

The Growth 303

Chapter 303 - 18: Godslayer (3/3)

Above the deep sea, on the surface of the Super Mimetic Entity.

Everything seemed to return to calm with the disappearance of the Plant Battleship, but the surging waves inside made the entire ocean anything but peaceful.

In a certain special higher-dimensional space, an unseen entity quietly opened its eyes.

It sat upon the Golden Throne, its gaze both compassionate and indifferent.

Everything currently happening in Pandora World could not escape its notice.

Whether it was the war sparked by the surviving members of the Pawa race, the Plant Battleship charging decisively at the Dragon Form beings, or the clash between Wu Kui and those Exotic Ascenders...

The unseen entity remained silent while witnessing all of this, until it noticed a higher-dimensional interference force that shouldn't exist in this world.

[Celestial Tao System?]

With a hint of surprise, the unseen entity made its voice heard.

Ever since the Super Mass Entity and Probability Cloud had a setback in the Divine Fall Realm, intelligence related to the Creator had become publicly available information within the Godslayer Civilization.

Before coming to Pandora World, the unseen entity had thoroughly reviewed all files related to the Creator.

Besides its suspected identity as the Supreme God of Time.

The strongest power exhibited by that Creator in the Divine Fall Realm was that cross-world interference force—the Celestial Tao System.

On the level of worldly beings, the [Celestial Tao System] is almost all-powerful.

The Godslayer Civilization had interacted with many Divine Pantheons, yet they only found similar artifacts in a few Pantheons ruled by the God of Destiny.

After the defeat in the Divine Fall Realm, the Godslayer Civilization once attempted to replicate a similar cross-world interference system.

The result was, the technological complexity of the [Celestial Tao System] was far beyond what the Godslayer Civilization had imagined.

If the Godslayer Civilization wanted to truly replicate the capabilities of the [Celestial Tao System], at the very least they would need four Epic Divine Artifacts related to material, energy, information, and faith.

What do four Epic Divine Artifacts imply?

That's a quantity of artifacts not even possessed by some ultra-large Divine Pantheons.

Even if they exhausted all resources and technology of the Godslayer Civilization, they estimated they could only create one Epic Divine Artifact.

Moreover, these four Epic Divine Artifacts must be able to be used together, which sounds like an impossible task.

Thus, the Godslayer Civilization also deduced the upper limits of the [Celestial Tao System] and the depth of the Creator's foundation.

That must be a giant lurking in All Heavens and Myriad Realms, possibly an ancient god that had retired since eons ago.

Faced with a being of this caliber, no matter how arrogant or hubristic, the Godslayer Civilization would choose to steer clear and not actively provoke them.

As for the loss of the two elite cadres?

The Godslayer Civilization could only resign themselves to fate, considering it the price paid for probing the Divine Fall Realm.

Since then, when choosing worlds for invasion and assimilation, the Godslayer Civilization would try to avoid worlds associated with the Creator.

[I really didn't expect this world to have followers of the Creator?]

The cross-world interference of the [Celestial Tao System] requires follower positioning to be effective.

This was a piece of intelligence confirmed by the Godslayer Civilization after repeated experiments.

The unseen entity didn't believe this was merely a coincidence; that supreme Creator must be searching and investigating events related to the Godslayer Civilization in its own way.

Perhaps, Pandora World was discovered by the Creator under such circumstances.

[If only I could obtain firsthand intelligence from the Creator...]

The unseen entity, now having a certain appraisal of its own future, sank back into contemplation.

Every individual in the Godslayer Civilization had ascended from countless ordinary lives to become powerful Desecrators.

Their attitude towards the Gods was not like ordinary creatures maintaining a mindset of fear and reluctance to gaze directly.

Other than mere reverence, the unseen entity now felt more curiosity—it wanted to explore the life form of the Creator, to probe the limits of the other’s abilities.

For this reason, the unseen entity had steel itself to face any consequences.

Curiosity is the driving force that has propelled the Godslayer Civilization to where it stands today, and it is the common trait of every Godslayer chosen by the civilization.

[So the question now is, how should we draw the Creator’s attention?]

As it pondered, the unseen entity cast its gaze on three places in Pandora World.

The battlefield opened up by the Super Mimetic Entity, the counter-attack of the surviving Pawa, and the Exotic Godslayers infected with the Stone Virus yet not entirely fallen...

All three places have followers of the Creator, making them the most likely spots to attract the Creator’s attention.

.....

Pandora World, above the deep sea.

As the Plant Battleship charged toward the position of the Dragon Form beings, the Super Mimetic Entity, indulged by the unseen entity, erupted into an unprecedented frenzy.

Rumble...

Incredibly, amidst a series of explosions that defied belief, countless grotesque and terrifying monsters rushed out from the Super Mimetic Entity.

All of them were life forms derived by the Super Mimetic Entity, and their forms weren't limited to conventional biological understanding.

Titan Giant Beasts covered with massive stones...

Turret Battleships forged from steel...

Elemental Life engulfed in flames...

Shadow Individuals existing between existence and non-existence...

Releasing its database, hundreds and thousands of world-ending monsters charged toward Pandora World, aiming for the position of the Pawa resistance forces.

"It's the Guardians! The Guardians have gone berserk!"

"Defense! Everyone, enter defense combat readiness!"

"Quick! Get into the trenches, into the trenches!"

...

Having witnessed similar situations before, the Pawa race reacted swiftly, making the most correct decision almost instantaneously.

Meanwhile, the trio known as Wuhua at the rear of the battlefield each widened their eyes in shock, staring at the overwhelming swarm of frenzied monsters unable to recover for a long time.

Every monster derived from the Super Mimetic Entity possessed capabilities on par with, or even exceeding that of ordinary Ascenders.

Even Chidan, incarnated as a Steel Worm, couldn't guarantee handling more than two frenzied monsters at once.

If confronted with a monster possessing abilities to counteract his own, Chidan felt one would be enough to give him a tough time.

"Let's go! The situation has exceeded expectations!"

Quickly making a decision, Chidan led Wuhua and A Meng to continue their strategic retreat without hesitation.

No matter how great the benefits, they are not more important than one's life. Chidan didn't want to be buried alongside the Pawa.

At least until figuring out the cause of the Super Mimetic Entity's frenzy, Chidan wouldn't show himself in Pandora World again.
