

The Growth 231

Chapter 231 - 15: Heavenly Father's Treasure (3/3)

Divine Fall Realm, Port of Confusion.

This is a rare settlement in the Divine Fall Realm that is neither of the Undead nor the Intelligent Mechanism Camp.

Here, Seekers of Ascension from all Heavens and Myriad Realms, who wish to find a slim chance of opportunity, come to gather information and take on missions.

After all, even though Ascenders have already embarked on the long Ascension Ladder, they are ultimately not high-dimensional beings capable of existing independently from the world.

Basic needs such as food, clothing, housing, and transportation are also reflected in them.

Especially when the two Supremes opened the Divine Fall Realm.

These Ascenders from different worlds must exchange intelligence with one another to find the slim chance of becoming a God.

Naturally, a city with a complete ecological chain for Ascenders sprang up.

The first thing to confirm is that not all Ascenders coming to the Divine Fall Realm are here to become Gods.

For those large, even super-large Divine Pantheons, they already have their own pathways to divinity and have no need to compete with lone travelers for opportunities in the Divine Fall Realm.

Just like Li Hao and Maitreya's thinking, Ascenders from these pantheons often see the Divine Fall Realm only as a platform to understand and interact with other worlds.

Secondly, it should be known that the Divine Fall Realm is not an exclusive world for Ascenders.

Besides the Undead and Intelligent Mechanism camps, other mortal races from other worlds also come here for various reasons.

They are not fanatical about becoming Gods; more often, they serve as subordinate units to Ascenders, specializing in collecting intelligence and fulfilling desires for their Ascenders.

In this scenario, the Port of Confusion naturally became a convergence point for all Heavens and Myriad Realms.

Here, Ascenders regarded as "Demigods" in other worlds are a common sight...

Here, extraordinary races capable of flying in the sky and calling upon ghosts and gods are not rare...

Here, the convergence of magic and science fiction, individuals and civilizations, is commonplace...

Therefore, when Celestial Monarch Yan arrived at the Port of Confusion with two independent eyeballs on each side, no one was too curious about this peculiar "Demigod".

"Is this the 'Port of Confusion'?"

Without concealing the eagerness in his eyes, the Lord of Ghosts and Gods murmured with slight curiosity.

"No wonder it's called a 'port'; it truly is a 'port'!"

The powerful flying races, blocking the sun, slowly flew over everyone's heads.

In the distance, void airships full of sci-fi elements appeared and disappeared, moving between lower and higher dimensions.

[You just realized it?]

[This is a place deliberately created as a 'space-time rift'.]

It seemed that Duo Mu, who already had some insight, spoke at this moment, the pupils of his eyes emitting a peculiar glow.

The two Supremes opening the Divine Fall Realm was not merely an idle promise.

Apart from removing the protective barriers of the world itself.

This world also hosts various special zones between low and high dimensions, allowing beings below Gods to freely enter this world.

"A mere 'space-time rift' is insufficient to describe this place."

With a face as deep as the starry sky, Celestial Monarch Yan distinctly felt a Divine Level power here.

The power of [Celestial Tao System] and [Reclining Buddha Maitreya] interweaves here, stabilizing the balance of lifeforms from different times and dimensions.

Even beings and technology from completely different dimensions can successfully integrate into the Divine Fall Realm under the influence of these two forces.

The situation where abilities and technology fail due to different rules is absolutely impossible in the Divine Fall Realm.

From this, one can see the importance Li Hao and Maitreya place on this world and the terrifying nature of the abilities and technology they possess.

Ordinary Gods, even a large Divine Pantheon, could not so easily weave together the rules of different worlds.

Of course, to accommodate such complex world rules, the Divine Fall Realm itself must pay a price.

The ordinary beings living within it must constantly adapt to the abrupt changes in world rules, greatly reducing the potential for life and civilization to flourish.

Life forms as simple as the Undead, as intelligent and agile as the Intelligent Mechanism...

To continue surviving in the Divine Fall Realm, they must exert a hundredfold more effort than beings from other worlds.

"The last place where Wu Kui disappeared is this city!"

.....

Curious gazes always followed the trio of Celestial Monarch Yan.

In the unseen realms, Li Hao understood even more clearly through the [Celestial Tao System] what exactly happened to Wu Kui.

Relying on his own formidable abilities and fearless spirit.

Wu Kui ultimately managed to break free from the entanglements of the Void Masks, temporarily escaping to the Port of Confusion, this temporary "safe zone".

However, upon entering the Port of Confusion, Wu Kui hesitated for a moment and chose to leave the Divine Fall Realm, venturing to an unknown distant world.

[So, do you have an explanation?]

In a world observable only by True Gods, Li Hao issued a query to Maitreya through the [Celestial Tao System].

The next moment, a gigantic Reclining Buddha Maitreya appeared out of thin air, then slowly opened its eyes amidst the heavenly chant and hymns.

[It is the Heavenly Father's Treasure.]

The voice was equally calm and composed; the Reclining Buddha Maitreya evidently anticipated Li Hao's inquiry.

[The Heavenly Father's Treasure?]

His eyes narrowed involuntarily, and the curiosity in Li Hao's eyes turned to surprise.

[What do you mean by this? Explain more clearly!]

Upon hearing this, the lotus platform beneath the Reclining Buddha Maitreya suddenly emitted ten thousand rays of golden light, and the Eternal Stillness Buddha Halo behind its head slowly began to rotate.

[In the all Heavens and Myriad Realms, there were once thirteen Supremes who reached the pinnacle.]

[However, as time passed, these thirteen Supremes gradually retired and disappeared; only Legends continued to circulate among the all Heavens and Myriad Realms.]

[But deities of our level should be aware that those thirteen Supremes actually never completely vanished, and may still be alive.]

[They still influence the operation of this world in their own way, impacting the boundless all Heavens and Myriad Realms.]

After a slight pause, Reclining Buddha Maitreya continued.

[Your follower seems to have discovered some traces left by the Heavenly Father...]

[If we could track these traces, we might find some information or even a Divine Artifact left by a Heavenly Father.]

[That would be a true 'Heavenly Father's Treasure' surpassing all Heavens and Myriad Realms, possessing boundless mighty power!]
