In the inner area of the manor.

Qin Lin started to work in the workshop again. It took him some time to make a bowl of medicinal liquid.

After the medicinal liquid was made, he entered the game with a thought and looked at the information of the bowl of medicinal liquid in his hand.

[(can be named) refreshing soup: Grade 1]

[this is a bowl of special refreshing soup. It's a good medicinal drink: refreshing mind +1! [mind-clearing and brain-nourishing +1]

Qin Lin saw the remark of the refreshing soup.

Since the higher-ups had given him the recipe, he naturally had to make it first.

He took a bite and it tasted pretty good.

It had a medicinal fragrance, but it was not bitter.

The key was that this refreshing soup had the attributes of refreshing the mind and nourishing the brain +1.

This thing was more useful than Linlin leisure tea for people who relied on their brains for a living and often consumed their brains.

However, Linlin food company had already promoted three products at the same time. The refreshing soup could wait until the new factory of the food company was completed.

with the promotion of linlin herbal drink, the herbal drink factory also needed to be expanded. based on the scale that linlin food company needed, you city industrial zone could no longer provide the required space.

Therefore, you city had specially planned a large area for Linlin food company to build a factory.

After the factory was built, it would not be a problem to increase the production line and add a few more products.

After finishing the soup, Qin Lin logged out of the game and went to his office. He took out his phone to check the news.

he had only watched a few videos when a smile appeared on his face.

The good show that Minister Lu had mentioned was here.

The Chinese Academy of Sciences announced that a nerve-opening medicine for cerebral infarction had entered clinical trials, and the price of this medicine was less than 50 yuan.

Once the clinical trials were successful, they would officially hold a press conference.

Anyone could tell who was being targeted.

After all, Xiansheng medical liquid had just released the news about the so-called second generation upgrade of Battili, and the Chinese Academy of Sciences came up with such a thing. Anyone could see that this was targeted at them.

Moreover, when this news came out, it was really relieving. It was directly pushed to the top of the hot search by countless people.

this Xiansheng pharmaceuticals thought that no one would be able to deal with him. They must be dumbfounded now.

haha, yesterday it was a monopoly, but today it's not worth much.

he can be cured for 50 yuan. Only a fool would buy a medicine that costs a few thousand Yuan.

I'm happy to see this. With this situation, Xiansheng pharmaceuticals is going to make a huge loss.

I want to spend 50 yuan to support our domestic products. Who knows what's wrong with my brain? "

I also want to support Chinese products, and I also want to ask how I got a brain block +1.

"Same request +2"

" +3"

" ..."

The comments section became more and more crooked towards the end. Although these netizens didn't have any malicious intentions, this was actually not good.

After all, having brain problems was not a good thing.

How would those who were really brainwashed, or those who were being threatened by brainwashing, feel?

However, this was a really ruthless move. The Chinese Academy of Sciences had spread the news so widely that even if they wanted to collude with a hospital and ask the doctor to prescribe them a medicine that cost thousands of Yuan, no hospital or doctor would dare to do it.

Firstly, the patient was not a fool, and secondly, in such a situation, whoever touched it would be unlucky.

Qin Lin continued to scroll through the videos.

Soon, he saw a piece of shocking news.

This news was even more popular than the Chinese Academy of Sciences 'announcement of the nerve-opening drug's entry into clinical trials.

[President Liu of a computer company was sent to XXX hospital. After diagnosis, he suffered sudden cerebral infarction due to stimulation and is now in the intensive care unit]

When this news came out, it was really good news.

The comments section was filled with 666 comments.

It was rare for the comments section to be so uniform.

Therefore, being able to be praised by so many people after entering the hospital was actually a kind of ability.

to be honest, people who didn't do immoral things didn't deserve such treatment.

Qin Lin put down his phone and was about to leave when he saw Huang Xin at his door.

"How come you have time to come over today?" Qin Lin asked curiously.

Huang Xin, however, handed him an invitation and said, " 'isn't my perfume going on sale soon? I'd like to invite you to participate."

I've also used some connections to invite some critics and distributors of the perfume industry to hold a test in your city. In order to get these people to come, I've asked a lot of people. Food and accommodation are all covered, and I even have to give them red packets.

"In such a hurry?" Qin Lin was stunned when he heard this.

He had seen the properties of Huang Xin's perfume before. It was a very ordinary perfume, without any special significance or brand enhancement, it would be very difficult to compete in the market.

If Huang Xin had used some devious tactics on the internet to hype up the perfume and make it a popular product, he might have been able to expand the market and get back his funds for research and development.

But the key was that the other party wanted to hold a Test Conference, such a grand event, and even invited the critics and sellers of the perfume industry to participate?

This was the confidence that only those big brands had.

Your perfume isn't outstanding. After this, it'll directly dry out.

Unless you could find some people who were paid to do things, it would be good to brag about you.

The problem with Huang Xin was that he was a second-generation nouveau riche. He had probably invited many well-known people, and most importantly, he had invited many retailers.

This made him feel as if Huang Xin had taken the initiative to tie a bomb to his body, and was eager to ignite it himself.

More importantly, he didn't even know how to remind Huang Xin.

After all, he was an outsider to the perfume industry. He couldn't possibly explain that he had to rely on the system to see its attributes, right?

[Chapter 697 The System Can Also Make A Mistake? Impossible!](#)

If you say that the perfume is bad, Huang Xin will think that you're mocking him.

Huang Xin was only lucky to be in this mountain.

Wasn't that young master Wang, who had spent 500 million Yuan to practice, the same?

Before he collapsed overnight, some people had said that he would end up being killed by the Penguins, but he was still very confident. He made a series of big moves, thinking that he could break out of the siege.

What was the final outcome?

If he didn't have good parents, he might have become a deadbeat.

"Qin Lin, I'm going back to work. You must come." Huang Xin left in a hurry after delivering the invitation. It seemed like he was really busy.

Qin Lin looked at the invitation in his hand helplessly.

However, he still went to Huang Xin's Test Conference the next night.

Huang Xin's charm fragrance test was held at the Zhong min hotel, and he had booked the entire banquet hall.

Qin Lin was quite familiar with the Zhong min hotel, so he went upstairs from the side elevator.

As soon as he arrived outside the banquet hall, he saw the lady at the front desk from Huang Xin company.

"Little Qin!" The lady at the front desk's eyes lit up, and she wanted to take a picture with her mobile phone. This was also the mentality of most ordinary people when they saw an internet celebrity.

She really thought that Qin Lin was an internet celebrity.

Fortunately, she knew that she was working, so she put down her phone.

Qin Lin also gave the invitation to the young lady at the front desk.

"Little Qin, please come in." The lady at the front desk didn't check the invitation. After all, she knew that Xiao Qin and her boss were friends.

Qin Lin entered the banquet hall and was dumbfounded by the scene inside. The decorations were really Grand, a bit like those luxurious scenes in movies.

If one didn't know better, they would have thought that this was the launch of a big brand perfume and not an ordinary new brand that had not been on the market yet.

It wasn't that the decorations weren't good, but it was stylish and Grand.

However, someone who started from scratch would definitely not be like this. It could only be said that this kind of rich second generation had a high starting point and had been exposed to different things from ordinary people.

If Huang Xin were to present an amazing product during the test Conference, it might become a good story. The perfume would become popular, and everyone would praise it.

however, if he failed, it would be a mockery. what did he mean by he only learned formalism? what did he mean by the second generation of rich people only knew about essence and not entrepreneurship?

Anyway, there was a high probability that this was the case.

naturally, the vendors and critics who were invited to the test were all well-dressed people. they were all fashionably dressed and meticulous.

"Qin Lin," When Huang Xin saw Qin Lin, he welcomed him warmly, "How's it going? the layout of my Test Conference is pretty good, right? I've hired a professional to set it up."

"Not bad, you've put in a lot of effort." Qin Lin praised him, but he sighed silently in his heart. He could only hope that Huang Xing's product launch would go smoothly.

The system's detection might not be entirely correct, right?

Even the system was not wrong.

of course, I have to put in the effort. It's my first business! Huang Xin smiled as he led Qin Lin to a sofa and sat him down.

Qin Lin didn't respond to his first venture. Other people called it a venture, but he was using 100 million Yuan as practice.

Huang Xin entertained Qin Lin and chatted with him for a while before he went to entertain the reviewers and distributors.

What puzzled Qin Lin was that things didn't seem to be what he had expected.

Huang Xin seemed to be chatting and laughing with these people, and they seemed to be very happy.

whether it was the reviewers or the distributors, they were all very open with Huang Xin, as if his product was really very good.

Qin Lin was very puzzled.

Could it be that the system's detection was wrong?

Huang Xin's perfume was very popular?

Or could it be that the "ordinary" in the system's remarks and "ordinary" in reality were not the same?

Anyway, when the crowd was dispersing, Qin Lin saw Huang Xin sending those people downstairs with a smile and confidence on his face.

Huang Xin had naturally arranged for these people to stay at the Zhong Min hotel.

After the test Conference ended, Qin Lin also left.

This was the first time he felt that the system could make a mistake.

...

The next day!

Qin Lin got up and went to the warehouse to move the things out of the game to the villa. When he returned to the manor, he saw Huang Xin.

Why did this guy come so early in the morning?

Qin Lin smiled and asked, "you're here early in the morning to show off your battle record?" How many orders have those sellers placed?"

However, Huang Xin suddenly looked dejected when he heard this. He said helplessly, "Qin Lin, I might have been played for the whole night."

"What?" Qin Lin didn't understand.

Huang Xin frowned and said, "those critics and distributors were all smiles when they were drinking last night. They praised my perfume and said that it was very good. The distributors even said that they

wanted to place orders. Who knew that they would change their minds this morning? the key is those critics. They're too despicable. Let me show you their comments.

as Huang Xin spoke, he took out his phone and showed Qin Lin a few screenshots.

"Sigh, I'm a perfume admirer, but anyone can make perfume now. I received an invitation, but I had to go because of some connections. It's a perfume made by a rich second-generation heir. I really don't know how to evaluate perfumes. I think the one I made is similar!"

I went to Charm Fragrance's perfume tasting meeting. The boss is a pretty good rich second generation, but his perfume is more ordinary. He doesn't have many perfumed products.

Charm perfume, a typical product of a rich second generation entrepreneur. How should I put it? It can't reach the level that Charm Fragrance company wants to promote.

Qin Lin was a little dumbfounded when he saw these comments.

He just said that the system would not make a mistake.

But weren't these people too good at acting?

He was smiling in front of her, but his face changed in the blink of an eye.

It was said that the business world was full of deception and people were all-faced, and today, he had seen it for himself.

Fortunately, he didn't have to be in charge of Linlin food company and Linlin's laboratory. Otherwise, he wouldn't have such acting skills.

"I wanted to look for these people this morning, but they left so early." Huang Xin said dejectedly. Then, he looked at Qin Lin with a face full of admiration. "Qin Lin, my business venture this time might end in failure. I might have to go back and inherit my family's business. I really admire you. You started from scratch and made your business so big step by step."

"Ran ran." Qin Lin didn't know how to answer.

This was the first time she had seen someone say that going home to inherit the family business was like going to the death penalty.

Did the other party know that his words would be very annoying outside?

Also, he was relying on the system. If he were to rely on his real abilities, he would still be selling fruits at that small fruit store every day.

Naturally, it was also possible to win a big prize, return the money, and even have a small business.

But it seemed impossible, because he didn't buy the lottery at all. Where could he win the lottery?

Perhaps it was just like the saying, dreaming of winning 5 million every day, but not even bothering to buy a lottery ticket.

"Qin Lin, you have some good wine here. Let's have a drink today!" Huang Xin finally sighed.

Looking at the dejected Huang Xin, Qin Lin thought of Jean's perfume formula and said to Huang Xin, "why would you want to drink?" Wait here, I'll get you something."

"What is it?" Huang Xin asked doubtfully, but Qin Lin had already walked inside.

[Chapter 698 This Liquid Is! Bit Like Coke! 1](#)

Qin Lin walked into his office and found the quality 1 perfume he had made.

He had stored the perfume in a few small transparent bottles.

This perfume has a charming fragrance +1, charm men +1, make men happy +1, make men impulsive +1, make men **+1! . it would definitely be very popular in the women's market.

It was just that this perfume couldn't keep up with the quality of Linlin company's products, and he had no intention of promoting it.

now, this thing could save huang xin.

Qin Lin came out with a bottle of perfume and handed it to Huang Xin when he saw him.

"What's this?" Huang Xin asked in puzzlement.

"Perfume!" Qin Lin explained.

"What?" When Huang Xin heard that it was a perfume, his face was filled with shock. He did not understand what Qin Lin meant.

Qin Lin didn't explain much and just said, " "Trust me, bring this perfume back for teacher Chu to use. Remember, it can only be used in the room."

"? ? ?" In the end, Huang Xin took the bottle of perfume and left with a dumbfounded expression.

Perhaps it was because of his trust in Qin Lin, or perhaps it was because of Qin Lin's achievements that he subconsciously followed Qin Lin's instructions.

He knew Qin Lin wouldn't joke with him at this time, so he went back to the villa he bought in you city.

As soon as he entered the courtyard, he saw his wife playing with his daughter.

On a specially made swing, his daughter was sitting on it, and his wife was pushing it behind.

"you're back?" Chu Yu asked with a smile when he saw his little husband return.

Huang Xin passed the perfume to her with a smile and said, " "Teacher, can you let our daughter play by herself first? Come with me to my room, I have some perfume for you to try."

Chu Yu asked in confusion, 'why do I have to go to the room to try on the perfume? I don't have any perfume on me?"

"Let's go to the room!" Huang Xin didn't know why he wanted to go to the room, but since Qin Lin had said it so seriously, there must be a reason.

Although Chu Yu was puzzled, he still followed Huang Xin to the bedroom after carrying his daughter back to the living room.

As soon as she entered the bedroom, she put some perfume on her wrist and sniffed it. She said in surprise, "Honey, what perfume is this? it smells so good, even better than the other brands on the market. Is this your new perfume? You're amazing, this perfume smells so much better than the previous one."

This praise was clearly a bit of admiration.

Wanwan. hearing his teacher's adoring voice, Huang Xin felt very embarrassed. This was because Qin Lin was the one who had given him the gift.

But now, Qin Lin, a layman, had given him a perfume that was better than the one he, a professional, had carefully developed.

This was quite a blow.

however, chu yu had already sprayed the bottle of perfume on himself.

Women always had a special liking for perfumes, especially this kind of high-quality perfume.

"Take a look, does it smell good?" Chu Yu moved closer to Huang Xin and leaned into his embrace.

In that instant, Huang Xin smelled an extremely pleasant fragrance.

The fragrance instantly captivated him.

this was obviously the effect of the +1 fragrance and +1 male charm attribute.

Although he had heard from his teacher that the perfume smelled good, he didn't expect it to be this good.

But when he smelled it, he felt that something was wrong. When he held his teacher in his arms, he actually slowly developed an indescribable impulse.

This feeling was very strong, and it wasn't like it had happened before.

It was as if he was hugging a teacher who didn't have any defense at all and not a teacher who had defense.

Obviously, this was in such a close and intimate state, making men happy +1, making men impulsive +1, making men ***+1! , The attribute had taken effect.

If it was a woman, he would definitely let go of her immediately and suppress this impulse. After all, he was not a reckless person.

However, the person in his arms was his wife. That was a different story.

Indulge!

Huang Xing picked Chu Yu up like a princess.

Chu Yu was shocked. hubby, it's broad daylight. What are you doing? "

"What do you think?" Huang Xin retorted.

And then,

...

An hour later.

Huang Xin's legs felt like jelly as he walked out of the villa. The first time, he was only suspicious, but after recovering from the Linlin leisure tea, he was sure of it the second time.

Qin Lin's perfume was amazing. He was sure that it would be a popular product among most women.

This was a treasure that could capture her husband's heart and tie it to the house.

It was just that the special effects of this perfume would be a little troublesome during the review. The sales would definitely be a restricted product, and he was afraid that it could only be used to make a name for itself. There was no way to sell it on a large scale.

However, it didn't matter. The fragrance of this perfume was also very good and fascinating.

As long as he knew the specific content of the formula, he could completely carry out experimental research on the decomposition, eliminating those special effects and weakening them.

Or, he could directly extract the fragrance and develop a new series of perfume.

He studied perfume making when he was studying abroad, so he was confident that he could do it.

Qin Lin's perfume was so mesmerizing after he had smelled it. Even if the fragrance of the new formula had weakened, it would definitely be able to make a light-smelling one.

Therefore, he had to get the formula from Qin Lin. He didn't want his business to fail and then go back to inherit his family business.

Naturally, he knew that Qin Lin didn't lack money. It would be a waste of money to buy it.

According to the market value, all of Qin Lin's properties would surpass his father's group in the future.

[Chapter 699 You Need An ID Card To Buy It! This Liquid Is! Bit Like Coke](#)

Therefore, he thought of the simplest way, which was to ask Qin Lin to use this perfume formula to buy shares, even if he became the major shareholder and he worked for him.

He really wanted to create his own perfume brand. It was his dream.

Now, Qin Lin's new perfume gave him hope.

Huang Xin drove to Linlin Manor as fast as he could. After parking the car, he hurriedly ran inside, almost falling down awkwardly because of his weak legs.

...

In the tea room of the manor.

Qin Lin was also greeting the two of them.

It was Liu Yi and his father, Liu Shangchuan, who came to recuperate.

After Liu Yi received the notice, he was delayed by some matters. He only sent his father, Liu Shangchuan, over today.

Liu Shangchuan was already 65 years old. He was not young, but his body was too thin and weak. He was obviously malnourished.

At this moment, Liu Shangchuan was touching the tea tables in the tea room. His eyes lit up as he said, "it's all made of red sandalwood and yellow Rosewood. Such a large tea table, amazing, really amazing. And this tea set, it's definitely not old. They actually used an antique to make tea for guests.

"Son, you've finally found a good place for your old man this time. The air is good, the environment is good, and most importantly, there's a good tea table and tea set."

The old man took out the tea leaves he brought and started to make tea at the tea table.

liu yi shook his head at this scene. they had just arrived, and there were still the emperor's supreme set meal and linlin medicinal wine.

Then, he said to Qin Yang gratefully, "Boss Qin, thank you so much for giving me this opportunity."

When he arrived at the manor, he only saw two old men. He knew one of them was professor Ren, and the other seemed to be an academician.

there were only two people in the manor, which meant that not everyone could enter linlin manor. boss qin was already giving him face by calling him.

Naturally, he also felt that it was a very honorable thing to do, so he was naturally grateful.

"President Liu, you're welcome!" Qin Lin replied with a smile. Just as he finished speaking, he received a call from Huang Xin.

When Qin Lin saw Huang Xin again, he could smell the strange smell coming from him. He said in disdain, "Couldn't you have come after taking a shower?"

Of course, he knew what that smell was. It seemed that this guy couldn't wait to test it out with teacher Chu when he went back.

"Qin Lin, what kind of perfume is this?" Huang Xin asked hurriedly. How did you make it?"

qin lin really didn't know how to explain it, so he just made it up on the spot. you also know that I'm most famous for my medicinal cuisine and medicinal wine. These are all researched from Chinese medicine recipes.

it's the same for this perfume. The concubines in the ancient Imperial Palace asked an old Chinese medicine doctor to make it in order to fight for favor. I converted the formula of this perfume to more modern materials and remade it.

there were perfumes in ancient times? " Huang Xin was obviously dumbfounded when he heard this.

"Don't tell me you really think there's no perfume in ancient times?" Qin Lin asked with certainty.

hoho. Huang Xin didn't know how to answer. That was what he felt. From what he had learned, perfumes originated from ancient civilizations such as Egypt, India, Rome, Greece, and Persia.

However, the truth was right in front of him. Qin Lin had no reason to lie to him.

more importantly, their country's ancient civilization was more prosperous than ancient Egypt and ancient India. if they could make something, there was no reason that their country couldn't, right?

Did he discover something amazing about perfume?

This meant that the knowledge he had learned while studying abroad might be wrong.

Unfortunately, even if he told the outside world about this discovery, no one would believe him.

Huang Xin didn't want to think about it. He put on a pitiful look and held Qin Lin's hand."Qin Lin, please save me!"

Qin Lin asked about the strange smell on Huang Xin's body. Then, he suddenly asked,"Did you wash your hands on your way here?"

there doesn't seem to be any Kasaya in that taxi. Huang Xin didn't react for a moment.

"F * ck, you're so disgusting." Qin Lin immediately retracted his hand and went to the side to wash his hands, his face full of disgust.

When Huang Xin saw this, he smiled in embarrassment and followed them to wash his hands.

However, he still begged while washing his hands. Qin Lin, I'm counting on you this time. If you don't plan to develop and promote this perfume, you can use this perfume formula to buy a share in my company. I'm a professional.

"Go and make a plan contract for me." Qin Lin didn't refuse. After all, he had this intention, but he also said, " However, we are also discussing this matter. I hope you can understand."

"Don't worry, I understand this." Huang Xin's face immediately lit up. The family he grew up in naturally made him understand this more than anyone else.

Moreover, he had already made up his mind. As long as Qin Lin was willing to use the formula to become a shareholder and help him realize his brand dream, anything could be discussed.

After getting Qin Lin's reply, Huang Xin left in a hurry. In just one afternoon, he brought another contract to Qin Lin.

"So fast?" Qin Lin was a little surprised when he took the contract.

I'll get the lawyer to rush it out. You can find a lawyer to see if there are any problems with the contract. Huang Xin explained, appearing to be very open-minded.

For things like contracts, as long as one didn't haggle over so many things and didn't haggle over each and every clause, it would be very fast.

Qin Lin opened the contract and took a look.

He had read through quite a few contracts by now, so he was still able to grasp some basic things. However, when he saw that Huang Xin was willing to let him own the shares, he was surprised.

65%!

This seemed a little high.

Moreover, Huang Xin had only set one condition, and that was that the management rights of the perfume company would belong to him until he quit.

in other words, he could take back the company after Huang Xin retired.

Why did it seem like Huang Xin had come out to realize his dream and was doing free labor for him?

"Aren't you at a disadvantage?" Qin Lin couldn't help but ask.

Huang Xin shook his head firmly. what's there to regret? I just want to create my own perfume brand and prove my ability.

besides, I don't plan to let my child inherit this company. After all, I'm the only child. There's a bigger family business for my child to inherit.

"Eh!" "Then wouldn't it be nice if you just went back and inherited the family business?" Qin Lin asked, not understanding Huang Xin's thoughts.

"I have a dream!" Huang Xin said matter-of-factly.

"Ran ran." Qin Lin was at a loss for words. "You have dreams, but your child doesn't need them."

But thinking about it carefully, with such a big family business to inherit, what dream did he still need? This was a good birth that many people could not be reincarnated into!

Someone who had been reincarnated into such a good family and still refused to inherit the family business for the sake of his so-called dream was definitely out of his mind.

Therefore, there must be something wrong with Huang Xin's brain.

In the end, Qin Lin signed the contract. After that, all he had to do was to make changes to the ownership of the shares and related rights.

Thus, Qin Lin became the big boss of Huang Xin.

Sometimes, things were just so wonderful.

After Huang Xin received the recipe, he started producing the perfume according to the recipe. He then gave it the name 'concubine Xiang' and submitted it for approval.

It was either Mei Xiang or Consort Xiang.

This name really made Qin Lin complain again.

Moreover, your city couldn't do this kind of assessment. It had to be at the city level.

As time passed, Huang Xin spent all his time modifying the production lines and machines in the factory. This way, after the audit was over, he would be able to produce perfume as soon as possible.

However, Huang Xin was a little dumbfounded when he received the approval!

Not only was it a restricted grade, but it was also classified as a special registration type.

Isn't this too strict?

What he meant was that he needed to register with his id to buy this perfume. What the hell?

.....

Time passed, and in the blink of an eye, it was December.

At Linlin's laboratory, Li Kai had also arrived with some anticipation.

He walked straight to the plum trees.

He was now certain that these plum trees were blue plum trees. They were already covered with blue plums and it was time to harvest them.

Li Kai stepped forward and plucked a few, but he couldn't eat them before testing them.

However, he crushed one and was stunned when he saw the liquid flowing out of it.

[Chapter 700 Shocking, Right? Two Ways?](#)

Li Kai looked at the dark brown liquid flowing out and frowned.

The liquid of the blue plum fruit was dark brown in color, similar to the color of Coke.

However, it was not a good sign for the juice of a blueberry to have the color of Coke. It might even be poisonous.

The blue plum tree might have mutated, but it might not be a good mutation.

After all, the color of the juice was not right.

Moreover, this blue plum didn't have a normal core. The core seemed to have shrunk a lot, and there were only two or three small grains.

Other than the outer layer of the peel, the inside was actually filled with that kind of liquid.

Li Kai hurriedly took the remaining blue plums back to the laboratory and immediately called a few laboratory assistants to help with the test.

This way, the speed would be faster.

Linlin's laboratory had Chen Shengfei and Marvin's 400 million investment. In fact, the money had not been used up yet. After that, Linlin watermelons continued to be sold, and the return of the money was not small.

As such, Li Kai had asked Shen Li to recruit more and more laboratory staff for the laboratory, and the senior researchers were poached from other laboratories.

Linlin's current state, coupled with the high-end technology donated, was still very famous, so it was possible to poach high-end research talents.

An ordinary Laboratory Assistant would be hired by a graduate student who had just graduated.

these people were usually studying the crops that had mutated, so they had not come into contact with special soil for the time being.

After all, to Li Kai's knowledge, the elements in the special soil would be exhausted sooner or later, so he couldn't just rely on the special soil.

A laboratory still needed to have its own research strength. Right now, it was focused on researching these genetically mutated crops, and in the future, it would be able to research new species.

Naturally, the more people there were, the tighter the security at Yun Fei's side would be.

Li Kai and the other assistants did the tests together, each of them checking one aspect of the situation. Soon, they got the results.

Professor Li Kai, although the juice of the blue plum is strange, it doesn't contain any harmful substances.

"I don't have any harmful substances here either. Instead, I have all the nutrients that fruits have."

yes, the vitamin content is very high.

"..."

Li Kai didn't find any problems with his own test, so he took out a blue plum, washed it clean, and put it in his mouth to taste.

The outer layer of the fruit was very crisp, and it broke with a bite. Then, the juice inside wildly overflowed.

At that moment, Li Kai revealed a look of disbelief.

"This smell is so sweet."

His face even revealed an expression as if he had seen a ghost.

Was she joking with him?

He felt like his mouth was filled with the taste of Coke.

did he get coke from eating blue plums?

The key was that the taste and texture were surprisingly good. It was even better than the coke he usually drank. It even had an indescribable refreshing and thirst-quenching feeling.

li kai didn't know how to describe this incredulity.

He quickly instructed one of his assistants, "Do you have Coke? go get me a glass of coke."

The assistant was a little confused. He did not understand why professor Li Kai wanted Coke.

However, since professor Li Kai wanted to drink Coke, he had to have it. The experimental assistant immediately ran out and soon came back with a bottle of eternal Coke. He poured a glass for Li Kai.

Li Kai took a sip of the coke and frowned.

What the hell is this?

He had just eaten the blue plum, but why did he feel that the Cola was so lacking?

He then took out a blue plum and put it in his mouth. With a bite, the crisp skin cracked open and the juice inside gushed out again.

It still tasted like Coke, but it was much better than the coke just now.

this time, li kai was really in disbelief. he hurriedly left the laboratory and went to the experimental sites.

Even if he didn't have a business mind, he realized that he might have made something amazing with the special soil this time.

Winter had arrived in December. The temperature dropped, and everyone had to put on their coats.

Naturally, winter had a huge impact on the tourism industry, especially in tourist attractions that focused on scenery.

This was because when winter came, all living things would wither. The trees would no longer have green leaves, just like some ranches. The grass would become very withered and yellow, without any life.

However, it was different in Linlin farm. Although quality 2 Dogtooth grass could not be grown in other places, it was not limited by seasons in Linlin farm. Even in winter, it was still green and very beautiful.

Therefore, Linlin Ranch seemed to have entered an out-of-season state of a scenic spot. After winter, the number of tourists in the scenic spot had increased.

Naturally, Linlin Manor was not affected by the winter.

The plants in the manor were all specially selected by Qin Lin and were not affected by the season. Even the flowers had a long flowering period.

And the air was as good as ever.

Naturally, only the guests who were qualified to enter this place to recuperate could enjoy the scenery.

qin lin's office.

He looked at the perfume Review report that Huang Xin had sent over and was a little stunned.

The perfume made by Jean's perfume formula was indeed very strong, and it was very helpful for a couple's harmonious life.

However, he had previously neglected the danger that this thing could bring.

The verification requirement was that one needed to register their ID card to purchase, and they could only go through the special product section, which was classified as some entertainment products. Each bottle also had a special number.

Many people didn't understand the dangers of this thing, but in fact, there were many dangers, such as the young ladies at the nightclubs. With this, they would definitely be successful.
