

The Game 741

[Chapter 741 346 The Dwarf Ah Ni: Are You Looking For A Job?](#)

Time passed.

In the blink of an eye, it was the end of the year again. The companies in the country were also preparing for the holiday. Soon, it would be the Chinese New Year filled with smoke and the sound of gunfire described in foreign countries.

Linlin villa, Linlin laboratory, and Linlin food company were also preparing for the new year. This year's Annual Meeting had to be more lively. After all, there were so many more employees.

However, there was also a problem. There was no place that could accommodate so many people. Even the county Hall couldn't accommodate so many people. Therefore, they had to find several places to hold the event at the same time.

This year, the county Hall could only invite senior management and outstanding employees every month.

The total number of outstanding employees in the three companies every month was also very high.

However, this was only for the time being.

The newly developed area in the county had a large Stadium that could accommodate tens of thousands of people.

This was a bit of an image project, but to promote the city, these facilities would also add points, provided that they didn't waste money and people.

It just so happened that your city's current tax revenue made many cities envious, so they could afford it.

Next year, Linlin's company would be able to rent the stadium and invite the three companies' employees to the annual meeting.

...

Linlin Manor Office.

Lin Lanzi was holding a list of information and reporting to Qin Lin. " the guests invited to this year's annual meeting are the agent of linlin ketchup. president cheng has brought 20 1000 yuan red packets, president li has brought 20 1000 yuan red packets, and the agent of linlin leisure tea in shanghai has brought 20 1000 yuan red packets, 2 5000 yuan red packets. the one who has brought the most red packets is the agent of linlin leisure tea, president wang. he has brought 20 5000 yuan red packets, and 50 1000 yuan red packets. "

These red packets were naturally given to the employees at the annual meeting to draw prizes. The employees who won the prize would be able to get the money in the red packets. It was considered a kind of benefit.

lin lanzi was the one in charge of all these matters, and she was fully in charge of this year's ivory tail banquet.

On the other hand, Wang Yan had brought 70 red packets in one go, which was 150000 Yuan, giving him a lot of face.

Lin Lanzi continued, " director Chen and director Ma's own companies are holding a banquet. However, they've both sent red packets. They're five carolages and five lanyis.

"A car?" Qin Lin couldn't help but be surprised.

This was definitely a huge sum of money for ordinary employees, but for Chen and MA, 600000 Yuan was just a small amount.

"Boss, what kind of red packet gift should we prepare?" Lin Lanzi asked again.

Qin Lin thought for a moment and said, " old Chen and old Ma have already gotten 10 cars. This way, Linlin villa, Linlin food company, and Linlin laboratory will each have 10 cars. In addition, Linlin food company and Linlin laboratory will each take out a house in you city as the final prize. Only outstanding employees can participate in this lucky draw.

" in addition, linlin villa, linlin food company, and linlin laboratory will pool some money to buy gifts for the lucky draw according to the proportion of employees. the employees who buy 200 huawei mobile phones, 400 small electric cars, hundreds of home appliances, and so on will be given special rewards for the performance. the employees who haven't won a prize will also be given a consolation prize. "

Lin Lanzi heard her boss say a lot in one breath and was so shocked that she opened her mouth.

In this case, this year's ivory tail lottery, excluding the cash and red packets, would get two suites, 40 cars, 200 Huawei mobile phones, 400 small electric cars, and hundreds of home appliances.

This was absolutely crazy for a small County's enterprise, and even for those super large corporations, this was a huge sum.

The biggest prize at last year's Annual Meeting was only 21 cars that cost 120000 Yuan.

If the employees knew about the gifts, they would be furious. If outsiders knew about it, they would fight to get into Linlin food company's new factory and expand their recruitment.

However, for the current Linlin company, this was just a small matter. There were long rows of figures lying on the account books of Linlin villa, Linlin laboratory, and Linlin food company.

Those numbers allowed him to say with confidence, " I'm not interested in money, and I've never paid attention to how much I've earned.

Qin Lin finally instructed, " "right, the lottery must be fair. there can't be any tricks."

"don't worry, boss. i'll keep a close eye on him." Lin Lanzi nodded and promised. Then, she left with a trace of nervousness and returned to the multimedia department.

It was her first time organizing such a large Annual Meeting and she was afraid that something would go wrong.

however, her boss had instructed her to do it well, and it had to be done beautifully.

when she returned to her office, she called for the media department and instructed, " everyone, put aside what you're doing. Let's start preparing for the annual meeting.

Upon hearing about the annual meeting, the people in the multimedia department were obviously excited. This was something that most of the staff were looking forward to.

"Manager Lin, what are the prizes for this year's Annual Meeting?" A girl from the multimedia department asked curiously.

Lin Lanzi didn't hide anything and said directly, "Two suites, 40 cars, 200 Huawei phones, 400 electric cars, and many home appliances and red packets."

These words stunned everyone in the multimedia department. They were all in disbelief and were clearly stunned.

They had only seen the news of cars being drawn at annual parties. Furthermore, only those super-large corporations had such standards.

[Chapter 742 346 The Dwarf Ah Ni: Are You Looking For A Job?](#)

lin lanzi gave another order to her subordinates, then began to contact the linlin laboratory and linlin food company.

After all, the boss had said that the money had to be paid by three parties together, so she had to contact them first.

Since boss Qin Lin had said so, Linlin food company and Linlin laboratory would naturally be happy to pay.

In the end, he just had to get Zhao moyin to sign it.

This sum of money would also be transferred to Zhao moyin's side, and Zhao moyin would settle the bill according to the purchase list.

After the money issue was settled, Lin Lanzi naturally contacted the people from Linlin food and Linlin laboratory to discuss the Annual Joint Conference.

Even the three companies had to contribute their people, work, and programs.

For this reason, she added all the Department managers and factory managers of the three companies into a group.

When Kong Lin was added to the group, he was at home. He had now been transferred to Linlin pharmaceutical factory as the director.

When 211 graduated from University and ran back to you city to work in a small county factory, many students mocked him. Some students even had grudges with him and joined a big company. They even compared him to others.

At that time, Linlin food company was still a very small company and not very famous. The factory was very small and only had a few production lines.

But now, a year had passed, and everyone knew about Linlin food company. Everyone knew the potential of Linlin food company, which would become a giant in the future.

A year had passed, and he was now the director of a factory in Linlin food company.

Many of his classmates were envious and asked him if Linlin's company still needed people.

The people who had mocked him at the beginning were all silent. The classmates who had pulled him out to serve as a foil when they entered the big company were still small group members after a year. They were far from being promoted.

It could be said that in his class, other than the rich second generation, no one else was doing better than him.

This was the importance of making a choice, and he had definitely made the most important and correct choice in his life.

Moreover, he heard that President Deng had already received the company's option reward, and the company's senior management would also have a term option reward plan.

He was full of energy now, and his next goal was to level up again and reach the lowest option reward level.

The WeChat group had already started chatting.

Kong Lin was also very puzzled as to why such a group had suddenly been created.

The group leader's name was Lin Lanzi. He knew this person, the beautiful manager of Linlin villa.

She was definitely very famous in Linlin company, and many people called her goddess.

However, no one dared to have any thoughts about this kind of beauty who was beautiful, had a good figure, had a great temperament, and held a high position. They were intimidated and could not resist.

However, he had no interest in this manager Lin. Instead, he looked at the graceful figure who was cooking next to him. His fiancée was also very beautiful.

As the director of Linlin food company, he was definitely a high-quality young man in your city, so he could naturally find a high-quality girlfriend.

His girlfriend, Guo wanru, worked in a bank. She was very much in line with his taste. They met at a party and had been together for a while.

Kong Lin looked at the WeChat group, and when he saw Lin Lanzi's message, he immediately stood up in shock. "I'll f * ck!"

what's going on? why are you making such a big fuss? " Guo Ruru asked in confusion.

"It's about our company's Annual Meeting," Kong Lin couldn't help but explain.

"What's so strange about an Annual Meeting?" Guo Ruru asked nonchalantly. Our bank is also holding an annual party!"

Kong Lin handed the phone to his girlfriend. "See for yourself!"

guo ruru also exclaimed in surprise when she saw the message in the wechat group. " "Hubby, is this the list of gifts for your company's Annual Meeting? Even a house and a car, and so many gifts, the winning rate is very high. Your company's employees are so lucky."

Kong Lin's girlfriend was not the only one who knew.

The gifts from Linlin's company for this Annual Meeting were quickly posted on WeChat moments.

In a short period of time, it spread like crazy in you city.

Seeing the gifts for the annual meeting, everyone couldn't stay calm. To be honest, when had the people in you city ever seen such a scene?

Countless people posted on their moments to express their envy. The title was: Someone else's company!

Many people had even started to use their connections to ask if Linlin company was hiring after the new year. Once they did, they would leave without hesitation.

In you city, as long as one could work at Linlin company, they would never consider another company.

The bosses of the companies in you city naturally saw the list of gifts from Linlin company.

However, they could only remain silent. They had no choice. They couldn't learn and couldn't compare.

what kind of company was linlin company? what kind of company were they? They were not on the same level at all.

Naturally, the county had also received the news.

When sun Xian saw the list, he asked Chen Li in surprise, boss Qin is so generous this year. The gift list is even higher than Penguin corporation's last year. Two suites and 40 cars!

" sun xian, " chen li said from another perspective, " this is also because linlin company is indeed very strong. when linlin company fully develops, it will also be a super company. "

"en!" Sun Xian nodded.

Everyone could tell that Linlin company would become a super company.

The most important thing was that Linlin company was an industrial company.

"After the annual summary, the first seat in the first row will definitely be Mr. Qin's." Sun Xian laughed again.

Chen Li nodded his head.

If boss Qin didn't take this seat, the other bosses in you city wouldn't dare to take it either. They didn't have the face to take it.

Chen Xian added, " let you City TV station continue to broadcast Linlin company's annual party this year. It's a good publicity for the county's annual party.

Naturally, the list of gifts for Qin Lin's company's annual party caused a sensation in your city, so the night of the party was even more lively.

The staff had long known about the list of gifts for this year's Annual Meeting and could not wait.

At the annual meeting, just the red packets alone would cause a tense atmosphere every round.

Whether it was a 1000-Yuan red packet or a 5000-Yuan red packet, it was an extra surprise. Who wouldn't want to win?

At the back, there was even more noise as they pulled out electrical appliances, electric bikes, and cell phones.

Although there were too many employees from all three parties and the venue of the annual meeting was divided into several locations, the lucky draw was done through a live video broadcast at the county hall.

When it came to the car selection segment, the atmosphere was pushed to the extreme.

It was a car, not a small gift.

Through the live broadcast, whenever someone won a prize, the winner would jump up in excitement, and then the people around them would show their envy.

40 cars, 40 spots, creating 40 cars.

As for the house drawing segment, the ordinary employees could only watch helplessly. This was specially prepared for outstanding employees.

In the end, the winners were all ordinary and outstanding employees from the production line. None of them were management.

The eyes of the two ordinary employees who had won the prize were almost red. They were so excited that they cried. A house meant a lot to ordinary people.

This also told all the employees that the lucky draw was fair. As long as they became outstanding employees, the ordinary employees in the production line could also win.

Imperceptibly, the enthusiasm of all the employees was aroused.

Countless employees had secretly decided to work hard after the new year and strive to be an outstanding employee.

Outstanding employees would have a chance to get a suite.

After the annual meeting, Linlin Mountain Villa, Linlin food company, and Linlin laboratory naturally went on holiday.

After that, Qin Lin and Qin Ren made an appointment to bring Zhao Moyin and his mother back to the old mansion for the new year.

This was because Liao Li had given birth to a girl, but this year, she went back with a baby.

Moreover, entering the village this year was clearly different from last year.

When they came back last year, there were not many cars in the village. Today, many people had new cars parked in front of their houses.

It was obvious that they had earned a lot of money from planting Linlin watermelons this year. Chilei society had earned a little money, and everyone wanted to buy a car first.

Naturally, when Qin Lin returned and passed by, everyone in the village looked at him with respect.

Everyone knew what Qin Lin's status was now.

Qin Lin and Qin Ren soon arrived at the old house and stopped the car. Qin Lin looked at the screen in his mind in surprise.

He had actually triggered the plot mission at this time.

The dwarf, ah ni, appeared in front of his character. "Hi, we meet again. Are you looking for a job?"

[Chapter 743 347-The Dwarf Ah Ni Is A Scammer As Always](#)

The dwarf ah Ni's sudden visit surprised Qin Lin.

Every time this guy came, he would give him an unexpected surprise.

It didn't matter if it was the albinism yellow tiger at the beginning or the Cola fruit at the end.

Moreover, when he saw the dwarf ah ni asking for a job, he seemed to have thought of something. He immediately controlled his game character to click on the dwarf ah ni.

The conversation reappeared.

[my companions have settled down in a house in ore town, but they are now looking for a job to support themselves. However, they have not been able to find a job. Can you help them? [I will be very grateful to you!]

As expected, it was about finding a dwarf to work for.

The story of ranches was a casual farming game.

In the beginning, players would find it interesting to grow horses, chickens, and cows.

However, as the game progressed, more land was opened up and more animals were raised. It took a lot of time to collect vegetables, eggs, and milk.

If this was repeated too many times, he would feel a little annoyed over time.

After all, the players still wanted to develop new playstyles and experience new storylines. They couldn't waste their time on such things.

So, the dwarves appeared.

There were seven Dwarves in ore town, wearing seven different colors of clothes. They were called chefne, naby, gulidi, dimitte, akya, tacak, and Bordeaux.

In the various versions of the story of the farm, players could hire them to work at the farm. They would be given the daily chores to do, and the players would be able to discover new ways to play the game.

in the old version of the game, to hire a dwarf, one had to give a gift that had reached a certain level of favorability. in this new version, it had obviously become a plot task.

Qin Lin was controlling his game character to accept the mission from ah ni when Zhao moyin's voice rang out, " "qin lin, why are you in a daze?"

only then did qin lin snap out of the game. he turned off the car and got out.

Zhao mochen also came down from the front passenger seat with little snow in his arms.

Lin Fen got down from the back seat and wangcai followed her. On its back was the squeaking red hair.

After Qin Lin got out of the car, he opened the trunk and was about to take out all the ingredients.

Qin Ren was the first to rush forward and help take out the vegetables from the trunk.

He knew that Qin Lin had brought a lot of dishes, so he didn't bring any.

With Qin Lin's dishes, who would still eat outside?

Qin Lin naturally wouldn't be stingy with the dishes.

The two families had celebrated it together last year, and they would still celebrate it together this year. He was fully in charge of the food, all of which were quality 2 ingredients that he had specially taken out from the game.

Seeing this, Qin shuigen and his wife also went forward to help. After taking all the ingredients in, Qin shuigen, his wife, and Lin Fen also began to prepare some offerings. The duck and pork had to be half-cooked.

Qin qinren and Qin Lin were arranged to decorate the old house and put up couplets.

After finishing everything, it was already time for Qin Lin to go down. At this time, Qin Lin had the time to look at the game in his mind again.

His character was still conversing with the dwarf, ah ni.

Qin Lin controlled his character and accepted the mission from the dwarf, ah ni.

[that's great. My companions are in the dwarves 'hut in ore town. Please go and invite them to work! [I'll give you a gift as thanks!]

After saying that, the dwarf ah ni quickly left the farm.

Qin Lin looked at the mission in the game and controlled his game character to leave the farm and head to ore town. Soon, he found the dwarf's house.

When he entered the small house, he saw seven cute dwarves with pointed ears playing and doing their own things.

because he had accepted the quest from ah ni, the game character could trigger a conversation when he walked in front of the child.

[are you going to hire me? Then can you find me some good food first? [I really want to eat sweet vegetables!]

As expected, he had to give food to these dwarves before he could invite them to work at the ranch.

Now, he roughly knew why the Seven Dwarves couldn't find a job.

You're the one who's looking for a job. The boss didn't mind your short height, but you're asking the boss to send you food first.

Wasn't this not worth a B point?

just like some confident graduates who had no work experience and asked for an annual salary of hundreds of thousands, which boss would want you?

Qin Lin went to the dwarves one by one and found that they all wanted different things.

Some things could still be found on ranches.

Some were going to other shops in ore town to buy.

For the sake of the dwarf ah ni, Qin Lin decisively controlled his game character to go back to the ranch storage room and put everything in the ranch into his backpack. Then, he went to the other shops in ore town to buy things that the ranch did not have.

After doing all this, Qin Lin went to the dwarves 'residence again and handed them their things one by one.

[that's great. These are my favorite vegetables. I can't believe you have such delicious vegetables. Let me work there!]

After he gave some vegetables to a dwarf, the dwarf began to talk.

Qin Lin clicked "agree." The next moment, the dwarf ran out of the house and headed to the farm, followed by the next dwarf.

Sure enough, after the dwarves gave their things, they all left the dwarven house one by one. All of a sudden, the surroundings seemed empty.

Qin Lin controlled his game character to leave the small house. When he returned to the farm, he saw that the Seven Dwarves were already wandering around.

[Chapter 744 347-The Little Dwarf Ah Ni Is A Scammer As Always 2](#)

when he opened the list again, he saw the operation interface for the dwarves. the general operation was that he could arrange for the dwarves to water, weed, plant and harvest the corresponding crops, and let the dwarves raise the products of the ranches.

After all, the dwarves could do the work that the game characters could do on the farm.

In other words, in the future, everything in the farm could be handed over to the dwarf. He could be a boss who did nothing. He only had to be responsible for fishing and looking at the mountain products.

As for the other things, if he wanted them, he could just go to the storage room and get them. He told the dwarves, and they could do it well.

In other words, he could be a hands-off manager for most of the things in the game.

After Qin Lin finished assigning tasks to the dwarves, he suddenly became interested in the dwarves who were already busy.

He entered the toilet in the old residence and entered the game with a thought.

As soon as he came in, he heard singing. A dwarf in red clothes was humming a song with unknown pitch with headphones. It was quite nice.

The red dwarf seemed to be called chefne, and he was currently planting a type of fruit from the level 3 plot.

Now that they were in reality, the dwarf was not as cute as the 2D image. Instead, he looked more naive.

Of course, the clothes they were wearing and their short height were the same.

"Boss, what do you think of the fruit I planted?" Chefne saw Qin Lin and asked him as if he was presenting a treasure.

Obviously, it was because of the system.

Because chefne knew the character in the game, he now knew him.

"Mm, well done!" Qin Lin walked up to chefne and praised him. He squatted down and put his hand on his head.

The dwarf was too short, and if he didn't respect his master, he wouldn't even be able to touch his head.

He was naturally thinking about whether he could bring the dwarf into the real world.

After all, these were real dwarves, not those dwarves in real life who suffered from dwarfism.

Although it would definitely cause a commotion if he brought the real dwarf to the real world, he still wanted to give it a try.

However, as soon as he thought about it, the system notification rang.

[the current creature is in an employer-employee relationship. You can not bring it out!]

"what's wrong, boss?" Chefne looked at Qin Lin, who was touching his head, in confusion.

"I'm fine, let's get to work!" Qin Lin smiled awkwardly. It seemed that there was a limit to this.

He found other dwarves to try, and the same thing happened.

In the end, he could only exit the game and look at the game screen again, waiting for some time.

he was waiting for the dwarf, ah ni, but he did not appear.

Logically speaking, he had already recruited the dwarf to work at the farm, so ah NI's plot quest should have been completed by now. However, he did not see ah ni appear at all.

After waiting for a while and not seeing any sign of ah ni, Qin Lin went back to the kitchen as he still had to cook for the night.

Everyone knew his cooking skills, so he couldn't run away from this kind of work.

when he arrived at the kitchen, qin lin saw zhao mochen and lin fen playing with qin ren's daughter.

The baby seemed to have become the main character. Everyone surrounded her and teased her.

Seeing him, Qin shuigen stepped forward and asked, " "Lin Lin, what are you doing tonight? Little Ren and I will help you."

"Uncle water root, then you and da Ren can help me wash the vegetables." Qin Lin said with a smile.

In fact, there was nothing much to help with in the cooking. It was just that during the new year, the atmosphere was important.

If everyone worked together, even if they couldn't help much, it would be good as long as the atmosphere was there.

For Qin Lin, cooking was a very simple thing. His current cooking skills included fish skills, shell skills, egg-fried rice skills, and medicinal cooking skills.

With the ingredients from the game, a table full of delicious food was made.

The quality 3 fish and the quality 3 Xiangshui Gong egg fried rice made Qin Lin and Qin shuigen praise them endlessly.

as qin ren ate, he said in an extremely exaggerated tone, " "Juan Zi, your cooking skills are really getting better and better."

Qin shuigen's face was also full of admiration. Juan Zi has been very smart since young. She learns everything quickly. She's not like you. I always pulled your pants off and spanked you.

" wuwu! " qin ren's face immediately turned bitter.

What's the point of talking about embarrassing childhood stories?

After the meal, the two families chatted about their parents for the whole night. They only went back to their rooms late at night.

"Lin Lin, Ren's daughter is very cute. I'm so envious of shuigen for having such a cute granddaughter." Before Lin Fen returned to her room, she deliberately said this to Qin Lin.

the meaning of these words seemed to be too obvious, causing a trace of awkwardness to appear on qin lin's face, and a trace of shyness also appeared on zhao moxi's pretty face.

Lin Fen went back to her room and suddenly came out again. She stared at Snowy, Wangcai, and Red Hair and shouted, "What are you guys doing? Come back to my room with me."

As she spoke, she carried Snowy into her room. Wangcai was also led away. Red Hair looked at his two companions and could only follow.

The meaning seemed to be even more obvious.

So, Qin Lin pulled Zhao Moyin back to his room. As soon as he closed the door, he pressed her against the door and said teasingly, "Mom, what did you mean by that?"

"Bah, you're asking the obvious." Zhao Moyin glared at Qin Lin. It was good that he knew, but he had deliberately asked to embarrass her.

Qin Lin naturally knew what his mother meant, but he still teased Zhao Moyin, "What do you think?"

"Liao Li and Qin Ren's daughter is really cute!" Zhao Mochen did not answer the question.

When Qin Lin heard this, he understood and whispered in Zhao Moyin's ear, "I understand. Then I won't be taking any precautions today."

"Hmph!" Zhao Mo pouted and took the initiative to wrap her arms around his neck. With a push of her legs, she hung on his body like a koala bear.

Not long after.

A creaking sound was heard in the room.

The old furniture in the old house was always a little unstable, and there would be some strange sounds when they moved.

However, this sound seemed to have become a bad taste for some people, and even a supplementary music for some sports.

Qin Lin obviously had this kind of bad taste.

.....

The next day.

Qin Lin looked at Zhao Moyu with a smile on his face. He even deliberately pressed his palm against the window and shook it, causing a creaking sound to be heard.

After last night, the wooden planks of this old object seemed to be even less secure.

This made Zhao Moye roll his eyes.

The two of them spent some time together before getting up. They washed up and went to the kitchen.

Lin Fen and Qin Shuigen, husband and wife, had already prepared breakfast. The elderly would always wake up earlier.

After having some breakfast, Qin Lin's gaze returned to the screen in his mind. The little dwarf, Ah Ni, had appeared again.

[we meet again. I've been observing in secret for a while, and my companion seems to be very happy working at your farm. So, to thank you, I'm going to give you a gift. Open it and see for yourself!]

The dwarf ah ni said as he threw a small bag to Qin Lin, then ran away.

a small gray bag appeared in his character's backpack.

Seeing this, Qin Lin immediately found a place where no one was and entered the game. Then, he saw the bag. Inside the bag was a black stone with some unknown runes on it.

At the same time, Qin Lin also saw the remark of the black stone:

[an unknown Stone: Unknown!]

[this is a stone of unknown use. It seems to have some information recorded on it. It's something that the dwarves picked up in the depths of Mount Saint Mary. You can go to Dr. Dott in ore town to see it!]

When Qin Lin saw the note, he subconsciously thought, " As expected of you, ah ni, this dwarf is as cunning as ever.

The dwarf ah NI's previous plot quests, whether it was red hair or white fox little snow, he had been treated as a hero. It was obviously something that the other party wanted to get rid of, but it was given to him as a reward.

This time, it was even more outrageous. He actually gave a stone that he picked up from the goddess mountain.

However, looking at the note, it seemed that this stone still had some use. It even suggested that he should find Doctor Dott. Perhaps there would be an unexpected surprise.

[Chapter 745 Exotic Attribute: Hair And Skin Recover, Hair Regrows!](#)

Although Qin Lin didn't know what unknown stone was for, he knew that it must have something to do with medicine.

Moreover, he was very curious as to how the dwarf ah ni could always pick up things from the Saint missus mountain. If it wasn't a Cola fruit seed, then it was this unknown stone.

He had been going to goddess mountain every day, but he had not seen any of these things.

With that thought in mind, Qin Lin logged out of the game and controlled his character to go to ore town to find Doctor Dott.

A moment later, the game character was in front of doctor Dott.

he clicked on doctor dott, and the plot dialogue appeared.

[this seems to be a stone recorded in the goddess's language. Can I take a look? There seems to be some mysterious formula recorded on it!]

The goddesses and Kappas were all fantasy-like NPCs in the story of the farm game, with special abilities.

He did not expect the stone that the dwarf ah ni had picked up on Mount goddesses to be related to the goddess.

Qin Lin chose yes.

he gave the unknown stone to doctor dott.

Then, a system notification appeared.

[Dr. Dott is in the middle of his research,]

After an unknown period of time, Dr. Dott's conversation reappeared.

[it's been deciphered. This seems to be the formula of an ancient mysterious elixir. It also seems to be used for soaking in hot springs. It has a very strange effect. I've written down the formula for you!]

As soon as doctor Dott finished speaking, a recipe appeared in his game character's backpack.

Qin Lin's eyes lit up. There was indeed something.

This was another recipe.

The dwarf ah ni was a scammer, but he never disappointed anyone.

However, what did the medicine used to soak in the hot spring have to do with the goddess?

He thought about it carefully.

The hot spring room in the game seemed to be right next to the mysterious spring where the goddess would appear.

So, this was the reason?

After Qin Lin got the recipe, he controlled his game character to return to the farm. Then, he entered the game again and saw the note of the recipe:

[hot spring powder recipe 03: grade 1]

[this is a special elixir specially provided to the nobles in ancient times. It can produce special effects when placed in water at a temperature of 30-40 degrees. Health effects +1, Hair Skin recovery +1, hair regeneration +1! [after using it, you can obtain the specific recipe.]

Qin Lin was a little stunned when he saw the remark of the elixir and subconsciously touched his head.

Luckily, he didn't need this.

This was the first time he had gotten something with such a weird function.

However, its function was weird. This hot spring powder recipe 03 was definitely a very awesome thing.

not to mention the health maintenance effect, the recovery of the skin and hair regeneration were absolutely amazing.

In today's society, how many men were troubled by this problem?

as they grew older, almost all men would face the problem of a receding hairline after they reached the age of 30.

Or rather, it wasn't just men. Even women were troubled by the problem of hairline.

For example, how beautiful was Yang Ming when she was young? Now, it was probably because her hairline was getting higher and higher, but her appearance had plummeted again and again.

If such a thing were to be sold, it would save many people and make many people go crazy.

He remembered that academician Hao, who was recuperating in the manor, was also bald. Now that he had returned for the new year, he could give it a try when he returned after the new year.

Moreover, this hot spring elixir reminded him of the emperor's medicinal cuisine. The emperor's medicinal cuisine had the attribute of prolonging life, so wouldn't it be a perfect match with this?

People who could use these two things for a long time would not only have a long life, but their hairline could also be saved at any time.

[do you wish to use the recipe?]

"Yes!"

Qin Lin made a decisive choice.

The formula in his hand instantly turned into specks of Starlight and entered his mind. At the same time, information about the formula began to appear in his mind.

The information of the herbs required for each formula appeared in his mind.

After getting the specific information of the formula, Qin Lin also logged out of the game. Then, he looked at the game on the screen in his mind again and controlled his game character to go to the seed store.

He had experimented with the emperor's medicinal cuisine secret recipe before. For this type of recipe, as long as the quality of the medicinal ingredients was higher, the attribute effect of the recipe would be higher.

For example, the emperor's medicinal cuisine. He used higher quality medicinal herbs produced by the game, which could increase his longevity by +3.

Otherwise, when Minister Lu brought the emperor's herbal dish recipe back to the capital city, even if the ingredients were the best in the capital city, the quality of the herbal dish would only be 1 at most.

Therefore, he could also plant the herbs needed for the hot spring powder recipe in the game. When he returned to you city, he could take them out to make the recipe.

After looking at the catalog of the seed shop, Qin Lin realized that the herbs he was going to use to make the elixir could be grown in a level 2 herb garden.

Wasn't this just right?

Qin Lin immediately controlled his game character to buy these seeds, then planted one of them in the herb garden.

After they were done, several people came to Qin Lin's old house. The leader was the new village chief, Qin Hui. It was said that the old village chief fell into a ditch on his bicycle and broke his leg, so he could no longer be the village chief.

Behind Qin Hui were a few old people from the village.

Qin Lin looked at Qin Hui and the others in confusion. He did not know the purpose of these people's visit.

After all, because of his father's illness, he didn't want to deal with these people who didn't do anything, but he didn't want to have much contact with them.

[Chapter 746 Exotic Attribute: The Skin On The Head Recovers, And The Hair Regenerates!](#)

His attitude should be understood by the villagers. Could it be that he came to find trouble during the new year?

Of course, Qin Hui knew about the situation in the village and Qin Lin.

Everyone knew that Qin Lin was a powerful man, but he only interacted with the people in the village who had helped the Fang family in the past.

Moreover, the people who had helped Qin Lin's family in the past were now doing very well, making everyone in the village envious, and even more so, many people felt regret.

he was also one of the bystanders back then.

He didn't borrow money from Lin Fen.

After all, in that situation, the other party couldn't afford it. Even if he did, he didn't know when he would have to return it, so he didn't lend it to her.

Now, he was more or less regretful. Who would have thought that Qin Lin would be so successful?

Outsiders didn't know who was in Linlin's company, but the villagers knew that it was Qin Lin.

However, there was no medicine for regret in this world.

Moreover, there was a big event that concerned the entire village today, so he had no choice but to bring his men to the door.

Qin Hui stepped forward and said to Qin Lin awkwardly, "Qin Lin, there's something I need to tell you. Now that all the villages have built ancestral halls, our village's ancestral hall will be built as well, so I want to ask for your opinion!"

The construction of the ancestral hall was a major event in the village. Under normal circumstances, there would also be a ranking list after the ancestral hall was built.

There were usually two names on the list.

One was the list of repair donations.

One was the status list.

The higher the donation, the higher the status.

Generally speaking, the one with the highest status in the village would also donate the most. Therefore, most of the time, there was only one ancestral hall ranking in some villages.

After all, no one would be so insensible as to steal the limelight from the person with the highest status.

Qin Lin must be the most important person in the village now, so they had to inform him about this and even ask for his opinion.

Otherwise, not saying a word was equivalent to disrespecting the other party. If the other party was angry and did not allow the village to grow watermelons, everyone would have to hide and cry.

Qin Lin wouldn't do such a lowly thing, but he couldn't ignore the ancestral hall. Their village was considered to be a village with the same surname, and everyone had the Qin surname.

Therefore, there was a common ancestral hall in the village. During the new year, everyone had to go to the ancestral hall to pay their respects.

The ancestral hall was no small matter for anyone.

Therefore, when he saw that Qin Hui and these old people had come for the ancestral hall, Qin Lin's attitude also eased a little. He said, "the village wants to build an ancestral hall? What's your renovation plan?"

yes! Qin Hui hurriedly said. the village has decided that every family will donate a little and then everyone will work together to repair the ancestral hall. We just want to ask for your opinion.

The general meaning of these words was that they would repair it however you wanted to, and they would listen to you.

Usually, for such opportunities, if there were big shots in each village, they would pay to make it Grand, and the other villagers would just be responsible for running the errands.

Qin Lin was definitely a Big Shot in their village now.

Qin Lin naturally understood what Qin Hui meant.

He also knew that under such circumstances, as long as one had some ability, they would express their thoughts.

He didn't want to pay attention to the villagers, but he also had a share in this ancestral hall, so he couldn't ignore it. He also said, "how about this, we'll build the ancestral hall as Grand as possible. The villagers will donate according to your original plan, and I'll pay for the majority. I'll ask uncle shuigen to keep an eye on this matter.

Although he didn't mind spending a sum of money to repair the ancestral hall, he wouldn't be generous enough to take away the money that the villagers should pay.

we don't have this friendship.

"Understood, understood. When the time comes, we will hand over the finances for the repairs of the ancestral hall to Shui Gen." Qin Hui said immediately after hearing Qin Lin's words.

Since Qin Lin was willing to pay for the renovation of this ancestral hall, they would make it more magnificent according to Qin Lin's wishes.

This way, when the ancestral hall was built, the entire village would have some face.

As for letting Qin shuigen keep an eye on the finance department, they didn't dare to say anything. After all, the money was paid by Qin Lin and everyone knew the relationship between Qin shuigen and Qin Lin.

Qin Lin was also qualified to make this appointment.

Qin Hui immediately said, "Qin Lin, the restoration of the ancestral hall has been decided. We will start work after the new year. So, on the third day of the new year, the whole village needs to pay respects to the ancestors and pray together.

Qin Lin nodded. got it. I'll be there. You guys can leave if you don't have anything else to say!

After getting Qin Lin's reply, Qin Hui and the few old men heaved a sigh of relief.

things had finally come to a satisfactory conclusion.

Moreover, through this ancestral hall incident, the relationship between the village and Qin Lin should be able to ease up a little.

The third day of the new year was coming soon.

After Qin Lin and Qin Ren's families finished their breakfast, they set off together to the ancestral hall in the center of the village.

Because everyone in the village knew what was going to happen today, all the people in the village, young and old, had arrived long ago and filled the ancestral hall.

When Qin Lin and Qin Ren arrived, they naturally attracted everyone's attention.

Once a person reached a certain status, his position would be the center of attention, and everyone would either be envious or respectful.

Qin Lin had obviously reached that position a long time ago. He was the boss of Linlin company. The internet said that he would be big shots like big Boss Ma and Big Boss Ren in the future.

Now, the whole village made money by growing watermelons from Linlin's laboratory.

After tasting the sweetness of Linlin's watermelons, no one was afraid that Qin Lin's words would make everyone lose their profit.

Some people in the village had offended Qin Lin's family very badly in the past. At this time, these people also quietly shrank back, not wanting to be seen by Qin Lin.

With Qin Lin's current status, as long as his identity was known, ordinary villagers would feel pressured even if they did not do anything or say anything.

[Chapter 747 Exotic Attribute: Hair Regeneration, Hair Regeneration!](#)

Qin Hui had been waiting for a long time. He pushed the crowd aside and welcomed Qin Lin in. The villagers did not dare to stop him and made way for him.

In ancient times, there were many locked rituals for praying to the ancestors. One ritual would take a lot of time. However, in modern times, these rituals were basically simplified. They were even just a simple formality, focusing on the atmosphere.

Qin Lin's village was like this. The ceremony was very simple. An old man in the village would pray, and the others would offer incense to pay their respects.

The only difference was that the old people in the village used to hold the incense in the first place, but this year, those old people all stood at the back and put Qin Lin in the first place to highlight his position.

After all, his current status was there.

in modern society, reputation was important. even if one was highly respected, one had to be virtuous.

Other than being old, the few elderly people in the village were not virtuous at all.

Qin Lin's position naturally made all the younger generation in the village envious. At the same age, they could only stand behind their parents. Who didn't want to be in the limelight and lead the show like Qin Lin?

Unfortunately, Qin Lin was Qin Lin, and they were them. They could only be envious.

Lin Fen, on the other hand, was very proud.

She could think of the days before her husband's death. She had to borrow money from all the families in the village and had to endure the cold looks and ridicule. Now that her son was capable, she felt proud.

After the ancestral worship ceremony ended, Qin Hui and the rest of the villagers obviously wanted to get close to Qin Lin, but Qin Lin simply left.

He could help with the ancestral hall, but that didn't mean he would care about the people in the village.

This also made Qin Hui and the others sigh silently and feel helpless.

After the third day of the new year, Qin Lin also left the village with Zhao Moxi, Lin Fen, and the others, returning to you city.

When they returned to Linlin villa, the villa's staff had already started to clean up and prepare. After the management positions were fixed, Qin Lin and Zhao moyin did not need to worry about these things. The managers of the various departments would arrange everything.

After returning to the manor, Qin Lin continued to plant the medicinal herbs required for the hot spring elixir in the game herb garden. After spending some time, he finally gathered all the medicinal herbs required for the hot spring elixir. Moreover, they were all Grade 2 medicinal herbs.

After that, he also took out the medicinal herbs and entered the special area inside the manor to start preparing the hot spring powder.

After Qin Lin made the hot spring powder, he immediately entered the game with it. He saw the attributes of the hot spring powder made from quality 2 herbs:

[special hot spring powder: 2]

[this is a special elixir specially provided to the nobles in ancient times. It can produce special effects when placed in water at a temperature of 30-40 degrees. health effects +1, hair skin recovery +2, hair regeneration +2!]

after using the grade 2 herbs, the attribute effect of the hot spring powder was indeed higher than what was described in the recipe. it became +2, but it did not have a +3 attribute like the emperor medicinal cuisine after using the grade 2 herbs.

This was probably due to the level of the formula itself.

After learning the properties of the hot spring powder, Qin Lin also logged out of the game with it. Now, he was just waiting to test the effects of the hot spring powder.

Two days later.

Academician Li, academician Lin, and academician Chu also returned to the manor. They didn't have to be in such a hurry, but the recovery days in the manor were too good, so they didn't want to waste time. So, he asked Minister Lu to arrange for someone to send them over.

When academician Hao got out of the car, he subconsciously touched his bald head.

This was a habit he had left behind in the past. When he was middle-aged, he often felt cold when the wind blew on his bald head. He had the habit of touching it with his hand.

This habit had been left behind as he grew older.

"Oh, academicians, you're finally here." qin lin was the one who personally went out to welcome the three seniors. when he looked at academician hao, he couldn't help but say, " "Academician Hao, you're finally here. I've missed you."

However, academician Hao clearly felt that there was something wrong with boss Qin's enthusiasm.

[Chapter 748 What Is A Group Organization? This Effect Is Heaven-Defying!](#)

Academician Li, academician Lin, and academician Hao all had their check-in information, so they didn't have to go through the complicated registration process. They just had to refresh their ID cards and check in.

Qin Lin brought the three seniors to swipe their ID cards. After that, he smiled and said to the three of them, " the three seniors must be tired after a long journey. Shall I arrange for you to go to the hot spring first? "

Of course, they would have to go to the hot spring first before they could get academician Yan to use the hot spring powder.

Academician li and the other two were interested.

"Perfect, I also want to do fish therapy," academician li immediately said.

Academician Lin nodded. me too. When I went back for the new year, my youngest son heard that I wanted fish therapy. He even took me to do one, but the fish therapy was not as effective as boss Qin'S.

"I also miss the fish therapy in boss Qin's shop." Academician Hao also said immediately, but he didn't notice that Qin Lin was already staring at his very prominent head.

Qin Lin did not hesitate and called Gao Yaoyao as well.

After a while.

Academician li and the other two were led into the hot spring area. They changed into special clothes and entered the three hot springs.

Three servers pushed in a aquarium.

Inside were densely packed kissing fish.

The baby fish seemed to have realized something as well, and they swam very happily in the aquarium.

Two of the waiters began to pick up special tools and began to put the kissed fish from the aquarium into the hot spring where academician li and academician Lin were.

The third waiter took out a special powder and squatted down in the hot spring where academician Lin was. He started to sprinkle it.

The elixir had a faint smell of medicinal ingredients, but it was not unpleasant.

Academician Hao was a little puzzled and asked,"How do I scatter the powder here?" Isn't it the same as academician Li's fish therapy?"

The waiter immediately explained, " academician Hao, this is specially arranged by our boss for you. This is our club's new hot spring program. This medicinal powder has a nourishing effect. Furthermore, the medicinal effect is very effective for the skin and scalp tissue recovery. The boss said that you are the first person to experience it, academician Hao. In the future, if there are others who come to the manor to recuperate, it will depend on the arrangement if they want to experience it.

when academician hao heard this, he was quite happy. " so I'm the only one who can experience it. Academician li, academician Lin, are you jealous? "

However, as he spoke, he felt that something was wrong.

Mass scalp tissue recovery?

He subconsciously touched the top of his head.

Wasn't this just hair?

boss Qin, this is the person who weighed the weights. academician Hao suddenly did not know whether to laugh or cry. At his age, he did not have any qualms about this.

It was just that he really didn't react in time just now.

Academician li couldn't help but laugh. it looks like boss Qin has something good. His arrangement is definitely effective, but it's unfair. Why can't academician Lin and I experience it? "

"Even though we're not as exaggerated as you are, we still have very few community organizations," academician Lin said with a nod.

Although they were old, who wouldn't want to have more hair?

Academician Hao smiled and touched his head.

Even if boss Qin's elixir was effective, could it turn the desert into a dense jungle?

After a few decades, the hair follicles of his scalp should have long been dead.

However, he was still looking forward to it. After all, boss Qin's reputation was still there. The things that the other party brought out would definitely be effective.

moreover, he could not control the gazes of the people he had been facing for decades. he could naturally feel that there was always attention on his head.

As he thought about it, director Yan actually could not help but want to doze off.

they were already a little tired from the journey, and soaking in the hot spring would indeed make them a little tired.

Academician Hao could not help but fall asleep soon after.

Academician li and academician Lin had already closed their eyes and were breathing steadily.

Because of the attribute effects of the kiss fish, they naturally fell asleep more easily.

The old man couldn't stay in the hot spring for too long. After a while, the waiter woke the three of them up.

Academician Hao came out of the hot spring and subconsciously touched the top of his head. He then smiled bitterly. Even if the medicinal powder was effective, it could not have happened so quickly.

The three academicians returned to the manor.

For the first meal, Qin Lin prepared a quality 2 ordinary herbal dish for the three academicians.

"Boss Qin is the best!"

"Yeah, it's enjoyable, there's good food, and the air is good."

what a pity. After this recovery period is over, I'll have to wait in line for a long time to come again.

"I think I still have one more chance even if I queue up. This is a treatment arranged by the hospital, not a normal recuperation!" Academician Li suddenly said.

Academician Lin and academician Hao looked at him in unison.

They were old, but they still paid attention to some things online and knew about Versailles, whom the young people were talking about.

Academician Li might be with Versailles.

They were willing to give the other party the title of being disrespectful to the elderly.

The night passed by quickly.

The next day.

Academician Yan had a good night's sleep, and he felt very comfortable.

When he woke up this morning, he felt a different feeling on the top of his head. It was a little itchy, as if there were ants crawling on it.

He subconsciously walked to the mirror and looked down. It was still very smooth, like a desert.

[Chapter 749 What's A Group Organization? This Effect Is Heaven-Defying! 2](#)

However, that itchy feeling was not right. It was something he had never experienced before.

Academician Hao felt that the medicine might have taken effect. The skin on his head recovered and his nerves were activated. He should feel something.

This made his face full of joy, and he even looked forward to it.

He then went out to have breakfast with academician Li and academician Lin.

As soon as academician Li saw him, he asked, "academician Hao, how is it?" The medicine is effective?"

academician hao immediately replied, " it seems to be working. my scalp felt a little itchy this morning. it seems like my nerve endings were touched. it's probably the hair follicles inside recovering. "

This made academician Li and academician Lin a little curious.

Was the effect of the elixir really so fast?

Academician Hao wasn't completely sure, but he would know after a few tries.

Therefore, he was very cooperative in the hot spring today and waited for the waiter to put the medicine in.

On the other hand, academician Li and academician Lin also requested to soak in the medicine.

No matter what, no matter how old a person was, they would still be curious.

After hearing academician Hao's words, it would be strange if he didn't give it a try.

For the next two days, academician Hao requested to make a hot spring elixir twice a day at the hot spring.

...

A new day had arrived.

Academician Hao got up as usual and touched the top of his head out of habit. Suddenly, he was stunned. "Yi!"

This was because the feeling was different.

He subconsciously got up and went to the mirror. Then, he was shocked to see that there were more black dots above his head.

It was the hair sticking out.

Although it wasn't a small amount, one could clearly see that it had grown quite a bit.

it was as if some green plants had appeared in the desert. it was very obvious.

Academician Hao was really surprised. Boss Qin's elixir was really effective, and it was surprisingly strong.

How much would it have been if this had happened decades ago? it was not that he had not thought of treating it back then, but the key was that it was useless.

If he had this kind of medicinal powder in front of him back then, he would have used it often no matter how much money he had to spend.

after washing up, director yan couldn't help but go out. when he saw director yan and director lin, he lowered his head like he was showing off a treasure for them to see.

"Are you serious?"

"Bones have grown out."

The two academicians were also surprised.

The speed was too fast, and the effect was too incredible.

Academician li couldn't help but say, "boss Qin's products are indeed very effective."

"Indeed," Academician Lin agreed.

Therefore, the three academicians continued to ask for the hot spring powder to be placed in the hot spring.

Although the kissing fish was good, it was more important to restore the group organization now.

...

Linlin Manor.

In the office, Qin Lin looked at the game on the screen in his mind.

The dwarves worked very hard and didn't slack off. They would only occasionally steal some food when they harvested the fruits.

Qin Lin controlled his game character to do some daily tasks while Gao Yaoyao went to the office.

after another year, this girl seemed to have matured. she was more confident and more charming.

It seemed that the position of manager had changed her a lot.

once a woman became confident, she would naturally become more beautiful.

Two women of the same appearance, one a manager and the other a waitress, stood together. Their confidence and temperament were different, and it was easy to tell who was bright and who was dark.

"Yaoyao, what's wrong?" Qin Lin asked.

boss, " Gao Yaoyao reported, " the elixir you gave me earlier is gone.

Qin Lin was surprised. the elixir I gave him was enough for academician Hao to use for a while. Why is it all gone? "

these two days, " Gao Yaoyao explained, " academician li and academician Lin have also requested to use the elixir when they go to the hot springs.

Qin Lin guessed the reason when he heard this and asked, " "How's the effect of academician Hao's medicinal powder?"

" boss, " gao yaoyao reported in surprise. " your elixir is very effective. i see that academician hao's hair seems to have grown a lot. "

Qin Lin couldn't help but be surprised by his words.

It was because the time was indeed a little short.

"You go do your work first, I'll get some for you later." qin lin said to gao yaoyao. he then went to take a look. from afar, he could see the difference above academician hao's head.

The black color could be seen at a glance.

The +2 Hair Skin recovery and +2 hair regeneration attribute effects were actually so strong?

If that's the case, even if it's a Grade 1 hot spring powder, it should be effective after half a month, right?

Even if half a month was not enough, a month should not be a problem, right?

For those who were troubled by the problem of group organization, which one of them didn't spend a lot of effort and time to solve this problem?

As long as it was effective, what was this little bit of time?

This seemed to be a very broad market.

Because even if they were not bald, who would not want to save their hairline?

Even if it was just to maintain the volume of hair, it would still be very good.

This was especially true for programmers, who would probably use it as a daily necessity.

After that, Qin Lin went back to the workshop inside the manor and made another batch of hot spring elixirs with quality 2 herbs. Then, he handed them to Gao Yaoyao.

for the rest of the time, academician hao, academician lin, and academician li still soaked in the hot spring powder twice a day, and they requested to use the hot spring powder each time.

Moreover, the three old seniors actually had a different feeling every day when they woke up after using it every day.

More and more hair appeared on academician Hao's head, and it was getting denser.

[Chapter 750 What's A Group Organization? This Effect Is Heaven-Defying!](#)

Academician li and academician Lin's hair, which was originally very sparse, became denser and denser.

more importantly, they realized that all the hair that grew out was black, not white.

This was a little shocking.

...

A week passed.

Qin Lin arrived at the villa early in the morning after delivering the things. When he returned to the manor, he saw the three academicians.

Academician Hao's originally bald head now had a crew cut, and he was no longer as barren as before.

Also, academician li and academician Lin's hair was a lot thicker.

That kind of hair volume was not something that old seniors of their age could have.

More importantly, he also noticed that academician Hao's hair was black. Even academician li and academician Lin's hair were black.

This effect was even more shocking. The attributes of hair, skin, and hair regeneration had such an unexpected effect? Or was it because of the health maintenance effects that it had such an effect?

"boss qin, why didn't i meet you decades ago?" Academician Hao couldn't help but say when he saw Qin Lin. Now that his hair had grown back, it was more or less a comfort to his decades of regret.

"Academician Hao, I wasn't even born a few decades ago." qin lin said with a smile. besides, decades ago, he didn't have the system, and he didn't have the story of the farm game.

Therefore, at that time, academician Hao was still bald.

"Boss Qin, can you take me to get a haircut? The length of the new hair is different from the previous one." As academician Hao spoke, he touched the top of his head.

This action made him a little embarrassed, as he was used to it.

He felt that he should change this habit, otherwise, he was afraid that his newly grown hair would be gone again.

of course, qin lin would fulfill academician hao's request. however, it was too troublesome to bring the academician out for a haircut. he called chen dabei and asked him to find a barber to come to the manor.

After receiving his boss's order, Chen dabei left the office and went to the parking lot!

As soon as he entered the parking lot, the security guard on duty greeted him respectfully, "Manager Chen!"

"En!" Chen dabei nodded and walked to his car.

another year had passed, and he had also changed his car to an audi. it turned out that he had already given that car to his wife.

As the manager of a Department in Linlin villa, his basic salary was very high. In addition to the Commission given to the employees of the villa, it was easy to afford an Audi A4.

Chen dabei left the villa and went straight to a barbershop that he often visited.

Seeing that he had arrived, the boss immediately said politely, "President Chen, what kind of hair do you want to cut today?"

It was no wonder the boss was so polite. After all, he knew Chen dabei's identity as the manager of Linlin Manor's security Department. To ordinary people, Chen dabei was now a Big Shot.

Moreover, this employee often came here to get his hair done.

" get someone with good skills to come with me to the villa, " chen dabei said. " i want to cut the hair of three big shots. "

President Chen, please wait for five minutes. I'll go with you after I'm done. The owner of the barbershop didn't dare to delay and decided to go to the safe spot himself.

After all, even President Chen had said that he was a big Shot, so his identity must be extraordinary.

Chen dabei nodded. A few minutes later, he brought the barbershop owner to Linlin Manor.

the owner of the barbershop was also shocked when he arrived outside linlin manor.

Everyone in you city knew that there was a high-end Manor in Linlin Manor, but no one had seen the inside. They had only seen videos on the internet and knew that this was a beautiful place.

He didn't expect that he would be lucky enough to come in today.

Moreover, the scenery inside was indeed very beautiful, like a paradise on earth. He was deeply attracted the moment he entered.

He couldn't help but take out his phone and take a picture of the beautiful scenery around the manor, and then post it on his WeChat moments.

Even if he just came in for a walk, he would post it on his moments to show off.

Seeing this, Chen dabei also reminded her, " " it's not a problem to take pictures of the scenery, but don't take pictures of the people. don't ask about the time either. after that, just focus on getting your hair cut. "

"I understand!" The owner of the barbershop hurriedly nodded. He wasn't stupid. He would make a fortune if he could come here once. Everyone knew that this Manor was high-end and that big shots lived here. He didn't want to court death.

Chen dabei also brought the barbershop owner to Gao Yaoyao and asked her to arrange for the hairdressers of academician Hao and the other two.

after a long time, the owner of the barbershop finished cutting the three academicians 'heads. then, chen dabei took him out of the manor.

Chen dabei knew how to be a good person. He sent him back to the shop and then drove back to the villa.

As soon as the owner returned to the shop, the barber, apprentice, and hair-washing girl all gathered around him and asked, "

"Boss, did you really enter Linlin Manor?"

"Boss, you're treating us today."

"Yeah, he's so lucky that he's treating."

"....."

These people had all seen the video he posted on his moments. To be able to go to Linlin Manor once was really an enviable thing in you city.

.....

linlin manor.

The three of them were very satisfied with the barbershop owner's skills. Although they could only have a crew cut due to their newly grown hair, it was very refreshing and neat, and they looked a lot younger.

This was not a joke. This was the change that a head of thick hair would bring.

"This one's pretty well-trimmed." Academician Hao had been looking at himself in the mirror for a long time. The dense forest really had a special meaning for someone like him who had lived in the desert for a long time.

then, he couldn't help but take a selfie with his phone and post it in a group chat software.

This group chat software wasn't an external software like WeChat, but an internal software developed by the Chinese Academy of Sciences.

the staff of the chinese academy of sciences usually used this software to communicate, and wechat was just a daily auxiliary function.

The group he sent was the group for academicians at the Chinese Academy of Sciences. There were only academicians and leaders like Minister Lu.

After he posted the photos, he noticed that academician li and academician Lin also posted photos.

The photo of the three of them with thick hair caused a stir in the group.

Especially when he saw academician Hao's thick black hair.

“? ? ? ?”Minister Lu.

“? ? ? ?”Academician 1.

“? ? ? ?”Academician 2.

.....
