

## **The Growth 399**

Chapter 399 - 21: Law of Cause and Effect

In the blink of an eye, more than half a month has passed in the Divine Fall Realm.

During this time, the "Divine Remains Battle" occurring at Yunding Mountain has become increasingly frequent.

Everyone knows that the final battle is not far away.

Due to the frequent searches and harassment by the Ascenders, He'Er, possessed by God Heimur, has long been exposed and has fought with the Ascenders several times.

However, its condition is somewhat bizarre, seemingly constantly switching wills.

When dominated by God Heimur's will, it is the high and mighty Demigod, decisive in killing, viewing human lives as worthless.

When He'Er's will momentarily prevails, it becomes the merciful, rebellious mortal.

— A mortal resisting the will of Gods.

He'Er's current performance, even the most defiant Desecrator would be no more so.

"It is qualified to become our partner."

Silently and unnoticeably, an irregular geometric shape that exceeds normal civilization's understanding in both appearance and ability appears amidst the mist of Yunding Mountain.

To be honest, as long as anyone sees the special appearance of this irregular geometric shape, it is not difficult to guess its identity—Godslayer.

In a sense, this is also a major feature of the Godslayer Civilization.

Transcending ordinary life's concept of appearance, yet unlike True Gods, indescribable and unobservable.

[If you are confident enough, you might consider inviting him to join us.]

The voice of the Supreme Will of the Realm of Truth, the First Sequence of Godslayer Civilization— [Mathematical Law] speaks in the ear of the irregular geometric shape.

As the first one daring to enter the Divine Fall Realm again after the apocalyptic war, the essence of the irregular geometric shape is some kind of embodiment of the Law of Cause and Effect.

As long as it doesn't touch the Law of Cause and Effect of this world, even the [Celestial Tao System] finds it difficult to sense the presence of the irregular geometric shape.

"My rule is that fulfilling the preset cause will lead to the established effect."

"Currently, He'Er happens to meet this condition, and I also want to test the limits of my own ability."

The embodiment of the Law of Cause and Effect responds in this manner, and the irregular body begins to change rapidly.

What He'Er desires as the "effect" is ultimately to rid itself of God Heimu's entanglement and even completely vanquish the one who was once its faith's master.

And the cause to achieve this effect is to become a true Godslayer.

This is the destiny set for He'Er by the embodiment of the Law of Cause and Effect, also its first true interference with the Law of Cause and Effect since arriving at the Divine Fall Realm.

Sizzle...

As the embodiment of the Law of Cause and Effect interferes with He'Er's destiny, the Divine Fall Realm's backlash also appears on its body.

After all, the Divine Fall Realm is not one of those ownerless worlds, the [Celestial Tao System] is the true master of destiny in this world.

.....

[Huh?]

In the mysterious void, Li Hao immediately notices the anomaly in the Divine Fall Realm.

This is the first time since the [Celestial Tao System]'s birth that a non-Divine Level being has interfered with it.

And this interference is not a simple, crude direct intervention, but rather quite cleverly substituting the impact of the [Celestial Tao System].

[God Heimu? He'Er?]

Focusing his gaze on the clouds and fog of Yunding Mountain, Li Hao can clearly see this confrontation between Gods and mortals.

Consequently, Li Hao seems to understand the intentions of the Godslayer who was originally hiding well in the Divine Fall Realm yet suddenly exposed himself voluntarily.

[Found a promising candidate?]

[So willing to expose itself in order to bring him into its camp?]

Having contacted the Godslayer Civilization many times, Li Hao considers himself having some understanding of this civilization.

Given their way of doing things, it is not surprising to do something like this.

Even daring to speculate, perhaps the purpose of this Godslayer infiltrating the Divine Fall Realm was originally to find a suitable candidate to become a Godslayer here.

Now that He'Er has been discovered, the purpose of this Godslayer is naturally achieved.

[Time interference? Or prophesied fate?]

Gazing at He'Er for a long time, a hint of interesting meaning appears on Li Hao's face.

In All Heavens and Myriad Realms, either interfering with time or prophesying fate, are abilities only the top-tier Gods are qualified to possess.

In that apocalyptic war, Li Hao had already witnessed the Godslayer Civilization's ability to interfere with the timeline and lock destiny in a low-dimensional manner.

Therefore, Li Hao is not surprised at all that this new Godslayer possesses the same ability.

However, after thorough scanning and analysis, Li Hao is astonished to find that this Godslayer did not interfere with the stream of time and destiny.

The ability used by the opponent is a more peculiar one, more in line with objective laws.

Everything has cause and effect, and this cause and effect is not some mystical concept.

— Eating makes the stomach full, sleeping refreshes the spirit.

This is the most basic Law of Cause and Effect, a natural phenomenon where cause leads to effect.

However, the Godslayer's application of the Law of Cause and Effect is precisely opposite; what it does is preemptively lock the effect and then deduce the cause through this effect.

— I want a full stomach, so I eat; I want to be refreshed, so I sleep.

This is the reversed Law of Cause and Effect, a kind of subjective initiative.

Godslayer pushes this subjective initiative to the extreme, completely overturning the conventional civilization's understanding of the Law of Cause and Effect.

Simply put, if this Godslayer wants a true Divine Artifact, it will use this special subjective initiative to drive the entire civilization or even the entire world to create such a Divine Artifact.

Interfering with the course of the entire world singlehandedly, this is exactly akin to the original power of [Celestial Tao System].

The situation occurring on He'Er now is the same.

Godslayer wants him to join the Godslayer camp.

Therefore, the Law of Cause and Effect, driven by the Godslayer's subjective initiative, will continuously deduce various "causes" centered on this "effect" until this purpose is finally achieved.

Before achieving this purpose, everything in the Divine Fall Realm will move towards this purpose.

In this process, whether time or fate, they are just the "artifacts" for realizing this Law of Cause and Effect.

[This Godslayer is an entity mimicking the birth of the Celestial Tao System!]

Suddenly enlightened in his mind, Li Hao becomes even more curious about the technology mastered by the Godslayer Civilization.

To unravel the operational principles of the Celestial Tao System in such a short time and then achieve a new Godslayer in a similar manner.

This is evidently no coincidence, but proof that the Godslayer Civilization is still continuously progressing.

[Unfortunately, this is just the most superficial mimicry!]
