

The Lord 1121

Chapter 1121: Devils

Zhao Fu felt a headache coming on as he looked at the Ministers arguing amongst themselves. He was also considering what to do; they had two months left, and they had to defend against the incoming forces. Great Qin could not fall here.

Masanori Hano looked at the scene around her and said with slight hesitation, “Your Majesty, in actuality, developing the Devil World doesn’t require Great Qin to send its residents into it. Recently, the Hundred Devils have created a Devil Soul Technique.

“This Devil Soul Technique can be fused into the Devil World. Anyone who is sent into the Devil World will be affected, and their memories will gradually disappear. By the time they turn into Devils, they will have lost all of their memories and will become new creatures.

“As long as you have something to control them with, they will obey Great Qin. No matter how great their hatred towards Great Qin was, after becoming Devils, they will have new lives and will no longer feel enmity towards Great Qin.”

This resolved something that Zhao Fu had been worrying about this whole time, which was that the Devils he nurtured could turn against him. At first, Masanori Hano had been quite hesitant to tell Zhao Fu about this as it would harm countless living creatures.

However, now that Great Qin was facing such immense pressure, she had no other choice and had to help think of ways to resist the incoming invasion.

“Really?” Zhao Fu looked at Masanori Hano in pleasant surprise. Zhao Fu knew how powerful the Devils were, but because of this problem, he had been hesitant to nurture them. If they could get rid of this problem, there would be nothing to worry about.

Moreover, Devils developed much faster than ordinary Cultivators, and they could quickly provide Great Qin with a large fighting force.

Masanori Hano nodded and confirmed what she had said.

Zhao Fu grinned and took Masanori Hano, leaving for the Devil City. He decided to start developing the Devil World, and he ordered the Ministers to continue discussing Great Qin's future plans.

After arriving at the Devil City, Tamamo-no-Mae leapt into Zhao Fu's embrace and wrapped her arms around his waist. Her enchanting figure twisted about as she said flirtatiously, "Your Majesty you finally came again. It's been such a long time since we last met. I've been hearing about all sorts of lewd things that Your Majesty has been doing, and I want to do it with Your Majesty too."

Hearing Tamamo-no-Mae's shameless words, Masanori Hano's face became slightly red.

Zhao Fu hugged Tamamo-no-Mae's seductive body and smiled as he said, "Maybe in the future! We have decided to build the Devil World, and We will make you Hundred Devils all Devil Lords."

"Really? Thank you, Your Majesty!" Tamamo-no-Mae said, feeling quite surprised. This was something they had been waiting for this entire time. If the Devil World was built, their statuses would skyrocket, and they would not have to stay in such a small place.

Zhao Fu lightly nodded, while Tamamo-no-Mae panted and said, "Your Majesty, can I use my body to thank you then?"

Following this, Tamamo-no-Mae undid her kimono, revealing her snow-white figure. She flirtatiously smiled as she stretched out her hand towards a certain part of Zhao Fu's body.

Masanori Hano could not stand this anymore, and her face was bright red as she cried out, "Tamamo! Stop, don't do this."

Because he had matters at hand, Zhao Fu also stopped Tamamo-no-Mae.

Tamamo-no-Mae felt quite disappointed but grabbed Zhao Fu's hand and pressed it against her large chest, pleading, "Then at least give me a small reward first, Your Majesty. Don't forget after you're done with all this!"

Zhao Fu felt quite helpless, and after much moaning from Tamamo-no-Mae, she grinned and gave off an intoxicating aura as she hugged Zhao Fu, and Masanori Hano walked beside them with a red face.

Following this, Zhao Fu gathered the Hundred Devils; in actuality, there were not just one hundred of them but 362. Each of them had their own stories and abilities, and they were quite powerful.

These Devils were mainly split into two factions: One followed the Greater Tengu, Shuten-Douji, and Tamamo-no-Mae, while the other followed Momijigari.

Out of all of the Devils, the strongest was most likely Momijigari. She could fight with the three other Devil leaders single handedly and was shockingly powerful.

Zhao Fu gathered them and let them know of Great Qin's plan to build the Devil World and give them 100 regions.

Seeing that Zhao Fu valued them so much, they profusely thanked him.

Zhao Fu's line of thinking was that since he was going to build the Devil World, he would nurture it greatly. Zhao Fu was quite interested in a Devil army because their abilities were quite strange and would be of great help to Great Qin.

Following this, Zhao Fu asked them how to build the Devil World.

Of course, things were not as simple as Zhao Fu had thought. The Devil World was not something that could be built at one's whim and required a massive number of items. No wonder they had not built the Devil World back when Great Qin had conquered Japan; they simply did not have the ability to build it.

First, they needed materials for a Great Devil Formation, which turned Heaven and Earth Essence Qi into devil qi. They also needed various items for all sorts of barriers.

The Devil World was naturally a world, and they could not make this entire world into the Devil World. However, they could use barriers to close it off and make it similar to a world.

Devil qi had strong mutation effects, and the barrier could make it so that it did not leak out and harm others. At the same time, it would prevent others from entering the Devil World and prevent Devils from escaping.

They also needed countless Devil Qi Stones. These Devil Qi Stones provided devil qi and could cause the devil qi in the Devil World to become denser and increase the speed at which people became Devils.

There were also many other things that cannot all be listed.

Zhao Fu ordered people to immediately prepare those items and chose a place to set up the Devil World. It was an island in the Eastern Archipelagos that had about 100 or so regions.

Because the Devil World was too dangerous, in order to avoid any heavy losses if things went out of control, Zhao Fu chose a fairly remote place.

The Devils started to make preparations – they were going to use their blood and Devil Power to create a Hundred Devil Blood Stone, which would become the core item of the Devil World.

It took the Devils a bit more than three days to condense the Hundred Devil Blood Stone. Their faces were all quite pale afterwards, and their bodies became quite weak, looking quite drained. To them, creating this Hundred Devil Blood Stone was not easy at all.

Following this, they gave the Hundred Devil Blood Stone to Zhao Fu. It was similar to jade and was rectangular. It was one finger-length long and had a bloody smell, and it contained a massive amount of a strange power.

Zhao Fu now had to refine the Hundred Devil Blood Stone; only then would the Devils obey his commands.

Of course, for the first three hundred Devils, he had given them each a drop of his blood. With his Sovereign Bloodline, the power that his blood contained was enormous and was of great help to Devils, even causing their bloodlines to slightly change.

At the same time, Zhao Fu set down restrictions within their bodies. Only then could he use them and the Devil World with peace of mind.

Chapter 1122: Black Bull Demon

Now that everything had been prepared, it was time to create the Devil World. Zhao Fu went to the center of the island, and the Great Devil Formation had already been prepared.

Zhao Fu stood at the center and placed the Hundred Devil Blood Stone into the magic formation, bringing it to life immediately. It gave off boundless blood-red light and gave off a strange, sharp, pained, and twisted sound, making people's hairs stand on end.

Sensing this power, Zhao Fu could sense that the Devil World was most likely quite an evil and twisted place. However, no matter what, Great Qin needed this power.

Seeing that the Great Devil Formation was activated, the surroundings Devils all smiled and squatted down, pressing their palms against the magic formation. A massive amount of devil qi flowed into it, causing a massive aura to spread out, and the Great Devil Formation started to operate.

The many Devils continued to send devil qi into the formation, causing the formation's aura to become stronger and stronger. The Devil Qi Stones in the surroundings all disintegrated, and their devil qi was also absorbed.

The ground suddenly started to tremble, and the weather started to change as clouds swirled. The light dimmed and a dangerous aura swept out like a flood.

Boom!

A shocking explosion sounded out as the Great Devil Formation gave off a piercing blood-red light and started to spin. A pillar of light containing immense power shot into the sky and smashed into it, causing the sky to tremble.

The blood-red pillar of light gave off a large amount of blood-red light, gradually dyeing the sky blood-red. A bloody, evil, crazed, and twisted aura spread out throughout the sky, causing those who saw it to feel fear.

Standing within the center of the blood-red pillar of light, Zhao Fu stretched out a hand towards the sky and started the final step of the process.

Boom!

An explosion sounded out as the Hundred Devil Blood Stone at the center of the formation gave off a wave of terrifying Devil Power and sent out a massive shockwave, making it difficult for the surrounding Devils to even stand.

The Hundred Devil Blood Stone turned into a ray of blood-red light as it traveled within the blood-red pillar of light and shot into the sky.

Boom! Boom!

Two explosion sounded out as two terrifying waves of might, bringing with them unstoppable power, descended, causing the surrounding Devils to feel their bodies sink.

A sun giving off intense, blood-red light appeared in the sky, and a moon giving off blood-red light had also appeared.

Within the Devil World, the blood moon and blood sun existed together. There was no night and no day, no yin and no yang, only chaos.

The appearance of the blood sun and blood moon signified the formation of the Devil World.

The blood sun and blood moon could be seen from a distance, and a blood-red color and an evil and twisted aura flooded over.

At that moment, Zhao Fu activated all of the barrier items, causing them to turn into rays of light and fly into the sky. They gathered into position and formed a powerful barrier that covered all of the blood-red light.

Zhao Fu thought that things were over, but at that moment, the blood sun and blood moon gave off intense blood-red light and two hazy figures flew out.

One was human-shaped but looked somewhat like a crow. It had two hands and two claws instead of feet. It also had a pair of wings with blood-red feathers.

The other looked like a rabbit and had blood-red fur. It had four eyes, as well as a blood-red crescent moon mark on its forehead.

Both figures gave off terrifying auras as they flew down from the sky and entered Zhao Fu's body before he could even react.

Zhao Fu immediately checked his body and found that there was nothing too strange. However, he now had two marks on his chest; one looked like a crow and one looked like a rabbit, and they seemed to connect to each other.

Following this, the silver dragon seal that Zhao Fu had obtained from the Ten Thousand Dragon Stage also fused with the two marks and formed a new mark.

This mark was blood-red and the shape of a crow and rabbit on one side, while the other side was silver and in the shape of a dragon, looking quite beautiful.

After the marks fused, they once again disappeared into Zhao Fu's body, and the surrounding ripples calmed down. However, the sky was still blood-red colored as was their surroundings. The blood sun and blood moon were still in the sky and had not disappeared.

Zhao Fu turned and asked the Devils around him, "What were those two figures?"

Even though he did not feel like there were any changes, it was still better to have a better understanding of them in order to prevent any mishaps in the future.

Momijigari lightly smiled as she replied, "Your Majesty, they are the two most powerful Devils out of all of the us. One of them is the Yatagarasu, the crow of the sun, and the other is the Gyokuot, the rabbit of the moon. In actuality, summoning the blood sun and blood moon were summoning them.

"Them appearing and entering Your Majesty's body is a sign of them acknowledging Your Majesty. Now, Your Majesty can also use Devil Power, and it will increase Your Majesty's power; it will not bring any harm to Your Majesty."

Hearing this, Zhao Fu felt quite relieved and did not pay it much mind.

Now that the Devil World had been formed, the next thing to do was to check its effects. Zhao Fu had been looking forward to this and ordered people to bring in some wild beasts, rebels, and traitors.

After entering the Devil World, these people and beasts did not react much, only looking around in fear. However, what they did not notice was that there were traces of blood-red qi entering their bodies.

The first to react was a black bull. Its gentle gaze was now replaced with a look of savageness and violence.

It gave a loud roar and started to attack the other wild beasts. It first attacked a panther, and as a carnivore, the panther used its fangs and claws to fight back against the black bull.

However, the black bull allowed it to attack as much as it wanted, and in the end, the black bull was able to kill the panther. It was covered with wounds as it started to devour the panther's corpse.

This made the people watching feel quite surprised; after all, bulls were herbivores, yet now it was devouring a panther. As the black bull devoured the panther, more and more blood-red qi entered the panther's body and was absorbed by the black bull.

The aura that the black bull gave off became more and more powerful. After devouring the panther, the black bull lay on the ground as if it was recovering from its wounds.

The black bull's wounds quickly recovered as if there was a power helping it recover.

Half a day later, the black bull once again stood up and attacked a sika deer. Now, the black bull was much stronger in terms of both speed and power, and it killed the sika deer in just a few charges before eating its corpse.

On the third day, the black bull killed two people and devoured their corpses. One person's head was directly crushed by the bull's teeth, causing blood and brains to splatter everywhere, creating a terrifying and evil scene.

The black bull happily ate, and after devouring the two people's corpses, it suddenly gave a massive roar as a powerful aura exploded out from it.

It suddenly stood up and its body gradually took human form. It was three meters tall, and its front hooves became sharp claws. Even though the look in its eyes was still quite violent and twisted, there was now a trace of intelligence within them.

A Black Bull Devil had appeared!

Chapter 1123: Devil Lord!

Devils developed shockingly quickly and had decent intelligence as well.

Moreover, this Black Bull Devil's power was extremely shocking. Originally, the black bull had strength comparable to a human with Stage 0-2 or 0-3 cultivation. Now, its strength was comparable to a human with Stage 0-5 or 0-6 cultivation. In other words, it had risen three Steps in just three days.

Zhao Fu realized how great the Devil World's potential was. Apart from the Blood God Pills, Zhao Fu had never seen any method of increasing cultivation so quickly.

If he gave this Black Bull Devil a Blood God Pill, at the very least its strength would be comparable to Stage 0-9 or even Stage 1. Thinking about that, a trace of a smile appeared on Zhao Fu's face.

Zhao Fu stood in the air, and because he was the master of the Devil World, he did not have to worry about being corroded by the blood-red qi. In actuality, just with his Sovereign Bloodline alone, Zhao Fu was able to neutralize the blood-red qi.

The 300 or so Devils around him felt quite comfortable here as they themselves were Devils. It did not have much of an effect on them, as the aura and atmosphere here quite suited them.

Zhao Fu descended and appeared above the Black Bull Devil. The Black Bull Devil discovered Zhao Fu and savagely looked at him, roaring as dense devil qi flooded out of it. It was about to attack Zhao Fu.

Bang!

At that moment, a blood-red rune floated out of the Black Bull Devil's head, and a powerful force caused its knees to vigorously kneel down on the ground, causing the ground around it to cave in.

At that moment, the Black Bull Devil half-knelt, half-lay on the ground, a look of terror on its face, while Zhao Fu gazed at it expressionlessly.

Zhao Fu did not do anything; it was just the restrictions within the Black Bull Devil activating. All of the Devils within the Devil World were under Zhao Fu's control. None of them could resist; only this way could Zhao Fu use them with ease of mind.

Following this, Zhao Fu looked at a human. At the start, he had kept his rationality; he knew that he was not as strong as the beasts, so he had made some simple weapons and killed a few beasts.

However, after a few days, he had lost control and started to kill others. Finally, in the end, he became like a beast and hunched over a corpse as he madly ate.

Zhao Fu watched as he excitedly ripped open someone's chest and took out his fresh heart and ate it in big mouthfuls. It was an extremely bloody and gory scene; this person could no longer be called a human.

After eating the heart, that person still was not satisfied and tore open a sheep and started devouring it too.

Boom!

A massive amount of devil qi spread out as he started to be transformed into a Devil. He lay on the ground, roaring as his skin gradually became black. His hands became sharp claws, and his face twisted as fangs grew in his mouth.

This person had become a Man-Eating Devil and had Stage 0-6 strength, a bit weaker than the Black Bull Devil. After all, the Black Bull Devil had its massive body and strength.

Zhao Fu walked towards the Man-Eating Devil, which tried to attack him as well. However, a blood-red rune appeared on its head and caused it to kneel and lie down on the ground. The

terrifying power within its body caused its eyes to become filled with terror, and it understood just how monstrous this person in front of it was.

“I was wrong, Devil Lord!” Zhao Fu did not expect that this Man-Eating Devil still retained his ability to think and speak.

However, that was all; it seemed to have become a different person and all of its memories had vanished. It was now closer to a beast that was capable of some human thought and speech.

In actuality, this person still had some impressions of Zhao Fu, because when Zhao Fu had thrown them in, he had been cursing Zhao Fu to die a horrible death and that he wanted to eat Zhao Fu’s flesh.

This person was one of the people who did not surrender as Great Qin cleared regions. Because Great Qin’s people had killed his relatives, he hated Zhao Fu greatly.

However, now, he was like an obedient dog that knelt and lay before Zhao Fu. Seeing this, Zhao Fu smiled; it seemed that this Devil Soul Technique was quite useful.

Following this, Zhao Fu took a look at a few other Devils and found the situation quite similar.

Now that Zhao Fu knew how useful the Devil World was, he decided to greatly develop it and send a large number of people and beasts in.

In actuality, all living things had spirits and could become Devils, although it was easier for animals than for plants to become Devils. Among animals, it was the easiest for humans to become Devils, as they already had some spirituality.

Even if the people here did not become Devils, they would become stimulants for other beasts to become Devils. After all, the flesh of people could make it easier for other creatures to become Devils, which was why Devils liked to eat people.

‘People’ did not refer to just humans but all sentient races, and it was easier for them to become Devils too.

In the future, when Great Qin cleared out regions, they would no longer have to kill those who did not surrender; such people, along with rebellious criminals in Great Qin, would all be thrown in here to provide more fighting forces for Great Qin.

The Devils that were nurtured were far stronger than soldiers of the same level. For example, even though the Black Bull Devil was only at Stage 0-6, it could fight two or three Stage 0-6 soldiers by itself.

If Zhao Fu gave them Blood God Pills, they could be immediately sent to the battlefield, where they could devour even more flesh. Thinking about the massive benefits brought by the Devil World, Zhao Fu could not help but grin.

After returning to the Great Qin Palace, Zhao Fu brought the Devils with him. It was the first time they had entered the Great Qin Palace, and they felt quite startled at how grand and luxurious it was. They could not feel quite excited because this was the first time they had come to the center of the Great Qin's power.

Zhao Fu personally wrote Imperial Edicts, enfeoffing the Devils as Devil Lords, who would control everything in the Devil World.

The Devils knelt on the ground and thanked Zhao Fu, and golden lights covered their bodies. They had received Great Qin's Kingdom Power and corresponding authority, making them all feel quite happy.

However, there were many Ministers who had worried expressions, seeing these savage Devils in the imperial court.

After making the enfeoffments, Zhao Fu gave an order to calculate how many people and beasts could be sent into the Devil World.

They found that they could send in around 40 million people, and because they were still clearing out regions, there were more people who could be sent in every day. They could send in around 50 million beasts, and this was around 100 million in total. Zhao Fu wondered how many Devils would be produced from this number.

Zhao Fu decided to take them out of the Devil World when they became Devils and not let them continue to fight and kill among themselves. Even though more powerful Devils would be produced by doing that, he did not want them to kill each other once they had become Devils.

Now that Great Qin had unified the world, they would be facing wars with other worlds in the future, so they could not lack numbers.

Chapter 1124: Nine Nether Royal Seal

Zhao Fu did not expect all 100 million creatures to become Devils; just 30 million would be enough to make him feel satisfied.

If he fed these 30 million Devils Blood God Pills, they would be able to withstand around 100 million Stage 1 soldiers. Great Qin would continue to nurture these Devils and create a Devil army, which would become one of Great Qin's main forces.

By the time Zhao Fu returned, the various Ministers had finished discussing a set of defensive systems and were currently setting them up. Zhao Fu asked them about the details, after which he allowed them to go about it with peace of mind.

Right now, Zhao Fu was thinking of ways to increase Great Qin's strength; only with enough strength could Zhao Fu feel at ease.

Zhao Fu's second focus was the Ghost Soldiers. They were converted within the valley that had fused with many magic formations and items, forming a special land that could connect to the Underworld and absorb Yin qi from the Underworld.

Great Qin's Ghost Soldiers had been through many battles and many of them had fallen, but their numbers had been replenished and remained at around 30 million.

What Zhao Fu valued was the fact that they could turn the corpses of deceased soldiers into Ghost Soldiers. Zhao Fu had preserved all of the corpses of Great Qin's soldiers who had died during the unification battle.

If he could make them all Ghost Soldiers, it would be a great boost to Great Qin's forces, and would provide Great Qin with a bit more safety.

Zhao Fu could convert them into Ghost Soldiers at any time, but the key thing was that he lacked things to control them with. The current Ghost Soldiers were all controlled through the Ghost King Seal and other Ghost Seals. Without them, the Ghost Soldiers would immediately go out of control.

Zhao Fu wanted to see if there was anything that could substitute for the Ghost King Seal, and Zhao Fu could not help but think of the Royal Seals from the nations that Great Qin had destroyed.

The Ghost King Seal had King's Power, which was why it had such a powerful commanding effect. Ordinary Royal Seals also had King's Power and just had different attributes. Ghost King Seals had an Underworld attribute that allowed them to command Ghost Soldiers, while ordinary Royal Seals could not.

If Zhao Fu could turn these Royal Seals into Ghost King Seals, he would be able to use them to control Ghost Soldiers. As such, Zhao Fu asked the golden dragon and found that this was actually possible.

However, the price would be quite high – only Barony Royal City's Royal Seals could be used. First, they had to break the connection between the Royal Seal and Royal City. In other words, they would have to destroy a Barony Royal City and have it become a Capital City again.

Levelling up a Capital City into a Royal City required an ocean of Experience, so the cost was quite great. Moreover, there would also be a great impact on the Legacy. After thinking about it, Zhao Fu decided to destroy some Barony Royal Cities and turn their Royal Seals into Ghost King Seals.

After all, things were not like before when Royal Seals could gather the power of the Royal City and the nation, allowing one to single handedly fight dozens, if not a hundred ordinary City Lords.

The City Lord Seals, Official Seals, and Royal Seals had all become treasures that could no longer gather power.

As such, Zhao Fu did not feel that it was a pity to destroy them and obtain more useful power. As for the Legacies, Zhao Fu did not care much for their Legacies.

Great Qin had seven Royal Seals in total; five were from the outside world while one was from Ramis' Kingdom and the other was from Tina Pendragon's Kingdom.

Zhao Fu thought about it; Tina Pendragon was only weaker than him and the Royal Seal was quite important to her, so he decided to preserve hers. The remaining six would be enough.

A while later, Zhao Fu destroyed the six Royal Cities and made them Capital Cities again, and he took the six Royal Seals to the valley.

Just like before, this place was filled with Yin qi and was quite gloomy. There seemed to be ghosts floating about, creating a terrifying scene. Ordinary people would not dare to get close at all.

Zhao Fu came to the center of this place, which connected to the Underworld and was quite suitable for cultivating Ghost Soldiers. Zhao Fu placed the six Royal Cities at the center of the formation and activated it, causing a massive amount of power to spread out.

Boom!

A massive wave of Yin qi exploded out like a volcano erupting, causing the surrounding temperature to plummet. That freezing Yin qi flooded out, causing people's hairs to stand on end as they uncontrollably trembled.

Under Zhao Fu's controlled, the Yin qi formed an orb that encapsulated the six Royal Seals. The formation continuously drew Yin qi from the Underworld, causing the orb to become larger and larger.

Finally, the orb expanded out to 1,000 meters wide and gave off an immense aura as it hung in the sky. The six Royal Seals within it quickly absorbed the Yin qi and gradually transformed.

Their various powers became a ghostly power, and their auras became gloomy and eerie.

The 1,000 meter wide orb of Yin qi was continuously absorbed by the six Royal Seals and continuously shrank.

Boom!

At that moment, Zhao Fu fully activated the formation with all his power, causing the region to shake. An even stronger attractive force exploded out, causing a gloomy and ancient hellish intent to rush out from underground and enter the six Royal Seals.

Boom! Boom! Boom! Boom! Boom! Boom!

Six massive explosions sounded out as the six Royal Seals instantly absorbed the Yin qi around them and gave off boundless gray light. A terrifying King's aura exploded out; the Royal Seals had successfully been converted.

Zhao Fu deactivated the formation and grabbed the six Royal Seals; they had all gone through big changes.

First, they had all become gray-colored and the dragons engraved on them were now ghost dragons. There were also three words engraved on them, 'Underworld Royal Seal.' They felt extremely cold and contained immense power.

[Underworld Royal Seal]: A Royal Seal that has absorbed a large amount of the Underworld's Yin qi and hellish intent. It is a high quality Royal Seal that has many effects, and can command ten million Ghost Soldiers.

Seeing this, a smile appeared on Zhao Fu's face. A single Underworld Royal Seal could command ten million Ghost Soldiers, so six of them would allow him to control 60 million Ghost Soldiers. Great Qin could add another 60 million Ghost Soldiers, and with their current 30 million, they would have 90 million Ghost Soldiers, which would be a big help to Great Qin.

In the future, if they obtained more Royal Seals, they could turn them into Underworld Royal Seals and revive more of Great Qin's soldiers, allowing them to continue to help Great Qin conquer worlds.

If they could obtain 100 Royal Seals, Great Qin would be able to control one billion Ghost Soldiers; anyone would be excited at such a thought. After all, these were all converted from soldiers who had perished, which would greatly cut down on Great Qin's losses. In the future, Zhao Fu would not have to worry as much about soldiers dying.

Chapter 1125: Illusion Flower Devil

Moreover, these Ghost Soldiers countered the Death Race and other Ghost creatures to some extent, which would be of use in future battles.

Zhao Fu already predicted that the Ghost Soldiers would be one of Great Qin's main forces in the future. However, they had to conquer more Kingdoms and obtain more Royal Seals.

It was a pity that the Great Qin Seal could not gather power anymore; if Zhao Fu did not use his other powers and just relied on his Stage 8 Cultivation, he would definitely die if he tried to assassinate the Kings of other Kingdoms.

After all, they had much higher cultivation and had countless soldiers and experts guarding them. After losing the Great Qin Seal's power, it would be much more difficult for Zhao Fu to deal with them.

Before, Zhao Fu had been using the power of the Great Qin Seal, which was the Royal Seal of a Level 11 Marquisate Kingdom, to deal with them. Now, he had no hope at all and could only focus on becoming more powerful himself instead of relying on external forces.

These six Underworld Royal Seals also had many other uses, but Zhao Fu was not sure what they were yet. Zhao Fu did not have the power to go to the Underworld, and even if he did, he would not have any other purpose in going, so he decided to put this matter aside for now.

Moreover, Zhao Fu was unable to use these six Underworld Royal Seals as a Ghost King Seal had already turned into a Fate Dragon and fused into his body.

A person could only have one of these seals, so Zhao Fu had to appoint six Underworld Lords to have them control the Ghost Soldiers.

The process was the same as enfeoffing the Devil Lords. Zhao Fu would never enfeoff another King, as he could not accept another King. As such, the highest rank in Great Qin below him was Lord.

Zhao Fu had enfeoffed Devils and Ghost Generals into Lords so that they would have greater potential and become one of Great Qin's main forces in the future.

There was still two more months, and Zhao Fu wondered if he would be able to obtain more Royal Seals. If he could increase the number of Ghost Soldiers, that would be for the best, as Great Qin would become a bit more powerful and have more confidence. That way, Great Qin would have more safety.

The development of Devils and Ghost Soldiers was now in the preliminary stages. In two months, the Heaven Domain Boundary would disappear, so Great Qin still needed more powerful methods.

Zhao Fu mulled this over, wondering how else he could develop Great Qin and what other powers he could use.

The golden dragon suddenly said, “How about you destroy all of Great Qin’s City Lord Seals and fuse them into various beasts? Even though the power of region creatures have been reduced, they can still be of great help to Great Qin!”

After hearing the suggestion to destroy all of the City Lord Seals, Zhao Fu instinctively wanted to refuse. Even though City Lord Seals were not as powerful anymore, they were still quite useful. Moreover, City Lord Seals were the core items of Cities, and destroying them would have a massive impact on Cities.

Even though the golden dragon’s suggestion was quite attractive, if they destroyed all of the City Lord Seals, the Kingdom and its Fate would become much weaker.

They definitely could not destroy all of the City Lord Seals, but could they find a way around this? As expected, the golden dragon had a solution and did not disappoint Zhao Fu.

Its suggestion was to use Official Seals to replace City Lord Seals. The number of Official Seals was determined by the strength of a Kingdom, and one could also determine the number oneself. Now that Official Seals could not provide much power anymore, they could create more and have them replace the City Lord Seals.

After fusing Official Seals into Cities, those Cities would become true governmental Cities. The Official Seals would have the same effects as City Lord Seals, and the previous City Lord Seal could be destroyed without affecting the City.

However, there was a very big flaw to this, which was that these Cities would be forever bound to Great Qin. If anything happened to Great Qin or it was destroyed, these Cities would immediately become Towns again.

After thinking about it, Zhao Fu still decided to use Official Seals to replace City Lord Seals. After all, if Great Qin was destroyed, Zhao Fu would not care if those Cities still remained. In fact, if Great Qin was destroyed, he would be happy to see those Cities become Towns.

However, this would also have a big effect on the Legacies of certain Cities. Of course, they could not destroy the Great Qin Seal, or else it would affect the entire Kingdom. Some Capital Cities were also off-limits, as they were pillars of Great Qin.

Zhao Fu decided to destroy the City Lord Seals of some ordinary Cities; this would not have too much of an effect.

It was a pity that Official Seals could not be fused into beasts; if that was possible, Zhao Fu would be overjoyed to death.

After all, a Kingdom could form as many Official Seals as it wanted, but the cost was that the power that they contained would become weaker. Once Great Qin became a Dukedom Kingdom, the Official Seals that it created would be more than ten times more powerful, and if they could be fused into beasts, Great Qin would be able to create a beast army that could sweep across everything.

It would simply be unstoppable, as each beast would have half the strength of a region boss monster. If such an army was possible, it would be horrifying.

If Great Qin could produce such a beast army, there would be nothing to worry about in the outside world, and it would not be facing such pressure. It was a pity that the Official Seals could not be fused into beasts, so Zhao Fu could only give up on this.

After making his decision, Zhao Fu gathered his subordinates and prepared to destroy the City Lord Seals. This was an extremely important matter, and they could not afford to take it lightly.

Following this, Zhao Fu had people count up the number of Wyverns and Corpse Soul Commanders. Zhao Fu had seen their power after fusing with City Lord Seals, so they were his first choices.

After them were the Spiders and Giant Wolves. As for the Black Forest Horses and Giant Deer, Zhao Fu did not want to bother with them, as they were more suited to being mounts than battle beasts.

There were also the Illusion Flower Devils, which could produce pollen that made people see illusions. Stage 1 Illusion Flower Devils could easily cause a Stage 1 soldier to become bewildered, and the same was true for Stage 2 Illusion Flower Devils and Stage 2 soldiers and so on.

They had massive potential, and there was no limit to their numbers; Zhao Fu could nurture as many as he wanted.

They were able to essentially replace the Hundred Ghost Illusionists, as the limit for the Hundred Ghost Illusionists was only 300 people. Because of Zhao Fu sealing the Six Paths Demon Images, it had actually been reduced to 299, which was simply not enough.

Now, the battles that Great Qin fought were incredibly big, and the Hundred Ghost Illusionists were no longer able to produce much of an effect on such a big battlefield.

Moreover, the loss of the ability to gather power with City Lord Seals was another big blow to the Hundred Ghost Illusionists. As such, Zhao Fu could only give up on them and use them in smaller battles, having the Illusion Flower Devils replace them.

Zhao Fu developed the Illusion Flower Devils in the flower region, which made them grow much faster. The World Flower growing there was also very beneficial to them.

Moreover, Zhao Fu had started developing the Illusion Flower Devils from the last festival, and back then Great Qin had not even established a Kingdom yet. After such a long time, there were likely many of them.

Chapter 1126: Beast Army

In total, Great Qin had 8,930 Wyverns and 7,330 of them were able to fight. Great Qin also had 560,000 Corpse Soul Soldiers and 8,540 Corpse Soul Commanders.

There were 30,000 Illusion Flower Devils, 1.2 million Spiders, and four million Giant Wolves.

The Giant Wolves had the greatest numbers as they were nurtured as mounts for the Orcs.

The Demon God Spiders had not been nurtured for a long time, but their reproduction rate was startling and grew incredibly quickly, so their numbers were the second greatest.

The fact that there were 30,000 Illusion Flower Devils was a pleasant surprise. As for the Wyverns and Corpse Soul Commanders, Zhao Fu felt slightly disappointed, because there were not even 10,000 of either of them. However, they were the strongest out of the beasts, so it was understandable that they did not have great numbers.

Zhao Fu was also quite pleased at the number of Corpse Soul Soldiers. Even though they could not compare to Corpse Soul Commanders, they still had Stage 4 strength and there were 560,000 of them. That number was enough for them to be a significant force on the battlefield.

Great Qin currently had 110,000 Cities and that did not include the ones from the Southern Continent of the Dark Demon world. The Night Dynasty and Great Qin were currently closely tied, but their relationship had not been revealed. Zhao Fu was not in a hurry to devour the Night Dynasty because it still had its value in being independent.

The 110,000 Cities could provide 110,000 City Lord Seals, which meant that Great Qin could produce 110,000 powerful beasts. Thinking about that, Zhao Fu could not help but feel excited.

Even though region creatures had become much weaker, they were still quite powerful. Only City Lords could contend against a true region boss monster, and ordinary Stage 1 soldiers would simply be seeking death if they tried to fight.

A single beast with a City Lord Seal fused into it could fight against 60,000 to 70,000 soldiers, ten could fight against 600,000 or 700,000, and 100 could fight against six million or seven million soldiers. If Zhao Fu could nurture 110,000 of them, they would be able to fight against 600 million to 700 million Stage 1 soldiers.

This was, without a doubt, one of Great Qin's greatest trump cards, and that was as a sum of the individuals. If they all charged together, the aura would be enough to destroy the heavens and earth and would be completely unstoppable. Their power would greatly surpass what 600 million or 700 million soldiers could produce.

Now, Zhao Fu felt actual confidence and was able to relax a bit, causing him to laugh. Great Qin could now fight with those from the outside world.

Zhao Fu stood on the Heaven Prayer Platform, wrote an Imperial Edict, took out the Great Qin Seal, and stamped it before saying, “Today, We hereby repeal City Lord Seals and replace them with Official Seals!”

Boom!

A shocking explosion sounded out as a black pillar of light shot into the sky, causing Great Qin’s Fate to start to roil.

Zhao Fu raised the Imperial Edict in his hand, which turned into motes of black light and disappeared.

Boom! Boom! Boom...

Explosions sounded out as pillars of light shot into the sky. The massive waves of aura threw the heavens and earth into chaos, causing clouds to swirl and a powerful aura to cover the entire human world.

Countless Cities exploded out with pillars of light, making it seem as if the heavens and earth were connected. Illusory images of Imperial Edicts gradually descended from the sky and fused into Cities, causing the Cities to be covered with a layer of black light.

The images of the Imperial Edicts appeared in the City Halls, which turned into black seals, and the City Lord Seals gradually lost their luster.

Now, Zhao Fu had successfully replaced the City Lord Seals with Official Seals. The next thing to do was to fuse the City Lord Seals with the beasts.

There were 15,000 Wyverns and Corpse Soul Commanders. Zhao Fu had already fused City Lord Seals into 8,000 of them, which meant that they still needed 7,000 City Lord Seals.

This meant that Zhao Fu still had over 100,000 City Lord Seals to use. The 30,000 Illusion Flower Devils had powerful support abilities and had decent battle strength as well. If he fused City Lord Seals into all of them, he would still have 70,000.

The Demon God Spiders all had around Stage 2 strength, and the Elites had Stage 3 strength. The Chief class Spiders had Stage 4 strength. Out of the 1.2 million Spiders, picking out 20,000 Chief class spiders was not very difficult.

Now, Zhao Fu still had 50,000 City Lord Seals. The Giant Wolves were relatively weaker: Ordinary Giant Wolves only had Stage 1 strength, while Chief class Giant Wolves had Stage 3 strength.

Now, Zhao Fu had two choices, which were to nurture Giant Wolves, which had Stage 3 strength at most, or to nurture the ordinary Corpse Soul Soldiers. After all, the ordinary Corpse Soul Soldiers had Stage 4 strength, so they would be more powerful than the Giant Wolves.

Moreover, there were 560,000 Corpse Soul Soldiers, which was much more than the number of City Lord Seals. Zhao Fu would be able to easily use up the remainder of the City Lord Seals.

However, Zhao Fu thought about it and decided to use 20,000 of the City Lord Seals on the Giant Wolves. With the Giant Wolves' speed and ferocious attacks, they would be more useful than Corpse Soul Soldiers sometimes.

As for the remaining 30,000 City Lord Seals, Zhao Fu fused them into the Corpse Soul Soldiers.

Before fusing the City Lord Seals, Zhao Fu fed them a large number of medicinal pills and spirit medicines that could purify their bloodlines; this greatly increased the effects of fusing with City Lord Seals.

After doing all of this, Zhao Fu first fused the City Lord Seals into the Wyverns and Corpse Soul Commanders. The Wyverns became around 110 meters long, and the Corpse Soul Commanders became 100 meters tall.

Because many Wyverns had been killed by the Dragon-Slaying Ballistae in the unification battle, Zhao Fu had people specially make armor for them. The lowest grade of materials used were Gold grade, and they also added some Legendary grade materials and Gold grade Talisman Stones.

The Talisman Dragon Armor was stronger than even defensive armor made from Epic grade materials, and it would be able to protect the Wyverns quite well.

As for the Corpse Soul Commanders, they had been wearing heavy armor and using heavy shields this entire time, and they also had Talisman Equipment as well, so there was nothing to worry about.

Zhao Fu then fused the City Lord Seals into the ordinary Corpse Soul Soldiers. They were slightly shorter than the Corpse Soul Commanders, around 80 or 90 meters tall. Their auras were slightly weaker, and they were also equipped with heavy armor and heavy shields.

Zhao Fu then went to the flower region and gathered the 30,000 Illusion Flower Devils and fused the City Lord Seals into them. Powerful auras exploded out as the Illusion Flower Devils gave off a large amount of green light, and their bodies became bigger until they became 70 or 80 meters tall.

The humanoid plants looked even more like humans now, and they seemed more well-built. Their facial features became clearer, and the flowers on their heads gave off an even more intoxicating fragrance.

The 30,000 Illusion Flower Devils that were each 70 or 80 meters tall stood before Zhao Fu in an orderly fashion. Their massive auras and the flowers around them created quite a shocking scene, looking like a beast army.

Chapter 1127: Rainbow Barrier

The Illusion Flower Devils' main strength was in support and lacked strength, so Zhao Fu prepared sets of Talisman Armor for them that had bonus defenses. With the Illusion Flower Devils' abilities, they would become targets on the battlefield, so they had to be protected.

Following this, Zhao Fu went to the Spider Den. There was a large palace here, which was the Spider Palace that Zhao Fu had rewarded Elise with.

After Zhao Fu arrived, Elise brought a group of people and smiled flirtatiously as they walked out. There were three female attendants with short, silver hair behind her, as well as dozens of women with short, black hair, and blood-red pupils. They all had delicate facial features and elegant figures.

Zhao Fu rarely came here, so he did not know what the situation was like here. After asking, he found that Elise had the ability to turn spiders into human form.

However, there was a high requirement as to their bloodline, and they also had to have a certain amount of strength. Elise had only nurtured dozens of black-haired female attendants, who were slightly weaker than the silver-haired female attendants.

Zhao Fu did not pay too much mind to details like this and had Elise call the chosen Spiders over.

Elise nodded and waved her hand, after which hair-raising sounds could be heard as countless black spiders that were around five meters long flooded over. This scene was quite terrifying.

Zhao Fu fused the City Lord Seals into the Spiders' bodies, causing them to give off a large amount of black light, and hazy spider images floated out of their bodies.

These Spiders were all Demon God Spiders and had a trace of god blood in them, and the images were of the Spider God.

After the images appeared, the Spiders' bodies quickly went through changes until they became about 70 or 80 meters long. Their terrifying auras swept out like a flood. What was particularly eye-catching was their eight legs which gave off a black light. They looked as sharp as knives and made people feel a chill in their hearts.

Zhao Fu gave a pleased smile. He also had special armor prepared for them as an extra layer of protection.

Finally, it was the Giant Wolves' turn. After fusing the City Lord Seals into their bodies, they also became 70 or 80 meters long and gave off a savage aura. Zhao Fu also had armor made for them as well.

Each of the enhanced beasts was incredibly terrifying, and now that they had special armor made for them, their effect would be far greater than anyone could imagine. Zhao Fu could almost already see them sweeping across everything in their path.

Now that he had this beast army, as well had the Devil army and Ghost Soldier army in development, Zhao Fu was not as worried about the outside world.

There were still two months, and Great Qin just had to focus on clearing out regions so that it could level up into a Dukedom Kingdom.

One month later, the situation outside the human world suddenly changed as a large amount of the Heaven Awaken World's Fate flowed into the human world. A massive rainbow barrier appeared; this was the true appearance of the Heaven Domain Boundary.

Everyone in the surroundings immediately noticed these changes and felt quite startled; they had never thought that the Heaven Domain Boundary would reveal itself so quickly. This meant that that world was about to completely fuse into the Heaven Awaken World.

"Why is it happening so early?" None of the Grassi people had thought that the world would fuse into the Heaven Awaken World so early. They thought that there would still be a few years, yet it was happening now – this was extremely good for them.

Because that world had less time to develop, wouldn't it be much easier to destroy that world?

Now that all City Lord Seals had lost their ability to gather power, they had a massive advantage. Now, it was a matter of who had the better foundation – they had developed for dozens of years and definitely had an advantage in terms of military force, Generals, equipment, and experience.

How could a world that had only developed for a few years compare to a world like theirs, which had developed for dozens of years? To them, that world was just a big piece of meat that all of them craved.

Even though they did not know what had happened to cause that world to fuse into the Heaven Awaken World ahead of time, anyone who did not want to take a bit would be an idiot.

News quickly spread, and the various Kingdoms of the Grassi world quickly gathered soldiers; everyone wanted to take a bit of this meat.

In the past, the Lantong people had conquered a lot of their territory, and now they were going to do the same to someone else. They could not help but feel secretly pleased – they were quite lucky that the next world was fusing into the Heaven Awaken World ahead of time, as all City Lord Seals could no longer gather power. This time, they would pillage to their hearts' content.

Many slave traders also arrived because this was an opportunity to become rich. They could charge in and take people or buy them for cheap from the armies.

They all wondered what sort of world this world was and what sort of people lived in it. They hoped that it would be a humanoid race, as they would be worth more. If it was a race that was grotesquely shaped, they would be worth less.

If they were a humanoid race, the good-looking men and women could be kept as pets, and the others could be used for labor.

Some people were incredibly eager and wanted to charge into that world. This was a big pot of gold just sitting there, and they would be able to sell the people for high prices. New races always drew a lot of attention, and everyone would buy slaves out of curiosity.

Moreover, this world had only developed for a few years and most likely did not even have many Kingdoms yet. It was definitely pitifully weak, and whoever charged in first would definitely strike it rich and obtain the most. As such, many people could not wait.

Roughly 2.6 billion soldiers gathered at the boundary, as well as countless Generals. The Grassi Kingdoms had not yet completely moved out because they did not take this world too seriously; they were confident that two billion soldiers would be able to sweep across the whole world.

After hearing about this, the Half-Beast World and Elf World also felt quite moved, and they were envious of the Grassi world.

However, they were unwilling to just sit and watch; they found that some corners of their worlds connected with that world, which made them feel delighted. Soon, they also started to gather their forces so that they could also obtain some benefits for themselves.

Three worlds attacking a new world was like three adults bullying a child; it was incredibly shameless.

However, in a world where the strong devoured the weak, who could blame them? It wasn't their fault that this new world was so weak and fused with the Heaven Awaken World so early. If they did not invade this world, who would they invade?

It was possible that that world had not even sensed the danger it was in and was most likely quite confident in itself, just like a frog in a well that could not see the full sky.

However, that was understandable; they had once been like that as well. Only when they had seen the true Heaven Awaken World did they realize how small they were.

Chapter 1128: Name of Great Qin

Most of the outside worlds believed the human world to be a pile of loose sand. It had only been six years, so it was obvious what the situation inside was like. As such, countless people could not help but head over, wanting to take a big bite of this piece of meat without spending too much effort.

The three worlds had gathered six billion soldiers in total. Now that such a big thing was happening, the surrounding Kingdoms heard about it as well. However, they were not as lucky as the Grassi, Half-Beast, and Elf worlds, or else they also would have wanted to take a bite.

With such a massive force gathered, countless people believed that world to be doomed. After all, it could not defend against the invasion of three worlds.

It was like a newbie fighting three pros with abundant experience and power; in the end, it would just be severely beaten by the three pros.

A major figure declared, "Fastest, within one month, slowest, within six months, the three worlds will destroy that world. When that time comes, the three worlds will split the spoils and quickly develop; it's a great opportunity for those three worlds to rise!"

Many people felt sympathetic to that new world, as it was about to be destroyed by others, and all of their people would be made slaves. The men would become labor and the women would become objects of pleasure.

Of course, many of the people waiting wanted to capture a few people as pets. Some lascivious people loudly laughed, saying that they wanted to have ten or so women from this world and that they could not wait any longer.

Because the Killing Sword Master had appeared in the Elf World before, there were many spies from the Ancient Stem Domain in the Elf World. The matter of the Killing Sword Master was far too important, and many factions in the Ancient Stem Domain were paying close attention.

As such, the news of these three worlds attacking a new world quickly spread.

The Dao Cultivation Sect's Sect Master looked quite indifferent as he said, "No need to pay too much mind to this matter!"

The woman who had reported this hesitated before saying her own thoughts, "This world is fusing into the Heaven Awaken World so early, and it is close to the Elf World; could there be some relation between them?"

"However, that world is now in dire straits; the Heaven Domain Boundary will disappear in one month, and I'm afraid the world will be destroyed. When that time comes, we might not be able to clarify anything."

The Sect Master felt quite startled, and after thinking about it, he said, "There most likely isn't any relation. After appearing at that time, the Killing Sword Master has not appeared again. He most likely left already. With that person's extraordinary powers, he most likely came from the Heaven Domain. Now that he has obtained the Killing Sword, I doubt he will come back.

"Also, this matter happened at a boundary region while we are in the inner region, so there's no need to get involved; just investigate it. There have been big matters happening in the Ancient Stem Domain recently. Not too long ago, a terrifying Emperor appeared and climbed up that Ten Thousand Dragon Stage."

Hearing this, the woman left to carry out orders.

After hearing about this matter, the Bear Mountain Kingdom's King was somewhat displeased, "There's no need to report about such a small matter; We only want information about the Killing Sword Master.

"However, that new world is quite unlucky; not only did they run into an age where City Lord Seals have become useless, but they're fusing into the Heaven Awaken World so early. They'll be destroyed without a doubt, but it's a pity that they're not close to the Bear Mountain Kingdom; otherwise, we'd destroy them within three days!"

As one of the largest financial groups in the Ancient Stem Domain, the Ten Thousand Dragon Financial Group's intelligence network was quite outstanding, and it naturally knew about this as well.

They had left some spies in the Elf World as they were quite concerned about the Killing Sword Master's matter, so they had also heard about this.

However, they did not pay it much mind; even though it was a war between worlds, the place where it was happening was too remote, so they did not care much.

Three worlds that had developed for dozens of years attacking a new world would definitely end just how they expected. The ending was already set in stone, and it had nothing to do with them, so they would not pay it much mind.

What the Ten Thousand Dragon Financial Group cared most about was that mysterious Emperor. He was the prophesied person, and the connection between him and the Ten Thousand Dragon Financial Group would become deeper and deeper. The Ten Thousand Dragon Financial Group was very desperate to know everything about that mysterious Emperor.

They were currently looking for his information with all their power, and they had even sent people to the Heaven Domain. They did not have any mind to care about anything else right now.

The Eight Dragons Essence Sect did not pay this information any mind at all. Right now, they were worried about the mysterious Emperor the Young Sect Master had offended.

Right now, cultivation was the most important thing, so it was evident that a world that had developed for decades would annihilate a world that had only developed for a few years. If that person came from the Heaven Domain, with his esteemed status and the massive faction behind him, he would be able to annihilate the Eight Dragons Essence Sect.

The loss of City Lord Seals was a fatal blow to them; facing people with incredibly high cultivation, they would be incredibly helpless. If that Emperor came to find them, the Eight Dragons Essence Sect would be doomed. After all, the foundations of those in the Heaven Domain was not something people like them could even imagine.

They would even be willing to have their Young Sect Master go and kowtow to atone for his offenses, because he had offended someone the Eight Dragons Essence Sect could not afford to offend.

The Ice Origin Kingdom did not give this matter much mind either. Even though they were in the Ancient Stem Domain, they were on the western side and was quite far away from the boundary region, so they would not care about something so far away.

They had also left spies in the Elf World, and that was why they knew about this; otherwise, it was impossible for them to know about it.

Moreover, they wanted Bing Qixue to do anything he could to befriend that mysterious Emperor. Now that cultivation was everything, if they could receive the support of an Emperor from the Heaven Domain, the Ice Origin Kingdom would feel more confidence.

At the same time, they prepared countless things – treasures, equipment, medicinal pills, women, pets – anything that the mysterious Emperor wanted, they would provide.

Bing Qixue felt quite frustrated and wanted to refuse because he was not the type of person who would desperately try to curry favor with someone else. However, befriending that person would bring great benefits to the Ice Origin Kingdom.

Bing Qixue had personally seen that mysterious Emperor before and had witnessed his power himself. That kind of power made him feel immense fear.

Putting aside power, just Zhao Fu's bloodline alone gave off an immense pressure that could cause his legs to grow weak. Nothing could compare to this kind of bloodline, and in front of that bloodline, he felt like he was rubbish. That mysterious Emperor's identity surpassed anything he could imagine.

This made Bing Qixue comply, and he decided to try to befriend Zhao Fu. However, that mysterious Emperor was not someone who he could find at will; he could only hope to find some information through the Ten Thousand Dragon Financial Group.

None of them knew that whether it was the Killing Sword Master or the mysterious Emperor, both of them were Zhao Fu, Great Qin's Legatee.

However, they would soon know Great Qin's name; Zhao Fu would have Great Qin displayed to the rest of the world in a shocking fashion.

Chapter 1129: Level 1 Dukedom Kingdom

Another 15 days later, it was a clear and sunny day when suddenly clouds started to swirl as a massive amount of Heaven and Earth Fate started to roil.

Boom!

A shocking explosion sounded out throughout the entire human world. A massive pillar of light shot into the sky as countless traces of Fate madly gathered. Hearing this massive sound, everyone looked excited and happy.

At this moment, Great Qin was about to become a Level 1 Dukedom Kingdom. Now, it was not something that just a few Kingdoms could deal with; only a few worlds would be able to deal with it.

Nine dragons' roars sounded out as the Great Qin Seal flew into the sky from within Zhao Fu's body, turning into nine massive black dragons that spiralled in the sky. Countless traces of Fate flowed into them, causing the entire human world to give off a faint light.

Now, all of the human world's Fate was fusing with Great Qin's Fate. In the future, the entire world's Fate would belong to Great Qin.

Boom!

Another explosion sounded out as the Earth Realm Mark on the back of Zhao Fu's hand gave off a brilliant light, causing the Heaven and Earth Source Energy to gather towards Zhao Fu.

Zhao Fu felt a massive amount of power enter his body as the power within his body went through changes. It felt incredibly comfortable, and he felt a warmth within his body.

Finally, the entire human world gave off a black light as the human world's Fate completely fused with Great Qin's Fate; Great Qin had become a Level 1 Dukedom Kingdom.

Something that was a slight pity was because Zhao Fu's bloodline was already of such a high quality, the world's source energy did not cause it to upgrade again. However, its power had become much stronger, and now, Zhao Fu was strong enough to fight with those above Stage 9.

Now that Great Qin had become a Level 1 Dukedom Kingdom, it was time to take a look at its new strength.

Great Qin now had 81.2 billion people, which was an extremely terrifying figure; it was more than ten times the previous population of the earth.

They had 7.5 billion soldiers, of whom 6 billion were Stage 1 soldiers, 220 million were Stage 2 soldiers, ten million were Stage 3 soldiers, 420,000 were Stage 4 soldiers, and the rest were those who were not yet at Stage 1.

Great Qin now controlled 47,570 regions, including the Netherwater Continent. As for the Night Dynasty in the Southern Continent of the Dark Demon world, it could not be counted as Great Qin's territory.

Great Qin had one Dukedom Royal City, one Marquisate City, eight Barony Cities, 16 Capital Cities, 105,028 Great Cities, 8,521 Cities, 14,860 Towns, and 16,589,489 Villages. This did not include the 20,000 Cities from the Southern Continent of the Dark Demon Continent.

Because Great Qin had 47,570 regions, it could have 190,280 Counties. This meant that it could have 190,280 County Seals, 19,028 Province Seals, 1,902 Baron Seals, 190 Marquis Seals, 19 Duke Seals, and one Earl Seal.

At the same time, Great Qin's Corps had automatically leveled up into Dukedom Corps. They were no longer Marquisate Corps, and each Corps could now have ten million soldiers, and Great Qin could now have a shocking 100 Corps.

After leveling up into a Dukedom Kingdom and controlling the power of an entire world, it was not something that a Marquisate Kingdom could compare to. The massive power it had completely surpassed Marquisate Kingdoms.

Now, the Great Qin Seal had fused with the world's source energy, and it was comparable to a Nation Armament and had immense power.

Zhao Fu long since knew about the three worlds on the outside waiting to invade, and he coldly laughed. Wanting to invade the human world with just six billion soldiers? Destroy Great Qin within a month? They were simply delirious.

Now, Zhao Fu was confident enough to face everything, and his blood seemed to boil. Great Qin would definitely reveal itself and become famous.

However, Zhao Fu actually wanted to be low-profile and not attract too much attention, or else it would be detrimental to Great Qin's development. However, it was a pity that the circumstances made it so that he could not be low-profile.

There were still 15 days left, and Zhao Fu planned to use these 15 days to make some final preparations.

Great Qin now had 7.5 billion soldiers, and it already had an advantage in numbers facing the incoming six billion soldiers. There was a gap in cultivation, but that was not too big, so they could still fight.

There was also the matter of City Lords. Most of Great Qin's City Lords' cultivations were around Stage 4 or Stage 5, while the City Lords of the outside worlds had Stage 5 or Stage 6 cultivation, and some even had Stage 6 or Stage 7 Cultivation. This was quite a big gap.

Having strength that was one Stage lower made the situation quite disadvantageous, but Zhao Fu had prepared sets of Talisman Equipment for his City Lords.

These sets included helmets, armor, shoes, bracers, and weapons; five pieces of equipment in total. They had all been made using Legendary grade materials and Talisman Stones that were at least Gold grade. With the powerful effects from these Talisman Equipment, the gap would be somewhat reduced.

With Great Qin's current strength, Zhao Fu felt that it could face the three worlds, and he felt that he had been unnecessarily worrying before. Moreover, Great Qin had a final trump card, which was its beast army.

Moreover, because of the Underworld Royal Seals, Great Qin now had 90 million or so Ghost Soldiers, as well as roughly 100 million Devils.

Most of these Devils had around Stage 1 Cultivation and were extremely ferocious when fighting. They were stronger than the ordinary soldiers and had all sorts of strange abilities, such as stealth, illusions, and other frightening abilities.

With them, dealing with 300 million Stage 1 soldiers would be no problem and would be quite useful.

There were also the Corps. Great Qin could now have 100 Corps, and taking away the 50 it already had, it could establish another 50 Corps. Of course, Zhao Fu wanted to make all of them Special Corps.

During that unification battle, Great Qin had obtained many special Cities, and they could all be used as vessels for Special Corps.

Great Qin most likely would not lose in terms of Corps; the stats of Dukedom Corps were far greater than those of Marquisate Corps. Moreover, each Corps could have ten million soldiers, so 100 Corps could contain one billion soldiers.

The only thing to worry about was the number of Kings. Even though Royal Seals could no longer gather power, the Kings of the outside Kingdoms would have at least Stage 8 or Stage 9 strength, and some may have even broken through Stage 9 and reached the Saint Realm. Moreover, they all had Nation Armaments as well.

In this New Age, Nation Armaments had become slightly stronger, and the amount of Fate they consumed had been reduced too.

From the intelligence Great Qin had gathered, there were 30 Kings from the Grassi World, 15 Kings from the Half-Beast World, and 16 Kings from the Elf World.

Dealing with the 30 Kings from the Grassi World would already be quite difficult for Zhao Fu. If they all allied together, Zhao Fu would most likely lose.

After thinking about it, Zhao Fu decided to have Tina Pendragon and Ye Cang help him deal with the Kings from the Grassi World, while he would leave the Kings from the Elf World to Ge Nia, Zhao Sha, Zhao Mo, Elise, Mo Yao'Er, and the 100 people who had gone into Sword Obsession.

Chapter 1130: Kings

Zhao Mo and Elise would be able to deal with four Kings with no problem, and Ge Nia, Zhao Sha, and Mo Yao'Er would be able to deal with three. The remaining would be kept busy by the hundred people in Sword Obsession.

Now, all of them had completed the Third Transformation and were extremely powerful. They were very difficult to kill, and even if their hearts were destroyed or their heads were crushed, they could quickly revive. Zhao Fu only needed them to tie down the other Kings.

Finally, Zhao Fu could only have the eight Aquatic Beast Kings deal with the Half-Beast World's Kings. Even though they were now half as strong as before, they still had terrifying power, and Zhao Fu had used a large number of medicinal pills to help them regain some of their power.

In the next 15 days, Zhao Fu went all-out in increasing everyone's strength. He did not hold back in making the beast army more powerful as well.

Zhao Fu was already completely at ease about the impending battle; in fact, he was somewhat excited for it. He wanted to fight with the people from those three worlds and have them know Great Qin's name.

Time gradually passed, and soon, 15 days had passed.

The three worlds advanced as three armies, preparing to invade the human world from three different directions. The Grassi World was at the center and had the most area to work with, while the Half-Beast World and Elf World were at the sides, making it harder to attack.

Massive auras spread out in all directions as the rainbow-barrier started to crack.

The Kings of the three worlds stood in the air and grinned self-confidently. They had been waiting for this day for a long time, and now they could finally take a bite out of this juicy meat in front of them. Now, they wanted to eat their fill.

No matter what sort of race lived there, they would conquer them by force. No matter if it was their nobles or their peasants, they would all kneel servilely in terror, trembling as they looked at their new masters.

Now, it was as if they had already declared that this world belonged to them and that it was just a cake that was waiting to be eaten by them. They would cause this world to fall into terror and show them what a true King was.

It was not just the Kings who felt excited; the soldiers were the same. This sort of invasion meant immense benefits, and since there was such a disparity in forces, they would be able to sweep through the world with lightning speed. They would then pillage everything; as long as they could slaughter their way in, all treasures, women, and equipment would be theirs for the taking.

Some slave traders leisurely sipped their tea at the back, not putting this world in their eyes at all. They were just waiting to buy a large number of slaves.

Crack, crack, crack...

Massive sounds could be heard as the cracks on the rainbow barrier grew bigger and bigger, and everyone started to prepare.

Boom!

An explosion sounded out as the top of the rainbow barrier shattered, turning into countless motes of rainbow light as they descended. The middle of the barrier soon shattered, revealing more of the world inside to everyone who had been waiting.

“Kill!” The people from the three worlds could not wait any longer and roared as they gave off world-shaking auras and flooded forwards savagely. They wanted to conquer this world, and nothing could stop them.

Boom! Boom! Boom...

In that moment, the air seemed to explode as the soldiers at the front felt their hair stand on end as powerful white rays of light giving off shocking auras flew forwards.

“Crap! Hurry and defend!” The countless soldiers noticed the danger and hurriedly tried to defend, but it was too late; these were Great Qin’s Talisman Bolts.

Chi, chi, chi...

The rays of light gave off terrifying power as they descended like bolts of lightning. Countless soldiers’ bodies were like sheets of paper as they were easily destroyed by the white rays of light. Blood sprayed everywhere as corpses littered the ground, and a disgusting stench of blood spread out.

The three massive armies paused and everyone looked shocked as they stared ahead.

The remainder of the rainbow barrier turned into motes of rainbow light and scattered, and the world inside was fully revealed.

What they saw was an incredibly tall and tough defensive wall, on which soldiers dressed in black armor were standing. They gave off a massive aura that was not inferior to theirs at all. How was this possible? The other side had been waiting for them?

Moreover, their uniform black armor and the black flag raised high signified that they all belonged to the same faction. How could a single faction have so many soldiers? Moreover, these soldiers were not any weaker than theirs.

Boom! Boom! Boom...

Before the attacking side could process this, rays of white light once again shot out from the defensive wall, giving off ferocious auras as they flew over.

After what had happened, the three armies were more prepared this time. Shieldbearers lifted up their shields and gave off powerful auras as a hemispherical energy barrier appeared.

Boom! Boom! Boom...

The rays of white light gave off powerful mights as they smashed against the barrier, causing it to violently tremble.

All of the soldiers' expressions were serious as they desperately blocked, and they were barely able to stop the Talisman Bolts.

This caused the Kings' expressions to fall, and they gave the order to stop advancing. If the other side launched another wave of attacks like this, they might not be able to defend.

The situation was completely different to what they had expected; the other side had been waiting for them to attack, and they were not weak at all. In terms of aura and numbers, they were not inferior to them, and they were even slightly superior. It was now the attacking side that seemed to be at a disadvantage.

What shocked them the most was that the other side was not a pile of loose sand; this evidently was not an alliance of factions but a single faction.

Suddenly, everyone thought of a shocking possibility, which could explain why this world had fused into the Heaven Awaken World so early – it was possible that the other side was already a Dukedom Kingdom.

They were most likely attacking a Dukedom Kingdom – thinking about that, everyone's expressions became grave. The situation completely exceeded anything they could imagine, and they were so shocked that they could not say anything. The other side had actually unified a world so quickly; this was completely unprecedented.

Boom! Boom! Boom...

Explosions sounded out as powerful auras burst forth, sweeping out like wild gales. Figures appeared in the air; they were all clad in armor, and the one at the head was dressed in a black and gold dragon robe. He gave off a noble and mighty aura and looked extraordinarily handsome.

He was undoubtedly the ruler of this Dukedom Kingdom, the ruler of this world.

Zhao Fu had a trace of a smile on his face; he too had been waiting for this day. He did not hide his appearance, because he wore his black cloak when he was outside and did not want anyone to make

the connection. Moreover, he did not care if they saw what he looked like – it was time for a direct battle!
