

The Growth 501

Chapter 501 - 23: Divine Relic

"The ghost gods that feast on evil spirits..."

Watching the image in the mirror, E Kui led by Shan Hu heading towards the city, Li Hao couldn't help but smile with satisfaction.

The birth of E Kui is Li Hao's attempt to use the specific capabilities of the [Vast Heaven Mirror]—that is, to manipulate an individual's past, present, and future fate.

"This is much more convenient than the 'Celestial Tao System,' and it can be used independently."

He repeatedly scrutinized the mirror in his hand.

Li Hao touched the mirror's surface lightly once more, and the image instantly shifted from the Mountain and Sea Realm to Earth.

The mirror now showed the figures of Li Jian Country and Jiang Xin, a husband and wife.

This image signifies that the [Vast Heaven Mirror] can be used outside the Mountain and Sea Realm and places of Creator worship, unlike the [Celestial Tao System].

Even in the law-prohibited [Fallen Area].

Li Hao can recreate some of the [Vast Heaven Mirror]'s abilities using special methods.

For example, the space Li Hao currently occupies is a huge library within the [Divine Treasure Vault].

Only in this special region between low dimensions and higher dimensions can Li Hao replicate the [Vast Heaven Mirror]'s abilities to affect Earth.

From this, it's clear that this mirror isn't the true [Vast Heaven Mirror].

The real [Vast Heaven Mirror] still hangs in the void of the Mountain and Sea Realm, illuminating and collecting information and intelligence from All Heavens and Myriad Realms.

The current mirror is merely a temporary vessel for carrying the [Vast Heaven Mirror]'s abilities.

Whoosh!

As Li Hao actively pulled the perspective farther, the image on the mirror quickly distanced from Earth, looking into the deeper universe.

In an instant, a semi-transparent, terrifying fish devouring a star appeared within the mirror.

That was the [Hunting Fish] which had descended again, plunging back into the [Fallen Area].

Ever since the battle with the "King of Angels."

The [Hunting Fish] left the [Ascension Area] and became a planet devourer in the [Fallen Area] once again.

Roaming between unknown star systems, the [Hunting Fish] was completely unaware of Li Hao's gaze, and greedily swallowed the power of the star.

In the [Fallen Area], it was a star far larger than the solar system.

Yet before it fell and became a star, it was the Divine Kingdom of a powerful Sun God in the [Ascension Area].

Thus, during its consumption of the star, the [Hunting Fish] inevitably discovered the remains of that powerful Sun God.

That's a "Divine Relic," a trait that even the [Fallen Area] couldn't annihilate.

Rustle, rustle...

After obtaining the "Divine Relic," the [Hunting Fish] almost without hesitation chose to sacrifice it to Li Hao.

Amidst eerie sounds, the "Eye of the Creator" on the front of the [Hunting Fish] suddenly shone brightly.

The next second, the "Divine Relic" from the powerful Sun God disappeared, replaced by the [Hunting Fish]'s excited and joyful calls.

.....

"Sometimes when followers are too devout, maybe it's not such a good thing..."

With a bitter smile, Li Hao looked at the "Divine Relic" suddenly appearing in a corner of the [Divine Treasure Vault] and lamented helplessly.

It was a cupboard Li Hao specifically placed for the [Hunting Fish], filled with various "Divine Relics" it found in the [Fallen Area].

If someone unaware saw this scene, they'd probably think the [Hunting Fish] was some kind of treasure hunting spirit.

In actuality, it was a habit gradually developed by the [Hunting Fish] after its battle with the "King of Angels."

After that battle, the [Hunting Fish] seemed to realize that the extraordinary traits in the [Fallen Area] could be used to please Li Hao.

Thus, the [Hunting Fish] started frequently offering Li Hao the extraordinary traits it found precious.

On one hand, the various "Divine Relics" found by the [Hunting Fish] were indeed interesting...

On the other hand, it was also to not dampen the [Hunting Fish]'s enthusiasm and positivity...

Li Hao created a special cupboard in the [Divine Treasure Vault] to store the treasures offered by the [Hunting Fish].

Fortunately, the [Divine Treasure Vault] itself has the ability to compress space.

Although the cupboard looks small, it possesses an almost unlimited storage space.

Over time, even Li Hao couldn't remember how many "Divine Relics" had been sacrificed to him by the [Hunting Fish].

The only certainty is that the [Hunting Fish] is truly glad Li Hao accepts its sacrifices, thinking this is the most effective way to communicate with its god.

"So, it's really thanks to that guy's 'diligence' that the 'Divine Treasure Vault' has become so large now!"

Surveying the current [Divine Treasure Vault], Li Hao couldn't see the end of this gigantic library at all.

This is another characteristic of the [Divine Treasure Vault].

As the number of various divine artifacts collected by Li Hao increases, the internal space of the [Divine Treasure Vault] will automatically expand.

Every time a valuable treasure is collected, the [Divine Treasure Vault] generates corresponding storage rules and enlarges its space.

Fortunately, Li Hao doesn't need to personally search through all the different collections within the [Divine Treasure Vault].

He can quickly retrieve various information contained within the [Divine Treasure Vault] and activate those treasures and divine artifacts just by sitting in front of the computer in the center of the library.

In other words, even when outside, without pulling out the original text.

As long as Li Hao needs it, he can use various divine artifact's original text abilities via the [Divine Treasure Vault].

Especially after moving the computer carrying the [Celestial Tao System] into the [Divine Treasure Vault], it has become his most precious treasure besides the Mountain and Sea Realm.

During the day, Li Hao will carry out daily learning and life like an ordinary university student.

Once night falls, Li Hao will enter the [Divine Treasure Vault], without worrying about his identity being exposed, completely liberated.

Besides occasionally descending into the Mountain and Sea Realm in the form of "Entering Dreams," Li Hao now almost doesn't need rest or sleep.

What about the dormitory at school?

The avatar created by Li Hao is completely sufficient to fool ordinary people.

If it weren't for Huo Dou still being far away, Li Hao wouldn't even need to create an avatar.

Of course, always cautious Li Hao, just in case, will leave Hua She beside the avatar.

If anything unexpected happens, Hua She will notify Li Hao immediately, allowing him to return to the real world.

"Speaking of which, I seem never to have personally made a truly meaningful incarnation?"

"For a Creator, this doesn't seem very qualified, right?"
