

## The Lord 1091

### Chapter 1091: Warfare

Finally, because Great Qin had four billion soldiers, it could have 40,000 Basic General Seals, 4,000 Intermediate General Seals, 400 Advanced General Seals, 40 Marquis Seals, and four Earl Seals.

Great Qin's current force of City Lords was greater than the two other sides', but its army was weaker in terms of soldiers, having about one billion fewer soldiers than the two other sides.

If Zhao Fu was going to unify the world, he would not hide anything anymore; the difference of one billion or so soldiers would be made up from the Dark Demon world's Southern Continent, putting them at the same level as the other side.

Zhao Fu's goal was to take down the Eastern Continent before conquering the Eastern Archipelagos. The soldiers he would move from the Dark Demon world would not attack, and they would instead defend against the Eastern Archipelagos while Great Qin attacked the Western Continent.

Right now, Zhao Fu was somewhat worried about the Great British Empire. It had 17,000 City Lords, seven billion people, and 700 million soldiers. It also had 7,000 Basic General Seals, 700 Intermediate General Seals, 70 Advanced General Seals, and seven Marquis Seals.

Each Kingdom had a limit to its population, and this was determined by how many Cities it had. Each City had a population limit, so the more Cities a Kingdom had, the greater the population it could have. If the population exceeded the limit, those people would not count in the total population of the Kingdom.

Cities were within regions, and each region could only contain five to seven Cities. Any additional Cities would not count as a City of the Kingdom.

The Great British Kingdom currently had 4,000 regions, so at the very least, it had 20,000 Cities.

This system restricted how many General Seals a Kingdom could have. The more people a Kingdom had, the more soldiers it would have; the more soldiers that a Kingdom had, the more

General Seals it could have. Because of the limitation on population, there was also a limit on General Seals.

As such, it was impossible to see a small Kingdom with ten billion people, one billion soldiers, and 10,000 Basic General Seals.

Zhao Fu thought about it for a while, and in the end, he decided to start a battle for unification. As such, he immediately gathered all of his subordinates to discuss, and Great Qin was soon in a state of solemn and anxious preparation.

This was a battle that would unify the world, and it would be the largest battle ever in the human world. The result would be incredibly devastating, with corpses that would pile up into mountains and lakes of blood. Even the heavens would weep.

Great Qin did not dare to show any carelessness towards such an important battle because the slightest mistake could result in the deaths of countless people. Because of this, Zhao Fu and his important subordinates discussed this matter for a full week.

Great Qin's various Departments worked at their maximum capacities, gathering all sorts of resources required for battle, and a large number of weapons was produced.

"Are they finally coming?" The Western Continent and Eastern Archipelagos soon heard that Great Qin was preparing for the human world's final battle, the unification battle.

If Great Qin won, the human world would be unified, and there would be peace in the human world. Great Qin would be the only Kingdom in the human world, and everyone would be subjects of Great Qin.

The Western Continent and Eastern Archipelagos faced immense pressure, as this concerned their very existence. They did not dare to be careless and also put in all of their effort as they started to nervously prepare.

In February, the orchids started to bloom, and in March, cherry blossoms could be seen everywhere. Great Qin had spent an entire month to prepare for this massive battle, and the Western Continent and Eastern Archipelagos had been preparing this entire time as well. It could be seen just how serious both sides were.

During this time, the Li family once again tried the same trick to lure Zhao Fu over, but Zhao Fu did not pay them any attention at all. Now that there was such an important battle coming up, Zhao Fu would not allow anything to distract him.

On March 7, Great Qin officially moved out. Both sides had set down countless Void Zones in the oceans to prevent the other side from using any underhanded tactics. Zhao Fu had also constructed a large number of ice islands on the oceans to set up teleportation channels; once the Void Zones were destroyed, they could be used.

Great Qin's soldiers wore black armor and held sharp weapons, and they orderly passed through teleportation channels. City Lords giving off powerful auras stood in the sky, giving off a massive might.

The Western Continent's factions had set down a large number of Void Zones in the ocean, so Zhao Fu sent the eight Aquatic Beast Kings ahead to scout out the way to avoid any ambushes before ordering scholars proficient in formations to destroy the isolation barriers.

On the other side, the Eastern Archipelagos heard that Great Qin was attacking the Western Continent, so it started to gather its armies to attack Great Qin.

Similarly, both sides had set up Void Zones in the ocean between the Midland Continent and Eastern Archipelagos. The Eastern Archipelagos had also used Ice Powder to create ice islands to transport soldiers.

They were planning on sending City Lords ahead to scout the way while they destroyed isolation barriers when something unexpected happened.

Swish, swish, swish...

Arrows shot out from underwater, tearing through the air as they flew towards the Eastern Archipelagos soldiers on the ice islands. The dark mass of arrows caused the soldiers on the ice islands to be greatly shocked, and they immediately defended.

The Shieldbearers rushed up and formed a semi-circular wall of shields that blocked the countless incoming arrows.

The sudden attack only caused small losses to the Eastern Archipelagos as they were quite prepared.

The City Lords in the sky looked quite serious as they found that there were people underwater; they were all Fish Scale people.

The Fish Scale people were adept at underwater battles, and for this unification battle, Great Qin had done much preparation. It had left a number of Fish Scale people here as the first line of defense.

The Eastern Archipelagos had sent 1.8 billion soldiers and 20,000 City Lords, which was almost their entire force. They understood this was their last chance; if they did not go all out, they would perish.

There were only one billion Fish Scale people underwater, and only 400 million were soldiers; the remaining 600 million were people's militia.

The Eastern Archipelagos City Lords knew how strong the Fish Scale people were underwater, so they gave the order for the soldiers on the ice islands to counterattack while they prepared to force the Fish Scale people into retreating. That way, they would be able to head to the Midland Continent.

However, Great Qin's City Lords gave off terrifying auras as they revealed themselves. Great Qin was weaker in terms of soldiers, but it was slightly stronger in terms of City Lords.

This forced the Eastern Archipelagos City Lords to stay their hands with unsightly expressions on their faces.

Swish, swish, swish...

The Eastern Archipelagos soldiers drew their bows and shot out arrows that drew arcs in the air as they flew towards the Fish Scale people.

The Fish Scale people immediately dove underwater, using the water to defend against the countless incoming arrows. This made most of the arrows miss.

The Fish Scale people underwater did not reveal themselves again and continued to hide as they bided their time. Their goal was to just stall the Eastern Archipelagos army and not destroy it. After

all, the main battlefield was at the Western Continent; as long as Great Qin could destroy the Western Continent, the Eastern Archipelagos wouldn't have the strength to defend.

## Chapter 1092: Ice-Destroying Spears

Facing the slippery Fish Scale people, the Eastern Archipelagos soldiers' expressions became quite serious. They knew that these Fish Scale people mainly just wanted to stall them so that Great Qin's main force could destroy the Western Continent. Once the Western Continent was conquered, the Eastern Archipelagos would have no hope at all.

As such, they could not allow Great Qin to get what it wanted. If the Eastern Archipelagos could invade the Midland Continent and force Great Qin to go back to defend, they would have a trace of hope.

"Activate the formations!" a cry sounded out as a massive magic formation appeared on the ice islands, giving off an intense white light that gave off a bone-piercing coldness.

Following this, the massive ice islands started to move, giving off immense auras of suppression as they moved forwards. They were quite fast and looked quite shocking; the scene of over 1,000 massive ice islands surging forwards was quite a grand sight.

The Fish Scale people were quite shocked; the Eastern Archipelagos people had turned these ice islands into boats. Facing these massive ice islands, the Fish Scale people could only scatter because they would be turned into meat paste if they were hit.

However, even though the ice islands were quite fast, it would take at least 20 or so days for them to reach the Midland Continent.

The Eastern Archipelagos factions knew this; they were only using the countless ice islands to charge and scare off the Fish Scale people. Their true aim was to destroy the Void Zones.

Boom! Boom! Boom...

The countless magic formations on the ice islands devoured countless traces of essence qi and gave off intense cold lights. Massive traces of chilling qi rushed into the sky, causing the surrounding temperature to plummet. Frost gathered in the sky as if the sky was going to be frozen.

The isolation barriers set down by tGreat Qin were destroyed by the chilling qi, and in just an instant, two lines of defenses had been broken through. Great Qin only had four in total.

This made the Fish Scale people feel quite shocked; they had never thought that the other side would be able to break through two lines of defenses so quickly. They did not hesitate anymore and took out spears inlaid with blue gems, throwing them towards the ice islands.

Bang! Bang! Bang...

The spears stabbed into the ice islands and seemed to contain some kind of magical power, causing a large amount of ice to crack and melt. These were Ice-Destroying Spears, and the Fish Scale people had used them against the human world when they had invaded.

However, things were different now, and it was now Great Qin's Fish Scale people using it against other humans.

The countless Ice-Destroying Spears riddled the ice islands with craters, making them look quite unsightly. In five or six waves of spears, these ice islands would be destroyed.

Because the Fish Scale people were throwing them from underwater, hitting the bottom of the ice islands, the Eastern Archipelagos soldiers could not defend at all. They did not want to go underwater either; even though they had more people, they did not feel very confident in an underwater battle.

The expressions of the Eastern Archipelagos' people did not change because they had not been preparing all this time for nothing. Countless people threw out Ice Powder, which quickly caused the water to turn back into ice, quickly restoring the ice islands.

Great Qin's Fish Scale people continued to throw out Ice-Destroying Spears to destroy the ice islands, while the Eastern Archipelagos' people continued to use Ice Powder to restore the ice islands.

Both sides continued on like this, with Great Qin ferociously attacking and the Eastern Archipelagos' people continuously repairing, and this lasted for a whole day.

In the end, the Eastern Archipelagos' forces were able to break through the third line of defense. Facing this, countless scholars from Great Qin hurried over to set up temporary isolation barriers to try to stop the Eastern Archipelagos factions from going further.

The City Lords continued to fight, with both sides suffering losses. Great Qin relied on its equipment and other advantages to have a slight upper hand.

Over at the Western Continent, Zhao Fu also met some trouble. The eight Aquatic Beast Kings found countless massive whirlpools, which were 10,000 meters wide. They had immense suction force, and Stage 2 soldiers who were sucked in were dead without a doubt.

This was the defensive measure of the Western Continent. At first, Zhao Fu did not pay them much attention, as all they had to do was destroy the Void Zones.

Zhao Fu ordered people to destroy the Void Zones, but the massive whirlpools could actually move, and they quickly headed towards Great Qin's forces.

The massive whirlpools could cause a lot of trouble, and they could even destroy the ice islands. Zhao Fu did not hesitate to order the eight Aquatic Beast Kings to destroy the whirlpools. The Aquatic Beast Kings' bodies were all around 10,000 meters long, so they naturally did not fear these whirlpools.

They gave off terrifying auras and slammed towards the whirlpools like mountains, causing whirlpools to collapse.

On an ice island, Zhao Fu was not satisfied at the speed at which the scholars destroyed Void Zones, and he prepared to use some other methods he had prepared.

120 savage-looking Dragon-Slaying Ballistae were pushed out; Great Qin had recently manufactured an additional 40.

These Dragon-Slaying Ballistae all had bolts with black crystals inlaid into them. These bolts were quite extraordinary and were made of Barrier-Destroying Stones. The head, body, and tail of the bolts were all socketed with Talisman Stones, and the bolts gave off monstrous auras.

Corpse Soul Commanders drew the Dragon-Slaying Ballistae with great force, and as Zhao Fu gave the order, they released the bolts.

Boom! Boom! Boom...

Massive explosions sounded out as enormous black rays of light giving off an unstoppable momentum shot into the sky incredibly quickly, making it seem as if the sky was going to explode.

The countless barriers in the sky were instantly destroyed by those black rays of light, and in that one wave of attacks, Great Qin forcefully destroyed three Void Zones.

A trace of a smile appeared on Zhao Fu's face. Each of those bolts were quite expensive, and they were twice as expensive as gold Talisman Bolts. If they were not so effective, Zhao Fu would not be willing to manufacture them.

After seeing those black rays of light tear through the sky, a few people from the Western Continent secretly observing a distance away felt incredibly shocked and could not help but gulp.

This time, they had made immense preparations and laid down nine Void Zones. Just like that, three of them had been destroyed.

Under Su Yan's leadership, they had also created whirlpool formations, and they had thought that they would cause Great Qin a lot of trouble. However, they had been forcefully destroyed by those massive beasts, and now the remaining ones were being attacked by the eight Aquatic Beast Kings as well.

If this went on, they definitely would not be able to defend against Great Qin. Those people left and reported this; if they did not do something, the Void Zones would be quickly destroyed.

Within a large hall in the Western Continent, Tina Pendragon sat on her golden throne. She was undoubtedly the most powerful Queen in the West, and many Legatees stood around her. Some were from the Southern Continent, some were from the Northern Continent, and some were from China.

In front of Tina Pendragon, they could only lower their heads. They had all been famous and important people in their own Continents, but they had fallen to such a state. Tina Pendragon was in charge, but, of course, they had not actually submitted to her.

## Chapter 1093: Battle of Abnormal Signs

Countless factions from three Continents were now gathered at the Western Continent. There were system factions, player factions, and many Legatees that Great Qin had not destroyed, such as China's Legatees.

There was also Akhenaten and Babilon; they had the human world's last two Clan Armaments.

The Western Continent was quite dangerous and terrifying, but they did not dare to face off against Great Qin directly. After all, Great Qin's strength was simply too horrifying, and facing Great Qin quickly destroying their defensive lines, they had to do something.

'How should we move? How can we avoid a direct confrontation and attack Great Qin from the side?' Tina Pendragon thought to herself as she sat in her throne. This day had finally come; even though she had wanted to directly face Zhao Fu at least once, she understood that she was not a match for Zhao Fu.

They could not afford to directly resist Great Qin, as they would most likely lose. As such, they would only have an advantage if they attacked from the side.

Jiang Ziya walked over and said, "If we want to weaken Great Qin without directly facing them, this old man has an idea, but I will need all ability users and espers to assist me!"

Hearing this, everyone felt quite delighted and nodded in agreement. They felt immense confidence in Jiang Ziya, a very famous figure from history. If he had an idea, it would definitely be an extraordinary one.

Following this, countless ability users and espers gathered together. Among them, there was the most important person to Tina Pendragon, the greatest magician of the Western Continent, Merlin.

There was a massive stage next to the ocean, on which there were countless flags. The flags fluttered in the wind, and there were all sorts of magic items on the stage including swords, sabers, drums, bells, paintings, instruments, staffs, and axes. They were all arranged in orderly structures.

Jiang Ziya, who was dressed in white clothing, stood at the center, giving off an otherworldly feeling. He slowly closed his eyes and stretched out his hands, causing a massive, formless energy to spread out. The countless magic items around him seemed to sense something and continuously trembled.

Boom!

A massive explosion sounded out as the countless magic items continuously trembled and gave off all sorts of light as they turned into rays of light and shot into the sky, forming a massive magic formation. Immediately, the heavens and earth seemed to dim as a massive wind roared.

The surrounding Heaven and Earth Qi madly gathered, forming a berserk gale that was almost corporeal. Sand and stones were blown into the air, making it difficult for people to even open their eyes.

An enormous might spread out from the magic formation, seeming almost solid, and everything nearby seemed to be weighed down by something incredibly heavy.

There were many smaller stages in the surroundings, over 1,000 of them, and there were people and all sorts of magic items on them as well.

They all started to act as well as formless energies spread out, causing the stages to give off a bright light.

Boom! Boom! Boom...

Massive auras flowed out from the stages, rushing into the enormous magic formation in the sky. After obtaining immense power, the magic formation expanded from 10,000 meters to 100,000 meters wide.

The monstrous aura seemed to tear through the sky, causing the heavens and earth to dim and for the sun and moon to go dark. The weather started to change as lightning suddenly descended, torrential rain suddenly fell, and the ground started to shake. It was as if it was the end of the world.

By now, Zhao Fu had broken through the second defensive line and was breaking through the third defensive line. A massive wind assaulted them from ahead, and Zhao Fu looked over to see massive black clouds heading over. Within the black clouds, they could see lightning as well.

This made everyone feel an aura of suppression, the feeling before a massive storm. It was incredibly dangerous.

The sudden massive changes in weather were definitely not natural; the other side had done something. Zhao Fu immediately shouted for the Hundred Schools of Thought and various Sects to deal with this.

Summoning wind, calling rain, divination, and reversing Yin and Yang were things that Great Qin itself was not proficient at, but even though the other side had ability users and espers, Great Qin had them as well.

Zhao Fu did not want to expend too much strength before the actual fighting began. It was not good to suffer losses here, and because this battle was incredibly important and could not be taken lightly, they had to be extremely careful.

Following this, Great Qin's countless ability users and espers hurried over. Looking at the abnormal signs ahead, they quickly thought of a countermeasure.

The Daoist Sect Master bowed towards Zhao Fu as he said, "Your Majesty, the other side has forcefully attracted Heaven and Earth Essence Qi, resulting in these powerful abnormal signs. We can use the same method to calm down the Heaven and Earth Essence Qi."

Hearing this, Zhao Fu nodded and had them immediately do it.

The various Schools and Sects started to set up stages on the ice islands before drawing out their own magic formations.,

By now, the dark clouds already covered the entire sky, and a berserk gale blew, making it difficult for everyone to stand in place. A massive amount of rain also poured down as bolts of lightning struck the ice islands and large hailstones also started to fall.

Zhao Fu frowned; this was only the start, and the destruction later would be many times greater. They had to stop this, or they would suffer great losses.

Boom! Boom! Boom...

At that moment, colored pillars of light shot into the sky, giving off massive explosions that rocked the heavens and earth.

Hundreds of pillars of light stood between the heavens and earth, giving off massive auras and looking quite awesome.

These pillars of light dyed the sky all kinds of colors, and Heaven and Earth Essence Qi madly gathered but did not cause any abnormal signs. Instead, it gave off a stabilizing and steady aura.

Colored clouds appeared in the sky, giving off all kinds of colored light as they flowed towards the dark clouds ahead.

After the dark clouds containing an aura of destruction came into contact with the colored clouds, they automatically vanished.

The abnormal signs quickly disappeared and everything calmed down.

In the Western Continent, Jiang Ziya and the others could sense Great Qin's interference, and their expressions became serious as they used their full power.

Jiang Ziya's body gave off a faint white light as he rose into the air and arrived below the massive magic formation. He stretched out his hand and vigorously pressed it against the magic formation.

Boom!!

A shocking explosion sounded out as the countless magic items in the magic formation continuously trembled and gave off an incredibly terrifying power. The massive magic formation started to spin, seeming to tear apart space.

The remaining dark clouds started to go through changes, giving off an even more intense sense of danger. Their color became darker, and the gales became stronger. The lightning became even stronger as the rain and hail became even more intense.

The expressions of the people from the Hundred Schools of Thought and various Sects fell as they did not hesitate and also exploded out with terrifying auras, and the hundreds of pillars of light gave off even brighter lights.

## Chapter 1094: Ice Islands

The colored clouds continuously gathered, and beautiful rays of light shot out from the colored clouds, landing on the dark clouds and causing them to disappear.

Jiang Ziya's expression did not change as he called out loudly, "Everyone follow my orders! Activate the Ten Thousand Spirits!"

The people on the surrounding stages took out knives and cut their palms, causing blood to fall onto the stages. The stages absorbed the blood and gave off faint blood-red light as faint images of people flew out from the stages and entered the magic formation in the sky.

As the images flew into the magic formation, the magic formation seemed to gain a life of its own. Jiang Ziya once again raised his hand and pressed it against the magic formation, causing a massive power to come out of the magic formation.

"Roarr..." countless roars sounded out. Within the thick dark clouds, countless massive figures appeared, roaring towards the colored clouds. The dark clouds' power instantly became many times greater, and as if they were alive, they flooded towards the colored clouds.

When the colored clouds met the dark clouds, they gradually disappeared, causing the faces of the people from the Hundred Schools of Thought and various Sects to fall, and they erupted with even greater strength.

The auras that the pillars of light gave off became even stronger, and the colored clouds continuously writhed, giving off even greater colored light.

The dark clouds and colored clouds continuously clashed, with both sides disappearing.

This lasted for a few hours, after which the dark clouds suddenly became much more ferocious than before, and the colored clouds continuously disappeared.

The abnormal signs from before once again re-appeared, with gales and lightning striking everywhere, looking quite terrifying.

Xianru stood by Zhao Fu's side and reminded him, saying, "Your Majesty, I think we've lost this time. The other side has the ability users and espers from three Continents, as well as the Western Continent's people. They have simply too many people."

"Is there any way to deal with them?" Zhao Fu stood with his hands behind his back as he gravely looked at the thick, dark clouds.

Xianru gave a slight smile as she said, "I precisely came because of this. When Your Majesty launched this unification battle, the entire human world's Fate became chaotic. Those ability users want to use these abnormal signs to stop Your Majesty, but what they are doing can already be seen as going against the heavens. Your Majesty needs to have this battle receive the acknowledgement of the heavens and earth and use Fate to give those people a backlash, which will resolve this situation."

A trace of a smile appeared on Zhao Fu's face as he asked Xianru how to go about this.

Following this, Zhao Fu stood on a tall platform and wore his black dragon robe and his black-gold dragon crown. There was an altar in front of him with all sorts of sacrificial items.

Zhao Fu took out his Great Qin Royal Seal, which gradually floated up from his hand and hung in the sky.

"Roar! Roar! Roar..." Nine dragons roars sounded out as the Great Qin Royal Seal gave off an intense black light, and nine black dragons came out of it, giving off intense dragon's might.

Zhao Fu looked quite serious as he stretched out a hand towards the sky and shouted, "We are the ruler of Great Qin. We have unified the Midland Continent, Northern Continent, and Southern Continent, becoming the first Dynasty to unify three Continents. We have started this battle as part of the Mandate of Heaven."

As Zhao Fu's voice fell, countless traces of Fate rose up from the Midland Continent, Southern Continent, and Northern Continent. They seemed to form a massive ocean as they flowed towards Zhao Fu.

Boom!

A shocking explosion sounded out as a massive black pillar of light tore through the sky. Zhao Fu stood at the center of the pillar of light, filled with an aura of holiness and majesty. He lowered his raised hand and pointed at the various Sect Masters and said with a booming voice, "We assign you the Mandate of Heaven!"

The Sect Masters' bodies trembled as an unimaginable wave of power flowed into their bodies. Within their eyes, the image of a black dragon flashed.

Boom! Boom! Boom...

The hundreds of pillars of light seemed to have received an immense wave of power and exploded out with even more intense light. The colored clouds in the sky gave off a piercing light and gave off a massive aura as they flooded forwards.

The countless dark clouds all disappeared in that instant, and countless people in the Western Continent felt as if they had been hit by an immense force, crashing to the ground and coughing up a large mouthful of blood.

Jiang Ziya was harmed the most. After coughing up a large mouthful of blood, he was unable to remain standing in the sky and fell down.

In this final battle of the human world, the result of the first clash was the Western Continent's loss, and Great Qin's army continued towards the Western Continent.

On the other side, the Eastern Archipelagos had broken through Great Qin's fourth line of Void Zones and was advancing towards the Midland Continent.

Now, there was only Great Qin's final last-minute Void Zone remaining. This last-minute Void Zone was naturally quite weak and would be destroyed easily.

The ice islands gave off powerful auras as they headed forwards like battleships, giving off powerful auras of suppression. The Fish Scale people were unable to stop them at all; if they charged up they would be slammed to death, so they could only think of other methods.

Great Qin had also prepared a large amount of Ice Powder, and Great Qin's Fish Scale people started to use Ice Powder to create a frozen region. This frozen region was tens of thousands of meters wide, and the ice islands could not directly smash it apart.

This allowed them to stall for time while the scholars at the back continued to set up another last-minute Void Zone to stall for time. Just stalling was enough.

As Great Qin stalled for time, the Eastern Archipelagos factions became more and more worried because they could feel that time was running out.

In response to the frozen region, the Eastern Archipelagos used one of its other tricks. Fiery-red pearls as big as watermelon seeds flew out, creating intense flames that formed flame beasts.

"Roarr..." These flame beasts looked like rhinoceroses and roared as they charged towards the ice with immense heat.

The flame beasts were very fast and blazed like fiery lights as they shot towards the frozen region. Their terrifying temperature caused the ice to quickly melt.

The flame beasts continuously charged ahead, melting more and more ice. There were fiery trails left on the ice, and even though the flame beasts were unable to melt all of the ice, the frozen region was now greatly fragmented and had large cracks.

The countless ice islands ferociously smashed into the frozen region, causing the cracked frozen region to split apart. The ice islands continued onwards and easily broke through the fifth last-minute Void Zone.

Great Qin's Fish Scale people used their final method, pouring flaming oil into the water and setting it alight. The ocean now became a flaming ocean.

The flames gave off intense heat, causing the ocean water to start to boil, and the Fish Scale people quickly distanced themselves and did not dare to get too close. If the ice islands continued onwards, the ice islands would greatly melt, and the soldiers would be injured or killed.

This forced the Eastern Archipelagos factions to stop their ice islands and wait for a few hours. After seeing that the flames were dying down, they had the ice islands charge through.

## Chapter 1095: Five Nation Armaments

As the ice islands entered the flaming ocean, they quickly melted, so the Eastern Archipelagos' soldiers could only continuously throw Ice Powder. They had also constructed ice walls to defend against the terrifying heat.

In the end, they were able to rush through the flaming ocean without much losses and had made it past all of Great Qin's Void Zones. They started to construct teleportation channels to head to the Midland Continent and attack Great Qin.

The Fish Scale people had no power to stop them, so they could only return and defend.

Great Qin had left one billion soldiers at the Great Wall at the coastal area. However, only 200 million were actual soldiers, and 800 million were people's militia. The people's militia was just residents who had temporarily become soldiers, and they were naturally weaker than true soldiers.

The Fish Scale army had 400 million soldiers and 600 million people's militia, and together, they had two billion soldiers. However, they only had 600 million actual soldiers and 1.4 billion people's militia. If they fought against the Eastern Archipelagos' 1.8 billion soldiers, Great Qin's side would most likely lose.

Of course, Zhao Fu had other methods, or else he would not have the confidence to go and attack the Western Continent.

After stepping onto the Midland Continent, the Eastern Archipelagos' factions did not directly attack; they did not dare to be careless at all.

The soldiers gathered as the Eastern Archipelagos' Legatees revealed themselves. Five of them had Nation Armaments.

They first sealed up the surrounding water regions with ice, preventing the Fish Scale people from attacking from the water. It could be said that they were incredibly prepared.

The Eastern Archipelagos' Legatees did not hesitate and gravely gave the order to attack. If they could break through the Midland Continent, Great Qin would be forced to return to defend, and Great Qin's unification battle would fail.

"Kill!!" Countless soldiers roared as they charged towards the Great Wall like a massive flood, giving off shocking sounds. At the same time, the Eastern Archipelagos' factions left some soldiers at the coast to defend against any Fish Scale people who made it through.

On Great Qin's side, Wei Liao was the General in command. Facing the countless incoming soldiers, he immediately gave the order to counterattack.

Swish, swish, swish...

Arrows containing immense force shot out, drawing out arcs in the air before descending like a torrential rain.

The Eastern Archipelagos' soldiers swung their weapons, sending out sharp lights that sent the arrows flying. Others used shields to defend, and the Archers shot back at soldiers on the Great Wall. The battle had begun.

The City Lords also started to clash in the sky, creating large gusts of wind that created a terrifying scene.

Boom!

A massive sound rang out as ten black pillars of light shot into the sky, and a magic formation giving off massive deathly aura appeared. The Undead Disaster had been activated!

“Roarrrr...” Countless Skeletons rushed out roaring from the side. There were two billion or so of them, and with so many Skeletons, Great Qin was worried about them running out of control, so they had been set up far away from Great Qin’s main territory.

The countless Skeletons formed an ocean of bones that gave off boundless Undead aura. However, the Eastern Archipelagos’ soldiers’ expressions did not change at all. They had experienced Great Qin’s Undead Disaster a few years ago, and now that they knew about it, they had countermeasures.

Groups of soldiers wearing white armor walked out and formed a defensive light. Their equipment gave off a faint white light and a dense Holy Light aura.

This equipment was filled with Holy Light power, and it specifically countered Great Qin’s Undead Disaster. Not only this, the Archers shot out arrows with white crystals tied to them.

Bang! Bang! Bang...

Explosions sounded out as the white crystals exploded and white light flashed. Searing Holy Light power rippled out, causing countless Skeletons to howl as they died.

This wave of attacks immediately caused the ocean of bones’ momentum to weaken, but because of the nature of the Undead, they continued to fearlessly roar and charge at the Eastern Archipelagos’ soldiers, ferociously slamming into the white defensive line.

Boom!

This immediately resulted in a massive explosion, but the white defensive line stopped the ocean of bones. Countless Shieldbearers tightly gripped their shields as the Infantrymen behind them started to attack, sending out Holy Light attribute attacks.

The Skeletons could not defend at all and were quickly killed, unable to harm the Eastern Archipelagos’ soldiers at all.

Seeing this, Wei Liao’s expression did not change. These Skeletons were just cannon fodder and were for stalling and tiring out the Eastern Archipelagos’ soldiers.

Wei Liao then gave an order, and soldiers tossed out barrels of flaming oil. This set many soldiers on fire, who screamed as they were burned to death.

Swish, swish, swish...

Countless arrows bringing with them massive power flew towards the City Walls. The people's militia soldiers found it quite difficult to defend, and blood flew everywhere as some were injured and killed.

By now, the Fish Scale people had made it through the ice and were fighting with the Eastern Archipelagos' soldiers defending the coastal region. The battle there was quite intense but mainly relied on long-range attacks. The Eastern Archipelagos' soldiers did not want to go underwater, and the Fish Scale people did not want to go on dry land, as they would be at a disadvantage.

The battle was slightly more advantageous for the Eastern Archipelagos' side. Their soldiers were all proper soldiers and had at least Stage 1 cultivation, and they were stronger than Great Qin's people's militia.

Boom! Boom! Boom! Boom! Boom!

Five explosions sounded out as five powerful auras spread out. The Eastern Archipelagos' five Legatees with Nation Armaments wanted to destroy Great Qin's defenses in one fell swoop and simultaneously unleashed their Nation Armaments.

The five of them stood in the air surrounded by aura flames, giving off berserk gales. They gave off mountain-like auras, seeming like peerless experts.

Now that Great Qin's Legatee had headed to the Western Continent, there was no one who could stop the five of them; after all, the power of Nation Armaments was quite difficult to defend against. Moreover, of them, Ramis had already become a true King.

The five people had confident smiles on their faces; they were certain they could break through Great Qin's defenses and force Great Qin to return to defend, causing them to fail to unify the world.

This time, Great Qin had been too confident, wanting to unify the human world but not having the power. They had greatly benefitted because of the Western Continent, as 70% of Great Qin's forces had gone to the Western Continent to fight, giving them this opportunity.

The five Legatees did not waste any time and prepared to attack, but what happened next caused their expressions to change.

Boom! Boom! Boom! Boom! Boom!

Five similarly terrifying powers exploded out, and the massive aura spread out and shook the heavens and earth.

A swordsman in white, a boy who was ten or so years old, a beautiful and cruel-looking woman, a demon surrounded by demonic qi, and an incredibly bewitching woman appeared in the sky, giving off powerful auras.

The Eastern Archipelagos' five Legatees' expressions became quite unsightly because they found that these five people's auras were not weaker than theirs. Even though they did not have Nation Armaments, they were not at all weaker than them.

## Chapter 1096: Demonic Qi

These five people were Ge Nia, Zhao Sha, Zhao Mo, Elise, and Mo Yao'Er. They all had Sect Armaments, which were just as powerful as Nation Armaments.

The Eastern Archipelagos' five Legatees had never thought that Great Qin would have such power; Great Qin had never displayed this power before.

They had still underestimated Great Qin, thinking that only Great Qin's Legatee had many Nation Armaments. Now, there were even others who had the same kind of power; Great Qin was simply too terrifying.

After appearing, Ge Nia and the others did not say much before acting. Terrifying attacks shot towards the Eastern Archipelagos' five Legatees; Zhao Mo, the strongest of them all, faced off against Ramis, who had established a Kingdom, while the others all each picked an opponent.

Five Nation Armaments against five Sect Armaments. The terrifying shockwaves were similar to a battle between thousands of City Lords, making people feel as if they had fallen into an icy cavern, and they felt immense terror.

The surrounding soldiers quickly left this region because the battle was simply too terrifying. If they were not careful, they could be killed by the shockwaves alone.

Ge Nia and the others from Great Qin were incredibly powerful, suppressing the Eastern Archipelagos' five Legatees right from the beginning.

Zhao Mo turned into a 100 meter tall demon and gave off heaven-toppling demonic qi as he ferociously attacked Ramis. Before, even without a Nation Armament, Zhao Mo would be able to kill someone with a Nation Armament just with his Demon King's power alone. Now that he had obtained a Sect Armament, he was even more powerful.

Even though Ramis had established a Kingdom and had the power of a Kingdom, he still could not rival Zhao Mo.

Ge Nia's sword skills were incredibly sharp and precise, drawing out cold lights that forced the Legatee fighting against him to continuously retreat. If he was not careful, he would be injured.

Zhao Sha gripped the demon sword Muramasa with both hands. Because he was originally an Assassin, his motions were incredibly unpredictable and ethereal, attacking from all sorts of angles, and each of his strikes was incredibly vicious and sought to take his opponent's life, forcing his opponent into a tough position.

Elise continuously shot out spider threads. Her opponent did not dare to get too close. If he got too close, he would be ferociously attacked, causing him to feel a chill on his back.

Mo Yao'Er continuously swung her sword, attacking her opponent. Even though her attacks were terrifying, her seductive aura and fiery figure could cause anyone's desires to erupt.

The Legatee facing her was a man, and his eyes went red, almost being charmed by Mo Yao'Er. If he could do it with her, he would be willing to even die.

The five people from Great Qin held a great advantage, and in the battle between City Lords nearby, Great Qin's City Lords also had a slight advantage because of their equipment.

However, in the battle between soldiers, Great Qin was at a heavy disadvantage. There were eleven massive creatures, including birds, bears, and demons, ferociously attacking the Great Wall, causing many deaths. These eleven creatures were the Corps Formations of eleven Corps.

Because most of Great Qin's soldiers here were people's militia, under the Eastern Archipelagos' ferocious attacks, they suffered great losses. The invaders had nearly broken through the Great Wall.

On the other side, the Skeleton army was becoming weaker and weaker as the Eastern Archipelagos' soldiers continuously killed them, and soon, they would be completely destroyed.

At the back, the Fish Scale people continued to attack from the ocean while the Eastern Archipelagos' soldiers stationed there mainly defended, and the battle there was quite intense as well.

The Eastern Archipelagos factions had a great advantage in terms of soldiers, and if this went on, they would definitely break through Great Qin's Great Wall and enter Great Qin's territory. Great Qin did not have any more soldiers to defend with.

Even though the five Eastern Archipelagos Legatees were facing Great Qin's people with great difficulty, looking at the battlefield below, they felt quite delighted. If their soldiers below could break through the Great Wall and then help them deal with these five people, they would win in the end.

"Kill! If we can break through the Great Wall, we'll win!" Ramis exploded out with a terrifying aura as he forced Zhao Mo back a step and shouted out. This caused the Eastern Archipelagos morale to greatly rise, and the various City Lords attacked with even more fervor.

Wei Liao's expression did not change as he surveyed the battlefield. He was not worried about the battle, nor did he give any commands.

Boom!

A massive explosion sounded out as the Eastern Archipelagos' Void Zone was blasted apart, and a young man giving off terrifying demonic qi appeared in the sky.

Following this, soldiers giving off powerful demonic qi passed through teleportation channels and arrived at the Eastern Continent before starting to attack. The Eastern Archipelagos' defending forces were greatly shocked, as they had never thought that the Demon Race that the Northern Continent faced would attack.

Everyone quickly sent soldiers to defend, but most of the soldiers had been sent to attack Great Qin, and only a small portion remained.

Ye Cang brought 20,000 City Lords and one billion soldiers, and they gave off a massive aura as they flooded forwards. They started to rampage throughout the Eastern Archipelagos, and the various Cities and regions were powerless to resist at all as they were conquered.

After hearing that the Eastern Archipelagos was moving out almost all of its forces, Zhao Fu changed his plans. They did not know that the Southern Continent of the Dark Demon world belonged to Great Qin, so they naturally did not know that Great Qin would be able to use the Night Dynasty's power.

This was a big advantage, and Great Qin could use it to launch a sudden attack on the Eastern Archipelagos. This would be completely unexpected, allowing them to reap great gains.

At the Midland Continent, the Eastern Archipelagos' forces had nearly broken through the Great Qin's Great Wall when they suddenly heard about the situation in the Eastern Archipelagos. Their joy turned into horror; they had never thought that such a thing would happen. The Dark Demon race was also joining in?

What should they do? The Dark Demon race was sweeping through their territory unhindered, and the Eastern Archipelagos leaders were all incredibly panicked because they were about to lose.

They had two choices: continue to attack Great Qin or immediately return to defend.

They would not be able to return in time because a countless number of Great Qin's soldiers were engaged with them, making it impossible for them to retreat. As such, everyone gritted their teeth and gave the order to continue to attack. Right now, breaking through the Midland Continent was their last trace of hope.

The Eastern Archipelagos' aura rose, and they attacked even more ferociously.

A few hours later, as the sun set, the golden sunlight seemed to drape golden clothes over the land. After paying a huge price, the Eastern Archipelagos factions had broken into Great Qin's territory, leaving blood and corpses everywhere.

However, the Eastern Archipelagos had lost many of its City Lords, and Great Qin's City Lords had turned on Eastern Archipelagos' countless soldiers. Of the Eastern Archipelagos' five Legatees, only two remained.

Even though Great Qin suffered heavy losses as well, it had obtained victory in the end. The Eastern Archipelagos' losses were already set in stone, and Wei Liao finally let out a sigh of relief and smiled.

Over at the Western Continent, that was the main battlefield. There, Great Qin had gathered 70% of its forces, and the Western Continent had gathered the forces from four Continents. There would be an incomparable world war.

#### Chapter 1097: Disaster Pearl

Both armies now faced off in the Western Continent, and the soldiers of the two armies were simply innumerable. All that could be seen were dark masses, forming two similarly-sized oceans.

Because one side wore all sorts of different armors, they looked like a colorful aura, and they gave off a terrifying aura. The other army was completely dressed in black armor, making it look like a black ocean, and it gave off an aura of destruction and conquering.

The two auras gathered, causing the air in the human world to seem to become heavier. Not a single living creature dared to stay nearby.

There were also powerful figures standing in the air, all of them City Lords. The auras they gave off could shake the heavens and earth, and it could be said that it was the first time so many City Lords had gathered in the human world.

The armies on the ground and the City Lords in the sky seemed to be able to lock down the heavens and earth and cause everything to distort. Even those far away could sense the danger coming from that area.

Zhao Fu stood in the air and looked at the people facing off against them with a serious expression. "It is time to conclude everything. The human world must be unified; only then does it have hope. We have the Mandate of Heaven, and if you submit to Us, We will disregard all of your previous actions."

The leaders of the Chinese factions looked at Zhao Fu with complex looks. They had never thought that Great Qin would rise to such a position. Had they known earlier, they would have destroyed him much earlier.

In response to Zhao Fu's offer of amnesty, they immediately refused without thinking. They already had a deep hatred with Great Qin and did not believe that Zhao Fu would let it go so easily. Moreover, as the Legatees of various Dynasties, no one wanted to submit to others.

Li Baiqing's expression was the most complicated. He had never thought that Zhao Fu would be Great Qin's Legatee; after all, Zhao Fu was his older half-brother. Now, he was going to unify the world and destroy the Li family.

It was not just the people from China; those from the Southern Continent and Northern Continent looked at Zhao Fu furiously. It was all because of Great Qin that they had become like this.

The people from the Western Continent all looked to Tina Pendragon, dressed in her silver knight dress and holding her golden sword.

Tina Pendragon said seriously, "Great Qin's Legatee, We do not want to fight either. We can promise that the Great British Kingdom will never invade Great Qin. We want to live in peace."

Zhao Fu looked at the people in front of him and said coldly, "The human world must be unified; only then can there be peace and can we defend against other worlds. Great Qin must unify the human world no matter what. We will ask you one last time: Will you surrender?"

Hearing Zhao Fu's cold voice filled with killing intent, she replied gravely, "We must refuse. The Great British Kingdom will not submit to anyone. Great Qin's Legatee, if you want to fight, We will fight with you."

"You all must want to kill Us! Today, We will give you an opportunity." Zhao Fu coldly laughed as he took out two swords, the Emperor Killing Sword and Death Disaster Sword.

Boom!

A massive explosion sounded out as a terrifying aura exploded out, bringing with it a berserk gale. The Emperor Killing Sword's horrifying killing intent flowed into Zhao Fu's body, causing Zhao Fu's eyes to give off a blood-red light. His hair also became blood-red, and a sword mark appeared between his eyebrows.

The Great Qin Royal Seal continuously trembled, and nine black dragons came out of Zhao Fu's body. Finally, a cold ghostly qi also spread out from his body.

In that moment, Zhao Fu had unleashed the Emperor Killing Sword's power, the Great Qin Royal Seal's power, and the Six Paths Demon Images' power. He had released essentially everything he had.

Three ferocious aura flames rose up around his body, completely covering him. Only his blood-red eyes giving off blood-red light could be seen within the flames.

The space around him twisted and turned as if it could not endure this power. It continuously collapsed as the immense power caused everyone in the surrounding thousand kilometers to feel their bodies sink down, and they felt as if they were as small as a grain of sand.

Zhao Fu had to use his full power, as he was facing countless Legatees. There were 27 of them who had Nation Armaments.

Facing Zhao Fu's release of power, the Legatees all looked incredibly serious. They understood that this was the final battle, so they did not withhold anything and unleashed all of their power too. Aura flames appeared around their bodies, and their terrifying auras could shake the heavens and earth and cause gods and ghosts to tremble.

Boom!

Zhao Fu held the two swords and stepped out, bringing with him terrifying power as he tore through space and headed straight towards Tina Pendragon, the strongest of them all.

As Zhao Fu attacked, this incomparable world war officially began.

Boom! Boom! Boom...

Powerful auras exploded out as the City Lords released their power and shot out like rays of light. They started a massive battle in the air, and with so many City Lords fighting, it seemed as if the sky was going to be ripped apart.

The soldiers on the ground also started to fight. Great Qin first shot out a wave of Talisman Bolts. These Talisman Bolts turned into white rays of light, bringing with them an incredibly terrifying and sharp aura as they flew towards the Western Continent's defensive walls.

Facing the shocking aura of the Talisman Bolts, the Western Continent's people immediately activated the defensive barrier to protect the defensive walls. The Talisman Bolts were incredibly monstrous and would be able to easily destroy the defensive walls.

The countless Talisman Bolts forcefully smashed against the defensive barrier, looking like a rain of white light. Massive explosions sounded out, and the defensive barrier was soon covered with countless cracks. However, it had still blocked Great Qin's attack.

The Western Continent's people immediately deactivated the defensive barrier and started to repair it as the soldiers on the defensive walls drew their bows and shot out arrows.

The countless arrows covered Great Qin's forces and fell like rain. Great Qin's charging soldiers shouted and released immense power as they swung their weapons, sending out countless sharp lights that sent the incoming arrows flying away.

Swish, swish, swish...

Another wave of white light tore through the sky, descending towards the defensive walls with unstoppable momentum and causing people's hairs to stand on end.

The defensive barrier was once again activated, but it was unable to stop the Talisman Bolts again. It was already severely damaged, and the countless white bolts pierced through it and continued onwards towards the soldiers.

“Arghhhh...” Countless pained cries sounded out as the soldiers’ bodies were pierced by those unstoppable white lights, resulting in countless injuries and casualties on the defensive walls.

The Western Continent’s people were furious and threw out all sorts of colored pearls. These pearls all contained the auras of different disasters; these were Disaster Pearls, which Great Qin had obtained in the past.

As the pearls descended, some released searing flames, burning soldiers to death; others released bone-chilling cold that froze soldiers; and others released lightning that blasted soldiers into crisp.

Chapter 1098: 33 Corps

Great Qin had used Disaster Pearls to deal with enemies in the past, and now enemies were using Disaster Pearls against them. These Disaster Pearls caused many injuries and casualties on Great Qin’s side.

Bai Qi’s gaze became cold as he ordered, “All Corps move out!”

Boom! Boom! Boom...

Fifty-six Corps rushed out from different places towards the defensive wall, roaring as they gave off terrifying auras that formed massive objects.

The Demon King Corps formed a Demon King that gave off evil demonic qi, the Sword Mountain Corps formed a sword that gave off boundless sharp sword qi, the Water God Corps formed a Water God that was surrounded by large amounts of water vapor, the Ice Corps formed a woman made of ice that was surrounded by countless traces of icy air, the Fire Corps created a woman made of fire that was surrounded by searing flames, and the Spider Corps formed a massive spider that gave off a ferocious aura.

56 massive objects were formed, which then gave off terrifying power as they charged at the defensive wall with unstoppable momentum.

Boom! Boom! Boom...

The Great British Kingdom's Commander also gave the order for all Corps to mobilize. Thirty-three Corps gave off terrifying auras as they released their own Corps Formations.

“Ji!!” A snow-white fox gave off an ear-piercing cry and gave off an icy power as it appeared, causing snowflakes to fall down around it.

“Roarr!!” A dragon's roar sounded out as a blue dragon appeared, giving off a massive amount of dragon's might, causing countless people to feel terror.

Boom!

Countless rays of golden light shot out as a golden scepter appeared, giving off a prestigious King's aura, making countless people want to submit.

The Great British Kingdom's 33 Corps unleashed 33 Corps Formations, which also gave off immense auras as they rushed at Great Qin's Corps Formations.

Bang! Bang! Bang...

The air seemed to explode as the massive beasts of the two sides ferociously clashed. A world-destroying shockwave spread out, causing the surrounding ground to collapse. Countless trees were uprooted as countless people were blown away.

Boom! Boom! Boom...

The massive beasts continued to disregard everything as they battled intensely. The horrifying scene seemed as if the heavens and earth were going to collapse and everything was going to be destroyed.

However, Great Qin had a big advantage – not only did they have more Corps Formations, but the Corps themselves were all Special Corps, while the Great British Kingdom only had 12 Special Corps. Moreover, Great Qin's Corps were higher level and had more people within the Corps.

The Great British Kingdom's Corps Formations were given a severe beating by Great Qin's Corps Formations, but they still fought madly.

Seeing that they were at a disadvantage, the Western Continent's Commander gave the order to push out large doors. They all looked different, with some made of wood, some made of stone, and some covered with blood.

These doors were ten or so meters tall and seven meters wide, and they gave off terrifying power. There were 100 of each type of door, with a total of 1,000.

The Commander gave the order to open these doors, within which was darkness. Terrifying auras flowed out, causing everyone to feel afraid.

"Roarrrr..." Roars sounded out as countless Goblins holding weapons rushed out of some doors. Other doors had Orcs, Ogres, or Elves.

After charging out, these creatures charged at Great Qin's army, looking incredibly ferocious. There were tens of millions of these creatures, and their auras were shocking.

Bai Qi did not hesitate to give the order to use Destruction Crystals.

Bang! Bang! Bang...

Countless crystals fell among the various creatures, resulting in massive explosions. Blinding white light filled the surroundings, and the terrifying explosive force devoured everything, causing the ground to continuously tremble.

Almost 70% of the dozens of millions of Outlanders were blasted to death, leaving behind fragmented corpses and blood on the ground.

"Roarrrr..." Countless Wyverns appeared in the sky, giving off violent gazes as they looked at the soldiers on the defensive wall.

"Roarrr.." At that moment, massive humanoid monsters clad in heavy armor also roared as they gave off bloodthirsty and ruthless auras.

The Wyverns flapped their wings and rushed down. Their bellies bulged as they gathered flames and icy air, preparing to blast the soldiers on the defensive wall.

Swish, swish, swish...

Suddenly, the sound of the air being torn could be heard as hundreds of arrows shot out, giving off terrifying ripples and striking fear into people's hearts.

Chi, chi, chi...

Some Wyverns were caught off-guard and were hit by the arrows. The arrows were ten or so meters long and contained immense force, easily piercing through the Wyverns' defenses and stabbing four or five meters into their bodies.

"Roarrrr..." Countless pained dragon's cries sounded out. Some Wyverns received light injuries while others suffered heavier injuries, and some that were hit in the head immediately died, their bodies plummeting down.

At a hidden location, 150 Dragon-Slaying Ballistae had been wheeled out. Great Qin had obtained 100 or so Dragon-Slaying Ballistae from Region Treasure Boxes, and the Western Continent had also obtained some and saved them to use against Great Qin's Wyverns.

The countless Wyverns started to become more careful, no longer rashly attacking. The 3,000 Corps Soul Commanders held heavy weapons as they rushed at the defensive wall and started madly attacking.

These Corpse Soul Commanders all had heavy armor and shields, making it so that the Dragon-Slaying Ballistae could not harm them.

The battle in the sky was incredibly intense and was not inferior to the battle on the ground. The City Lords viciously killed, and the terrifying shockwaves from their battle caused those far away to feel a chill through their bodies.

At the same time, City Lords from both sides continuously died, and their corpses plummeted to the ground.

The most terrifying battle was Zhao Fu's battle. Zhao Fu was facing hundreds of Legatees alone, and the battle was incredibly fierce. Only those who had Nation Armaments had the qualifications to actually fight with Zhao Fu. Those who did not have Nation Armaments could only attack from a distance.

“True King's Sword!!” Tina Pendragon raised her sword, and the Royal Seal within her body continuously trembled, sending King's Power into her sword. A golden sword light rushed into the sky, dyeing half of the sky gold.

Boom!

Tina Pendragon slashed out, causing the heavens and earth to tremble. The golden sword light was filled with King's aura, and it was as if it could slash apart all creatures as it flew towards Zhao Fu.

Bang!

Zhao Fu immediately unleashed his Emperor's Domain to protect himself. The golden sword light crashed against the Emperor's Domain, resulting in a massive explosion. The golden sword light exploded out, turning into a golden gust of sword wind.

Crack!

A clear cracking sound rang out as the Emperor's Domain started to crack, and Zhao Fu was forced back a few steps.

At that moment, someone cried out, “Grab this opportunity; everyone please ignite your Fate Dragons, or we won't have another chance!”

Chapter 1099: Was Scepter

As that cry sounded out, hundreds of Legatees appeared, and nearly 1,000 people surrounded Zhao Fu. The inner circle was the 20 or so Dynasty Legatees who had Nation Armaments, and the others were on the outer circle.

They all roared as they invigorated the Fate Dragons within their bodies, causing different auras to flow out. Some were red, some were white, some were black, and some were green; there were all sorts of different colors.

“Roarr...” Dragons’ roars filled the sky as rays of light shot out from the Legatees’ bodies and slammed into the sky, seeming to tear the sky apart.

The human world’s sky gradually darkened, and the entire world’s Fate madly gathered like a berserk gale. Everyone sensed something and looked towards the west, because the shockwaves from there were simply too powerful.

The shockwaves here were indeed quite terrifying. Around 1,000 Fate Dragons gave intense lights as they spiralled in the sky, their terrifying auras inundating everything like a horrifying tsunami.

Everyone present was someone who played a critical role in the human world, and they had much of the Fate of the human world. Each of their Fate Dragons could invoke changes in the heavens and earth, so their combined power was naturally quite terrifying.

The terrifying shockwaves affected the entire battlefield, and many people could not help but look over. How could such terrifying power exist in this world?

Boom!

A massive explosion rang out in all directions as the thousand Fate Dragons formed a massive dragon-shaped magic formation. An even greater pressure suddenly descended, causing the ground to cave in.

Some unfortunate people who were caught in it felt as if they had been struck by something that was millions of kilograms heavy, and their bodies directly exploded, causing blood and guts to fly everywhere.

Zhao Fu was underneath the magic formation, and his body was bound by that terrifying power. Images of dragons appeared around Zhao Fu, making it so that he could not move at all.

This made Zhao Fu feel quite startled. He tried to struggle free but found that he was unable to do so at all. The dragon images around him tightly bound him in place.

Seeing this, the countless Legatees all grinned; this was something they had especially prepared for Zhao Fu in order to kill him. They did not hesitate to burn their Fate Dragons' power.

A Fate Dragon was the most important thing to a person, and it affected their fate. Igniting it came at a great cost, and it would be difficult for the Fate Dragons' power to recover.

"Everyone, let's work together to kill Great Qin's Legatee!" a Legatee cried out in joy seeing that Zhao Fu could not break free of the binding.

The others all acted, sending all sorts of powerful attacks towards Zhao Fu, causing the space around him to seem to explode.

In order to kill Zhao Fu, the Legatees all continuously attacked. The 20 or so Dynasty Legatees used most of their Nation Armaments' power to blast towards Zhao Fu, causing explosions to continuously sound out.

Seeing so many terrifying attacks being unceasingly launched towards Zhao Fu, Bai Qi could not help but feel a trace of worry.

Only after ten minutes did the Legatees stop and let out a sigh of relief. After releasing so many monstrous attacks, they had definitely blown Zhao Fu to smithereens.

After all of the light dissipated, everyone was shocked to see that six chains had come out of Zhao Fu's chest, and there were six terrifying figures that were each four meters tall around Zhao Fu.

One of them looked savage, had fangs, and two horns on its head. It had a powerfully-built body, and tongues of flame occasionally appeared on the surface of its body. It gave off a heavy sulphuric smell and had the head of a demon, and it held a trident.

One looked like a skinny human without any flesh on its body. Its limbs were very long and thin, and it had a large and round belly. Its skin was gray, and it looked quite ugly. It had pointy ears and white eyes, which were filled with savageness. There was a piece of cloth around its waist, covering its lower body, and it held a large bone knife.

One of them looked essentially like a human and had a handsome face and well-built body, and it wore white clothes. There was a blood-red sword at its side, and its eyes were also blood-red colored, giving off dense killing intent.

One of them looked exactly like an evil ghost and had pure black eyes, fangs, and a pair of wide wings. It also had a tail and wore black armor, holding a large halberd.

One was human-shaped and was covered with muscle. It looked quite strong, and it had gray-white skin and three heads. One was a chicken's head, one was a duck's head, and the other was a pig's head. There was a beastskin tied around its waist, and it seemed to be filled with powerful fleshly power.

These were the Six Paths Demon Images, and they had stretched out their hands, sending out their Domains to form a Six Paths Defensive Barrier.

The Six Paths Defensive Barrier was gray and was formed from six complicated and mysterious-looking compasses. It contained boundless Six Paths of Reincarnation power, and the eerie ghostly qi flooded the surroundings.

The temperature sharply decreased, causing countless people's hairs to stand on end as their bodies uncontrollably trembled. Everything seemed incredibly gloomy and eerie.

The first time Zhao Fu had unleashed the Six Paths Demon Images' power, allowing them to appear in the human world, they had gone out of control, so Zhao Fu had not dared to use their power this entire time.

Now, there was no reason for him to hold back. He only had a single goal, which was to kill everyone in front of him.

"Arghhh!!" Zhao Fu tilted his head back as he roared. Four dragon's roars could be heard from within his body as a four-colored aura flame burst out from his body and a terrifying power also exploded out. Zhao Fu had also used his Fate Dragons.

"Roarrrr..." Countless mournful cries sounded out as the dragon images around Zhao Fu were destroyed under that immense power.

This caused the other Legatees' expressions to fall, because it seemed that Zhao Fu would soon break free.

Boom! Boom! Boom! Boom...

The Dynasty Legatees once again did not hesitate to release all of their Nation Armaments' power. They did not hold anything back and even burned their life force as aura flames appeared and massive winds started to blow.

Nine bronze cauldrons giving off a boundless aura was the first to descend, after which a spear giving off an aura of conquering appeared. This was followed by a crown that was like the sun, and then a flower that looked like a Japanese rose appeared.

Boom!

A golden light tore through the sky as a golden scepter covered with ancient runes and giving off an aura that seemed to be able to command the world appeared, seeming like no one could resist it.

Chapter 1100: Book of God

All of the Egyptians could sense something, because this scepter was Egypt's Clan Armament, the Was Sceptre!

Boom!

Another massive explosion sounded out as countless rays of white light filled the entire sky. Pure-white feathers slowly floated down from the sky as a white book descended from the sky.

An unimaginably powerful energy spread out as every living creature seemed to become illusory. This book was the Clan Armament that Babilon wielded, the Book of God!

Twenty or so Nation Armaments and two Clan Armaments' power caused the entire human world to feel the power of extermination. Under that wave of terrifying power, countless people's bodies froze in terror, and countless beasts ran in fear.

As the Dynasty Legatees acted, the surrounding thousand Legatees also moved as well. They cut open their palms and raised their hands.

The blood flowed out of their palms and was attracted by a formless energy, flying into the massive magic formation made of Fate Dragons.

Boom!

The magic formation gave off even more shocking power as space was ripped apart. A thousand dragon-shaped chains shot out from the sky, bringing with them immense power as they shot towards Zhao Fu.

These chains were incredibly terrifying, and they were unobstructed as they shot into the Six Paths Defensive Barrier, tying Zhao Fu up.

The dragon-shaped chains were not corporeal, and they were formed from Fate. The Six Paths Defensive Barrier could not block the chains made of Fate, but the chains consumed a large amount of Fate.

Now, Zhao Fu's upper body was wrapped in chains, and there were countless dragon images around him. He tried to struggle but could not break free at all.

"Kill!" The Dynasty Legatees did not hesitate at all and used their Nation Armaments to blast Zhao Fu. With so many Nation Armaments attacking, the sky was torn, and the power seemed to be able to even extinguish the heavens.

Before that power had even come close, it seemed as if the world was coming to an end.

Zhao Fu's body was finally harmed by that power, causing blood to flow out from him as a few wounds appeared on his face.

"Arghhh!!" Zhao Fu felt immense pain as he roared towards the sky, causing the heavens and earth to tremble.

Boom! Boom! Boom...

Explosions sounded out as waves of power aura exploded out. The Twelve Metal Colossi giving off immense killing intent, a stone staff giving off massive destructive power, and a jade seal giving off an Emperor's might all appeared.

The 20 or so Nation Armaments and two Clan Armaments that Great Qin possessed were all simultaneously released by Zhao Fu.

After releasing the power of so many Nation Armaments, Zhao Fu's body gave off an intense black light that turned into a pillar of light, giving off a destructive aura as it shot into the sky. The terrifying power seemed to rip open a hole in the sky, and a boundless dark and destructive aura flowed out like a fountain.

"Arghhhh..." The Legatees held nothing back as they roared, exploding out with their full Nation Armaments' power as they blasted their Nation Armaments at Zhao Fu.

The countless Nation Armaments around Zhao Fu continuously trembled and gave off immense lights as terrifying auras came out from them. They gave off world-destroying power as they madly crashed against the incoming Nation Armaments.

Boom!!

A shocking explosion sounded out as the sky seemed to shatter and a terrifying shockwave rippled out. Ten or so regions were instantly reduced to flatlands, and everything within them were obliterated.

The entire human world trembled as the sky above the human world's Western Continent was torn apart, and an aura of destruction filled the world.

The sky above the northern side was covered by an azure energy barrier. A massive dragon's might, containing power that seemed to suppress the world, appeared, and countless creatures felt a massive force weighing down on them.

A massive azure dragon appeared in the sky. It was covered with azure scales and had many branches in its horns. It had powerful claws and a mighty aura – this was the northern side's Guardian Beast, the Sky Desolation Azure Dragon!

The western side's torn sky was now covered by a fiery-red barrier. A searing heat spread out from the sky, and countless traces of water vapor instantly evaporated. A world-destroying power appeared, making countless people feel terror.

A massive flaming bird appeared in the sky – this bird seemed like a phoenix but was not a phoenix. Its eyes and beak were as red as rubies, and they gave off an intense red light. This was the Divine Sun Fire Bird.

The eastern side's sky was covered by a white energy barrier, and the sound of water could be heard. An unimaginable might descended, causing countless people in the east to feel as if they had fallen into boundless darkness.

A massive whale appeared in the sky; it was snow-white and had blue eyes, and it looked extremely beautiful. It had a pair of pure-white wings, and it was the Guardian Beast of the east, the Sovereign Emperor White Whale.

In the southern side, multicolored light spilled out of the sky, causing all creatures to seem to put on multi-colored clothes and making the world seem quite beautiful. A massive might slowly descended, and even though it was powerful, it caused no fear. Instead, it made people feel reassured.

A massive deer appeared in the sky. Its fur was multi-colored, and its horns were platinum-colored. It gave off a gentle aura, and it was the Guardian Beast of the south, the Nine Celestial Enchanting Deer.

As the shocking destructive force rippled out, the human world's four Guardian Beasts simultaneously appeared. It could be seen how terrifying that destructive force was, to the point that it could destroy the world. This was indeed the final battle.

The western side's Divine Sun Fire Bird was the first to speak, and it said in a coarse man's voice, "These humans are going to destroy the world, are we not going to interfere? If this goes on, the human world's Fate and source energy will be severely damaged."

The Sky Desolation Azure Dragon's ancient image replied, "We can't interfere! This is a battle for the unification of the human world, which will cause the human world to become one. When that happens, everything lost will gradually recover."

The Emperor Sovereign White Whale replied with a simple and honest voice as it laughed, saying, “If the human world is unified, our mission will be complete, and we’ll be able to leave the human world!”

The Nine Celestial Enchanting Deer said with a young girl’s voice and also lightly laughed, “Mm! After this battle concludes, we can head to the Devil Domain. Great Qin’s Legatee is quite terrifying, facing so many people by himself. If he can unify the human world, that might just be the best outcome for the human world.”

At that moment, the Sky Desolation Azure Dragon spoke, saying, “Let’s stabilize the human world for now in order to prevent these humans from destroying the world. That will affect us greatly.”

The three other Guardian Beasts nodded and each guarded one direction as a formless power covered the human world, and the four figures gradually disappeared into the sky.
