

## The Growth 180

Chapter 180 12: Celestial Tao System (3/3)

"Hua She, are you willing to become my apostle?"

Simplifying his emotions, Li Hao suddenly held up the small Hua She with one hand.

At this height, Li Hao and Hua She's eyes met on equal terms.

"Just like Yao Xin, become my Messenger, to guard this world for me. Are you willing?"

Faced with this sudden invitation, Hua She's eyes widened in disbelief, and her emotions were as tumultuous as a roller coaster.

"Me? Do I even have the qualifications to become your apostle?"

It was precisely because Hua She had spent enough time with Li Hao that she clearly understood the stringent conditions he set for choosing an apostle.

Ji Meng, who achieved the great feat of saving the world...

Yao Xin, who heralded the beginning of the Mythical Era...

The Merfolk Spirit, considered the 'Creator Incarnation'...

All apostles who ascended the "Divine Sequence" were unparalleled elites among beings.

"Qualifications?"

"If you aren't qualified now, wouldn't that make me, the 'Creator,' seem too lofty?"

With an inexplicable smile on his face, Li Hao's Celestial Eye on his forehead opened again.

"This is not a transaction; this is what you deserve."

Before his words had finished, Hua She suddenly felt her whole body heating up, a power seemingly inexhaustible pouring into her body.

At the same time, on the large screen of Li Hao's computer.

The program of the [Mountain and Sea Realm] operated automatically, broadcasting a scene at the peaks of the mountains.

There, a gigantic White Serpent, as vast as a mountain range, coiled among the mountains, weaving through the clouds.

The next moment, that enormous White Serpent suddenly broke through the cloud layers, darting towards the active sun.

That wasn't the Day of Sin!

That was the true sun!

In this mythical world, the sun was like the moon in water, a flower in a mirror — an existence to be yearned for but never approached.

Yet that soaring White Serpent seemed to shatter the rules maintaining the world's operation.

At this moment, all creatures in the Mountain and Sea Realm saw the White Serpent's actions, witnessing it inching closer to the real sun.

Initially, the beings of the Mountain and Sea Realm thought it was just a crazed Ascender.

It wasn't until numerous MinAseerpentg She also followed the White Serpent, dancing between the heavens and the clouds, that they realized it was the totem of the Serpent Race.

Swoosh!

As the White Serpent drew nearer to the sun, flames began to ignite around her.

It was a golden flame, enough to consume all things, the essence of the sun.

Under the envelopment of this solar essence, the White Serpent's face showed obvious signs of pain.

Even though she had entrusted her Divine Soul to Yao Xin, sharing her 'Immortal Body' to a degree.

But this Solar Fire, capable of reaching the essence of death, still exceeded the limits the White Serpent could endure.

In this mythical world, the sun was the source of all flame.

When gentle, the Solar Fire could foster life.

When enraged, the Solar Fire could destroy worlds.

In other words, the sun was the 'Divine Authority,' the supreme 'divine position'!

The closer one got to the sun, the more likely the White Serpent could become the Sun God of this world.

Just when everyone thought this height was the White Serpent's limit.

The massive sun in the sky unexpectedly began to descend.

Yes, that ancient and unchanging sun lowered itself for the White Serpent.

In a daze, the beings of the Mountain and Sea Realm, while feeling the world heat up, seemed to see the Creator's eyes opening again.

The descending sun was the Creator's eye.

.....

"As you wished, this is what you deserve."

Watching calmly as Hua She's body gradually dissipated, Li Hao murmured in a voice only he could hear.

As the Creator of the Mountain and Sea Realm, how could Li Hao not know Hua She's innermost thoughts?

Taking advantage of this opportunity, Li Hao fulfilled her long-held wish to become the Sun God.

Yet, just as Li Hao said, this wasn't a transaction; it was the reward Hua She deserved.

"Speaking of which, I'm also quite curious about the Winged Serpent God's experiences."

"Since that's the case, let's take searching for traces of the Winged Serpent God as a goal!"

Not until Hua She had fully returned to the Mountain and Sea Realm did Li Hao laugh and speak in his normal volume.

"However, before that, I must deal with this divinity."

Gently touching the divinity floating in mid-air, Li Hao's Celestial Eye immediately shot out a divine light.

Subsequently, the black and bloody divinity started struggling and twisting violently as if burned by intense fire.

Seeing this, Li Hao merely chuckled indifferently, commenting sarcastically.

"I knew you wouldn't die so easily; Hua She was still a bit too naive."

"Unfortunately, compared to the Candle Dragon, you fall far short; such little trickery can't influence your ultimate fate."

As he spoke, the blood and blackness within the divinity gradually retreated, replaced by the unique radiance of Li Hao.

It was a color indescribable by words, marking the first time he used the [Chronicles of Time] to modify the creations of gods.

The effect wasn't just good, it was unexpectedly successful.

In fact, ever since Li Hao used the [Chronicles of Time] to modify his computer, he had been pondering how to further upgrade.

Merely projecting the state of the Mountain and Sea Realm through the computer and conducting real-time surveillance during the day hardly met Li Hao's needs.

The reason Li Hao hadn't chosen something else as the projection and medium of the Mountain and Sea Realm in the real world was because the computer, a product of modern technology, held more potential.

Creating a program capable of 'automatically operating' to maintain world operations in place of Li Hao's true self was something he had always wanted to do.

However, the operation of a world wasn't something that could be handled by a simple program.

Compared to straightforward program logic, maintaining a world required some kind of chaotic dynamic balance system.

After all, even the standards of good and evil are always changing, let alone the continuous influence of so many factors and events within a world.

In this case, the divinity of an Ancient God daring to call itself the 'God of the Internet' naturally became the best choice for crafting this dynamic balance system.

Most importantly, compared to the world maintenance device obtained from the [Civilization Game].

A dynamic balance system crafted with his own hands clearly surpassed it in terms of safety and reliability.

"Since it's a system acting on behalf of 'Heaven,' let's call it the 'Celestial Tao System'!"
