

The Growth 565

Chapter 565 - 35: God-Armed Countermeasure!

"Ah!"

Unaware that her appearance had already caught the attention of the "Weihe Combat Team."

Yu Wei, engulfed in black flames, roared in anger yet was unable to truly approach the core of the Twisted Beast, let alone rescue Haoguang from its clutches.

Fortunately, despite her anger and pain, Yu Wei did not forget her current identity.

"Want to devour me?"

"Let's see if you have the ability to do so!"

Accompanied by Yu Wei's roar, four superconducting optical fibers resembling octopus tentacles stretched out from both sides of her spine.

It was a special {External Implant}, a spatial device capable of emitting hyperspace signals.

Zi zi zi...

As the four superconducting fibers spread out like wings behind Yu Wei, everyone witnessed the distorted anomaly in space-time.

{User Name: Yu Wei}

{Access Permissions: Management Level Highest Authority}

{Signal Connection: Hyperspace Signal}

{Artificial God: Celestial Child God No. 2}

{Energy System: Imaginary Number Core self-check normal! Primordial Qi Amplification Core self-check normal! Conventional Power System self-check normal!}

{Weapon System: High Energy Cannon, Quantum Fluctuation Blade, Primordial Qi Amplification Device, Autonomous Unmanned Device...}

{Defense System: Phase Armor, Subdermal Electronic Armor, Light Conversion Defense Field, Subspace Distortion Barrier...}

{Communication System: Conventional Signal Access Device, Quantum Signal Access Device, Hyperspace Signal Access Device...}

...

Alongside the flash of information and data in Yu Wei's eyes.

A massive shadow slowly emerged from the twisted space-time behind her.

It was a {Artificial God} with a beast-like posture, entirely covered in high-strength Phase Armor.

Silently yet with an overwhelming sense of oppression.

Named "Celestial Child," the Artificial God made its appearance, even the terrifying Twisted Beast in front became still.

"God?"

The deep voice revealed an incredulous tone, the Twisted Beast had never seen such a "God."

However, Yu Wei's subsequent actions made the Twisted Beast understand the essence of this "God."

Zi zi zi...

From afar, Yu Wei's four superconducting optical fibers unfolded like wings smoothly connected to the "Central Cabin" at Celestial Child's brow.

Soon, Yu Wei's entire body began to sink into the "Central Cabin," completely merging with the Celestial Child.

"Huff!"

With the help of {External Implant}, Yu Wei's brain and {Brain-Machine Implant} instantly took control of Celestial Child.

So, when the beast-like Celestial Child slowly raised its head, four genuine wings spread out from its back.

Buzz!

Just a gentle flap of those four wings unleashed a torrential energy storm across the battlefield.

In less than a blink of an eye, the black flames encircling Yu Wei were rapidly dispersed, restoring the sky to its clear, bright condition.

Su!

In the next second, a pair of "Quantum Fluctuation Blades" resembling mantis claws sprung from Celestial Child's arms.

The dazzling blades were capable of slicing through any tangible matter at the quantum level.

Even the so-called "Seventeenth Ancestor of Chaos," an unspeakable entity, if it remained in this world as the form of the Twisted Beast, could not avoid being chopped into two pieces by the Celestial Child.

"Harnessing the power of God with a mortal's will..."

"Your armor seems more intriguing than the previous one..."

Before the Twisted Beast could finish its words, Celestial Child extended its hand towards its direction.

Instantly, the two "Quantum Fluctuation Blades" separated from Celestial Child's arms, transforming into two drones charging at the enemy.

Swish! Swish!

In a flash of electric light, the Twisted Beast was cut into several pieces.

The drones equipped with "Quantum Fluctuation Blades" also housed neural nodes capable of autonomous combat.

No extra attention from Yu Wei was necessary for their control.

As long as she issued a command, these two autonomous drones would independently seek the opportunity to fight.

The only weakness of these autonomous drones.

Is probably that their neural nodes are sourced from the Celestial Child's user.

This means, these two autonomous drones' combat habits and styles originate from Yu Wei, unable to self-correct like those self-evolving artificial intelligences.

Nevertheless, for this reason, they were effectively Yu Wei's two incarnations, harmoniously coordinating actions and attacks.

Su—Boom!

Taking advantage of the moment the Twisted Beast was fragmented, Celestial Child dashed forward at a speed surpassing the limits of human sight.

Not only enhanced speed but also wrapped in a layer representing "Absolute Defense" during the charge.

When absolute speed was paired with absolute defense, a powerful shockwave naturally formed.

Under the impact of this mighty shockwave, all black flames were extinguished, and the Twisted Beast just a short distance away was reduced to smoke and ashes.

"Is this all you can do?"

Unexpectedly, the Twisted Beast's voice sounded again in the next moment.

Then, the previously dispersed Twisted Beast reassembled, and the dispersed black flames and dark clouds once again covered the sky.

The light brought by Celestial Child was merely a fleeting moment, a time so brief that most people hadn't even realized what happened.

This is the true God! The supreme ruler!

The Seventeenth Ancestor of Chaos, essentially a high-dimensional being above all life forms.

The Twisted Beast appearing in the Celestial Human Realm was merely a low-level incarnation.

Unless Celestial Child possessed the power to forcibly reduce dimensions of its opponent, even if it killed the Twisted Beast a thousand times, all it consumed was a bit of contaminated Primordial Qi.

However, since Mountain and Sea Civilization defined "Artificial God" as "the armament against God," naturally there were ways to cope.

"Roar!"

With another roar towards the sky, a halo appeared behind Celestial Child.

From appearance to embodiment, transforming into a tangible halo, wouldn't take more than one ten-thousandth of a second.

By the time the Twisted Beast realized the crisis, that halo had already enclosed it.

——To Divine Armor: Subspace Distortion Barrier!

Using its own manipulation of the Power of Space-Time, creating a subspace with infinitely compressed space-time relationships outside the normal space.

This was the Mountain and Sea Civilization's solution for dealing with those unkillable Gods—Seal.

Certainly, sealing a Divine Incarnation isn't simple even with the assistance of the Power of Space-Time.

Without Celestial Child's equipped {Imaginary Number Core}, the energy consumption alone would be enough to destroy half the world.

Only true Infinite Energy could support the space-time sealing method for a Divine Incarnation.

Whirl!

Then, under the watchful eyes of the masses, the halo continuously compressed from large to small, eventually compressing the Twisted Beast into a tangible black sphere.

Around this black sphere, two autonomous drones orbited like satellites.

Anyone daring to approach this black sphere, attempting to release the Twisted Beast, would face attacks from these two autonomous drones.
