

The Lord 1131

Chapter 1131: Completely Unstoppable

This was a direct battle, and the Grassi World was facing off against Great Qin. The situation was the same on the two other sides as well.

The Grassi people's expressions were quite unsightly. They had thought that they would be facing a bug that they could easily crush underfoot, but it was like they had stepped onto a steel spike.

Just that first wave of attacks alone had lost them around 100 million soldiers due to their carelessness. Now, should they continue to attack or retreat?

If they continued ahead, they might not win, and even if they did, they would most likely suffer disastrous losses.

They had been careless! Utterly careless! They had never thought that the other side would actually be a Dukedom Kingdom, and they had never prepared for this. They did not send out all of their forces, and facing such terrifying power from Great Qin, they wanted to shrink back.

"Hahaha..." Facing the cowardice of the Grassi side, Zhao Fu unrestrainedly laughed loudly. He looked at the Grassi people and said, "You wanted to destroy the human world in one month? You wanted humans to become your slaves? Today, We will use your blood to prove Great Qin's name!"

"Advance!" Zhao Fu drew his Death Disaster Sword and gave off a massive aura as he fearlessly turned into a ray of light and charged towards the countless Kings of the other side. Great Qin's City Lords obeyed, turning into rays of light as they rushed at the City Lords of the other side.

"Roarrrr..." Massive dragon's roars sounded out as massive figures covered the sky. Everyone looked up to see countless Wyverns that were 100 or so meters long appear in the sky, giving off powerful might.

"Roarr!" More roars tore through the sky as nearly 40,000 giants that were 100 meters tall appeared. They were all clad in heavy armor and held heavy shields and carried heavy swords. Their eyes were blood-red, and they gave off savage and violent auras. Their bodies gave off a sense of pressure, and facing billions of enemies, they showed no fear at all.

“Awoooo...” Massive wolves’ cries sounded out as enormous wolves leapt out. They were nearly 100 meters long and gave off ferocious auras. There were ruthless gazes in their eyes as they looked at the Grassi people.

Massive clattering sounds could then be heard as 100 meter wide black spiders quickly appeared, giving off fierce auras and causing people’s hairs to stand on end.

The gates had been opened, and Great Qin’s countless Cavalrymen rode out. They held the reins of their horses in one hand and grasped long spears in the other and had resolute gazes in their eyes. They gave off a massive sharp aura, and they were followed by countless other soldiers.

Everyone charged as soon as Zhao Fu gave the order. The massive beasts were at the front, followed by Great Qin’s galloping Cavalrymen, who were then followed by countless Infantrymen. Their sounds shook the heavens and earth, and it seemed as if they would kill all gods and buddhas in their way, completely unstoppable.

Facing this aura and hearing these sounds, the Grassi people could not help but tremble. They had never thought that the other side would have so many terrifying massive beasts, and everyone felt terrified.

Zhao Fu was now fighting with the other side’s Kings, and as the ruler of the Night Dynasty, Ye Cang was able to defend against five or six ordinary Kings.

Tina Pendragon had once been the Queen of a Marquisate Kingdom and her sword was quite special – it was similar to a Nation Armament and a Clan Armament, and it could be used as an ordinary weapon. It could provide a massive amount of power, and Zhao Fu did not destroy her Royal Seal, as it could still unleash a lot of power.

Moreover, because of her various Legacies’ powers, she could fight against three or four Kings with no problem.

The remaining Kings were personally dealt with by Zhao Fu.

Shing!

Zhao Fu sent out a massive sword light towards the various Kings. Facing such an arrogant attack from Zhao Fu, the Kings felt quite furious and held their weapons as they rushed up, opening up the battle between them.

The battle between City Lords was also incredibly ferocious. They continuously collided in the air, resulting in terrifying shockwaves that blasted out like wild gales, making no one else dare to get close.

Whether it was the battle between Kings or the battle between City Lords, they were roughly on equal footing, with Great Qin being at a slight disadvantage.

However, in terms of soldiers, Great Qin completely suppressed the other side.

Seeing Great Qin charge at them, the Grassi army's Corps released their 70 or so Corps Formations, giving off terrifying power as they rushed at Great Qin's forces.

Great Qin's forces did not hold back either, also unleashing their Corps Formations that gave off shocking power and met the Grassi Corps Formations in battle.

Following this, violent clashes began, and even though Great Qin was at a numbers disadvantage, their Corps Formations did not seem weaker at all.

The Wyverns continuously dove down, spewing out flames or icy blasts, turning the ground into magma or freezing the ground solid.

The giants contained ferocious power as they directly charged over like tanks, sending countless soldiers flying.

The countless Spiders flooded forwards, and their incredibly sharp legs easily tore people's bodies apart, causing blood and flesh to fly everywhere. After the countless Spiders flowed past, only broken corpses remained.

The Giant Wolves also went on a rampage, sending soldiers flying and chomping down on them, killing innumerable people.

“Kill!” Great Qin’s Cavalrymen followed close behind. With the beast army acting as the vanguard, they had no problems at all and picked off the leftover soldiers. They stabbed their spears through their chests and dragged their corpses as they continued.

The Infantrymen at the back had it the easiest, dealing with the remaining survivors.

Now, the Grassi army was unable to resist at all, and it was completely swept away by Great Qin. Some people had already started to run away in terror.

In the battle between Kings, both sides had exploded out with their Nation Armaments’ power. This was a battle on a completely different level, and it would not be possible to fight without using their Nation Armaments.

Zhao Fu put away the Death Disaster Sword as he held the two meter long, two fingers wide Nation-Suppressing Pillar, giving off enough power to cause the sky to explode as he attacked those kings.

Bang!

Zhao Fu gripped the Nation-Suppressing Pillar with both hands as he slammed it down, sending a King’s Nation Armament flying. That King’s body directly exploded, turning into bits of fragmented flesh.

The other Kings’ expressions became savage, and ten or so Nation Armaments giving off destructive power blasted at Zhao Fu. However, Zhao Fu madly laughed and even more Nation Armaments appeared around him, forming a massive protective barrier that blocked these attacks.

The countless Kings’ expressions became quite unsightly. Seeing this scene and the wretched sight below, they could only order for a full retreat. Things were the same on the two other fronts as well.

However, things were not as intense as on Zhao Fu’s side, and not many Kings had died.

Following this, news of the three worlds retreating in shame quickly spread. However, things were not over, because Zhao Fu gave the order to attack the three worlds, shocking the surrounding ten or so worlds.

Chapter 1132: Mad Attacks

“What? The three worlds lost and couldn’t even defeat a new world?” Countless people looked incredibly shocked and could not believe this news because it was simply too inconceivable. If it was a single world attacking, failure would have been understandable, but three worlds had simultaneously invaded, yet they had been defeated so pitifully. No one had expected such a thing.

Back then, everyone had thought that the three worlds had been too careless and too weak to give the other side a chance. However, when they heard about the full information, massive waves crashed within their heart.

That new world was actually a Dukedom Kingdom! In just six short years, they had unified their world? What sort of existence was that? How could it have such strength and power?

The Dukedom Kingdom’s forces were not inferior to those of the three worlds at all, and they even had powerful beasts that could sweep across everything. It was not that the three worlds were too weak but that the other side was too powerful, and they were not a match for it.

Moreover, the other side’s King was abnormally terrifying; he had lower cultivation than all of the other Kings, yet had been able to kill 11 of them; it was simply too shocking.

In total, the three worlds had lost 17 Kings, and it was the first time so many Kings had died in the past 100 years. The three worlds had also suffered heavy losses in terms of soldiers; out of their six billion soldiers, only 1.5 billion remained.

This new world was simply too terrifying! How could it be so powerful? Those people who had thought that the outcome was already set now all had grave expressions on their faces; the situation was the opposite of what they had expected.

This news traveled incredibly quickly. When the three worlds who had attacked heard about this, they were greatly dismayed. Afterwards, the surrounding worlds soon heard about how monstrous this new world was.

Countless people were incredibly shocked about this new world’s appearance. No one could say anything because this completely exceeded anything anyone could predict.

Even the most powerful faction nearby, the Devil Horn Empire, took this matter seriously and felt an intense threat. It understood that a powerful competitor had appeared; out of the surrounding ten or so worlds, only Great Qin could give it a feeling like this.

After hearing about this, the Dao Cultivation Sect's Sect Master lightly laughed and felt slightly surprised. He did not care about this at all, but because of that world's exceptional performance, he was now slightly interested.

The Bear Mountain Kingdom's King's gaze became serious; this world had exceeded all expectations. In fact, he wondered if there had been a mistake. However, this faction had the power of a world, which was one-tenth of Bear Mountain Royal Kingdom's, so it was worth paying them some mind.

The Eight Dragon Essence Sect's people were also quite shocked; they had never thought that the new world, which should have been bullied, would make such a domineering appearance.

The Ice Origin Kingdom also withdrew their condescension because it was as if Great Qin was a new star about to rise and be known by the world.

However, matters were not settled so simply, and soon, even more shocking news came: This new world was making a counterattack against the three worlds.

Was that new world crazy? It was acting so madly. For a new world to attack three worlds that had been developing for decades, everyone thought that it was completely crazy.

Boom!

Zhao Fu gave off an enormous aura and turned into a ray of light and shot into the Grassi World, followed by countless City Lords. Below, the massive army swept forwards like an immense ocean.

Countless people in the Grassi World were completely horrified. Many Kingdoms quickly sent people to defend. Long ago, they had built some defensive walls but thought that they would never be used. However, these defensive walls were now being used to save their lives.

The Grassi World had six Continents in total, and the one connected to the human world was called Evergreen and had 7,000 or so regions.

They had to stop the other side outside the Grassi World, as if they got in, they would be doomed – that was the goal of the countless factions of the Evergreen Continent. All of them swarmed towards the defensive walls. A world that had been developing for decades did not have nothing to show – not only were the soldiers all at least Stage 1, but the countless residents also all had Stage 1 strength as well. The fighting power that they had lost outside was quickly made up for.

Great Qin could not do this; indeed, its foundation was much weaker.

However, as long as Great Qin was strong enough, it could fight against ten worlds by itself. So what if they had greater numbers? If 100 million came, they would kill 100 million; if one billion came, they would kill one billion.

“Kill!” Zhao Fu gave off a monstrous aura as he charged forwards, the countless powerful City Lords following behind him. The ferocious tsunami below also gave off a world-shaking aura as it fearlessly surged forwards.

Currently, the other side did not have many Kings, but the number of people with high cultivations was many times greater than what Great Qin had. Again, this was a matter of foundation that could not be made up for without time. Moreover, people from the other Continents were quickly heading over as well.

Zhao Fu was surrounded by countless Nation Armaments, and their terrifying power could not be withstood by the heavens and earth. Zhao Fu showed no fear as he charged at the people with high cultivation.

Seeing Zhao Fu fly at them, the group of people looked quite serious and did not dare to be careless at all. They split off 10,000 people to encircle Zhao Fu and kill him, while the rest went to deal with Great Qin’s City Lords. A massive battle quickly exploded out!

Zhao Fu wildly laughed and had the Twelve Metal Colossi’s bronze swords appear. Twelve bronze swords that were three meters long, giving off bronze light, appeared, fanning out in a circle behind Zhao Fu.

Zhao Fu left twelve bronze sword streaks behind him as he instantly dove into the group and passed through.

Chi, chi, chi...

It was like a shocking sword light instantly tore through the group. Countless people's bodies were ripped apart by that sword light. Countless broken corpses fell to the ground, and it was as if it was raining corpses.

The Kings present looked incredibly shocked and quickly released the full power of their Nation Armaments, trying to work with others to suppress Zhao Fu.

The battle between City Lords was also incredibly intense, resulting in terrifying shockwaves and for cold light to shoot everywhere. The heavens and earth dimmed, and both sides suffered many casualties.

The tsunami on the ground gave off an aura that seemed to be able to destroy everything as it charged towards the defensive wall, and it was as if it could destroy it in one blow.

Boom! Boom! Boom...

Green light suddenly exploded out from the defensive wall as terrifying auras exploded out. Green spears containing massive amounts of energy flew out, shooting towards the beasts at the front.

“Roarr!!” Cries of pain immediately sounded out. The green spears contained terrifying power and instantly pierced through the beasts' armor and stabbed into their bodies. Many beasts were injured and a few hundred beasts were killed.

This caused all of the beasts to become completely enraged. The Wyverns madly blasted out flames and icy blasts, while the Corpse Soul Commanders rammed against the defensive wall with their heavy shields. The Giant Wolves leapt onto the defensive wall and rampaged, while the countless Demon God Spiders climbed up and started massacring.

Chapter 1133: True Power

Boom! Boom! Boom...

White rays of light tore through the sky, giving off incredibly sharp auras as they covered the defensive wall and descended like rain.

Countless Grassi people's bodies were instantly shredded, causing blood to spray everywhere. Pained cries sounded out as the arrows fell onto the wall after tearing through bodies, leaving behind large craters on the defensive wall.

The battle here was incredibly intense, and it was the same for the two other battlefields.

On the Half-Beast side, they had not prepared anything to defend against an invasion from the human world. They had never thought that the human world would launch a counterattack against them; they were simply too daring!

The Half-Beast World had five Continents, and the one closest to the human world was the Moon Wolf Continent. Countless factions were quickly gathering here to defend against the invading army. Their strength was similar to the Grassi people.

Even though they had lost many people, they did not lack people with Stage 1 Cultivation, and they quickly gathered many residents to become soldiers. Most residents had at least Stage 1 Cultivation, and they also had countless people with high cultivation.

However, without a defensive wall, both sides started to fight directly.

"Roar! Roar! Roar..." the Eight Aquatic Beast Kings gave heaven-shaking roars as they flew in the sky, rushing to the front. Their 10,000 meter long bodies covered the sky and hid the sun, giving off a mountain-like pressure that seemed to be able to destroy anything.

Following behind them was a beast army that gave off massive roars that sounded in all directions. Powerful auras exploded out as they followed behind the eight Aquatic Beast Kings, preparing to destroy everything.

"Kill!" Finally, Great Qin's Cavalrymen rode on their black horses and held their spears as they sped forwards. They had frenzied expressions and loudly shouted, giving off a berserk aura. They were going to conquer the land under the heavens for their Emperor.

The opposing Half-Beast army looked incredibly serious, but there was nothing to be afraid of because their world was right behind them, the place they had to protect.

“Kill!” The Half-Beast side also gave off a ferocious aura, their eyes filled with savageness as they roared and charged at Great Qin’s army.

At the front were Cavalrymen riding on Giant Wolves holding large sabers, followed by countless Infantrymen. They were like a flood and gave off an aura that could shake the lands. The experts in the sky also gave off terrifying power as they charged at Great Qin’s army.

Boom!

Two world-destroying floods with unstoppable momentum collided, resulting in a shocking explosion as the aura of killing shot to the clouds.

Bang! Bang! Bang...

The eight Aquatic Beast Kings gave off terrifying auras as they madly blasted countless experts away. The pressure from their 10,000 meter long bodies could cause the ground to crack, and the experts sent flying away were like small rocks falling away from a mountain.

Countless Devils and City Lords gave off terrifying auras as they shot towards the Half-Beast World’s experts, and terrifying ripples tore through the sky.

“Roarr!!” The Wyverns were the first to attack, ferociously breathing out flames and icy blasts. The Corpse Soul Commanders did not use their heavy shields and instead gripped their massive swords with both hands, swinging them about with massive destructive power.

The Spiders gave off black light as coldness spread out from them. The countless Spiders flooded forwards, while the Giant Wolves gave off savage auras and started death charges.

The Half-Beast army on the ground was completely suppressed. After being slammed into by Great Qin’s side, they immediately started to collapse.

Half-Beast people were burned, frozen, or slashed in half by the massive sword wind. Some were torn into countless pieces, creating a bloody scene.

The Half-Beast army started to collapse after the very first wave of attacks, while Great Qin's ferocious Cavalrymen were like sharp spears that launched a second wave of attacks.

The Half-Beast army was split into small groups, and Great Qin's soldiers flooded forwards to devour those small groups.

The situation in the Elf World was just as intense. They still had quite a few Kings left, but they were completely suppressed by Ge Nia, Zhao Mo, and the people in Sword Obsession.

These hundred people in Sword Obsession had blood-red eyes and were filled with killing intent. They held their blood-red swords and sent out terrifying sword lights, slashing apart the sky and causing it to be filled with sword qi.

Facing these terrifying attacks, the Kings did not dare to be careless and defended while attacking. After a while, they were finally able to injure some of the people in Sword Obsession. However, their bodies immediately recovered, causing the Kings to feel incredibly furious.

The battle below was also incredibly severe.

The Elves did not build any defensive walls but had summoned a wall formed of massive trees, and they used it to defend against Great Qin.

However, in front of Great Qin's beast army, it was not of much use. The Wyverns razed the trees while the Corpse Soul Commanders were able to easily slash the trees apart.

The Spiders could climb up the trees, while the Giant Wolves could easily leap over them. After much destruction, the rest of Great Qin's soldiers were able to easily charge through and start directly fighting with the Elves.

Back at the main battlefield, Zhao Fu was currently surrounded by over 10,000 people and a few Kings. However, he did not seem worried at all with countless Nation Armaments surrounding him. Each gave off its own light, forming a powerful protective barrier that no one could damage.

This made everyone feel incredibly shocked; just what sort of existence was this King? How could he use so many Nation Armaments? Moreover, these Nation Armaments were backed by the Fate of an entire world; this was too terrifying.

“Hahaha... We will continue to show you what true power is! You wanted to destroy Great Qin with such tiny and weak power? What a bunch of fools!”

Zhao Fu wildly laughed, causing the Grassi experts to feel anger, and they madly attacked him.

Boom!

Zhao Fu did not waste any time and raised his hand. The Nation Armaments around him turned into rays of light and shot into the sky, giving off brilliant light and looking like countless stars.

“Today, We will show you Great Qin’s true power!” Zhao Fu’s arrogant voice sounded out as a world-destroying aura spread out, causing everyone to feel shocked. Their bodies started to tremble in fear.

Boom! Boom! Boom...

The Nation Armaments gave off terrifying power as they descended like meteors. The immense destructive power caused the people around him to explode into a bloody mist; in just an instant, thousands of people had died.

Some people who had been lucky enough to survive looked incredibly frightened and quickly escaped backwards. They understood that they were not a match for Zhao Fu at all.

Chapter 1134: Resounding Under the Heavens

Now, they could only escape; whether they were the experts in the air or the soldiers on the ground, they had all taken heavy losses. If they remained here, all of them would die; their loss was already set in stone.

“Hahaha...” Zhao Fu looked at the Grassi people running away and loudly laughed before saying, “The Grassi World has lost. Who is willing to follow Us into the Grassi World and show them Great Qin’s power? Who wants to make them be afraid of Great Qin and have Great Qin’s name resound under the heavens?”

“We are willing to follow Your Majesty to conquer the Grassi World!” countless soldiers shouted as they passionately gazed at Zhao Fu’s godlike figure in the sky. Their voices sounded out in all directions, piercing through the heavens.

“Roarrrr...” the countless beasts could not speak, but they excitedly raised their heads to the sky and bellowed, expressing their willingness to also follow Zhao Fu to kill their way into the Grassi World.

Zhao Fu turned and looked at the Grassi World in front of him. He raised the Death Disaster Sword before bringing it down heavily.

“Kill!” Countless people obeyed, their blood boiling as they loudly roared. They exploded out with powerful auras, charging towards the Grassi World to conquer it.

Now that the Grassi World’s defenses had been breached, Great Qin could now officially invade the Grassi World!

This caused the countless people of the Grassi World to feel panic; they had never thought that such a thing would happen. Before, it had been them invading, and they had thought that this new world would not be able to resist at all. Now, they were the ones being invaded, and the other side had already breached their defenses.

A terrifying aura covered the Continent as it was enveloped with the flames of war. Countless people desperately ran for their lives, as they knew clearly that this Continent was going to fall. The other Continents quickly gathered their forces, wanting to stop Great Qin’s invincible onslaught.

Boom! Boom! Boom...

The Earthwater Dragon Tortoise created thousands of water orbs containing terrifying power, sending them towards the countless Half-Beast experts.

Swish, swish, swish...

The Reef Lizard raised its head and roared, causing the countless rhombus-shaped reefs on its body to shoot towards the Half-Beast people with immense destructive force and making the Half-Beast experts feel a wave of terror.

Bang! Bang! Bang...

The Three Soul Great Snake's massive heads spat out three terrifying rays of black light that swept towards the Half-Beast people, resulting in loud explosions.

Swish, swish, swish...

The Heaven Cloud Jellyfish flew towards the Half-Beast experts in the sky, its dozens of thousands of tentacles whipping about like sharp knives.

Countless Half-Beast experts were killed by the eight Aquatic Beast Kings. Blood and flesh flew everywhere, creating a savage scene as the eight Aquatic Beast Kings madly attacked the Half-Beast experts.

This time, Zhao Fu had promised that anyone they killed and any Cities they took down would belong to them, so they naturally gave it their all.

These Half-Beast experts' corpses all belonged to them. These corpses were very beneficial to them, and after killing these experts, they could enter the Half-Beast World and devour City Hearts and City Lord Seals.

Even though City Lord Seals had lost their ability to gather power, devouring them would still bring the eight Aquatic Beast Kings great benefits.

Because they would be facing a lot of pressure in the Half-Beast World, Zhao Fu decided to properly reward them, so they were naturally quite happy and excited.

Apart from the eight Aquatic Beast Kings, the Devils used strange methods to kill Half-Beast experts. Shuten-Douji loudly laughed as she tore a person's body in half. Momijigari swung her saber, slashing apart a few people, while Tamamo-no-Mae ripped out someone's heart and elegantly took a few bites.

The Half-Beast army had already collapsed after the first wave of attacks. It was now completely scattered, and Great Qin's army completely swept through it.

The Devils madly chased down those who were escaping, using all of their abilities.

The Black Bull Devil from before barbarically charged, crippling eight or nine people as it slammed into them. Other Devils laughed beautifully, charming the Half-Beast people escaping ahead and causing them to stop running. Other Devils dug underground before popping up and devouring people.

The Half-Beast people had lost, and the eight Aquatic Beast Kings gave off awe-striking roars as they lead the countless beasts and soldiers into the Half-Beast World.

The countless Half-Beast people started to panic. They had wanted to take a bite of that new world, but they had instead brought trouble on themselves. Now, the Half-Beast regretted their decision to death. If they had known that things would be like this, they would not have invaded the human world no matter what. That way, they would not have been invaded like this.

However, the other side was now invading them. They had offended such a terrifying monster, and the situation was irretrievable.

The flames of war lit up, and countless Half-Beast people ran to the other Continents because this Continent could not defend at all anymore. They could only run, or else they would fall into the other side's hands and suffer a terrible fate.

The remaining Continents of the Half-Beast World quickly sent soldiers over to stop Great Qin's attack. Otherwise, it was possible that Great Qin really might destroy the Half-Beast World.

Finally, over at the Elf World, Zhao Mo turned into a 100 meter tall demon and attacked a few Kings. Both sides were using their Armaments, but the Elf Kings still coughed up blood in their clashes against the other side.

Elise had a cruel smile as she used spider webs to gradually cut off flesh from the other side's Kings as she slowly attacked and dodged.

Ge Nia held a simple sword as he attacked with incredibly sharp attacks. He was facing two Kings but was not at a disadvantage at all.

Bang!

Over at the people in Sword Obsession, a King held a spear and stabbed out with immense power, opening up a gaping hole that was as big as a bowl in the chest of one of the people in Sword Obsession. Despite inflicting such a fatal injury, the King was not happy at all.

This was because that monster did not seem to feel any pain and coldly looked at him with its blood-red eyes, and its aura did not become weaker at all.

Shing!

A clear sword hum sounded out as that person counterattacked. The gaping hole in his chest did not seem to affect him at all and quickly healed.

The hundred people in Sword Obsession tied down ten or so Kings, and they had been able to kill one or two due to their carelessness. Now that they were in the Third Transformation, they were extremely powerful and could use a small portion of the Emperor Killing Sword World's power.

The battle was abnormally intense, with a layer of corpses on the ground. Their faces were covered with terror, pain, and reluctance. There was blood as far as the eye could see, and the aura of death that formed caused people to feel a chill in their hearts.

Most of the corpses belonged to Elves, and seeing such a heavy loss, the Elf Kings could only give the order to retreat.

As soon as they retreated, Great Qin gave chase and started to invade the Elf World.

This caused the entire Elf World to fall into panic, and they regretted attacking, just like the Half-Beast World. Why did they have to offend such a terrifying existence? Now, not only had they not been able to invade that new world, but they were also the ones being invaded.

The three worlds had failed spectacularly, and they were now being invaded. This news traveled explosively, sending the surrounding Kingdoms into terror. This new world's strength was ridiculously powerful, and they heard the name of this faction.

The Great Qin Empire!

In the future, this name would resound under the heavens and cause countless beings to submit and feel terror.

Chapter 1135: We Don't Like Your Attitude

Now, Great Qin's name had already resounded in the surrounding worlds, and it was spreading even further. Everyone felt somewhat surprised after hearing about this.

The Dao Cultivation Sect's Sect Master could not help but laugh; he had really underestimated this faction's abilities and said, "Pay some slight attention to the Great Qin Empire! Perhaps it'll cause some interesting matters in the future."

The woman next to him nodded; she also felt that the Great Qin Empire was not ordinary at all. Despite being a new world, it had the strength to fight back against three worlds; it had limitless potential and might become a Royal Kingdom in the future.

The Bear Mountain Kingdom's King looked quite surprised; the Great Qin Empire was not simple at all. Back when his Bear Mountain World had fused into the Heaven Awaken World, it did not have such power.

They had to pay some mind to the Great Qin Empire; perhaps it would cause more shocking events in the Ancient Stem Domain. The Bear Mountain Kingdom's King suddenly felt that there was more to its potential that could be seen.

His premonition was not wrong at all – not only was Great Qin going to shake the Ancient Stem Domain in the future, it had already shaken the Ancient Stem Domain. After all, the Killing Sword Master that everyone was looking for was the King of Great Qin.

After hearing about the rise of the Great Qin Empire, the Eight Dragons Essence Sect felt quite shocked. The Great Qin Empire? Why did this name have a sense of killing and conquering to it? It seemed that the Great Qin Empire was not simple at all, and they had to keep an eye out for it.

The Sect Master immediately gave the order for people to investigate this information and find out just what sort of empire the Great Qin Empire was.

The Ice Origin Kingdom had similar thoughts. It was also quite interested in the Great Qin Empire now. It was the first time it had seen a new world invade three worlds; its development was quite startling.

Perhaps in a few more decades, a new empire would rise up. When that time came, the Ancient Stem Domain might have its twenty-first Royal Kingdom.

The various top-level factions in the Ancient Stem Domain were all quite interested in the Great Qin Empire now. They all sent people to find more information about it.

It could be said that the outstanding performance Great Qin had just put on had drawn the attention of the entire Ancient Stem Domain. It was simply too rare and not many people could do such a thing. Even the terrifying Devil Horn Empire would not be able to do such a thing.

However, now that the Great Qin Empire had appeared, the most terrifying existence was now Great Qin, and everyone now feared Great Qin.

Zhao Fu did not know about any of this; currently, he was leading his army as he charged forwards with his army. Anyone who obstructed them was killed without mercy!

Boom!

The Great Qin army swept forwards like a tsunami into the Grassi World. Its aura was enough to sweep across anything, and there was nothing that could stop its onslaught.

Boom!

At the same time, the eight Aquatic Beast Kings led the Great Qin army into the Half-Beast World. The sounds were incredibly savage and violent, and an aura of terror covered the entire Continent. All living creatures fell into terror, and no one could retaliate.

Boom!

Over at the Elf World, Zhao Mo and the others led their army as they started to sweep through the Elf World with unstoppable momentum. They conquered region after region, taking over half the Continent in just a short while. No one could stop them.

The three armies were currently unrestrainedly conquering in the three worlds, inundating everything like a world-ending flood. If any gods or buddhas stood in their way, they would kill them all. Facing such a horrifying onslaught, the surrounding Kingdoms started to hold emergency meetings.

“What should we do? Great Qin’s Legatee is simply too terrifying. He’s nearly conquered three Continents already; should we attack?”

“That’s right! Should we do something? If this goes on, maybe those three worlds will be conquered by the Great Qin Empire. If it possesses four worlds, who will be able to withstand it?”

“But right now, it’s a matter between them, so it wouldn’t be good for us to interfere, right? I don’t want to invite trouble – after all, those three worlds wanted to invade the Great Qin Empire and they’re now receiving their punishment. They deserve this!”

“Even though that’s true, if the Great Qin Empire destroys those three worlds, their strength will become too terrifying. When that time comes, our safety will be threatened. You think that the Great Qin Empire won’t invade us?”

“Ai! The Great Qin Empire is like they’re using cheats; their power is so unbelievable. Back then, I admired those three worlds for being lucky enough to be connected to it and having such a big piece of meat placed right in front of them. However, now I’m grateful that I’m not them.”

“That’s right! They unified their world in just six years; no wonder they fused into the Heaven Awaken World ahead of time. If they were given a few more years to develop, that would be dreadful.”

“Alright, there’s no use talking about all that. We need to quickly make a decision now. The Great Qin Empire has most likely already conquered three Continents by now, and if we don’t make a decision soon, it will be too late.”

Hearing this, everyone continued to discuss. In the end, in order to protect their own safety, they decided to slightly interfere. They could not allow Great Qin to continue rampaging like this, so they gathered their forces and prepared to head towards the three worlds.

On the other side, Great Qin had indeed swept through three Continents, but it had faced some obstructions. The rest of the factions from the other Continents had gathered, and their forces were three times greater than Great Qin's. These forces were made up of both soldiers and also some people's militia.

The three worlds' resolve was evident; they were determined to stop Great Qin here. Otherwise, the three worlds really might be destroyed at the hands of Great Qin.

Zhao Fu stood in the sky, his expression unchanging. Great Qin's City Lords and Generals were behind him, facing off against the Grassi World's Kings and experts.

The two armies faced off on the ground, and their auras seemed to clash and collide. Their surroundings were deathly silent, and no one could feel unafraid under this pressure because this was a war between worlds.

Zhao Fu was not in a hurry to attack because the other side's strength was already quite powerful and they were also prepared. As such, he was not completely confident.

A long-haired young man who looked gentle and reserved walked out from the Grassi side. His aura was the most powerful, and he was most likely the most powerful King.

He walked out and looked at Zhao Fu as he spoke with a slightly cold and arrogant voice, "You're the Great Qin Empire's Emperor?"

Zhao Fu gave a cold smile and swept out his arm, causing the Twelve Metal Colossi around him to tremble, and a formless power gave off an unstoppable momentum as it surged towards the other side.

Sensing this power, the young man's expression fell and a dark green energy barrier appeared around him.

Boom!

The massive power slammed against the barrier, resulting in a massive explosion. Countless cracks appeared on the barrier, and the young man immediately retreated a few steps.

“We don’t like your attitude!” Zhao Fu’s voice sounded out with a trace of arrogance, sounding quite domineering and imposing. The entire scene’s atmosphere froze; it seemed that a big battle was about to erupt.

Chapter 1136: Great Qin’s Strength

The Grassi people around them looked at Zhao Fu furiously; Great Qin’s Legatee was simply too domineering and arrogant!

However, Great Qin’s Legatee was truly powerful. Their strongest King, who was also their World Protector, was evidently weaker than Great Qin’s Legatee and not a match for him.

They could only wait because Zhao Fu was not in a hurry to attack, and they did not dare to attack either. All of the Grassi World’s forces were gathered here, and if anything went wrong, the Grassi World would no longer have any forces left and would be defenseless.

Moreover, there were also countless other ravenous wolves around them. In the end, even if they defeated Great Qin, they would not be able to defend against the invasions of the surrounding worlds, and they would still be destroyed. They knew this clearly, so despite Zhao Fu acting so arrogantly, they could only endure it.

The young man looked at Zhao Fu coldly and said angrily, “Great Qin’s Legatee, don’t go too far! Do you really think the Great Qin Empire has a one hundred percent chance of victory? You’re facing three worlds, and I’m sure your forces have also met obstructions in the two other worlds as well!”

He was not wrong – Great Qin’s forces were also at an impasse in the Elf World and Half-Beast World.

The remaining Continents had sent all of their forces to stop Great Qin’s advance, and they did not dare to casually start fighting either.

Zhao Fu coldly harrumphed, “So what? Do you think that Great Qin fears you?”

This arrogance once again caused everyone to feel quite angry, but they still did not dare to act, so they could only furiously glare at Zhao Fu.

The two sides were now at a stalemate, but soon, they received news of the other worlds’ interference, causing their expressions to become serious.

Great Qin was at a deadlock with the three worlds, as it did not have the confidence to defeat any of them. Moreover, these battles would decide the survival or death of both sides, so if others interfered, it would not be beneficial to either side.

The worst thing that could happen was for them to fight to the death and allow others to reap the benefits.

Following this, the people from a few other worlds arrived.

As they arrived, they looked at the handsome Zhao Fu dressed in his dragon robes. It was the first time they had seen Zhao Fu for themselves, but they had already heard about how terrifying this person was.

Now that they had seen him for themselves, just that noble and domineering aura alone was not something that ordinary people could have.

A white-haired elderly man walked over with an amicable smile and cupped his hands, saying, “Both sides have lost countless people; those are all your subjects. If there are any conflicts, let’s sit down and settle them peacefully. Our worlds are willing to act as mediators.”

The Grassi World’s people looked at Zhao Fu; the decision-making power was primarily in Zhao Fu’s hands. They could not continue to allow this stalemate to go on.

Zhao Fu also fell into his thoughts. With Great Qin’s current strength, it was not possible to simultaneously devour three worlds. After two large battles, Great Qin had suffered many losses, and now that Great Qin had moved out all of its forces to attack, it did not have much left behind to defend.

Right now, settling things through mediation was undoubtedly the best option. Zhao Fu nodded, and everyone else let out sighs of relief.

Following this, they went to a large palace, with soldiers austere standing guard around them. There was a large round table at the center, around which many important figures were gathered.

Present were Great Qin, the Grassi World, the Half-Beast World, the Elf World, and the people from the surrounding worlds.

“This Queen does not have much to say. As long as Great Qin leaves the Elf World and provides the Elf World with compensation, we are willing to settle matters here,” a peerlessly beautiful Elven woman with a mature figure and giving off a noble aura said.

“This King does not have anything to say either. Just like the Elf World, as long as Great Qin leaves the Half-Beast World and provides compensation, we won’t continue to pursue Great Qin over this!” a valiant-looking big man from the Half-Beast world said.

Following this, the gentle and reserved-looking Grassi man said, “We are of the same mind.”

“Hahaha...” Hearing those words, Zhao Fu started to laugh somewhat mockingly. He looked at the three people who had spoken and said, “We think that you’re all quite confused! Back then, it was you three who wanted to invade Great Qin, and Great Qin retaliating is simply meting out justice.

“Now, you want Great Qin to leave and provide compensation? Such wishful thinking! It should be you providing Great Qin with compensation for its losses. Great Qin should keep all of the territory it conquered, and you should also each cede one Continent to Great Qin!

“Moreover, you small Kingdoms should provide tribute to Great Qin every year in the form of treasures and women.”

Hearing this, the people from the three worlds looked at Zhao Fu furiously and felt somewhat regretful. Why did they not investigate things clearly before attacking? If they had done their research, they would not have faced a monster like the Great Qin Empire.

Now that they heard that Zhao Fu wanted them to cede Continents and provide tribute, wasn't this submitting to Great Qin? It was a complete humiliation.

The valiant-looking Half-Beast man slammed his palm onto the table, resulting in a massive sound and causing the table to crack as he shouted, "Great Qin's Legatee, you're going too far. You're occupying our Continents and we're the ones who have lost the most. You want us to pay tribute to Great Qin? Keep dreaming!"

A trace of anger appeared on Zhao Fu's face as he looked at that Half-Beast man. His terrifying pupils, that he had been hiding, surfaced, causing the Half-Beast man to shiver as a trace of fear welled up within his heart.

A bone-piercing voice sounded out, causing the temperature in the palace hall to plummet. "If you continue speaking to Us like this, We will kill you. With your strength, We can easily crush you to death. Everything that is happening has been brought upon yourselves by your own doing. If Great Qin was not strong enough, it would have been destroyed by your worlds already.

"It was you all who invaded Great Qin first. Great Qin has not used its full strength yet; if you want to fight, Great Qin will gladly fight with you!"

Everyone nervously gulped. Seeing those terrifying pupils in Zhao Fu's eyes, everyone instinctively felt immense danger.

After being looked at directly by those eyes, the Half-Beast man's body went weak, and he could not speak. He could only sit back down.

Everyone felt quite shocked after hearing Zhao Fu's statement about Great Qin not using its full strength yet. They were not sure about Great Qin's true strength; it was possible that Great Qin was still holding back.

Chapter 1137: Risen to Fame

Zhao Fu said, "Have you considered Our proposal?"

Everyone started to feel quite nervous and did not know how to respond. They looked at each other, and in the end, the Elf woman spoke first. Her attitude was not as strong as before, and she said somewhat weakly, “Your demands are too much; we’re unable to agree!”

The mediators also said, “That’s right. Great Qin’s Legatee, you’re indeed asking for a bit too much. How about we properly discuss this? It’s best that both sides are happy so we can resolve this battle. Everyone, please think of your subjects.”

Zhao Fu coldly harrumphed and did not say anything else. Inwardly, he sighed; he could only act so unreasonably in this kind of situation.

Right now, with Zhao Fu suppressing the entire scene, everyone else took a step back and seemed much weaker. After all, the aura that Zhao Fu’s body gave off was simply too powerful and completely suppressed them. In front of this feeling of danger, they could only act timidly.

A while later, the Elf woman said, “The Continents that Great Qin currently occupies can be ceded to Great Qin by us. We hope that the matter will be settled with this; what do you say, Great Qin’s Legatee?”

Zhao Fu shook his head, “The Great Qin Empire suffered heavy losses from this battle, so you should also give some compensation. Even though you can’t give any more territory, I’m sure other items will be no problem.”

Following this, Zhao Fu listed out some things, and seeing that he was not asking for too much, the three worlds could only helplessly agree.

In the end, Zhao Fu also nodded, and everyone let out sighs of relief. This battle, which had shaken ten or so worlds, had finally concluded. The three Continents that Great Qin had conquered belonged to the Great Qin Empire, and the three worlds provided Great Qin with compensation as punishment for invading Great Qin.

The Great Qin Empire formally appeared to the world in such a mighty and domineering fashion. It was difficult for the surrounding worlds to not know about this, and they immediately listed the Great Qin Empire as a powerful Kingdom.

The hottest topic right now among the surrounding worlds was Great Qin; it could be said that Great Qin had completely risen to fame.

The surrounding countries weren't the only ones that tried to obtain any and all information on Great Qin; many other factions in the inner regions of the Ancient Stem Domain tried to find information and find out why Great Qin was so powerful.

At the same time, they were also quite interested in the Great Qin Empire's history and traditions. After all, if they found out information about Great Qin's history and traditions, they could also copy them.

No one would be interested in the history and traditions of a weak Kingdom, and even if they told others about them, they would just be mocked and laughed at.

By now, Zhao Fu had already led his forces back to Great Qin and left a portion of them stationed at the three Continents. Even though these three Continents were all in different worlds, they were all connected, so they could be defended together. This was essentially expanding Great Qin's territory outwards.

This was a severe blow to the three worlds, causing their strength to greatly fall. Moreover, Great Qin did not sign any Contracts with them, so both sides could still attack each other.

Both sides had their own thoughts. The three worlds were quite reluctant to accept this situation, but in front of Great Qin's strength, they could not show any discontent. They were currently thinking of ways and waiting for their chance to take revenge.

At the same time, they were recovering their strength. They had been careless from the very beginning and had not sent many people to invade, resulting in heavy losses. The second time, they had not gathered many soldiers either, and they had been completely swept away by Great Qin.

If they had gathered all of their forces together from the beginning, Great Qin would not have won so easily, and it would not be so arrogant.

Now, the three worlds' experts hated Great Qin's Legatee to death, and flames of fury burned within their hearts.

The reason that Zhao Fu did not sign any Contracts with them was because he wanted to grasp an opportunity to once again invade the three worlds and take another big bite out of them.

The battle between the two sides would not end so simply; they were simply taking a rest. In the future, they would definitely fight again.

After returning to Great Qin, Zhao Fu went through the number of injuries and casualties and found that the number was not small at all. Around 20 million beasts and a few hundred million soldiers had died, but they had taken down around seven billion soldiers from the three worlds. This was a result that they could be proud of.

During these battles, the eight Aquatic Beast Kings had benefited greatly. They had devoured the blood and flesh of countless experts and dozens of City Hearts. They were currently fast asleep as they rested.

Even though the experts' corpses could be refined into high-Stage Blood God Pills and the City Hearts could establish Cities, it was not too great of a pity to give them to the eight Aquatic Beast Kings.

After all, they had withstood a lot of pressure during those battles and performed extremely well, so Zhao Fu was naturally happy to reward them. At the same time, their strength increasing was beneficial to Great Qin.

The ones who benefitted the most were the Devils. After this battle, even though they had lost some people, the ones who had survived had become much stronger.

After this battle, the Devils with great innate talent had advanced from Stage 1 to Stage 3 after devouring a large amount of blood and flesh. Their devil qi had rapidly grown and they looked even more savage, causing anyone who saw them to feel fear.

The Devils had immense potential, but Zhao Fu felt slightly worried. If the Devils went out of control, they would be a great threat to Great Qin. After thinking about it, Zhao Fu decided to increase the restrictions on the Devils.

Finally, they tallied their gains from this battle. They had conquered 6,000 regions and 15,000 Cities in the Grassi World's Evergreen Continent, 5,000 regions and 12,000 Cities in the Half-Beast World's Moon Wolf Continent, and 6,000 regions and 13,000 Cities in the Elf World's Cypress Continent.

In total, they had obtained 40,000 Cities, which could provide another 40,000 City Lord Seals for Great Qin's beasts. Thinking about the massive power that the beasts had provided in these battles, Zhao Fu gave a trace of a smile.

In the process of conquering the three Continents, they had destroyed eight Kingdoms and killed 18 Kings. Most of the remaining Kingdoms had seen that the situation was bad and escaped to other places, so even though they had killed many Kings, they did not conquer many Kingdoms.

At the same time, Great Qin obtained 18 Royal Seals which could be turned into 18 Underworld Royal Seals and provide an additional 180 million Ghost Soldiers. The more Royal Seals they had, the quicker Great Qin's Ghost Soldier army would develop.

After conquering three Continents, Great Qin's Fate had greatly grown.

They also obtained nine billion people, three billion from each Continent. This figure was quite small, making Zhao Fu feel somewhat disappointed.

There were also countless treasures and items, and they would soon give out rewards for contributions.

Chapter 1138: New Legatees

Through this battle, Zhao Fu found that Great Qin's greatest weakness compared to the outside world was that its foundation was greatly insufficient. The number of experts and Stage 1 people that the enemy had far exceeded what Great Qin had.

After returning to Great Qin, Zhao Fu continuously thought about this problem, but there were essentially no solutions to this problem; only with enough time would one build up a sufficient foundation.

Even with the heaven-defying Heaven and Earth Refining Formation, it could only close the gap by a bit and not completely make up for it.

After all, the Blood God Pills from the Heaven and Earth Refining Formation could only increase cultivation by a portion, not directly boost people from no cultivation to Stage 1.

It seemed that Great Qin also needed time to solidify its foundation. It could not afford to offend too many people or Kingdoms that were too powerful; it had to lay low for a while. Now that they did not have the protection of the Heaven Domain Boundary, they had to be wary of the outside world, which was filled with boundless danger.

Another weakness of Great Qin was that they did not have enough people wielding Armaments. Back then, Zhao Fu had realized this, so he no longer refined Sect Armaments.

However, he had come to find that this still was not enough. If it wasn't for the eight Aquatic Beast Kings and the 100 people in Sword Obsession, even if Great Qin's people were quite strong, they would have been injured or killed by the other side's sheer numbers.

Now, Zhao Fu wanted to give up some Armaments and increase the number of people in Great Qin who wielded Armaments. Otherwise, if more Kings attacked next time, it would be quite difficult for Great Qin to defend, so they had to make preparations to fight against many enemies.

Zhao Fu thought about the Kingdoms that Great Qin had conquered; their Legatees could still use their Armaments because those Armaments belonged to their Kingdoms. Even though they had been refined by Zhao Fu, they still had a connection to them.

More importantly, if Zhao Fu gave them permission to use the Armaments, they would also receive the benefits of Great Qin's Fate.

Ordinary Kingdoms would not be able to do such a thing; firstly, they were unable to refine the Armaments, and they also required Fate to use, so without a large amount of Fate, they could not be used.

Because Great Qin could refine their Armaments, they naturally belonged to Great Qin, so they could use Great Qin's Fate.

As such, it was common in the Heaven Awaken World to have a powerful Kingdom with many smaller vassal Kingdoms. The smaller Kingdoms were controlled by the powerful Kingdom, and this allowed the powerful Kingdom to have more Armaments and soldiers at its disposal.

Zhao Fu had Li Si prepare some information about the Legatees who had submitted to Great Qin and their Nation Armaments.

Li Si quickly prepared some documents for Zhao Fu, and Zhao Fu looked through them carefully, preparing to pick the most outstanding people.

“Your Majesty, we have not yet given out rewards for contributions,” Li Si reminded him seeing that Zhao Fu was about to get absorbed in his work.

Countless Generals, Ministers, and soldiers had been excitedly waiting for the distribution of rewards, and the ordinary residents were also waiting for the announcement to have a grand celebration.

Zhao Fu had almost forgotten about this; giving out rewards for contributions was a great way to bolster morale and increase popular sentiment, so it could not be delayed. Zhao Fu thought about it and said, “Li Si, go and prepare things; We will attend shortly after.”

Li Si nodded and left to prepare the ceremony.

Following this, Zhao Fu sat on his throne, dressed in his dragon robes. Li Si stood beside him as he read out Imperial Edicts, and Great Qin’s various officials came up to receive their rewards. Everyone was in high spirits.

Afterwards, they set up a grand banquet to celebrate this victory. The matter of counterattacking the three worlds thus ended.

A few days later, Zhao Fu picked out six people who would wield Nation Armaments.

They were Erling from the Vile Dynasty, Zhao Xiaolong from the Song Dynasty, Rodas from the Roman Empire, Onia from the Kievan Rus, Yashi from the Elf Kingdom, and Lang Cangya from the Half-Beast Kingdom.

These people were not the original Legatees, as those people had already been killed. These people were the ones with the best bloodlines and the best talent in their families, so Zhao Fu had made them the new Legatees.

They had never thought that they would one day be able to wield the Nation Armaments that belonged to their families. Even though these Nation Armaments now belonged to Great Qin, they could still wield them with Zhao Fu's permission. Being able to wield these Nation Armaments meant that they had reached the highest level in Great Qin.

"Thank you, Your Majesty, for your graces!" The six of them knelt with happy expressions. They could not help but feel extremely excited to be valued by Great Qin.

Zhao Fu lightly nodded, summoned the six Nation Armaments, and gave them to the six new Legatees to familiarize themselves with the Nation Armaments; he did not want to risk them going on the battlefield without knowing how to use them.

After dealing with everything, Zhao Fu became quite relaxed. He sent out some soldiers to the three Continents to clear them out. Because the Continents now belonged to Great Qin, they were quite easy to clear. The main task was to build a Great Wall; only then would those regions officially become Great Qin's territory.

Following this, Zhao Fu went to the Light God Temple, where Great Qin was nurturing the Light God that came from the Divinity Shard.

Zhao Fu did not feel any feelings of reverence towards the godly spirit, and he just viewed it as a powerful existence. However, even powerful gods had to submit in front of Great Qin. That was why Zhao Fu dared to nurture godly spirits; ordinary people did not dare to do such a thing.

After coming to the Light God Temple, Zhao Fu found that the massive piece of crystal had turned into a statue. This statue was of a woman who wore a cloak that gave off white light. Her face was quite beautiful and gave off a warm aura.

As Zhao Fu walked in, the image of the Light God gradually appeared, and she bowed to Zhao Fu as she said, "Your Majesty!"

Zhao Fu smiled and nodded; very few people could have a godly spirit act like this. Zhao Fu already had the image of ten thousand godly spirits bowing at his feet, and such a grand scene could make anyone feel excited.

Zhao Fu had come to see the Light God as she had formed her image a few days ago and she still had a few lapses in her memory. After some time, she had accepted her current identity, and Great Qin's large amount of faith energy caused her power to increase quite quickly.

Zhao Fu had wanted to change the contents of the Bible and make her the ‘God’ of the Bible. This way, she would receive even more faith energy, but he found that this was not possible.

After all, the Bible had already taken root in the minds of westerners for thousands of years and could not be changed so easily. The Church did not dare to directly refuse Zhao Fu out of fear that he would kill them all, so they could only tactfully decline.

Seeing that they were not willing, Zhao Fu did not force things and respected their beliefs.

However, Zhao Fu’s principle was that all faith had to bow its head in front of sovereign power; he would not allow religion to usurp the throne; such a thing had happened in the west, and he would not allow it to happen in Great Qin.

If such a thing happened, not only would Great Qin kill that god, but all those who believed in that god would also not be spared either.

Chapter 1139: Underworld Treasure

The Light God had similar attributes to the Water God, and it could give blessings and develop a group of divine guards.

The divine guards would become stronger as the godly spirit became stronger. Not only were their stats tied to the godly spirit, but their bodies could also obtain a bloodline related to that godly spirit.

After looking over the Light God, Zhao Fu ordered people to continue building a temple, which would be called the Life God Temple – Zhao Fu was going to nurture another godly spirit.

When Great Qin had invaded the Elf World, they had conquered an extremely ancient family and discovered a piece of wood that had been worshipped for a long time within a secret cell.

This piece of wood was about one meter tall and one palm wide. It was slightly black and what was shocking was that there was a green shoot growing out of the wood, which gave off a powerful aura of life.

The golden dragon had told Zhao Fu that this was a piece of godly spirit wood, which may have been a part of the World Tree. After being worshipped for countless years, it had developed divinity and could be used to nurture a godly spirit.

Moreover, the golden dragon had given Zhao Fu a method to nurture the Goddess of Life that the Elves worshipped.

Almost all of the Elves worshipped the Goddess of Life. Most Villages naturally had special stats that were related to the Goddess of Life, which was one of the higher-grade godly spirits in the godly spirit world.

The Goddess of Life that Great Qin would nurture would naturally be a new Goddess of Life; it could not compare to the true Goddess of Life. However, if it had a large amount of faith energy, it could rival the true Goddess of Life someday.

The method that the golden dragon spoke of required Zhao Fu to obtain the blood of 10,000 female virgin Elves. It seemed that all godly spirits were interested in virgins; whenever making sacrifices, whether they were benevolent godly spirits or evil godly spirits, they required virgins.

Of course, it was quite easy for Great Qin to obtain blood from 10,000 female virgin Elves, and as that was happening, Zhao Fu ordered people to quickly build the Life God Temple.

Following this, he put the piece of wood on the platform at the center and fused the blood into it. The wood gave off an intense green light and a powerful aura spread out.

The piece of wood gradually grew, and soon, it was two meters tall but only had its trunk. Following this, the wood started to go through changes as it gradually formed a human shape before turning into a very lifelike statue.

The image of a beautiful Elf wearing green clothes with an elegant figure appeared before Zhao Fu. This was the divinity from the godly spirit wood.

This divinity had existed since long ago, and its form had already been created since a long time ago.

“Greetings, Your Majesty!” After appearing, the Goddess of Life smiled and bowed to Zhao Fu.

Before, Zhao Fu had already communicated with her that Great Qin could help her become a powerful godly spirit but that she had to be loyal to Great Qin. The Goddess of Life had happily agreed because that was what she wanted.

At the same time, she had a condition, which was for Great Qin to treat the family that had worshipped her well. This was a small matter, so Zhao Fu directly agreed.

Zhao Fu looked at the Goddess of Life’s stats and the blessings she gave. They were not very suited to direct fighting, being more suited to support. They could give massive healing and recovery effects, which Zhao Fu was still quite pleased with.

If the Goddess of Life became more powerful, her effects could be used in battle, and they definitely would not disappoint Zhao Fu.

Currently, Great Qin had three godly spirits, which was not a large number. The situation was quite far away from the scene of having 10,000 godly spirits bowing down to him, and in the future, Zhao Fu even wanted to create a godly spirit army, as it would be quite powerful.

It seemed that he had to pay more mind to this and nurture more godly spirits. In the future, they would also be able to help out with battles and help Great Qin conquer the world.

After dealing with these matters, Zhao Fu prepared to refine the Royal Seals he had obtained into Underworld Royal Seals; there were 18 in total.

Boom!

A massive explosion sounded out, turning into an earthquake that gave off a gray light. An eerie, cold aura flowed out, bringing with it an immense aura as it flowed into the Royal Seals in the air. At that moment, the Royal Seal’s attributes went through changes.

Apart from Zhao Fu standing next to the formation, there were nine figures standing behind him. They were the current Underworld Lords, and they were responsible for everything related to the Ghost Soldiers.

Six of them had been Yin Generals; one of them was the original City God, Darknorth Red Autumn; and the remaining two were the Black and White Impermanences.

As the City God, Darknorth Red Autumn had many attributes related to ghosts, so he was quite suited to being an Underworld Lord.

The Black and White Impermanences came from the Underworld, and whether it was their bloodlines or attributes, they were even more suited to being Underworld Lords.

They had also told Zhao Fu about some extra effects of the Underworld Royal Seals. If he could gather 100 of them, he could open the Underworld Gate and head to the Underworld. That was a special effect of the Underworld Royal Sects, which was quite a rare ability.

After entering the Underworld, the Underworld Royal Seals had all sorts of additional powers. The first was that one could obtain some territory. The Underworld was not like the Heaven Awaken World, which had worlds continuously fused into it, causing it to grow bigger and bigger.

The Underworld and Godly Spirit World were attached to the Heaven Awaken World, and even though they were quite big, their growth was extremely small.

Moreover, almost every place in the Underworld was ruled by someone. However, these people were not the true owners; only by having an Underworld Royal Seal would they be acknowledged by the Underworld and the land.

However, Zhao Fu felt that there was not much value to this, as he would have to defeat the previous ruler to obtain the land.

If one was lucky, with an Underworld Royal Seal, one could obtain a piece of land for free, which was if the Underworld bestowed them with a piece of land with no ruler.

This was quite rare because most areas already had rulers and there were very few places without a ruler.

The second effect of the Underworld Royal Seals was that they could allow one to obtain the Underworld's Fate. As one of the Three Worlds, the Underworld had vast amounts of Fate, and if one could obtain Fate from the Underworld, the benefits would be immense.

Moreover, the Underworld Royal Seals were a type of Underworld treasure like ordinary Royal Seals, and they had Ghost King's Power.

The final effect was that one could fuse an Underworld Royal Seal into one's body, turning one into someone from the Death Race; in fact, even one's bloodline could become an Underworld Royal Bloodline.

This might have been quite attractive to others, but it was nothing to see or speak about to Zhao Fu. After all, Zhao Fu had the Six Paths of Reincarnation Bloodline, which was a sovereign bloodline in the Underworld. Almost nothing could rival it, so Zhao Fu would not care about a Royal Bloodline like that.

Chapter 1140: Four Soul Devil World !

Boom!

A massive wave of cold and eerie aura expanded out as the 18 Royal Seals became Underworld Royal Seals. One person could only use one Underworld Royal Seal, so Zhao Fu had to appoint another 18 Underworld Lords.

If Zhao Fu really did head to the Underworld in the future, the Ghost Soldier army would have enormous effects. However, there was no reason for Zhao Fu to go to the Underworld right now, as he did not even know what he would do there.

Zhao Fu did not have any interest, but the Black and White Impermanences did, as their family and friends were there.

After catching the Underworld Royal Seals, the Black Impermanence wrapped her arms around Zhao Fu's shoulders and flirtatiously smiled as she said, "Your Majesty, we have many peerless beauties in the Underworld. They're all waiting for you to conquer them, so you can't not go! Also, perhaps our family will be able to provide Great Qin with some assistance in the Underworld."

Hearing this, Zhao Fu smiled and ignored the words she had said at the start. However, he was quite interested in their family because it was most likely an ancient family that was even more powerful than Great Qin.

There was still a lot of time in the future, and perhaps he would head to the Underworld sometime later. As such, he did not reject the Black Impermanence's suggestion.

Seeing that Zhao Fu did not refuse, the White Impermanence gave a happy smile; perhaps they would be able to see their family and friends again soon.

Zhao Fu put the Underworld Royal Seals away and picked out 18 of the strongest Yin Generals and made them Underworld Lords. Now, Great Qin could have 270 million Ghost Soldiers.

The speed at which this number rose was incredibly fast, and soon, Zhao Fu's Ghost Soldier army would be formed.

Finally, Zhao Fu went to the Devil World. Before, Zhao Fu had felt quite worried about the Devil World because the Devils were growing too quickly and were incredibly savage and twisted; if they went out of control, they would bring great harm to Great Qin.

Moreover, Zhao Fu planned to develop them into one of Great Qin's main forces, which made them even riskier. As such, he had to increase the control over them.

The Devil World had been created using a Ten Thousand Devil Blood Stone, which had been created from the blood of countless Devils. Those Devils could control other Devils, and even though that Ten Thousand Devil Blood Stone had been refined by Zhao Fu, he still felt somewhat worried because the Devil army was simply too dangerous.

After thinking about it, Zhao Fu decided to use the four Soul Jades that the four Guardian Beasts had given him. As the Guardian Beasts that defended the four sides of the human world and controlled source energy, they had the power to create heaven and earth.

If Zhao Fu fused the four Soul Jades into the Devil World, the Devil World would become even more like a real world. Not only would the Devils transform even faster, but they would also become even stronger, which was greatly beneficial to the Devil World.

At the same time, Zhao Fu's control over the Devil World would be increased. Even if something out of the ordinary happened with the Ten Thousand Devil Blood Stone's restrictions, he would have the four Soul Jades as his trump card.

That way, Zhao Fu would not have to worry about the Devil army in the future. No matter how twisted, abnormal, ruthless, powerful, and numerous they were, they would still be within Zhao Fu's control. Thinking about that, Zhao Fu grinned and immediately went to carry this out.

He first refined the four Soul Jades using his blood to gain greater control using his bloodline.

After refining the four Soul Jades, Zhao Fu entered the Devil World. The Devil World still looked the same as before, with a blood-red sky, blood-red sun, and blood-red moon. The ground seemed to be covered with blood, and ghastly howls could be heard now and then. The entire place was filled with an eerie and strange aura.

Zhao Fu stood in the air and looked around him before taking out the four Soul Jades. They gave off different lights and floated around Zhao Fu.

Boom! Boom! Boom! Boom!

Four massive explosions sounded out as the four Soul Jades gave off intense light and exploded out with four world-shaking auras. This was no less than expected from the Soul Jades given by the four Guardian Beasts – their terrifying auras caused all creatures in the Devil World to fall into terror, and they lay on the ground and trembled.

Zhao Fu raised a hand and pointed it at the blood-red sun and blood-red moon in the sky, and the four Soul Jades turned into four rays of light as they shot towards the north, south, east, and west.

Boom! Boom! Boom! Boom!

The four Soul Jades flew to the boundaries of the Devil World and once again exploded out with intense light, looking like four brilliant suns in the four directions.

Within them were four images: One was an azure dragon, one was a fiery bird, one was a rainbow-colored deer, and one was a whale; they were the images of the four Guardian Beasts.

At that moment, Zhao Fu's raised hand forcefully grabbed at the air.

Boom!

An explosion rocked through the surroundings as the blood-red sun and blood-red moon actually fused together, forming an enormous blood-red sun. An extremely terrifying aura suddenly descended, causing the countless Devils to feel even more terror; this was a terror that came from their bloodlines.

“Heavens and earth, four directions combine!” Zhao Fu roared as the orbs of light in the four directions gave off four rays of light that gave off shocking sounds and shot into the blood-red sun.

Boom!

An enormous explosion sounded out as the blood-red sun burst forth with an even more monstrous aura, and it was as if it could twist space. The blood-red sun now had four extra colors.

Now, a five-colored sun giving off five-colored light covered the Devil World, and the Devil World started to go through changes. Every blade of grass, every tree, every grain of sand, every rock, and the countless Devils seemed to be permeated by a sort of energy, and the space here became firmer and more solid.

Boom! Boom! Boom! Boom!

Four massive sounds once again rang out as the four orbs of light sent all of their power into the sun, revealing the four Guardian Beasts’ images.

The four Guardian Beasts were rapidly devouring the Devil World’s aura, and countless traces of blood-red aura flowed into their bodies, causing their eyes to become blood-red.

After obtaining the power from the four orbs of light, the five-colored sun in the sky became twice as big and the light it gave off became even more intense. Its aura became even more powerful as all creatures did not dare to even make a sound under this aura.

After absorbing the aura from the Devil World, the four Guardian Beasts in the four directions looked quite abnormal and savage, and they started to fuse into the barrier in each of the four directions.

Finally, the four Guardian Beasts were completely fused into the barrier, causing there to be the images of four figures on the barrier, resulting in the barrier becoming dozens of times stronger.

The aura from the five-colored sun in the sky gradually weakened until it became a relatively small five-colored sun. it was primarily blood-red colored, with the four extra colors as secondary colors. A new Devil World had formed, and Zhao Fu called it the Four Soul Devil World.
