

The Growth 417

Chapter 417 - 3: God of Chaos

In the Civilization Game, due to the increasingly close and strengthened connections among the gods, many strange organizations have been nurtured.

The [God of Chaos] is one of the more secretive and special organizations among them.

This is a mysterious organization not open to the public.

It was established by a group of gods who do not wish to reveal their identities for the purpose of exploring the [Fallen Area].

Yes, the [God of Chaos], as its name suggests, is a façade shared by many gods.

All gods in this special organization can declare themselves as the [God of Chaos] to the outside world.

Especially when exploring the [Fallen Area], they can use that shared incarnation to minimize the leak of their information.

However, due to some actions by a certain member, this incarnation, originally used for exploring the [Fallen Area], unexpectedly fell.

It must be known that it can accommodate the power of different gods and maximally conceal their essence.

The [God of Chaos] itself is an epic divine artifact, with its ability to lightly transform and hide its attributes, a unique existence in All Heavens and Myriad Realms.

Until recently, the façade of the [God of Chaos] was reactivated and connected with the gods within the organization.

Only then did those gods who did not wish to disclose their identities realize that the [God of Chaos] had actually found a suitable host in the [Fallen Area].

That was a mortal with divine lineage, yet she had no divine protection.

If the essence of the [God of Chaos] were not merely an incarnation instead of a true god, she would have long been successfully possessed by it.

Even so, the essence of the divine caused confusion in that mortal's cognition.

She firmly believed that the communication through the [God of Chaos] was the divine remnants.

Even though this [God of Chaos] had quite a few remnants, it did not hinder the mortal's aversion and disgust for the gods.

.....

"You haven't leaked too much information yet, have you?"

Silently, the dragon-headed figure of Li Hao appeared before the Taotie.

By the mark left by the Taotie, Li Hao actually found it easy to locate the other party's true hiding place.

Or rather, it was the Taotie's intention to leave a mark on Meng Yao, hoping someone could find her this way.

"You... you've come indeed!"

Struggling in pain, the Taotie, even at this moment, strove to maintain her beauty and dignity as a woman.

Delicate makeup, decent dress, and the feminine demeanor she maintained as much as possible at all times.

Although she knew if someone truly found her through the mark left on Meng Yao,

that person would not care about her identity as a woman at all.

"Do you know me?"

Raising an eyebrow in surprise, Li Hao's dragon head appeared particularly dignified.

"It's just a mere guess..."

Without denying Li Hao's words, the Taotie endured her physical pain and said softly.

"Before encountering the 'God of Chaos,' I always thought that girl relied on the 'Mythical Armament' left by the Ancient God to counterattack the divine remnants attempting to possess her."

"But when I learned of the essence of the divine from the 'God of Chaos,' I realized everyone had fallen into a misconception."

"The gap between gods and humans is far greater than we imagined."

"Thus, after all impossibilities were eliminated, a thought arose in my mind."

Slowly raising her head, Taotie's eyes suddenly shone with an astonishing desire for survival.

"It wasn't some Mythical Armament nor her proud Ancient God lineage that helped that girl counterattack the divine remnants..."

"What enabled her transformation was a true god, a high-ranking being similar to Mazu."

The existence of Mazu Lin Momei is not a secret, and is even famously known for her unique style.

Long ago, people suspected that throughout all mythological history, there couldn't be only one existence like Mazu on Earth.

The difference lies in that unlike Mazu, they don't flaunt themselves or enjoy interacting with humans, hence they seem obscure.

Taotie's action was both a test and her final plea for help.

The result proved that Taotie's gamble was successful; the Ancient God who once helped Meng Yao actually appeared!

The dragon-headed human posture and the majestic demeanor perfectly matched Taotie's knowledge of those ancient gods on Huaxia Land.

"Please, save me!"

Silently staring at the Taotie, Li Hao did not respond immediately but suddenly opened the Celestial Eye at his brow.

Under the Celestial Eye's insight, Li Hao saw a "Bright Pearl" inside Taotie's body.

"Is this the reason you're wanted?"

With a sinister dragon claw slowly reaching towards Taotie's abdomen, Li Hao, using a cross-dimensional method, directly extracted the "Bright Pearl" from her body.

This was a Divine Format, a tangible Divine Format.

From Li Hao's perspective, it was clear that it symbolized the essence of "Moonlit Night" and "Longevity."

If it weren't in the [Fallen Area], any Ascender could use this Divine Format to directly ascend to divinity.

As the "Bright Pearl" was extracted, Taotie's appearance rapidly changed, her features and form twisting in an unusual manner.

"Oh, this is rather interesting?"

Unhurriedly observing the changes on Taotie's body, Li Hao raised an eyebrow again.

"I must see what you really are."

His entire body becoming ethereal, Li Hao, just like when he extracted the Divine Format, approached Taotie through a high-dimensional method.

The next second, Li Hao's body merged with Taotie's, and at that moment he successfully interacted with the essence of the [God of Chaos].

[Artifact: God of Chaos]

[Type: Incarnation]

[Quality: Epic]

[Function①: An Immortal Body forged by various Supreme Divine Powers, capable of maintaining its existence even in the 'Fallen Area.']

[Function②]It serves both as an incarnation and a secret realm, allowing multiple divine wills to coexist within it.]

[Function③]Capable of transforming into countless forms, it can simulate all substances, energy, and information it contacts on a microscopic level.]

[Function④]High-dimensional coordinate positioning, used by some gods as a reference coordinate to explore unknown areas.]

[Function⑤]A cross-timeline information collection device, capable of summarizing and feeding back the information it collects, serving as a vast information repository.]
