

The Growth 327

Chapter 327 - 18: Giant Turtle Holding Up the Sky

Rumble... Rumble...

At the edge of the Chishui River, where it meets the South Sea.

The epic creatures still engaged in battle had no idea what was happening when an unprecedented giant wave surged up behind them.

Propelled by this massive wave, the epic creatures, which already had no real formation to speak of, instantly fell into disarray.

Even the Ascenders among the epic creatures couldn't help but get distracted by this sudden tidal wave.

Fortunately, the Mountain and Sea People did not take advantage of the chaos to pursue, but instead stared in disbelief at the rear of the epic creatures.

There, more surging waves were coming toward this direction.

Wave after wave, endless as if creating an ultimate suffocation sensation.

"Defend! Quickly switch to defense!"

"Watch out for the waves; the current tide isn't normal!"

"Be cautious of those epic creatures, don't let them seize the chance to sneak attack the artificial reefs!"

...

In less than a second, similar messages had spread across the entire frontline battlefield communication channels.

Since Tianyou and the others were on a secret mission, the frontline battlefield had no idea what had happened at the Bottomless Abyss.

But judging from the observable situation, such a huge commotion was evidently beyond what the epic creatures could cause.

The entire South Sea was in a state of continuous tremor.

That formidable wave, uncertain when it would cease, relentlessly battered the coastline.

Such a horrifying scene, so exaggerated in its commotion...

It naturally couldn't escape the detection of the Zhiku members from the Mountain and Sea Civilization's rear.

They immediately used various instruments to monitor the source of this enormous tsunami, attempting to figure out what on earth was going on.

Then, a scene that shocked everyone appeared.

Crash!

Amidst the tumbling waves and the turbulence of the Bottomless Abyss.

Two masses of life energy, scorching hot like the sun, suddenly appeared on the monitoring instruments.

The life energy of both sides was so prominent that it even made people overlook the equally vigorous life forms beside them.

Boom! Boom! Boom!

Until those masses of burning life energy gradually rose from the seabed to the sea surface.

The epic creatures and Mountain and Sea People on the frontline finally saw their true form.

The first to emerge from the sea was a Giant Turtle so large it almost rivaled the land.

Owing to its immense size, the sea level dropped several centimeters when it surfaced.

"Roar!"

The enormous turtle shell undulated like mountains, its fierce spikes piercing the clouds like towering peaks...

The fully surfaced Giant Turtle roared in fury, its four majestic legs stepping out like Celestial Pillars.

Rumble... Rumble...

In a moment of unguardedness.

Gu Zhu was the first to be blasted into the air by magma erupting from the seabed.

Following closely, Tianyou, although dodging in time, could not prevent being shaken out of the ocean surface by the aftershocks.

Only Dragon Child, clad in armor and wielding a Heavy Hammer, struck ruthlessly at one of the Giant Turtle's legs.

"Roar!"

Under the blow of the Heavy Hammer, the Giant Turtle, losing its balance, let out a miserable cry.

Unfortunately, Dragon Child apparently wouldn't miss this golden opportunity and also floated from the bottom of the sea to the surface, revealing its body even larger than the Giant Turtle.

The Heavy Hammer slammed down once more, this time targeting the Giant Turtle's head.

.....

"Gu Zhu!"

Without any hesitation, Tianyou quickly called out to Gu Zhu, who was blasted away by the volcano, to join in the assault while the Giant Turtle was entangled by Dragon Child.

"No problem!"

A robust voice echoed like Thunder throughout heaven and earth.

Gu Zhu's massive form forcibly froze in mid-air, then plummeted like a Meteorite toward the location of the Giant Turtle.

Boom!!!

Without any surprise, the entire body of the Giant Turtle was driven downwards.

The surging waves suddenly churned up countless vortices, forming a giant whirlpool at the point where Gu Zhu struck.

In this situation, Tianyou decisively leaped from the Holy Relic Ship, transforming mid-air into a winged humanoid shape.

Swoosh—Boom!

His chest opened, the Holy Bone launched.

Tianyou, now winged, appeared like a humanoid turret, using absolute air superiority to implement a fire coverage strike on the Giant Turtle below.

The countless bones, blessed with Divine Power, possessed astonishing penetrability.

Unless encountering the Giant Turtle's solid carapace, its flesh simply couldn't withstand the bombardment of the Holy Bone.

"Roar!"

The intense pain made the Giant Turtle struggle frequently, attempting to escape from this perilous situation.

Yet, those three now besieging it, except for Dragon Child, the other two were the strongest Ascender series with battle-hardened experience.

Therefore, the Giant Turtle's struggles only rendered it more passive, utterly futile.

"Howl!"

Seeing the Giant Turtle about to fall into an absolute disadvantage, an all-too-familiar dragon roar suddenly echoed from not far away.

The sound of wind and Thunder, mingled with the howl of the Fox Dragon, instantly intimidated the few Mountain and Sea People involved in the siege.

Before the Mountain and Sea People could react, the Fox Dragon was already driving the Thunder, appearing at the battlefield's edge between the Giant Turtle and Dragon Child trio.

Boom!

Lightning filled the sky, forming into a sphere, with endless Thunderbolts crashing down.

With the least battle experience, Dragon Child was temporarily pushed back by this ambush from the Fox Dragon without realizing what had happened.

Taking advantage of this brief gap.

The unrestrained Giant Turtle seized the chance, forcefully swinging its head to fling Gu Zhu away.

"You despicable ants!"

"I'll make you understand the price of provoking me!"

Taking a deep breath, a gleam of ocher flashed through the Giant Turtle's eyes.

Immediately, the patterns on its carapace started to seep out an unknown substance, similar to liquid, pervading the Giant Turtle's entire body in an instant.

Sizzle... Sizzle...

With the help of these unidentified substances, the Giant Turtle's form rapidly enlarged and expanded once again.

If originally, the Giant Turtle was just a gigantic island floating on the sea.

Then at this moment, the Giant Turtle was thoroughly an authentic Pan Continent mobile plate, its enormous size far surpassing the limits of human imagination.

Especially its four legs, like Celestial Pillars, forcibly propping up the entire continental plate.

"What is that..."

"How could such a massive creature exist..."

"The wound on its leg is self-repairing, how could it be this fast..."

...

Watching this scene unfold before their eyes, all the spectators present opened their eyes wide.

Whether Mountain and Sea People or epic creatures, any intelligent being could perceive the terrifying Power of the Giant Turtle now.

A piece of the continental plate that can move freely, capable of destroying the entire Mountain and Sea Realm on its own.
