

The Growth 478

Chapter 478: Vast Heaven Mirror

All Heavens and Myriad Realms, within Chaos.

Li Hao, who came across the timeline, silently gazed at Adam's act of patricide.

The choice of the Holy Spirit was somewhat unexpected, yet reasonable, and this choice marked the final full stop of His life.

Li Hao could tell that this time, the Holy Spirit didn't choose reincarnation or rebirth, but utterly gave up everything and fell into the [Fallen Area].

Without the Holy Spirit, who was the Supreme God, the Yawei World also descended into the [Fallen Area].

Thus, Li Hao witnessed the entire process of a large Divine Pantheon merging into the [Fallen Area].

No need to zoom further in, Li Hao knew that the "King of Angels" would eventually appear on Earth and attempt rebirth using Taotie's body.

As for the other angels that fell with the Yawei World?

They are not like those Hands of God who escaped from the Yawei World.

The fall of the world also means the extinction of their lives, with only some remnants becoming Ancient Divine Relics of the [Fallen Area].

This is the ultimate fate of the Gods, an ending even the Holy Spirit couldn't avoid.

In the final moment of Yawei World's descent into the [Fallen Area], Adam, who reappeared in Chaos, seemed to accept the Holy Spirit's final advice.

Not only did He refrain from hunting the other Hands of God from Yawei World but He also intervened to stop the Hunting Fish from preying on the angels.

Seeing this situation, Li Hao, who had understood everything and had no intention to stay at this time node, also commanded the Hunting Fish to withdraw from the battlefield and return to the normal timeline.

Thus, in this Chaos, only Adam and Leviathan, who was still trying to drag Yawei World out of the [Fallen Area], remained aimless.

"..."

Wordlessly watching Leviathan's doomed efforts.

After a long silence, Adam finally floated next to Him.

This sea monster capable of destroying worlds might become the only testament left by the Holy Spirit in this world.

"Do you want to come with me? My sister."

Adam knew Leviathan could understand His language.

Because when the Holy Spirit created Him, He certainly didn't intend to create a mindless and senseless beast.

Unfortunately, Leviathan had no reaction to Adam's words, instead refusing to let go of Yawei World's remnants, making Himself an unstable dimensional entity between existence and non-existence.

If this situation is left to continue, the [Fallen Area] might have another terrifying star-devouring monster.

Whereas the [Ascension Area] where All Heavens and Myriad Realms reside, would be missing an immensely powerful Divine Abomination rivaling the Gods.

"Leviathan, what you're doing is meaningless."

With a helpless sigh, Adam continued to persuade.

"Yawei World could traverse All Heavens and Myriad Realms intact because the Holy Spirit was alive."

"But now the Holy Spirit is dead, and Yawei World has lost that unique Attribute, becoming an ordinary world like any other."

"Even if you successfully forcefully keep it in the 'Ascension Area,' you're merely preserving a mass of meaningless material energy."

His body made of countless tentacles suddenly split, and a giant eye slowly extended from Leviathan's body.

Like a massive conglomerate of countless eyeballs, this single eye expressed the look of chaos and bewilderment.

"You are the Holy Spirit's last child, also my sister, I will not harm you."

"Come leave here with me!"

"In this All Heavens and Myriad Realms, there are countless miracles."

"I want to find a way to resurrect Eve, and you can also find the meaning to continue living."

"No longer as the mission given to you by the Holy Spirit, but choices made by us with our own will."

.....

After returning to his own time node, Li Hao soon found the remnants of Yawei World's fall.

According to the normal timeline, the current Yawei World had already fallen into the [Fallen Area], and Leviathan had also disappeared with Adam from All Heavens and Myriad Realms.

On the original battlefield of the [Ascension Area], only Gus's Destiny Weaver remained.

This was certainly not because Adam didn't want to take this powerful Divine Artifact, Destiny Weaver.

It was because this Divine Artifact had long lost its form and had become a concept that pervades within Chaos.

If wanting to recreate Destiny Weaver, it would require a material carrier capable of holding this Divine Artifact.

Clearly, this was not something destitute Adam could do.

Not to mention being able to carry some Divine Artifact concept, Adam simply didn't have the ability to gather Destiny Weaver's concept, making it concretely manifest again.

In addition, Adam was clear in his heart that Gus's existence was involved with a [God of Chaos] who crossed time and space.

Destiny Weaver was most likely the spoils of that [God of Chaos].

If he were to actually take away Destiny Weaver, a peaceful life for himself in the latter half of his life would probably be out of the question.

Therefore, with all these reasons and concerns, when Li Hao's consciousness returned to the normal timeline, he quickly discovered Destiny Weaver.

Rustle, rustle...

Accompanied by a familiar sound, the Hunting Fish, also returning to the normal time node, instantly leaped out from between dimensions.

Just like a real fish swimming freely within Chaos, each tail flick of the Hunting Fish caused ripples to spread nearby.

Constant flicking, constant spreading...

The Destiny Weaver, lost without a carrier, soon showed a tendency to reunite into an entity under the Hunting Fish's repeated attempts and efforts.

The only problem now was what material to use to carry Destiny Weaver.

This is a Divine Artifact involved with destiny, capable of directly interfering with the actions of the Supreme God at an Epic Level.

If the carrying material is of too low a grade, it will definitely affect Destiny Weaver's ability to perform.

Li Hao did not lack Divine Artifacts now, so he must carefully consider how to maximize Destiny Weaver's effect.

[Speaking of, doesn't this 'Combined Divine Artifact' also have room for improvement?]

With a flicker of contemplation in his eyes, Li Hao's gaze finally rested outside the Mountain and Sea Realm.

[Cup of Hygeia], [Void Divine Hall], [Celestial Tao System], [Chronicles of Time]...

These were the Divine Artifact combinations Li Hao currently had in hand, capable of pairing and using their abilities to the fullest extent.

Each of these four Epic Divine Artifacts, taken alone, had the power to recreate the universe, and their combined use was incredibly strong.

If they had one flaw, it's due to Li Hao's own preference, causing their functionality to be overly powerful yet lacking real offensive capability.

After all, Li Hao's most powerful offensive Divine Artifact was the Candle Dragon Mask.

With such a strong artifact at hand, ordinary offensive Divine Artifacts really may not catch Li Hao's eye.

[Then, let's enhance this 'Combined Divine Artifact's' offensive ability this time!]

As Li Hao's thought flashed, the Celestial Tao System swiftly drew upon the limitless energy of the Void Divine Hall.

Then, combining with the ability of the Cup of Hygeia, a new carrier suitable for holding Destiny Weaver was created within Chaos.

...

[Artifact: Vast Heaven Mirror]

[Type: Mirror]

[Quality: Epic]

[Function①]As a carrier of destiny power, it can cross the river of time to interfere with an individual's past and future.]

[Function②]Infused with the power of the 'Eye of the Creator,' it is the Creator's material incarnation in the Material Realm, able to observe and discern all physical or non-physical entities.]

[Function③]No one can directly look at the Creator's gaze, all entities perceived and understood in essence will be decomposed into their fundamental material, energy, and information.]
