

## **The Growth 306**

Chapter 306 - 21: Enlightener (3/3)

Where did the Godslayer's will go?

This is not just Wu Kui's question, but also Li Hao's question, who has been closely observing the battle.

Because the Celestial Tao System scanned and collected all the information in the Pandora World, yet it could never find the so-called Godslayer's will.

Until Wu Kui seized the physical body and soul of the Super Mimetic Entity, the Godslayer never appeared.

There are only two possibilities.

One is that the so-called Godslayer's will never existed from the beginning.

And the other possibility is that, for some unknown reason, the Godslayer's will temporarily chose to give up the idea of resurrection.

After all, in today's Pandora World, with the absence of the Super Mimetic Entity's balance and assistance, the difficulty of resurrecting the Godslayer has sharply increased.

So why did it choose to give up resurrection?

Li Hao knows the Godslayer truly existed; those petrification viruses spread after its death were actually part of it.

Just as Li Hao was puzzled, the Celestial Tao System suddenly detected an abnormal signal.

It was a higher-dimensional presence above the Pandora World, an entity infinitely close to the Gods.

Due to its too bizarre form of existence, along with its internally self-sustaining rules, it had evaded the detection of the Celestial Tao System.

Has it voluntarily revealed itself?

Li Hao was even more astonished because the Celestial Tao System identified the high-dimensional entity as the Godslayer.

Clearly maintaining a higher-dimensional state could evade detection by the Celestial Tao System.

Yet the Godslayer voluntarily incarnated as a high-dimensional entity, appearing within the Pandora World.

This obviously discovered the existence of the Celestial Tao System and intends to communicate with me.

Let me see what you plan to say.

After a brief hesitation, Li Hao decided to use the Celestial Tao System to further contact the high-dimensional entity.

In an instant, an unknown life form seated on the Golden Throne appeared in Li Hao's view.

It was an indescribable presence made manifest by the ultimate "light".

It wasn't a solid state, had no physical entity, but presented itself in the form of light waves and spectra.

Due to its exceedingly advanced form of existence, essentially already infinitely close to a God, only a true God could fully decipher its composition.

Are you the Godslayer?

After some brief contemplation, Li Hao's voice was transmitted into the other's ear through the Celestial Tao System.

Because this was a communication that transcended language, Li Hao's speech was directly converted into a spectrum that could be recognized by the other party.

Great Creator, I am the Godslayer you recognize.

The "light" seated on the Golden Throne slowly materialized into a human form.

Just as Li Hao could convert his speech into a spectrum recognizable by the other, the Godslayer would also present different appearances according to the observer.

Appearing in human form was simply because this form best suited Li Hao's cognition.

It was evident, just as Li Hao was using the Celestial Tao System to explore the depths of the Godslayer's nature.

The Godslayer was also probing Li Hao's habits in its own way.

This was a divine level game, proving that the Godslayer indeed possessed some divine abilities.

No, not merely possessing a few divine abilities; this Godslayer had even acquired the ability to elevate to the Divine Throne, advancing to Godhood long ago.

You voluntarily gave up becoming a God?

One must admit, the Godslayer brought Li Hao enough surprises.

The situation Li Hao observed was what among all these surprises shocked him the most.

Among all the life forms Li Hao encountered and interacted with, this Godslayer was the first to voluntarily give up or even refuse becoming a God.

Godhood is not the endpoint of life's evolution...

I merely seek to blaze a new trail, finding a shortcut for all life to reach the endpoint.

Clearly, the Godslayer smiled slightly, albeit mixed with traces of melancholy.

Is this the ultimate goal of your Godslayer Civilization?

With a hint of comprehension, Li Hao spoke.

No, this is just my personal ultimate goal.

Gently shaking his head to deny Li Hao's claim, the Godslayer spoke dismissively.

The Godslayer Civilization is different from all civilizations in your understanding, we are not a Race nurtured by a particular world.

In All Heavens and Myriad Realms, any being that recognizes our ideals can join our civilization.

Moreover, the term Godslayer Civilization is the outside world's label for us, we usually refer to ourselves as "Enlighteners".

With a slight raise of the eyebrow, Li Hao softly spoke, already aware of this term.

To become the morning star of All Heavens and Myriad Realms, your ambition is quite grand?

Currently, the mainstream in All Heavens and Myriad Realms is to become Gods.

Yet this group of Godslayers went against the mainstream, attempting to overthrow the Gods' authority and pull them down from the Divine Throne.

Regardless of whether their theory is feasible, this action is indeed filled with idealistic colors.

I knew you are a God who can understand our ideals.

Catching the undertone in Li Hao's remarks, the Godslayer laughed again.

Your Clan is not bound by faith, and your followers are filled with compassion and righteousness.

This is extremely rare among the Gods in All Heavens and Myriad Realms.

For their faith, for their status, Gods dictate life and death over their Clans and civilities, what a ridiculous notion?

Yet in today's era, this idea is gradually becoming a consensus?

To obtain their favored Clan, Gods repeatedly destroy and create worlds, completely disregarding their actions that would kill countless Lives.

Some extreme Gods even sell Clans as commodities, this is simply an incomprehensible practice.

Although the Godslayer's voice sounds calm, the anger and unwillingness in the words completely reveal its thoughts.

When those beings forced onto a dead-end choose to rebel, those Gods condemn them as Desecrators...

What right do they have to do this? What qualification do they have to place themselves above all Lives?

Their power, their authority, their Life dimension above all beings, yet never because of mercy and compassion.

This is obviously wrong, and the Godslayer Civilization aims to correct this error!
