

## The Growth 502

Chapter 502: Incarnation of God

Lu'an City, the male dormitory of Lu'an University.

The sun had not yet risen, and the moonlight still shrouded the earth.

And in dormitory 318, Hua She, who had continuously maintained the form of a "snake-shaped lamp," suddenly came alive, then looked somewhat surprised towards Li Hao's bed.

Lying there was a fake body Li Hao used to disguise as if he were sleeping.

But the moment Hua She looked at that fake body, the [Divine Treasure Vault] appeared out of thin air above its head.

Under the gaze of the prank doorbell's fierce single eye, piles of hundred yuan bills flew out as origami cranes, swirling and dancing around the fake body.

These hundred yuan bills were nothing else but the "Creator Totem" that Li Hao had crafted by hand.

Ever since all those hundred yuan bills, carrying attributes of misfortune, were made into "Creator Totems"...

Li Hao hadn't created any totem for a long time.

On one hand, it was because he had released enough "Creator Totems" across the [All Heavens and Myriad Realms]...

On the other hand, using hundred yuan bills to make "Creator Totems" was somewhat too extravagant for the current Li Hao...

As for why Li Hao was so obsessed with using hundred yuan bills to create "Creator Totems"?

It could only be said that it was an individual quirk of this Creator, not particularly unique.

Therefore, when Hua She saw those origami cranes made from hundred yuan bills again,

she couldn't help but be curious about what her God of Gods intended to do, being willing to use his precious savings?

Truth be told, Hua She really couldn't understand Li Hao's emphasis on money.

In her opinion, if Li Hao wished, not to mention acquiring some currency from Earth, even overthrowing Earth's monetary system wasn't difficult.

Besides, with Huo Dou the pup working outside, Li Hao wouldn't lack money to spend.

For this reason, Hua She could only conclude that Li Hao wanted to preserve his humanity to the utmost extent.

He used such a straightforward and crude method to distinguish between "Li Hao on Earth" and the "Creator of the Mountain and Sea Realm."

"'God' and 'human' balance isn't so easy to maintain."

Although she had long been completely subservient to Li Hao, no longer thinking of correcting his behaviors unfitting of a Creator,

upon realizing what Li Hao intended to do, Hua She couldn't help but mutter.

Fortunately, even though she muttered, Hua She didn't forget her duties, immediately hypnotizing the dormitory roommates.

Whatever noise Li Hao made next, the dorm mates wouldn't be startled into waking.

Whoosh!

So, when those paper cranes reverted back to hundred yuan bills and surged into the fake body's interior,

a stream of air erupted from within, causing the body to float uncontrollably.

Rumble!

In the next second, the fake body, which was originally just a false object, began transforming into a true body of flesh and blood.

First, the body became ephemeral, and a fertilized egg inheriting human genetic material started to form in the illusion.

Soon after, those hundred yuan bills fully simulated the biological embryo's growth process, prompting the fertilized egg's rapid differentiation and growth.

In just a few breaths, a physical body identical to Li Hao was born.

.....

Under Hua She's protection, Li Hao's incarnation didn't truly open its eyes until daybreak.

"So this is... the feeling of a mortal?"

Li Hao's voice slowly rose, unusually full of weariness in his tone.

Because this incarnation was not endowed with any extraordinary abilities, not even the basic "Immortality."

And this was the primary reason why it took Li Hao such a long time to complete this incarnation.

"No extraordinary power, and no Immortal Body either..."

"This feeling is right, this is the purest form of humanity!"

Despite his weary face, Li Hao's voice sounded somewhat excited.

If not for this sudden whim, Li Hao nearly forgot this feeling of being born as a human.

"Great God of Gods, you are..."

Also noticing the unique nature of Li Hao's incarnation, Hua She blinked in some confusion.

Other gods create incarnations leaning towards strength and peculiarity.

Why did her God of Gods create an incarnation that was merely a mundane mortal life?

Hua She admitted that Li Hao's current abilities have surpassed her imagination, even being able to create a fully real incarnation in the law-forbidden [Fallen Area].

Yet the problem was, this incarnation was too weak; it didn't match Li Hao's current status.

"You don't understand, now this is the truest me!"

Feeling this long-lost sense of reality, Li Hao squinted his eyes slightly.

Just as Hua She was puzzled, making an incarnation in the law-forbidden [Fallen Area] was not a simple matter.

Even for Li Hao, who holds the belief of the entire Mountain and Sea Realm, creating a new incarnation from nothing was a huge consumption.

So Li Hao went against the norm, just using his abilities to simulate the embryonic birth and differentiation process.

Considering his inherent Immortal Ability, Li Hao didn't dare use his own genetic material when creating the incarnation.

The genetic material for this incarnation was taken from the couple Li Jian Country and Jiang Xin.

In other words, at least on a biological level, Li Hao's current incarnation was the legitimate son of Li Jian Country and Jiang Xin.

"There's so much that I don't understand, anyway, I can't understand a lot of what you do."

Rolling her eyes, Hua She did not wish to continue entangling with Li Hao on this issue.

Her God of Gods was perfect in everything, except having a vastly different worldview from other gods in the All Heavens and Myriad Realms because of his birth issue.

"But I must remind you, your incarnation is not truly a mortal."

Seeing Li Hao's slightly surprised look, Hua She continued speaking.

"Do not forget, you are a true high-dimensional existence, your power is ubiquitous."

"Since your will appeared in this incarnation, it has already been influenced by your will."

"If judged by the standards of the 749th Bureau, your incarnation is a 'Possessor'..."

"And the kind that is occupied by an Ancient God's Will, completely resurrecting in the form of an Ancient God as a 'Possessor'."

Upon hearing this, Li Hao fell into silence.

After all, in a certain sense, Hua She's words were spot on.

Li Hao's current incarnation was indeed a "Possessor" in its ultimate form - a resurrected Ancient God.

And such an existence often gradually awakens various extraordinary abilities due to the influence of the Ancient God's Will.

So the question arises, continuously influenced by Li Hao, the Creator's Will, what kind of superpower will this incarnation awaken to?
