

The Growth 159

Chapter 159 - 14: Void Divine Hall (3/3)

The different goals lead to different perspectives and viewpoints.

Normal gods would not consider matters after their death.

And the Fallen Ancient Gods lacked the resources and capability to experiment with having a Divine Abomination frequently ascend and descend dimensions.

Furthermore, Divine Artifacts like the Cup of Hygeia are extremely rare, and a Divine Abomination like the Hunting Fish, which can freely manipulate dimensions, is nearly impossible to replicate.

Of course, being hard to replicate doesn't mean there are none.

All Heavens and Myriad Realms are too vast; who knows if there's some god or race dedicated to studying dimensions.

It can only be said that in the gods and civilizations Li Hao can currently touch, the Hunting Fish is a phenomenon akin to a BUG.

Whirl... whirl... whirl...

Accompanied by a visible energy storm and void vortex.

The Hunting Fish once again returned to the Ascension Area and began to actively roam between different dimensional gaps.

Different worlds have different rules and are located in different dimensions.

And the Hunting Fish, which traverses the edges of worlds at will, seems destined to bring about calamity and unnamable misfortune.

Even if merely a shadow covers and overlaps with the world, it can bring confusion and panic to the creatures within.

However, having learned from the last lesson, the Hunting Fish knows that Li Hao seems to dislike it destroying worlds, so it didn't truly intrude those worlds it passed by.

Of course, this also relates to the Hunting Fish being well-fed.

Anyway, the Fallen Area has countless planets that won't resist, waiting for it to enjoy.

The Hunting Fish sees no need to risk angering Li Hao by hunting independent worlds in the Ascension Area.

The Hunting Fish is merely naïve and simple-minded, not truly an unthinking beast.

Whirl... whirl... whirl...

In the endless void, the concept of matter doesn't exist.

Frequently shifting dimensional gaps cannot possibly nurture life.

The Hunting Fish traverses through the endless energy storm and void vortex, rapidly reaching the location Li Hao predetermined, following the guidance of the Eye of the Creator.

.....

"Is that your new believer? A Divine Abomination?"

Seeing the existence of the Hunting Fish through a computer screen, Hua She couldn't help but let out an exclamation.

Honestly, Hua She considers herself not to be one of those ignorant gods.

But it was her first time witnessing a Divine Abomination choosing to have faith in a god.

"Is it a shallow believer? A true believer? Or a fanatic?"

Although she knew asking like this might be offensive, Hua She couldn't help but voice it out.

After all, Hua She always wanted Li Hao to become a qualified God of Gods—a dignified, powerful Supreme God, possibly with a touch of mercy.

Therefore, even out of her own duty, she had to figure out whether this Divine Abomination was exploiting the God of Gods' mercy.

"Hmm, I haven't really paid attention to that."

Not noticing Hua She's little thoughts, Li Hao said thoughtfully.

"If following your classification, it should be a fanatic, and the kind rather obsessed."

Upon hearing this, Hua She instantly fell silent.

Despite being unwilling to believe a Divine Abomination could be a fanatic, Hua She knew Li Hao had no reason to deceive her about this matter.

"Do you want it to use the Gate of Ten Thousand Realms and head to the location of the Long-Eyed God?"

Li Hao nodded while gently clicking on the Gate of Ten Thousand Realms icon on his phone.

Boom!

Immediately, an entity akin to a "black hole," tangible yet non-substantial, appeared at the center of the computer screen.

In contrast to this giant "black hole," the figure of the Hunting Fish appeared so small.

Vaguely, it seemed like myriad rainbow lights were brewing within the "black hole," connecting different locations across All Heavens and Myriad Realms.

Buzz!

Without the slightest hesitation, Li Hao directly threw the Evil God Mask into the computer screen.

Just like a stone sinking into a lake, the Evil God Mask quickly melded into the screen, appearing before the "black hole" on the screen.

Gulp!

The Hunting Fish, long waiting, decisively lunged and swallowed the Evil God Mask into its belly.

The Evil God Mask inherently possesses the power to possess and assimilate other entities, granting itself the ability to act independently.

The Hunting Fish's voluntary consumption of the Evil God Mask naturally activated this power, making it the new incarnation of the Long-Eyed God.

However, since Li Hao had already separated the spirituality from the Evil God Mask beforehand.

The Hunting Fish essentially only inherited the divine power of the totem, without truly becoming the incarnation of the Long-Eyed God.

Moreover, as the Hunting Fish inherited and acquired the power of the Evil God Mask, the Gate of Ten Thousand Realms before it gradually stabilized.

Whisk!

Myriad rainbow lights converged into physical forms at this moment, constructing a rainbow bridge reaching deep into the "black hole."

Cheering, jumping joyfully, and filled with overwhelming curiosity...

The Hunting Fish, without any hesitation, jumped into the "black hole."

Gasp!

In just the blink of an eye, the Hunting Fish crossed the distance of millions of worlds, arriving at a completely unfamiliar Earth Realm.

Different from other areas of the Ascension Area, the time-space dimension here appeared extremely chaotic.

Surging energy and temporal storms even made it hard for the Hunting Fish to control its constantly spinning body.

Fortunately, the Hunting Fish possesses powers comparable to gods, forcefully stabilizing itself in this endless chaos.

Whirl... whirl... whirl...

Utilizing its Void Engine to create a massive energy field.

Then using this massive energy field to counteract the chaotic external temporal dimensions, creating a continuous and stable normal space-time around it.

"What is that?"

Only at this moment did Li Hao, outside the screen, finally see the full view of this chaotic area through the Hunting Fish's perspective.

The chaos and disorder at the periphery were merely superficial.

What truly made the time-space become a dangerous malicious land was the broken world at its center.

Yes, this was the first time Li Hao discovered that after being shattered, a world didn't fall into the Fallen Area.

Even if a world is broken, even if its rules are disordered...

That broken world still arduously maintains its dimension without falling into the lower dimensional Fallen Area.

This unbelievable phenomenon is enough to refresh any god's understanding.

Most notably, through the Hunting Fish's perspective, that broken world formed a giant structure akin to a divine hall.

Towering majestic divine hall...

Unshakeable divine pillars...

And the vivid divine statue with vertical eyes...

This "Void Divine Hall" formed by the shattered world appears so lifelike.
