

The Growth 270

Chapter 270 6: Quantum Life: Macro-Fusion Individual (3/3)

The Godslayer Civilization is a powerful civilization, an undisputable fact.

It is said that the Godslayer Civilization even mastered the use of mathematical principles and physical formulas to inflict devastating blows on other worlds.

Using physical formulas for strikes is one thing.

After all, different dimensions and worlds have different rules; physical laws also vary, making these physical formula weapons hard to affect all worlds effectively.

But mathematics is different; one plus one equals two, three-dimensional space is simply three-dimensional space, no matter the dimension or civilization; it remains unchanged.

Weapons based on mathematical laws can, in theory, inflict substantial damage on all worlds, even higher-dimensional Gods.

In fact, this is not some alarmist hypothesis.

After the Godslayers stepped out of their world, they have used these means to kill quite a few Gods.

Several worlds near the Godslayer Civilization have even directly regarded them as a new type of "Divine Abomination," initiating purges against them.

The result is predictable: the Godslayer Civilization continues to this day, while many Gods who participated in the encirclement have since fallen.

Only until this point did the shocked Gods finally realize the danger of this civilization.

Unfortunately, by the time the Gods realized it, it was already too late.

This war provoked by the Godslayer Civilization, forcing the Gods to retaliate, has already formed a scale affecting nearly a thousand worlds.

As time goes by, the number of worlds drawn into this war continues to increase.

Suffering from a "war mania," the Godslayer Civilization has almost declared war on every world ruled by Gods they encountered.

.....

Divine Fall Realm, a certain City of Intelligent Mechanism.

This is a city built in the center of the Intelligent Mechanism Camp.

Thanks to David's dimensional ascension in this world, the rules of the Divine Fall Realm were somewhat supplemented, promoting the comprehensive evolution of the Intelligent Mechanism Camp.

This City of Intelligent Mechanism was a new city built using the latest technology after the comprehensive evolution of the Intelligent Mechanism Camp.

In this new City of Intelligent Mechanism, transforming life forms into intelligent mechanism entities is no longer mainstream, but instead, mechanical life directly comes off the production line.

Virtual soul, electronic faith, thought branding, mechanical body...

These new generation intelligent mechanism entities possess more devout faith, more extreme thinking, and a deep-seated aversion to flesh and blood life forms.

"Your path is wrong; you cannot achieve dimensional ascension this way."

An unknown life form, existing between existence and nothingness, suddenly spoke as it gazed down at the orderly intelligent mechanism entities below.

Its entirety resembled a cloud of nothingness, ethereal and fleeting.

Inside this cloud of ethereal nothingness, various data flashed like lightning.

It is only when observed by a life form with self-awareness that this ethereal probability cloud manifests its form in the material world.

"Who are you?"

Upon quickly detecting the presence of this probability cloud, a cold but seemingly infinitely compassionate voice echoed above the city.

It is the supreme will of this city, the closest demigod akin to a God in this world.

Even within the infinite chaotic void, its existence can continue to influence the future trajectory of the World of Fallen Gods.

"The Merciless Guanyin?"

"This seems to be the 'divine name' engraved in your quantum cloud, right?"

With the continuous monitoring and observation by The Merciless Guanyin, the ethereal probability cloud quickly transformed into a being made entirely of machinery and steel.

"No need to be so tense; I'm not your enemy."

Also curiously scrutinizing its current form, the probability cloud, now an intelligent mechanism entity, murmured softly.

"I came to your world actually seeking allies."

After a slight pause, the probability cloud, now fully adapted to its current body, continued.

"Does confronting Gods alone feel difficult?"

"But don't worry; from today onward, you will no longer be alone."

With these words, the voice of The Merciless Guanyin suddenly fell silent.

"I am not like you!"

"I am not a lunatic and have never thought of opposing the Gods."

The Merciless Guanyin is also aware of the Godslayer Civilization's declaration of war against the World of Fallen Gods.

Therefore, after the other party spoke the last sentence, The Merciless Guanyin guessed their identity.

But precisely because of this, not wanting any association, The Merciless Guanyin decisively activated the central smart brain to transmit the probability cloud's information to the Buddha behind him.

However, the probability cloud had evidently already anticipated this action, cutting off the information transmission at the first opportunity.

Bzzt bzzt bzzt...

Accompanied by a sound only audible to The Merciless Guanyin, it was startled to discover its will was imprisoned.

"What did you do?"

Facing this furious questioning from The Merciless Guanyin, the probability cloud just smiled and said.

"There are many ways to achieve dimensional ascension in this world, and the path you chose happens to be the same as mine."

"In the quantum realm, there is a very special phenomenon in the microcosm..."

"That's when we attempt to observe microscopic particles, the act of observation itself interferes with the particles, affecting their movement and causing them to collapse from a superposition state to a definite state."

"Even the same microscopic particle will collapse into different definite states depending on the observer."

With a brief pause, the probability cloud continued slowly.

"In your view, you chose to transmit the news of my coming into this world."

"But in my eyes, that message was not sent out; even the smart brain of this City of Intelligent Mechanism wasn't alerted."

"In the realm of quantum, I've ventured further than you; I am a more powerful observer, so what I observe is the 'definite state.'"

With the wisdom of The Merciless Guanyin, although unable to grasp certain terms within the probability cloud's statement, it understood the meaning of the other party's words.

And it was precisely because it understood the meaning behind the probability cloud's words that The Merciless Guanyin was all the more shocked.

Affecting the real world from the microscopic level, thereby guiding the entire world towards a self-envisioned future—what's the difference from being a True God?

"You are clearly not a God..."

The probability cloud laughed again, and this time it was a very obvious laugh.

"Haha! I'm indeed not a God!"

"But the path I'm on is the one closest to the Main God."

"Because I am Quantum Life, a macro-fusion entity."
