

## **The Growth 301**

### Chapter 301 - 16: The Unspeakable Thing (1/3)

As a top-tier civilization capable of contending with the Gods.

The Godslayer Civilization is never one to prefer fighting alone; unity and cooperation are the keys to their repeated victories against the Gods.

The Super Mimetic Life Guardian is a lower-level combat unit under the Godslayer Civilization.

This is an extremely special form of life, and whether it can even be called 'life' is still up for debate.

But it is undeniable that as a special war weapon and the most commonly used combat unit by the majority of Godslayers, Super Mimetic Life can adapt to most universal environments in various worlds.

It is well known that in the world, besides solid and liquid states, there is also a fluid state that lies between them.

The Godslayer Civilization, utilizing their advanced technology and concepts, has developed this fluid state to its extreme, turning it into a kind of special life with boundless variations—the Super Mimetic Entity.

As long as the Godslayer, as the superior, gives the order, the Super Mimetic Entity can simulate and transform into any form of tool.

And due to its own special fluid form, the Super Mimetic Entity is completely immune to physical attacks, capable of only being substantially harmed by Ascenders who can twist rules.

However, even a Demigod, infinitely close to the Gods, can only cause damage to the Super Mimetic Entity and cannot truly eliminate it.

Theoretically speaking, as long as a small part of the body survives, the Super Mimetic Entity can replenish itself by devouring and assimilating other substances.

In terms of immortality and adaptability alone, this terrifying life is even more outrageous than the average Godslayer.

In the counteroffensive war in the Pandora World, the Super Mimetic Entity annihilated the entire Primordial Alliance while the Godslayers stood by.

After that, though the Dragon Form defeated the Godslayers, the Super Mimetic Entity survived thanks to its tenacious life force.

What Fang Xun sees now as the 'Deep Sea' is essentially a boundless expanse formed by the Super Mimetic Entity devouring and assimilating Pandora World's ocean.

"The real battle is just beginning!"

"Fang Xun! Execute plan number seven!"

When the giant eyeball, symbolizing the Super Mimetic Entity, emerged from the sea, the Plant Battleship piloted by Ashoron unhesitatingly switched back to cannon mode.

Shoosh! Shoosh! Shoosh!

Under the Plant Battleship's overloaded operation, one negative ion beam after another descended from the sky.

Everywhere the eye could see, they seemed like giant light sabers tearing through the sky, suppressing the ocean and striking each part presented by the Super Mimetic Entity.

However, as a combat-focused lower unit of the Godslayer Civilization.

How could the Super Mimetic Entity be just a big punching bag?

It quickly utilized combat models from Zhiku, forming defensive barriers specifically against the negative ion beams.

Boom! Boom! Boom!

The massive beams bombarded these defensive barriers, merely causing a slight ripple.

Immediately after, odd-shaped, and intricately structured sky-high turrets began to emerge on the surface of the Deep Sea.

Shoosh! Shoosh! Shoosh!

Retaliating in kind.

These land-to-air super turrets possessed extraordinarily terrifying firepower.

Most crucially, these super turrets were not energy weapons but ultra-long range artillery using physical ammunition.

Shooting directly from the ground into the sky, their saturating firepower covered every enemy unit within view.

In this scenario, the vines on the Plant Battleship's surface twisted once again, and Ashoron's prowess as an Ascender was perfectly manifested.

Whoosh!

The twisted spacetime allowed the Plant Battleship to hide in the other side of the world, appearing in the real-time space only at the moment of attack.

This is the perfect synergy of Ashoron and the Plant Battleship and one of the main reasons why he was chosen as the 'fusion' component of the Plant Battleship back then.

.....

Unlike the 'war-style' tactics of the Plant Battleship.

Fang Xun, who also turned his body into elements, was more like a sharp blade.

Taking advantage of the gap between the Super Mimetic Entity and Plant Battleship's artillery exchange, Fang Xun maneuvered through the barrage in a nearly miraculous way, using his body as a 'blade' to pierce the giant eyeball.

Shoosh—Boom!

The rapid speed caused continuous sonic booms, eventually drawing the attention of the Super Mimetic Entity.

"Roar!"

With a roar sounding like a wild beast.

The surface of the giant eyeball suddenly swelled, revealing a small 'black spot.'

It was a giant beast differentiated from the Super Mimetic Entity, a terrifying evil beast seemingly crawling out from Hell.

Lacking the conventional limbs and torso structures, every part of the hideous monster's anatomy was created for attack and slaughter.

If faced with a normal creature, even an Ascender, there would inevitably be hesitation in confronting this hideous beast.

But unfortunately, the one initiating the charge was Fang Xun, who hails from the Mountain and Sea Realm.

Having witnessed too many strange monsters and bosses in the Game Realm, Fang Xun didn't even blink as he flapped his wings again.

Whoosh!

The gust turned into blades, and shadows emerged beneath.

The terrifying beast didn't even grasp what had happened before being cut neatly into thousands of fragments by Fang Xun.

In the next moment, Fang Xun's body returned to its solid form as he charged into the interior of the giant eyeball.

Pop!

Immediately, more terrifying monsters appeared, along with weapons and blades transformed by the Super Mimetic Entity.

Amidst this deep enemy encampment's onslaught, Fang Xun maintained a high degree of calm.

Then, utilizing Fang Xun's positioning, the Plant Battleship performed a short-range spatial jump and appeared inside the Super Mimetic Entity.

Without any hesitation, Fang Xun decisively returned inside the Plant Battleship.

And Ashoron then piloted the Plant Battleship, launching an assault toward the core of the Super Mimetic Entity.

Rumble...

The vast Deep Sea churned with visible waves as various terrifying monsters and weapons appeared one after another to intercept.

Though not exactly unimpeded, the Plant Battleship indeed broke through the multiple encirclements, arriving at the most core position of the Super Mimetic Entity.

"There stands the Dragon Form!"

Surrounded and pursued by the Super Mimetic Entity, what appeared before the Plant Battleship was an indescribable entity slumbering in the Abyss.

Its size is so immense, its aura so terrifying...

Even though it has long been infected and petrified by the stone virus, it still exudes an astonishing sense of oppression.
