

The Growth 532

Chapter 532 - 2: Automatic Alchemy Furnace

Meanwhile, inside the Divine Treasure Vault.

"Oh great God of Gods, it seems there's some trouble on Huo Dou's side. Do you want to send a Divine Split over to handle it?"

Slowly poking their head out from the bookshelf beside them, Hua She asked, half-curious, half-reminding.

Even though Hua She never seemed to get along with Huo Dou when the latter was with Li Hao,

after Huo Dou left, Hua She couldn't help but miss that dog who always went against her.

Therefore, upon noticing that something seemed amiss with Huo Dou, Hua She immediately snapped out of her "internet-addicted girl" state.

Of course, another reason Hua She wanted to bring this up was to give Li Hao a chance to relax.

"It's nothing serious; no need to worry about it for now."

Raising his eyelids slightly, the busy Li Hao replied calmly.

In a way, Huo Dou is also part of Li Hao, so he couldn't possibly be unaware of what was happening there.

As Li Hao said, it wasn't a big deal.

It was just some individuals with extraordinary abilities trying to force their way into a military base.

Not to mention that the military base itself had strong defensive measures, Huo Dou alone could wipe out those intruders.

If it weren't for wanting to figure out the invaders' intentions and the forces supporting them from behind, Huo Dou would have already burned them all to ashes.

Compared to Huo Dou's side, Li Hao felt that the work at hand was more worth his attention.

"You've been at it for several days now, aren't you planning to give up yet?"

Clearly noticing Li Hao's thoughts, Hua She could not help but glance toward the spot in front of Li Hao.

Inside this massive library structure, Li Hao had sectioned off a small space with bookshelves, like a study or a nap room.

Of course, Hua She preferred to call this small space an "alchemy room."

Because in the center of this space, right in front of Li Hao, there was a copper furnace as tall as a person.

At the furnace's base, the Yin Yang Trigrams rotated and combined, continually providing flames of varying temperatures and attributes.

Moreover, on the front of the copper furnace, there were some mechanical wheels and buttons that starkly contrasted with its design.

Hua She didn't know what those buttons did, but she knew the wheel could adjust the firepower of the furnace.

Because when the copper furnace was initially made, it was Hua She who provided the fire source for it.

By simply turning the wheel to the "sun" symbol, real Sun Essence Fire would appear at the base of the furnace.

"Do I seem like someone who gives up easily?"

Rolling his eyes at Hua She, Li Hao began to explain the fruits of his labor over the past few days.

"Although it hasn't reached the effect I anticipated, this copper furnace can actually be used."

"All you need to do is insert the corresponding herbs into this slot, then press this button..."

"This copper furnace can automatically refine 'Primordial Qi Pills' that replenish primordial qi, without any need for human operation or supervision."

Pointing twice at the corresponding button, Li Hao said with pride.

"If this were in the Celestial Human Realm, my invention would surely be groundbreaking!"

Upon hearing Li Hao say this, Hua She rolled her eyes in response.

"Yes, yes, you're aware this is in the Celestial Human Realm?"

"Your incarnation is in the 'Fallen Area,' where there's none of the various herbs from the Celestial Human Realm."

"Even if you hand him this artifact, he wouldn't even have the environment to use it!"

Li Hao was left silent by Hua She's retort, aware that she was speaking the truth.

Since leaving the Celestial Human Realm, figuring out how to allow his incarnation to continue practicing the "True Martial Demon-Vanquishing Scripture" had become a question Li Hao consistently pondered.

On Earth, where there is no "qi," Li Hao had devised a solution of refining various elixirs and using "medicine supplementation" to address the cultivation of his incarnation.

However, this plan hit a snag right at the first step.

The various pill formulas in the Celestial Human Realm were based on its special environment, which Earth lacked in heavenly herbs and earthly treasures.

Moreover, Li Hao wanted to create an alchemy furnace that could operate entirely automatically, without any need for human intervention.

The result was that Li Hao spent several days here and only managed to produce this semi-finished product.

By inserting the corresponding herbs, this alchemy furnace could indeed refine various elixirs from the Celestial Human Realm.

The issue was that Li Hao wanted something capable of automatically analyzing various herbs, extracting the corresponding medicinal properties, and then fully automatically refining the corresponding elixirs.

...

[Artifact: XX Pill Furnace? (Unnamed)]

[Type: Copper Furnace]

[Quality: Legendary]

[Function①Built-in flames of various specifications and levels, adaptable to any world.]

[Function②Can automatically refine pills and synthesize elixirs, provided the central core has the corresponding pill formula stored.]

[Function③Inadvertently infused with the power of a certain God of Time, the pill furnace's secret compartment inherently possesses the attribute of compressed space, and time within it is eternally fixed at the moment of pill completion.]

...

Looking at this semi-finished pill furnace, Li Hao could only smile wryly in the end.

When creating this pill furnace, Li Hao hadn't used any power of the Creator, instead attempting to rely solely on his own wisdom and skills.

In truth, if it weren't for the pill furnace's third function elevating it, it probably wouldn't even reach the threshold of Legendary Level.

"Even without considering the pill-refining function, it's sufficient to simply use it as a piece of space equipment."

"Moreover, it even comes with a 'preservation' effect, making it much more useful than ordinary space equipment."

Just as Hua She was about to speak up to shatter Li Hao's self-consolation, she saw him suddenly change his tune and say.

"Besides, outsiders may not be able to use the pill-refining function of this furnace, but my incarnation might be a different story."

Momentarily taken aback, Hua She quickly understood.

"You're planning to cultivate Celestial Human Realm herbs on Earth?"

"Is your incarnation already capable of 'materializing' something so complex?"

Thinking of the abilities developed by Li Hao's incarnation under his influence,

Hua She had to admit that the Creator's incarnation was fundamentally different from ordinary Ancient God incarnations.

The ability Li Hao referred to as "Reality Reconstruction" was practically a scaled-down version of the Creator's power.

The only distinction between the two might be that the incarnation must consider the corresponding framework and material composition to materialize something reasonable, and cannot generate energy and matter out of thin air.

"It's merely reconstructing the structure of some herbs."

"As long as I don't pursue absolute perfection, it should suffice to meet this pill furnace's usage conditions."

Brimming with confidence, Li Hao patted the pill furnace, which instantly shrank and leaped into his palm.

At the last moment, Hua She distinctly saw an eye filled with curiosity open on the surface of the pill furnace.

Clearly, this pill furnace, like everything Li Hao had used previously, had been imbued with a spirituality akin to life.

Compared to its function as an automatic alchemy furnace, in essence, this pill furnace was a living artifact.
