

The Growth 282

Chapter 282 18: World Collapse (3/3)

So what exactly happened inside the Divine Fall Realm that caused such a widespread upheaval of the world's rules?

The answer is the battle between the macroscopic transformation entity and The Merciless Guanyin.

As a high-dimensional world existing in the form of a Klein Bottle, the Divine Fall Realm has no so-called "core."

However, when the macroscopic transformation entity—the Probability Cloud—used its abilities to change the world's structure on a microscopic level, the Divine Fall Realm began to fall from high dimensions to lower dimensions.

"You madman!"

The Merciless Guanyin, with its thousand-hand and thousand-eye stance, silently stared at the Probability Cloud opposite.

For The Merciless Guanyin to use the word "madman" to describe the other's actions was more than enough to prove how insane the Probability Cloud's actions were.

"Mad?"

Imitating The Merciless Guanyin's stance, the Probability Cloud, also with a thousand hands and eyes, laughed.

For the Probability Cloud, which had no actual form and relied completely on observers to determine its existence, The Merciless Guanyin's verbal attack was not at all threatening.

"If I'm a madman, then surely you must be one too."

"After all, my logical reasoning comes from you; I am merely your other side now."

After a brief pause, the Probability Cloud continued to add.

"Moreover, destroying this world has been one of my missions, so how can it be called madness?"

"If you choose to join us, perhaps we would consider integrating this world into our civilization's sub-world..."

"However, since you've chosen to reject our proposal, neither you nor your world hold any further value for existence."

Thousands of eyes almost simultaneously opened as The Merciless Guanyin launched the attack without saying another word.

Su! Su! Su!

Each eye could perceive every detail on a microscopic level...

Each beam of light holds the Power to shatter atomic structures...

As those thousand beams formed a "Network" shooting towards the Probability Cloud, a genuine trap of heaven and earth silently took shape.

"Haha, in the microscopic quantum field, I'm your senior!"

Unhesitatingly also opening its thousand eyes, the Probability Cloud, in an almost replicative manner, destroyed The Merciless Guanyin's trap.

Pu! Pu! Pu!

Since this battle was unfolding on a microscopic scale, neither side produced any sound exceeding twenty decibels.

Nonetheless, when these micro-level vibrations transmitted to the macro world, the already collapsing world order inevitably hastened toward destruction.

Rumble...

Volcanic eruptions devoured the land, merging sky and sea became an omnipresent phenomenon...

The Merciless Guanyin could clearly see all this, intensifying its inner fury inevitably.

Although, from a personal stance, The Merciless Guanyin was entirely opposed to the Immortal Stone.

Yet, no one could deny The Merciless Guanyin's deep love for the World of Fallen Gods, which was the fundamental reason for rejecting the Godslayer Civilization's offer.

"In the realm of the Ascender, there's never talk of 'seniors'."

With a tone calm to the point of suffocation, the murderous intent-soaked Merciless Guanyin murmured.

In the next instant, the Probability Cloud opposite revealed an astonished expression.

"You!"

The shocked words were swallowed again, with the Probability Cloud showing a serious expression for the first time.

"To touch 'High-dimensional Concepts' with such rudimentary Technology, you're even more gifted than I imagined."

Indeed, as with the Immortal Stone, The Merciless Guanyin also touched upon high-dimensional concepts at this moment.

In The Merciless Guanyin's current perspective, those previously intangible microscopic particles were now as tangible as if they were on paper.

With a single thought, adjusting atomic sequences, dismantling weak forces, had become The Merciless Guanyin's instinct.

.....

Beyond the world, within the Void.

[This world holds no more value...]

With a hint of regret, the black sphere fighting the Golden Giant Ape suddenly spoke.

The purpose of the Godslayer Civilization's expedition was, for one, to recruit the Immortal Stone and The Merciless Guanyin from the Divine Fall Realm, those most likely to become a "Godslayer."

The other was to see if they could wrest control of the Divine Fall Realm from the two supreme entities, to turn it into a base for cultivating future "Godslayer" members.

However, both objectives have been declared failures.

This means that the Divine Fall Realm, stripped of its unifying value, no longer had a necessity to continue existing.

Buzzing...

No longer suppressing its mass, the black sphere rapidly expanded at a visible rate.

In just the blink of an eye, a black hole nearly as vast as the world appeared out of thin air in the void.

Space-time distorted, matter devoured...

At this moment, the ultra-massive entity demonstrated through its actions what "mass is power" means.

The matter and energy within the Divine Fall Realm furiously poured into the black hole formed by the ultra-massive entity through the previously torn world barrier.

Buzzing...

In front of the current ultra-massive entity, even the Ascenders were merely a group of "masses" that could move.

Once the Divine Fall Realm was entirely destroyed, the Ascenders who managed to survive till then would ultimately become part of the ultra-massive entity.

[Five Boys! I'm willing to pay any price!]

[Now, immediately, right away... I want the Power to kill this bastard!]

The Golden Giant Ape roared furiously, with its eyes wide in rage, as five different colors of light suddenly bloomed on its body surface.

That was the Power of [Five Lucky Boys], also sourced from the Primordial Power of the Data World.

After all, the two supreme entities had only ever opened up the Primordial Power of the Divine Fall Realm.

The Primordial Power of the Data World hidden within the Divine Fall Realm was never a masterless entity.

Boom!!!

In the crisis of the world's collapse, the Golden Giant Ape's body expanded limitlessly, growing colossal.

Though still incomparable to the black hole formed by the ultra-massive entity, the Golden Giant Ape slowly pushed it out of the Divine Fall Realm's bounds.

Boom! Boom! Boom!

Punch after punch landed on the surface of the ultra-massive entity.

The Golden Giant Ape's body began to crack, golden blood flew from its wounds.

Most of the golden blood spilled into the void, but a considerable portion dripped into the Divine Fall Realm.

[How is this possible...]

The ultra-massive entity realized the crisis for the first time, yet was powerless to resist.

The Power of the [Five Lucky Boys] locked it firmly.

The Golden Giant Ape shattered its main body piece by piece, stopping the entity's world-destroying behavior in a way resembling mutual destruction.

The black hole collapsed, the giant ape perished...

Until the void restored its calm once more, everything seemed to have gone back to when nothing had happened.

Only the Divine Fall Realm, still continuously emanating energy and mass, told the tale of the earth-shattering battle that had just taken place here.
