

The Growth 281

Chapter 281 17: War of Annihilation (2/3)

Xiao Gu's use of the Divine Skull to seize the Time Pocket Watch had consequences far deeper than they appeared on the surface.

[The timeline... has really been unified?]

Reclining Buddha Maitreya, observing the gradually unifying timeline from beyond the world, was filled with astonishment and disbelief.

Xiao Gu's act of seizing the Time Pocket Watch was akin to untangling a single thread from the chaotic knot of timelines.

Following this thread, the Celestial Tao System crossed the torrent of time, smoothing out the chaotic timeline into a clear and orderly logic.

Moreover, the Celestial Tao System even learned from the methods of the Godslayer Civilization, forcibly directing the countless potential futures towards a single inevitability.

[This civilization is quite interesting.]

As he continued to unravel the chaotic timelines, Li Hao showed a hint of interest.

Because he discovered that the Godslayer Civilization seemed different from any civilization he had previously encountered.

Whether in its philosophy or the unimaginable technology...

To a certain extent, it overturned Li Hao's understanding of the limits of civilizations.

Civilization isn't merely a cradle for nurturing Gods.

In a sense, the limit of civilization is God.

The Godslayer Civilization was telling Li Hao with facts that civilization and Gods are never in a subordinate relationship.

[They are using the power of technology... to replicate the abilities of Gods.]

[Although for now, what they have replicated is merely superficial, it still genuinely touches the lower limits of a God.]

[No wonder this civilization is called the 'Godslayers'!]

Despite having countless thoughts in his mind, Li Hao's gaze never left the Divine Fall Realm for a moment.

As the countless timelines were ultimately unified into an absolute torrent of time, the Godslayers hidden within the Divine Fall Realm were forced to reveal their true forms.

Boom!!!

A golden fist shot out from the depths of the earth.

A pitch-black sphere tore through time and space, directly appearing in the void chaos beyond the world.

The world's barrier was devoured by a highly compressed substance, causing an invisible storm of time and space to surge into the Divine Fall Realm.

"Roar!"

Abandoning all words, turning his fury into a beast-like roar.

A golden giant ape followed closely behind, bursting out of the Divine Fall Realm to engage in an epic battle with the black sphere.

The power of both the Golden Giant Ape and the black sphere had already surpassed the limits of their respective Ascension Ladders.

Their distinction from True Gods lied only in the fact that they still had corporeal entities and weaknesses within existence that could be targeted and destroyed.

Boom! Boom! Boom!

Both combatants belonged to a class of Ascenders who could wield their power to its fullest.

The clash of Vajra Indestructible and Absolute Matter had even exceeded the capabilities of an ordinary God.

Besides those who surpass ordinary Gods, generally only the War Gods who specialize in combat could possess such terrifying power.

Obviously, the Golden Giant Ape and the black sphere both possessed the potential to become War Gods.

Their fight had entered a state of non-reconciliation; only by completely annihilating the opponent could they quell their inner rage and battle lust.

.....

In the World of Fallen Gods, on the battlefield of Godslaying.

"What is that?"

When the Golden Giant Ape and the black sphere tore through the world barrier and began their battle, a visible Celestial Calamity descended upon this world.

Storms, earthquakes, volcanoes, thunder...

The ordinary beings birthed in this world could not comprehend what was happening.

However, those Ascenders capable of perceiving the battle beyond the world stood shocked and dazed.

Because the power displayed by the black sphere and the Golden Giant Ape had already surpassed the Ascenders' understanding.

Not even the Celestial Dog previously exalted on the Divine Throne had shown such overwhelming destructive power.

Ripping through the world's barrier was like tearing paper, facing no resistance whatsoever.

No, not even the Celestial Dog...

Not even the Ascenders who had previously achieved successful Ascension within the Divine Fall Realm possessed such terrifying power.

"This is the 'God' in my heart!"

Gazing upward at the sky, Luo Yan, in the form of the Furious Vajra, murmured lowly.

That kind of ultimate destructive power, that kind of combat capability equivalent to a legion...

For someone like Luo Yan, an Ascender who pursued the extremes of physical prowess, it was a tremendous inspiration and shock.

"I think we should consider the question of how to escape now?"

Unwittingly reverting back to his original head, Xiao Gu couldn't help but whisper a reminder.

"I also think we should consider the problem of escaping now."

Once again transformed into a bird by the wind, Dororo also warily surveyed the surroundings.

After Xiao Gu obtained the Time Pocket Watch, the Celestial Dog's path to Divine Investiture was completely cut off.

The furious Celestial Dog, in its rage, ignored the Ascenders encircling it, almost crazily attempting to charge towards the trio.

Simultaneously, the Ascenders who noticed the trio's actions began to silently surround them once more.

In such a scenario, attracting the hostility of all the Ascenders present, it could be said the trio was in an inextricable and doomed situation.

"Do you have any skulls that can be used in this situation?"

Unobtrusively shielding Dororo and Xiao Gu, Luo Yan unintentionally asked.

"Um, no."

After a simple head tilt and a moment of thought, Xiao Gu shook his head without hesitation.

Xiao Gu never collected skulls based on their capabilities; the skull's rarity was its primary consideration.

"I think you should consider collecting more skulls that could be useful for escaping next time."

Evidently aware of Xiao Gu's collection style, even at this time, Dororo had the energy to sarcastically comment on his impracticality.

"So what should we do next..."

Vigilantly observing the surrounding encroaching circle.

Luo Yan hadn't finished speaking when another violent blast emanated from beneath the earth itself.

Rumble...

Unlike the previous tearing through the world barrier.

This time, the booming sound, although less magnificent, had a greater scope and impact than before.

The ground began collapsing, oceans reversed to the sky...

The rules of the world were overturned at this moment; the sky was no longer a sky, and the earth was no longer the earth.

Wherever one could see, whether the undead of the Undead Camp or the intelligent mechanisms of the Intelligent Mechanism Camp, they could only become the first victims of this world's upheaval.

The remaining Ascenders, though somewhat stronger, were not significantly better off.

As Floating Cities fell one by one, as Ascenders howled...

The world's order was replaced by chaos, and the countdown to the world's destruction began.
