

## The Lord 1371

### Chapter 1371: Reincarnation Revival

However, it was virtually impossible to subdue these Outer World creatures, because when they sensed auras from the Heaven Awaken World, they could become incredibly bloodthirsty, wanting to destroy anything related to the Heaven Awaken World.

It seemed that the Outer World creatures naturally hated anything related to the Heaven Awaken World for some reason.

Because of Arasina's warning, Zhao Fu did not go back to the base for now and planned to clear out the Outer World creatures around the base.

Shing, shing, shing...

Zhao Fu continuously swung his sword, sending out sword lights and killing Stage 4 Outer World creatures. He then waved his hand, collecting their corpses into his spatial ring.

The strength of the remote regions in the Outer World was stronger than that of the Heaven Awaken World. It was impossible to find large numbers of Stage 3 and Stage 4 creatures in the remote regions of the Heaven Awaken World.

“System announcement! Because you have heroically killed Outer World creatures and have met the requirements to unlock an Exchange Stone Stele, you have been awarded with an Exchange Stone Stele.”

Just as a system announcement sounded out within Zhao Fu's mind, light started to shine in front of him as a square-shaped stone stele that was a few centimeters long and seemed to be made out of white jade appeared. This stone stele was a treasure, and it was definitely not this small.

Since they had completed their goal, Zhao Fu and Arasina returned to the base and put the Exchange Stone Stele at the center of the base.

The stone stele that was only a few centimeters long suddenly turned into a ten or so meters tall stone stele, and Zhao Fu looked at what it had with interest.

After looking through a few things, Zhao Fu was quite delighted to find that these things were all quite good and quite valuable. Using Points to exchange for these things would be quite worth it.

However, what Zhao Fu was looking at right now were the lowest-grade items, and Zhao Fu looked at the highest-grade items curiously. He was instantly shocked, and his mind went blank because those items surpassed anything he could imagine.

[Nether Soul Celestial Sword]: A sword crafted by a Celestial that has world-destroying Celestial power and can easily open up a world. It is one of the most terrifying weapons in existence.

[Empire's Crown]: After obtaining the Empire's Crown, you will become the owner of an Empire. You will directly obtain 1,000 worlds and will be able to form a massive Empire and become an Emperor reigning above countless people.

[Reincarnation Revival]: Can revive all people from a certain time period, limited to one billion people. After reviving, the deceased people will lose their cultivation.

[Nine Changes Celestial Spirit Pill]: Contains massive amounts of Celestial energy and is extremely rare. If a higher-being consumes this pill, they have an 80% chance of becoming a Celestial and obtaining the greatest power in the world.

[Divine Blood Crystal]: This blood crystal can cause a person of any bloodline level to immediately upgrade to the powerful Divine Bloodline, and it will be a pure Early-Stage Divine Bloodline.

[Turning Back Space and Time]: Using this can cause time in a region to reverse to a maximum of 1,000 years.

[Celestial-Slaying Talisman]: A talisman that contains the Great Dao of Heaven and Earth. It can cause gods and demons to retreat. If used against a Celestial, even if the Celestial does not die, he or she will be heavily injured and close to death.

[World Barrier]: The most powerful barrier in the world and contains boundless Heaven and earth Power. Even Celestials cannot destroy it and it can defend against all dangers. It can cover up to 1,000 worlds.

[Heaven Awaken Celestial Guard]: A guard with the power of an ordinary Celestial. It will obey any order from you. It will stay by your side for life.

[Unaging, Unkillable, Undying]: Your body and soul will be bound to the Heaven Awaken World. If the Heaven Awaken World exists, you will exist. Nothing will be able to kill you or wipe away your soul.

Zhao Fu only looked at ten or so items and was incredibly shocked. All of them exceeded what anyone could imagine; in fact, people would not even dare to imagine such things existed.

The first item was relatively ordinary, a Celestial sword. Everyone knew how terrifying it was, and various monstrous factions had such swords.

However, Reincarnation Revival could instantly revive up to one billion people; perhaps even Celestials could not do this. Also, Turning Back Space and Time could cause time to reverse in a region by 1,000 years. This sounded too fantastical.

The final item was even more terrifying – Unaging, Unkillable, Undying. As long as the Heaven Awaken World existed, one would never die; even Celestials would not be able to survive for so long. What was key was that one could not be killed; no power could kill you. This was simply broken.

Zhao Fu had only taken a casual look and had found such monstrous things. If he took a detailed look, he would probably be shocked beyond words. It was not that Zhao Fu had not experienced much but that these things simply exceeded one's imagination.

Zhao Fu held back his excitement and continued to look through the things in the Exchange Stone Stele. Only after a while was he able to calm himself down.

However, even though these top-tier items were powerful, the prices for exchanging them were just as unbelievable as their effects. Even higher-beings and Empires found it difficult to obtain them. If it was easy to obtain them, these top-tier items would have long since been gone.

It seemed that the Heaven Awaken World took the Outer World Battlefield incredibly seriously to be able to give such terrifying rewards. One could not help but wonder what its goal was.

Zhao Fu did not dare to think about those items for now. He looked at some of the mid-tier items because those were more possible for him to exchange. The things here also greatly shocked Zhao Fu.

The Heaven Awaken World gave such shocking rewards and one could obtain them by killing Outer World creatures. There were also more historical remnants and opportunities here. Even though the Outer World Battlefield was incredibly dangerous, countless people were attracted by it.

This place was very much worth developing. On one hand, Zhao Fu would be able to obtain all sorts of good rewards, and on the other, he would be able to find all sorts of historical remnants and opportunities. He would also be able to obtain all sorts of resources.

Zhao Fu decided to properly develop here. If he met any danger in the Heaven Awaken World, he would hide here.

After looking through the rewards, Zhao Fu brought back a large number of corpses to Great Qin to create more Spirit Destruction Crystals in order to deal with Outer World creatures in the future. The materials could also be used to make weapons to deal with Heaven Awaken World people.

However, one could not use spirit qi with those weapons because the materials naturally suppressed spirit qi and had great resistance.

After returning to Great Qin, Zhao Fu sent more talented people to the base in the Outer World, as that was a place that he had to develop. It would be a great asset to Great Qin in the future.

## Chapter 1372: Ghost Baby

Seven days after Zhao Fu returned to Great Qin, Great Qin fully digested the Spirit Light World and finished making preparations to attack the Corpse Pall World. Now, it was time to gather the army and officially attack the Corpse Pall World.

Great Qin sent ten billion soldiers and many beasts and devils. The remaining soldiers were left to defend Great Qin, especially against the Devil Horn Empire; it was likely that it would try to interfere.

Great Qin's soldiers gathered in front of the Heaven Domain Boundary, giving off an ocean-like aura that shook the surroundings. Upon sensing this aura, all living creatures had long since run away in fear, and the surroundings were deathly silent.

Mosax and Yu Ling went up and unleashed their abilities. A Domain expanded out and waves of light spread out.

Boom!

A shocking explosion sounded out as the Heaven Domain Boundary cracked and pieces fell down, resulting in muffled explosions. The pieces smashed open many large craters and dust filled the air, obscuring everyone's vision.

After the dust settled, everyone was surprised to see that there was no one ahead in the Corpse Pall World. What was going on? The Corpse Pall World had to know that Great Qin would attack them, yet there was no one here and no defenses either.

Zhao Fu felt that something was off and sent a vanguard ahead. A group of hundreds of soldiers went up to investigate.

"Arghh..." Pained cries sounded out as the hundreds of soldiers stepped into the Corpse Pall World and gray auras invaded their bodies, making it seem as if their bodies were being eaten away at by formless creatures.

In just a few moments, the soldiers all died, their bodies bloody messes. There were many small bite marks and they seemed to have died horrible deaths, causing everyone else to gasp.

Zhao Fu frowned; he did not understand what had happened, but since they could not travel across the land, they could only try the sky.

Zhao Fu ordered a few people to fly into the sky and had them unleash defenses to ward off any dangers. If they sensed that anything was off, they were to immediately return.

However, after entering the Corpse Pall World, before a few seconds even passed, howls sounded out as they fell from the sky and died. They died in the same fashion and seemed to have been bitten to death.

Now, Zhao Fu felt quite confused as to what had happened. A robed elder came up and reported, “Your Majesty, this is an extremely powerful curse. Anyone who enters will be cursed.”

Zhao Fu was startled and asked, “Is there any way to nullify the curse?”

Hearing that it was a curse, Zhao Fu understood; no wonder it was so strange. The people who had flown in the air had unleashed defenses were unable to block it at all because curses could not be blocked using ordinary methods.

“This Taoist needs to go up to see what sort of curse it is to think of a countermeasure,” the elder said as he cupped his hands.

Zhao Fu nodded and said, “Then go! If you need anything, let Us know.”

The elder obeyed and brought ten or so Taoists to the boundary of the Corpse Pall World. They took out a few Talismans, threw them into the Corpse Pall World, and the Talismans ignited and a formless energy spread out.

Immediately, the scene before them changed. Gray auras could be seen everywhere, covering the heavens and the earth. A cold and strange aura filled the surroundings, and what was terrifying was that there were terrifying babies with mouths filled with fangs.

These babies were like ghost babies and played about happily in the sky and on the ground. They looked incredibly evil and were innumerable; at a glance, all that could be seen were ghost babies.

Seeing this scene, everyone could not help but feel startled. The wicked laughter that they gave off made people’s hair stand on end, and they could not help but feel afraid.

The ghost babies were not corporeal and were instead illusory existences. They were a type of curse, and not only could they not be attacked, but they were also impossible to defend against. They could easily invade one’s body, and the bite marks on the soldiers’ bodies were most likely from these ghost babies.

After a while, the elder came back with a serious expression and reported, “Your Majesty, this type of curse is incredibly terrifying. It requires ten million babies as ingredients and is incredibly difficult to nullify.”

These Corpse Pall people seemed to be going all out and were incredibly cold and merciless, sacrificing so many babies to defend against Great Qin’s attack.

However, now that they knew what kind of curse it was, Zhao Fu could think of a way to deal with it. Zhao Fu ordered the Light God to come to the battlefield, and seeing so many babies turned into a curse, the Light God Ruixi was incredibly angry.

“Husband, I’ll definitely help you dispel that curse. You have to punish those evildoers!”

Zhao Fu smiled and agreed, feeling quite calm. He did not have as much of a reaction to the babies being sacrificed for the curse. Even if he knew that all of them were buried alive, he would not feel much or feel angry.

He could understand how much the Corpse Pall World wanted to resist Great Qin; in the end, Zhao Fu was not a very good person either.

The Light God gave off an intense light and shined like a brilliant sun in the sky. The light passed into the Corpse Pall World, and the countless ghost babies howled as their faces twisted in pain.

With how much ground the curse covered, the Light God’s power seemed quite weak. Zhao Fu ordered people to summon the Spirit Light World’s priests; they would also be able to cleanse this place.

The priests spread out and put their hands together as they chanted scriptures. Golden rays of light spread out and shot into the Corpse Pall World, and the effects were quite obvious. The gray aura retreated, and the ghost babies’ howls disappeared as the ground returned to normal.

However, from the current speed, it seemed like it would take quite long to nullify this curse and allow Great Qin’s army to truly enter the Corpse Pall World.

On the Corpse Pall World’s side, they all looked quite serious because they had paid a great cost to unleash the Ghost Baby Curse. Even though it had quite a great effect and had blocked off Great Qin temporarily, Great Qin was currently dispelling it and would attack soon.

“Are we going to use our next method?” a bald-headed short man looked at Shi Xiao and asked.

Of the seven of them, Shi Xiao was the most powerful in terms of both personal battle power and the faction supporting her. At this moment of crisis, they naturally deferred to her.

Shi Xiao did not reply, and another slim woman with a pale face and giving off a cold aura said, “We need to think about this carefully. After using that method, we won’t have anything left and will have to directly face Great Qin. When that time comes, we won’t have an advantage.”

### Chapter 1373: Spite

“However, if we don’t use that method, after Great Qin cleanses that ground, they will still attack. If we use that method in conjunction with the cursed ground, perhaps we will be able to beat them back, and we can use this time to prepare other things.”

Many people supported this suggestion, and everyone turned to look at Shi Xiao to see what she thought.

Shi Xiao slightly sighed; that person’s suggestion was their best choice, so she was about to nod and agree. Otherwise, facing the terrifying Great Qin, they would not have any other options.

At that moment, a soldier charged in and cried out in joy, “Your Majesties, Great Qin has retreated; we’ve won!”

After hearing this, everyone felt quite confused; why would Great Qin suddenly retreat? They hurriedly asked the soldier for details.

Following this, everyone looked delighted and their grave expressions disappeared. Great Qin had indeed retreated, and they had successfully defended the Corpse Pall World.

This was all thanks to the Devil Horn Empire, because Great Qin had split into three armies and were madly attacking the Continents that Great Qin occupied in the Grassi, Half-Beast, and Elf Worlds. Because of the urgent battle reports from the three Continents, Great Qin could only retreat.

Yao Ming did this purely out of spite, because every time the Devil Horn Empire tried to do something, Great Qin would interfere. The Devil Horn Empire's plans were always being thwarted by Great Qin and Great Qin had always reaped benefits, and Yao Ming had remembered this.

After hearing that Great Qin was attacking the Corpse Pall World, Yao Ming understood that his opportunity for revenge had come, so he ordered people to madly attack Great Qin.

The Devil Horn Empire was not like the allied worlds, which just attacked for show; it really was ferociously attacking. If Great Qin was set on conquering the Corpse Pall World, the Devil Horn Empire would obtain three worlds at the same time. When that time came, the Devil Horn Empire would have six worlds.

However, Great Qin retreated and sent over its troops. After hearing this, Yao Ming immediately gave the order to retreat. Now that Great Qin had retreated to defend, Yao Ming naturally understood that with the Devil Horn Empire's strength, it was impossible to break through the Great Qin's defenses, so he could only give the order to retreat.

However, Yao Ming still gave a pleased smile; he had vented out much of his anger. Otherwise, he would have felt too sullen after continuously being set back by Great Qin.

Looking at the Devil Horn army, Zhao Fu could only put a hold on the invasion of the Corpse Pall World while preparing methods to quickly dispel the curse.

It was nearly time for the next round of Imperial Examinations. He had been putting all of his focus on warfare and had not taken care of internal affairs for a while. He could take this opportunity to sort out the internal affairs matters.

Imperial Examinations were something that Kings, Ministers, commoners, and talented people all took seriously. It was an opportunity for people to reach the sky in one step, and no one wanted to miss out. This made Great Qin much more lively than usual.

There were talks everywhere about the Imperial Examinations, and various talents gathered at the Great Qin Royal City, preparing to take the Imperial Examination and attain scholarly honors.

Now, Great Qin had hundreds of billions of people and innumerable talented people. Some people were overflowing with talent and were quite famous, and the common people had made a ranking of the various talented people.

At least one-third of them came from the Rising Qin Academy. Now that Great Qin had greatly expanded its territory, there were tens of thousands of academies all over. However, the very first Rising Qin Academy that Zhao Fu had created was something that could never be rivaled.

That was a holy land for scholars and countless geniuses gathered. Ordinary academies could not compare to it.

There were a few other academies that were quite good, such as the Book and Poem Academy opened by the Confucians, the Demon Immortal Academy from the Dark Demon World, the Sky God Academy from the Spirit Light World, and the Forest Academy from the Elf World.

As Great Qin's territory expanded, they needed more and more talents. With so many Academies and scholars, the competition was quite intense, so everyone wanted to be ranked at the top.

Perhaps they would be summoned by Great Qin's Emperor; to the ordinary people, this was an incomparable glory.

This Imperial Examination was like the previous ones. On the flat ground outside the palace, Zhao Fu wore a black dragon robe and wore his black dragon crown. He had a dignified expression as he led out the various Ministers and Generals.

"We greet Your Majesty! Long live His Majesty! Long live His Majesty!" the scholars immediately knelt and called out in unison, their voices sounding like thunder and shaking the sky. The heavens and earth seemed to be filled boundless righteousness.

Zhao Fu was pleased as he sat on his throne and gave the order for the Imperial Examinations to begin. The scholars went to their positions and took their pens as they started to write and diligently answer the questions. They wrote out their own thoughts, aspirations, and their plans for Great Qin's future.

The Ministers around Zhao Fu discussed the scholars they favored.

There were mostly Civil Ministers here, and the Generals were over at the Martial Examinations. The one responsible for the Martial Examinations was Wang Jian, while Bai Qi was responsible for defending the three Continents in the three worlds. Zhao Fu would later go and take a look.

Great Qin's Ministers were predominantly men. Li Si and Shang Yang were relatively important and controlled great power in Great Qin. All of the commoners knew them.

Of the female Ministers, there were only Li Muqing, Shangguan Wan'Er, Lu Lingxuan, and the Confucian scholar who had done well in the last Imperial Examinations, Li Xiaoling.

Even though Zhao Fu believed in equality between men and women, in actuality, most power was held by men and the women in power were often suppressed.

If it was not for Li Muqing and, Shangguan Wan'Er and Lu Lingxuan's hard work, resulting in them being valued by Zhao Fu, almost no woman would have power in Great Qin's Imperial Court.

Zhao Fu knew about this, and it was primarily because many people's ideologies were still quite old fashioned. The historical Ministers still held onto their old values, and many people felt that women should not be able to become Ministers and that men's authority was being challenged.

Even though Zhao Fu supported gender equality, it had only been eight or so years and the ideology had not been changed yet. Li Si and Shang Yang slightly suppressed the female Ministers while others did this more openly. The female Ministers were always on the defensive and were often oppressed.

Zhao Fu knew about this but did not interfere; this was not something that could be rushed and required time to change.

The Imperial Court splitting into factions was unavoidable and it was only because of Zhao Fu that the Ministers did not dare to go too far. Otherwise, Li Muqing and the other female Ministers may have been thrown out or executed long ago. Li Muqing was now incredibly famous and was a role model for many women.

She was not only incredibly beautiful but also had astounding talent, and she was incredibly kind to the commoners. She did her best to protect women's rights and everyone called her the number one talented woman in Great Qin.

Her family had originally been against her serving Great Qin. After all, as the descendant of Li Qingzhao, how could she serve a tyrant?

However, the current situation now showed that Li Muqing had great foresight. Great Qin had not only unified China but the entire world, and it had started to conquer other worlds.

#### Chapter 1374: Poem Sword

The Li family had originally been an ordinary family, but it had now become a famous family within Great Qin. Virtually no one dared to offend it, and very few families held as much power as it did.

Now, Great Qin indeed had countless large families and some large families declined and became weaker and weaker. On the other hand, some families rose up and became famous families within Great Qin and obtained great power.

Now, the situation in Great Qin had more or less stabilized. Great Qin's more powerful families would most likely remain powerful families.

Things were no longer as chaotic as during the earlier days and had settled down. Back then, everyone had opportunities to quickly rise up; anyone with power could easily change their fate.

Moreover, during those days, one could challenge large families, lords, or even rulers. Because things were so chaotic, there were many opportunities.

However, now that the situation had stabilized, even though Great Qin held Imperial Examinations, the opportunities had reduced by nearly 70%.

The world had been unified, so the large families no longer had to fight nor was there any internal chaos. Many of them held power and only needed to focus on developing.

They became more and more powerful every day, and ordinary people had no chance in surpassing them. They could only submit under them; those large families' positions could not be shaken.

It was possible that families that occupied low positions would continue like this for many generations, while those who occupied high positions would always remain in those positions. Zhao Fu could not change this, because this was part of the empire developing. Zhao Fu could only do his best to give the ordinary people opportunities.

As such, Zhao Fu did not help the female Ministers who were being suppressed. Zhao Fu had given them opportunities, and the rest was up to them.

Under this kind of pressure, the female side had performed quite well. From what Zhao Fu had heard, many commoner women had formed their own organizations.

One of the organizations that talented women made was called the Washing Flower Pavilion. Many women adept at medicine formed the Celestial Doctor Residence. Some women who were skillful and liked investigating things made the School of Niftiness, and some women who enjoyed dancing made Dream Dance.

Many organizations formed by women started to appear, and there were many of them. Some were made up of a few people and some numbered in the thousands or even hundreds of thousands.

However, this made many men displeased, as they felt that the women were being too flamboyant and should be more reserved. They could not tolerate them doing as they pleased and disregarding men.

Because of this, many men made their own organizations to suppress the female organizations while also proclaiming the grandness of men.

The most famous one was an organization that targeted the Washing Flower Pavilion, and it was called Poem Sword. It was made up of many talented men and they often fought with the Washing Flower Pavilion. However, they only fought with words and never used violence.

However, both of these organizations continued to increase in number and the scales of their battles became larger and larger. Once, a rabble of hundreds of thousands of people had exploded out, forcing the government to send soldiers to intervene. Only then did they become more well-behaved, not daring to continue acting like that.

After hearing about this Imperial Examination, many people from both organizations participated, wanting to obtain victory there. The women from the Washing Flower Pavilion not only wanted to best the Poem Sword's men, but they also understood that the female Ministers were at a

disadvantage in the Imperial Court. Even though His Majesty supported gender equality, it would be difficult for women to rise up in the Imperial Court.

They embraced their ideals, wanting to use their power to change Great Qin in order to make it a better place for women.

The men from Poem Sword not only wanted to defeat the women from the Washing Flower Pavilion, but they also wanted to change Great Qin, obtain the power to reign above others, and support Great Qin to make it an eternal empire.

Apart from these two clashing organizations, there were some neutral organizations that acted more harmoniously.

There were also some people from large families who were all quite exceptional. The Imperial Examination was an opportunity for their families to receive even more glory, so they were very proactive in participating. The disciples of the Hundred Schools of Thought also participated with such aspirations.

Because of the factions behind them, the people from the large families and Hundred Schools of Thought naturally received more attention from Great Qin and were more famous than most other talents.

This was the current situation in Great Qin. The younger people were more rambunctious while the older people were steadier and calmer. They were not only interested in Great Qin's inner affairs but also in the things on the outside.

Everything they had was built on Great Qin, and if Great Qin collapsed, everything they had would crumble as well.

The older people did not care much for the young people making a din; they just wanted to provide a good environment for their growth and make Great Qin even more powerful. Only then would they be safe and obtain more power.

Of course, whether they were the older people or younger people, Civil Ministers or Generals, or the male Ministers or female Ministers, they all had to lower their heads and worship Zhao Fu. Zhao Fu was the sovereign of Great Qin and controlled everything in Great Qin.

The various Ministers recommended to Zhao Fu the people they favored. If they made an impression on Zhao Fu, they had the possibility of obtaining a position in the future.

Even though Li Muqing did not like this, she understood the heavy burden on herself. Without her support, it would be difficult for women in Great Qin to step into the center of power. They would forever live in the shadow of men and would be unable to obtain true equality.

There were also many female Generals but they were not too concerned about this and would not help the ordinary women. In fact, most did not care about their lives or deaths. Even if they became pets of men, they would not object too much.

Li Muqing could only do her best to recommend to Zhao Fu the people who she favored in order to increase the strength of the faction of female Ministers. Perhaps they would have more resistance in the future and would not have to live so subserviently.

Zhao Fu sat on his throne and did not say anything, nor did he feel annoyed. He felt that there was much that he did not know, and he could learn a lot from them.

At the same time, Zhao Fu tried to keep an eye out for the talents who were recommended; the prosperity of the empire would rely on these people.

Time passed quickly, and soon it was the afternoon and the results of the Imperial Examination were out. The top ten people were watched with gazes of admiration and worship as they were brought before Zhao Fu and they respectfully kneeled.

## Chapter 1375: Gender Equality

“You may all rise!” Zhao Fu said and the six men and four women stood up, looking both excited and nervous. They had finally seen Great Qin’s Emperor with their own eyes and at such a close distance too; they did not dare to even imagine this in the past.

“Introduce yourselves to help Us and the Ministers know more about you,” Zhao Fu said with some interest. The ten people here were the most exceptional out of all of the scholars, and they would be greatly used from the start.

“This humble one is Long Ling!” “This humble one is Zhang Feiling!” “This humble one is Kelimi!” “This humble one is Lin Li!” “This humble one is Yue Jiuya!” “This humble one is Bai Xiang!”

The six men spoke first. Long Ling was a handsome young man dressed in white, Zhang Feiling was a valiant-looking young man, Kelimi was an Elf; Lin Li was a Fish Scale person, Jiu Yueya gave off demonic qi and looked quite cold and cruel, and Bai Xiang gave off a scholarly elegance.

“This humble one is Lin Weiling!” “This humble one is Ye Fengfeng!” “This humble one is Nan In!” “This humble one is Liu Yunyun!”

The four women spoke next. Lin Weiling gave off the aura of the daughter of a big family, Ye Fengfeng looked quite lively, Nan In looked quite gentle, and Liu Yunyun gave off a charming aura. All four of them were quite beautiful.

The ten people were quite young; the youngest was 17 and the oldest was around 20 years old, and their was a tenderness to their faces.

Hearing their introductions, Zhao Fu nodded in satisfaction. The person who had placed first this time was Long Ling, the leader of Poem Sword. The person who placed second was Lin Weiling, the leader of the Washing Flower Pavilion. Both organizations had performed quite well.

Zhao Fu did not want to interfere with these organizations. As long as they did not violate Great Qin’s laws, the more intense the competition, the more prosperous Great Qin would become.

Zhao Fu prepared to confer on them official positions when a Minister came out and said, “Your Majesty, the men have significantly outperformed the women in this Imperial Examination. This Minister suggests greatly nurturing the men.”

Another Minister came out and said, “Your Majesty, this Minister believes that there is no need in giving the women too much power. They have already let down Your Majesty’s expectations. This Minister believes that women are unable to bear the responsibility of some roles.”

Another Minister said respectfully, “Your Majesty, this Minister believes that what they have said is right. Please support the men more. This Minister believes that with Bai Xiang’s experience, he should be able to undertake important roles in the Imperial Court.”

The women had not performed as well as the men in the Imperial Examination, and some Ministers took this opportunity to suppress the female Ministers. Most of the power in the Imperial Court was still within men's hands, and these ten people all had factions behind them.

The factions behind them all wanted them to obtain important positions. That way, their factions would become more powerful and have solid foundations.

Li Muqing and Lu Lingxuan's expressions fell. They had long since expected that the other Ministers would make things difficult for them, suppress them, and push for policies more favorable to men.

"This Minister doesn't think that women are inferior to men. For example, the top scorer in the last Imperial Examination was Li Xiaoling. This Minister believes that women can definitely do well in the political sphere," Li Muqing hurriedly said.

Lu Lingxuan lifted her head and said confidently, "Your Majesty, do you think This Minister is inferior to men when dealing with political matters? If you believe this to be the case, This Minister will agree with what they say."

Li Xiaoling also wanted to speak, but even though her position was not low anymore, she did not have the qualifications to speak.

The atmosphere became quite tense and the top ten scorers could not help but feel anxious.

Zhao Fu calmly cut them off, "Alright, that's enough; Our decision will not change. Also, you'd best all stay in line. Now that the situation outside Great Qin is so tense, We do not want any internal conflicts."

"Yes, Your Majesty!" Hearing Zhao Fu's words, everyone quickly acquiesced and no one dared to disobey.

This caused Long Ling and the others to feel immense respect and awe towards Zhao Fu. In front of those powerful people, they did not dare to say even a word, but just a few words from the Emperor had caused them to become incredibly docile, and none of them dared to complain.

Following this, Zhao Fu went to the Martial Examination to have a look.

“Your Majesty, you’ve come!” Wu Zetian came up, leaned against Zhao Fu, and gave a moving smile.

Zhao Fu smiled as he hugged the mature and charming Wu Zetian and sat on the throne. Wu Zetian was quite interested in the Marital Examinations and would come to watch every time.

The Martial Examination soon reached its final stage and it was a well-built young man against a Half-Beast person. One of them would take first place.

Your Majesty, look at that Half-Beast person’s wolf ears and wolf tail; how interesting! I want to take a few Half-Beast female attendants,” Wu Zetian said as she smiled.

Zhao Fu smiled and nodded. The Half-Beast people were somewhat wild and were quite different. In actuality, every race had its own characteristics.

The only Half-Beast woman Zhao Fu had been with was Cang Xuenu, but he had made many of them Concubines. They had all been Queens or Princesses of Kingdoms.

The fighting on the stage was quite intense and a soldier came up to report, “Your Majesty, there’s news from the Charm Devil World, and they’re requesting for you to go over.”

Zhao Fu nodded and prepared to get up when Wu Zetian said with a trace of displeasure, “Zhao Fu, don’t indulge in those lewd women.”

Hearing this, Zhao Fu smiled and replied, “I understand, wait for me. I’ll be back at night.”

Hearing Zhao Fu tell her to wait for him at night, Wu Zetian looked quite pleased and her displeasure disappeared, and she said, “Come back early then. I’ll pick a few pretty Half-Beast female attendants to serve you together with me.”

Zhao Fu headed to the Charm Devil World, not knowing what had happened and why they had suddenly asked him to go over.

After coming to the Royal Palace, Mei Xianggu, Mei Qiangu, and Xiang Li and their Generals were all present, but they looked quite serious.

“What happened?” Zhao Fu looked at them and asked in curiosity.

Mei Xianggu leapt into Zhao Fu’s arms and said worriedly, “My good husband, your prediction was right. The Wind God Empire told everyone in the Charm Devil World to get out within three days, and anyone who remained would be slaughtered.”

Zhao Fu felt quite startled; this actually ended up happening. They were incredibly domineering and as the invader, they actually told the original residents to scram. No one in the Charm Devil World dared to say no.

After all, if they did not leave, they would definitely be slaughtered. An Emperor Heaven Realm expert and three billion Stage 3 soldiers could indeed annihilate an entire world.

In actuality, if all of the Charm Devil people fought with the Wind God Empire’s three billion soldiers, they would be able to take down some of them. However, all of them would have to die anyways. What’s more, the Wind God Empire seemed to be gathering even more soldiers here.

## Chapter 1376: Royal Palace

That was the reason why the Wind God Empire did not directly attack and instead warned everyone to leave. If everyone in the Charm Devil World retaliated, they would suffer great losses. After all, they only had three billion soldiers here.

Moreover, if they really slaughtered a world, the surrounding worlds would not sit by and wait to be killed. They would definitely ally together. If enough people gathered, the Wind God Empire would naturally lose.

Now, no one dared to stay in the Charm Devil World. The Wind God Empire obtained the world so easily, causing others to feel admiration.

Zhao Fu could now confirm that the Wind God Empire was expanding, possibly to make preparations for the Wind Spirit World. Otherwise, they would not want an entire world.

Now, it seemed that the Charm Devil World was their first step. After solidifying their foundation, they might look to other worlds. When that time came, the surrounding worlds would be in danger and would be susceptible to an attack from the Wind God Empire.

This was especially so for Great Qin – it was only one world away from the Wind Spirit World. Facing a Royal Kingdom, Zhao Fu felt immense pressure. This was especially so for the Emperor Heaven Realm expert who could completely suppress him.

The Wind God Empire was still gathering people here, proving that they were going to do something. With Great Qin's strength, they would not be able to withstand it.

Thinking about that, Zhao Fu's expression became serious. Within Zhao Fu's embrace, Mei Xianggu could see Zhao Fu's worry and did not disturb him. Right now, Zhao Fu was their support.

A while later, Zhao Fu came back to his senses and said, "Relocate to Great Qin for now! If the Wind God Empire really does try to do anything to Great Qin, Great Qin will do its best to defend. Now that you're Great Qin's people, Great Qin will protect you."

Mei Xianggu happily smiled and kissed Zhao Fu. "My good husband, we all trust you. Also, I prepared a very good gift for you."

Zhao Fu hugged Mei Xianggu and smiled as he asked, "What is the gift?"

Mei Xianggu flirtatiously laughed and called out, "You sluts, you're still not coming out? I thought that you were dying to meet my husband."

Giggles sounded out from a bedroom nearby as five women with mature and enticing figures walked out. They looked at Zhao Fu with greedy and desperate gazes, quickly came up, and sniffed at Zhao Fu's aura as if they were intoxicated.

Mei Xianggu laughed as she said, "Husband, I convinced them all to join Great Qin and their factions are all quite strong! How about it, I've been quite thoughtful, right?"

Following this, Mei Xianggu started to introduce them to Zhao Fu.

One of them was the Queen of a Kingdom and was called Xiang Yue. She had a voluptuous figure and had a trace of a dignified aura. Under Mei Xianggu and Mei Qiangu's help, she had staged a coup and had killed her previous husband and become the Queen.

One was called Gu Lili, and she was the leader of a faction. She had a fiery figure and gave off a lewd aura. One was called Qian Liyue and looked neither male nor female and was quite skinny, and she was the Queen of a Kingdom. One was called Di Wu and was the leader of a faction. She had a sexy figure and looked quite flirtatious.

The last one was called Min Yeye and had a graceful figure and looked quite gentle and quiet. However, she was actually extremely passionate deep down. If it was not Mei Xianggu holding her back, she would have been servicing Zhao Fu already.

Zhao Fu felt quite helpless as he looked at the women in front of him.

The Queen Xiang Yue hugged Zhao Fu enticingly and said, "Your Majesty, why didn't you come find me earlier, making it so that I only met you now. I feel that we've missed out on so much. The aura your body gives off makes us Charm Devil women lose all control."

Min Yeye said coquettishly, "That's right! We've long since heard of your famous name, but we didn't have an opportunity to meet you. If we met you earlier, I would have long since served under you as your little pet."

Di Wu flirtatiously smiled as she rubbed against Zhao Fu, saying, "Your Majesty, look how much I want you. You have to properly satisfy you, and in the future, I'll be yours; I already can't leave you."

Mei Xianggu lightly laughed and said, "You five sluts, I didn't lie to you, right? As soon as you met my husband, you would become like five female dogs in heat."

"Yes, yes, yes, you were right. Let's start now! I can't wait anymore." Gu Lili's eyes looked quite hazy as her face became red.

"Wait! Don't you shove us aside," Mei Qiangu laughed as she looked at Zhao Fu and licked her lips. She brought her four Generals and walked towards Zhao Fu, and Xiang Li had long since thrown herself at Zhao Fu

After an intense session, the women's faces were red as they happily obeyed Zhao Fu's orders and started to move their factions to Great Qin.

"Your Majesty, I'm quite far away and because of instability, I need your help," Qian Liyue said somewhat unhappily as she hugged Zhao Fu.

Hearing this, Zhao Fu nodded and agreed. Qian Liyue was the Queen of a Kingdom and Zhao Fu hugged her and went to a palace.

All of the various Ministers were gathered there and a handsome and luxuriously-dressed young man said loudly, "I think that we shouldn't submit to Great Qin; only by relocating somewhere far away will we be safe. Great Qin is only one world away from us."

"Hmph! Since I decided to submit to Great Qin, we will submit to Great Qin. I'm the Queen and all of you must obey me. That includes you, Ye Li," Qian Liyue said as she walked out hugging Zhao Fu.

Ye Li was that handsome young man, and when he looked at Qian Liyue affectionately hugging Zhao Fu, he immediately became enraged, pointed at Zhao Fu, and roared, "Who is that bastard?"

Zhao Fu felt quite angry but Qian Liyue hurriedly said, "Husband, don't be angry; he's my King. I'll have him killed and will only belong to you; you can play with my body however you want."

Ye Li was almost angered to death hearing his woman saying such things. Back then, they had been deeply in love, but now she seemed completely different, willing to kill him to please the man next to her.

"Qian Liyue, you're going too far; you dare to humiliate my little brother." A long-haired, cold-looking woman in armor stormed in with a large group of soldiers. She was Ye Li's older sister and was called Ye Qingqing. She held a lot of military power and the cause of the instability here was her.

"Good husband, with your power, you should be able to subdue her. This woman has the power of the military and I can't deal with her," Qian Liyue ignored Ye Qingqing's words and said to Zhao Fu.

Zhao Fu did not hesitate as a powerful aura exploded out. A corporeal might landed on everyone within the palace, causing everyone to feel shocked. No one had thought that Zhao Fu would have such terrifying power, and their bodies instinctively trembled.

“My husband is the Emperor of Great Qin, so you’d best be tactful. I don’t want to kill too many people, but don’t force me,” Qian Liyue gave off an intense Queen’s aura and said icily.

## Chapter 1377: Wind God Empire

Everyone looked terrified; they had never thought that Great Qin’s Emperor of the legends would come here. No wonder he had such terrifying power.

Ye Li’s expression was dull and he looked incredibly dispirited as he powerlessly collapsed to the ground. He could not compare with Zhao Fu; in front of Zhao Fu, he was nothing. Qian Liyue choosing Zhao Fu was the best option.

Ye Qingqing’s face also became pale. With Zhao Fu’s immense power weighing down on them, they could not resist at all.

“We are willing to listen to the Queen’s orders and submit to Great Qin!” Seeing this scene, everyone understood that this was unavoidable. They could only follow Qian Liyue’s orders and did not dare to resist.

Qian Liyue told the Ministers to leave and start preparing to relocate, leaving behind only Ye Li and Ye Qingqing in the palace.

Looking at the brother and sister pair, Qian Liyue smiled and said, “Good husband, I’ve got a present for you.”

She walked over and took off Ye Qingqing’s clothes and placed her in a humiliating posture. She then vigorously slapped Ye Qingqing’s white bottom and said, “Good husband, come and do this slut. Don’t worry, we Charm Devil women are all incredibly lewd and this slut will definitely like you.”

As Zhao Fu looked at her, Ye Qingqing actually wanted Zhao Fu to do something to her; she had never expected Zhao Fu's aura to make her feel like this.

However, in the next moment, she came back to her senses. Even though she wanted it badly, her little brother was next to her. She felt embarrassed to be done by a man in front of her little brother but also somewhat excited.

"I'm also willing to submit and I don't expect anything, but please spare my big sister. Qian Liyue, given how much we loved each other in the past, please at least agree to this."

Looking at his big sister, who had taken care of him since he was a child, about to be treated like this, Ye Li knelt on the ground and pleaded with Qian Liyue, asking her to let off Ye Qingqing.

Qian Liyue smiled and looked at Ye Li as she said, "Ye Li, I also loved you, but you should understand what Charm Devil women are like. You don't know how happy I am doing it with my husband; he's already conquered my very soul. Now, I don't feel any love towards you at all, only contempt. Don't blame me, it's because your abilities weren't enough.

"Also, don't worry, your big sister will also submit to my husband and become one of my husband's pets. You can die now."

Qian Liyue came to Ye Li's side and drew her sword, preparing to kill Ye Li.

Seeing this, Ye Qingqing cried out, "I'm willing to serve your husband and become his pet, but please let off my little brother. I'll do whatever you say."

Qian Liyue was quite displeased and she slapped Ye Qingqing, causing her face to swell. "Your words make it seem like we're forcing you or threatening you; don't you know what a glory this is? Do you think ordinary women can do it with my husband?"

Ye Qingqing endured the feeling of humiliation, and her eyes were teary as she looked at Zhao Fu and pleaded, "Owner, please come and give your female slave some love."

Zhao Fu frowned and said, "It's getting late; hurry up and relocate your Kingdom to avoid anything expected from happening."

Qian Liyue smiled and nodded, and she hugged Zhao Fu as they went outside to look over the relocation process, no longer paying any attention to the brother and sister.

The Kingdom's people, Cities, and various resources were quickly and orderly moved through countless teleportation channels. In three days, they would all move to Great Qin. If they gave up some things, they would be able to go even faster and reach Great Qin in a day or so.

In the end, Ye Li was thrown in a cage, while Ye Qingqing, the female General who had once held the most military power in the Kingdom, was given thin and sexy clothes to wear and was led around like a dog by Qian Liyue beside Zhao Fu.

"Owner, female slaves are the best tools. Look how obedient and slutty she is. If you give me a few women, I'll definitely make them the best female slaves. Look at how well-trained Sejuani, Shyvana, and the others are," the Sadistic Killing Sword's sword spirit could not help but say in Zhao Fu's mind seeing Ye Qingqing.

Zhao Fu rejected this without even having to think about it. Even though the Sadistic Killing Sword's sword spirit had gone through some changes, it was still quite twisted. If it was to enemies, Zhao Fu did not mind, but he was not willing to do this to his own people.

Following this, Zhao Fu came to the Gurao Kingdom and oversaw the relocation of a few other factions. The Gurao Kingdom and Mei Qianggu's Continent had done much relocation already, so they were able to quickly relocate the rest. The only worry was the other factions.

After hearing about this, Yao Ming tried to draw the Charm Devil people to his side. This was a large number of people, and if he let this opportunity slip by, it would be too much of a pity.

According to their calculations, Great Qin gained around seven billion Charm Devil people. Zhao Fu built an imperial residence for Mei Xianggu as a reward, and the other Charm devil women who had relations with Zhao Fu chose to stay there. They also picked many beautiful Charm Devil women to serve as female attendants.

They heard that the Devil Horn Empire also gained around one billion people, while many Charm Devil people escaped to other places.

A world with decent strength had disappeared just like that under the threat of a Royal Kingdom. The many Charm Devil people could only leave in disgrace.

Otherwise, what could they do? With their strength, they could not stop a Royal Kingdom. Even though they could cause the Wind God Empire to suffer some losses, no one wanted to die for nothing.

The Wind God Empire easily obtained the Charm Devil World, sent over another one billion Stage 3 soldiers, and started to build all sorts of buildings in the Charm Devil World.

The four billion Stage 3 soldiers could rival 40 billion Stage 1 Soldiers, and Zhao Fu felt a headache and immense pressure. The Wind God Empire would definitely make a move against the surrounding worlds, and Great Qin could not escape.

Zhao Fu sent people to gather information on the Demon Wind Empire's movements, as it was the archenemy of the Wind God Empire. However, Zhao Fu was left disappointed – the Demon Wind Empire was not doing anything, and it seemed that he had to rely on himself and not others.

If the Wind God Empire really wanted to do something to Great Qin, it was not as if Great Qin had no chance of victory. There was still a trace of hope, and that was in the Outer World.

There were many things there that could kill Celestials, and even though Great Qin could not afford them, it would definitely be able to obtain things that could kill Emperor Heaven Realm experts. If the Wind God Empire forced Zhao Fu's hand, he would go all out.

Now, the situation was relatively peaceful. As long as Great Qin did not attack the Corpse Pall World, the Devil Horn Empire would not do anything. Moreover, under the Wind God Empire's threat, they also had to think of measures to deal with them.

Great Qin could focus on the Outer World Battlefield; that was the best place to develop, and it would be of great help in the future.

## Chapter 1378: Insect Soul

Zhao Fu led billions of soldiers and all sorts of beasts, and he brought countless construction materials to the Outer World. In just one night, they constructed a massive and grand City in the Outer World.

During that time, many Outer World creatures attacked, but they were quickly killed by Great Qin, and their materials were collected by Great Qin's soldiers to be sent back to Great Qin.

Because Great Qin did not have any Sunlight Gemstones, they could only do things at night. After such a massive City suddenly appeared, giving off a terrifying aura, the Outer World creatures did not dare to come within the surrounding 1,000 kilometers out of an instinctive fear.

Now, it was Great Qin's turn to attack them. Zhao Fu left half of the army to defend the base and the remaining half split into eight armies to attack in eight directions. Each army had a Commander-level figure leading it, and Zhao Fu also personally led an army.

Under the moonlight of the twelve moons, it seemed as bright as day, though there was a clear coldness, and Zhao Fu led his army onwards.

"Roar! Roar! Roar..." Hundreds of thousands of scorpion-like Outer World creatures gave off massive roars and shocking auras as they flooded over.

"Formation!" Without Zhao Fu having to give any orders, a Commander's voice sounded out. A group of Shieldbearers walked out from the left and formed a shield wall. Behind them, Archers walked out and drew their bows and aimed at the incoming Outer World creatures.

These arrows were not ordinary arrows but contained Spirit Destruction Crystals, and the arrowheads gave off traces of blood-red light.

咻咻咻...

咻咻咻...

Swish, swish, swish...

The arrows drew out countless blood-red arcs as they shot out like arcs of electricity towards the Outer World creatures.

The arrows easily sank into the Outer World creatures' bodies, and green blood flew everywhere. Countless Outer World creatures directly died and some fell to the ground and writhed in pain, looking like they were not long for the world. However, the remaining Outer World creatures continued to ferociously attack.

However, after another wave of arrows, most of these Outer World creatures had been killed. Hundreds of thousands of Outer World creatures looked like a lot, but Zhao Fu had 200 million soldiers with him, so killing these hundreds of thousands of Outer World creatures was not a problem at all.

The Spirit Destruction Crystals had proved quite effective, increasing the damage against Outer World creatures and making it easier for Great Qin to kill these Outer World creatures.

Swish, swish, swish...

Soon, another wave of arrows tore through the sky, descending like rain and poking countless holes in the Outer World creatures. The Outer World creatures were gathered quite densely and always appeared in large waves. If anyone was by themselves, it would be very difficult to survive here.

After killing another wave of Outer World creatures, the soldiers collected the corpses and hunted down the remaining Outer World creatures.

This was the fifth wave that Zhao Fu had killed, and all of the Outer World creatures they encountered were Insect type Outer World creatures. The number of Insect type Outer World creatures was simply astonishing.

They still had not found a Sunlight Gemstone mine. Zhao Fu brought such a large force not only to kill Outer World creatures but to find a Sunlight Gemstone mine. Without Sunlight Gemstones, Great Qin's soldiers could not do anything during the day.

"Reporting to Your Majesty, those ahead have discovered something," a soldier from the vanguard ran to Zhao Fu and reported.

Hearing the is, Zhao Fu nodded and flew towards the front.

There was an enormous crater with countless rhinoceros beetle-like insects around it. The insects gave off light from their backs, and there were glowing eggs at the center. These eggs seemed to have membranes around them, as opposed to shells.

Because the eggs gave off light, it was possible to hazily see what they contained. It was a liquid-like substance and some had murky forms that looked like rhinoceros beetles.

The crater was incredibly big, at least hundreds of kilometers wide, and there were millions of insects. They were gathered incredibly densely and looked quite terrifying.

What caught Zhao Fu's attention was that at the center of the crater, there was a hexagonal stone that was around three meters tall and silently floated in the air, giving off a green light. It gave off a powerful aura and seemed like some kind of treasure.

Zhao Fu immediately led the soldiers up. There were millions of insects, and if they were not careful, they would suffer losses.

Zhao Fu first ordered the soldiers to set up defenses in the outer borders and had some people draw a few hundred thousand insects over at a time. In a few waves, they would be able to clear out half of them, and the remaining half would not be much of a threat.

Zhao Fu then had the army surround the crater. Within the crater, the insects sensed the Heaven Awaken World's aura and charged over with no regard for their lives.

Facing these insects, Zhao Fu did not care too much and released Wyverns. The Wyverns gave off massive auras and flew in the sky, spewing out flames and icy blasts.

Soon, Great Qin had killed all of the insects, leaving a massive wreck in the crater. There were charred insect corpses and frozen corpses everywhere.

Great Qin had tried to keep as many of the insect eggs as possible, but a small portion had been destroyed. Zhao Fu had never seen these eggs before, and he felt quite interested as he came before an egg and sensed the power it gave off.

He found that the eggs were slowly absorbing the Primal Chaos aura. Everything in the Outer World Battlefield was made of Primal Chaos aura, while the Heaven Awaken World was made of spirit qi.

Because Zhao Fu was standing quite close, he could feel a bit of his energy being sucked into the egg. Zhao Fu felt quite confused; the insect egg could actually absorb his energy though he came from the Heaven Awaken World.

“砰!”

Suddenly, Zhao Fu had an idea and sent large amounts of his energy into the egg. The one meter tall egg madly absorbed Zhao Fu’s energy, and its color gradually became black as its aura became stronger and stronger.

Bang!

Suddenly, an explosion sounded out as the insect egg exploded. Black mucus shot everywhere, and fortunately Zhao Fu raised his barrier in time, or else he would have been completely covered. The mucus also had a stench to it.

The reason that the egg exploded was because it was unable to contain Zhao Fu’s Divine Bloodline’s power. Zhao Fu thought about it and called over an ordinary soldier and had him send his energy into an egg.

The egg quickly absorbed the soldier’s energy, and the aura it gave off became stronger and stronger. The liquid within the egg continuously went through changes as the body of a rhinoceros beetle gradually formed.

At that moment, a palm-sized image of a rhinoceros beetle shot out from the egg and flew into that soldier’s body.

“Arghhh!” The soldier suddenly cried out, his face covered with pain. Zhao Fu’s expression fell and he sent his Divine power into the soldier’s body. He found that the rhinoceros beetle image was currently devouring the soldier’s life force.

As Zhao Fu’s Divine power entered the soldier’s body, it easily killed the rhinoceros beetle image. At the same time, the egg seemed to lose all traces of life.

Chapter 1379: Insect Den Wyvern

The soldier was relatively fine and just lost some lifeforce. He would recover after consuming some medicinal pills.

Zhao Fu did not understand what had just happened; it was a pity that Arasina was not with him, or else he could ask her what he could do with these insect eggs. He could only put them away and research them after going back.

Zhao Fu then went to the center of the crater, where the glowing hexagonal stone was. He looked at it, stretched out his hand, and looked at its information.

“System announcement! This item cannot be checked.”

Zhao Fu lightly laughed; he expected this. After all, even though he could check the information of items within the Heaven Awaken World, this was something from the Outer World. Being from the Heaven Awaken World, he was unable to look at its information.

However, Zhao Fu could guess that this item was similar to a Den, and it would perhaps be even stronger than Dens in the Heaven Awaken World. However, Zhao Fu was unable to conquer this Den nor could he relocate it; in other words, he could not use it.

However, sensing the immense lifeforce from the Den, Zhao Fu had a daring thought. He summoned a Wyvern that had not fused with a City Lord Seal and planned to try it out.

The ordinary Wyvern was only ten or so meters long and had gray-colored scales. Its defense was only ordinary, and it was much weaker than the Wyverns that had fused with City Lord Seals.

Zhao Fu planned to use the same method of fusing City Lord Seals to fuse this Insect Den into the Wyvern’s body to see what would happen.

Looking at the Wyvern obediently lying on the ground and looking at him with eyes full of worship, Zhao Fu could not help but hesitate and thought of a problem.

Wyverns were Heaven Awaken World creatures while this Insect Den was from the Outer World, and Heaven Awaken World people were unable to use it. Perhaps the Wyvern would not be able to fuse with it and would die; he could not act too rashly.

Zhao Fu thought about it and came up with a hypothesis. He ordered people to gather blood from the rhinoceros beetles and used a Blood Fusion Stone to fuse the blood into the Wyvern's body.

The process was extremely painful, and the Wyvern felt its body being corroded by a type of energy as it continuously cried out and struggled. Its aura slowly changed.

A while later, the Wyvern calmed down and powerlessly lay on the ground; the pain seemed to have subsided. Zhao Fu had expected this; after all, it was difficult to fuse things from two worlds with different Laws.

Now, the Wyvern had only successfully fused a trace of Insect Outer World creature bloodline. It was much more powerful than Insect type Outer World creatures, so its blood could suppress the Insect blood. However, it was still so painful for it and it was unable to bear the Insect Outer World creature bloodline.

If it was an ordinary person, daring to fuse Insect Outer World creature blood would result in certain death.

Zhao Fu looked at the Wyvern and took out a high-grade medicinal pill and fed it to it. The Wyvern quickly regained its strength, and it started to fuse with the Den.

Zhao Fu's expression was quite serious as he performed countless hand seals and sent his energy into the Den. Fortunately, Zhao Fu's bloodline was now a Divine Bloodline, or else he would not be able to fuse his energy into the Den.

As he sent in more and more energy, the massive Den became more and more under his control. Zhao Fu then pointed at the Wyvern and the massive hexagonal stone shot into the Wyvern's body.

"Roar! Roar! Roar..." The Wyvern once again started to roar painfully as the two energies clashed. The Den's enormous power continuously corroded the Wyvern's body, causing the Wyvern's body to glow.

The Wyvern struggled and rolled about on the ground, its claws and tail slamming at the ground and smashing open craters, looking like it was in extreme pain.

A while later, the Wyvern's pain lessened; the Insect Outer World creature blood that Zhao Fu had fused earlier started to take effect.

The Wyvern's body became bigger – 100 meters, 200 meters, 500 meters, 700 meters... in the end, the ten or so meter long Wyvern became 1,000 meters long, and its appearance went through great changes as well.

Its gray scales became green and fluorescent, and attached to its dragon wings were a pair of thin insect wings. On the Wyvern's head was a green insect antenna, and it now had pincers beside its mouth.

The Wyvern now gave off a terrifying aura, and it was more than ten times more powerful than the Wyverns that had fused with City Lord Seals. It was more than 1,000 meters long and gave off both the Heaven Awaken World's aura and a Primal Chaos aura.

Zhao Fu was delighted and looked at the Wyvern's information

[Insect Den Wyvern]: A terrifying creature formed by fusing a Heaven Awaken World Wyvern and an Insect Den. It has extremely terrifying power and can rival a Stage 9 Dragon. It contains both Primal Chaos power and Insect Dragon power.

“Hahaha...” Looking at that information, Zhao Fu loudly laughed. He had just wanted to try and did not think that he would actually succeed and create such a terrifying dragon.

Stage 9 Dragons were the most noble existences among Dragons. Their power and bloodline could greatly suppress normal dragons and they were also quite rare. However, Great Qin could use this method to create a large number of Stage 9 Dragons.

The power of Stage 9 Dragons was unimaginable. Even if they faced Stage 9 soldiers, they would have an overwhelming advantage.

These Insect Den Dragons would cause Great Qin's strength to greatly increase; even ordinary Empires would not have such powerful Dragons.

Of course, Great Qin would not be able to produce many more Insect Den Wyverns, as they required Insect Dens. They would have to destroy an Insect Den of millions of Insects to obtain an Insect Den; this was not easy at all.

Zhao Fu ordered people to collect the Insect corpses and the Insect eggs were brought back as well to be researched.

After destroying this Den, Zhao Fu led the army onwards. An hour later, they found another Insect Den, and Zhao Fu was quite delighted about this.

Killing the Insect type Outer World creatures gave good rewards, as did taking down the Den. The Heaven Awaken World used to give good rewards, but now war only gave population and territory.

Zhao Fu went with the vanguard to take a look. It was a massive hole in the ground that had red centipedes. They were about two meters long and there were only around one million of them. There were also many red eggs.

There was also a hexagonal stone giving off red light at the center, silently floating in the air.

There were only one million or so centipedes, so Zhao Fu did not bother being too careful. It would be quite easy to kill them, so he sent forth the army to attack.

The arrival of Great Qin's army was quickly sensed by the centipedes, and they quickly swarmed out and attacked.

Chapter 1380: Insects

Great Qin's soldiers got into formation with the Shieldbearers at the front, Infantrymen with spears at the second row, and Archers at the third row.

Swish, swish, swish...

Arrows shot out, tearing through the air and descending like a great rain. Centipedes' bodies were pierced and they immediately died and hissed in pain. The ground was soon covered with red blood.

Some centipedes gave off ferocious auras as they rushed at Great Qin's army. At that moment, the Wyverns in the air descended and shot out flames or icy blasts, burning or freezing the centipedes.

Zhao Fu watched the Insect Den Wyvern, which was quickly flying in the air. It opened its mouth and a massive green beam of light shot out into the horde of centipedes.

Bang! Bang! Bang...

A chain of explosions sounded out as green light rushed into the sky. The green beam of light swept out, blasting countless centipedes. Red blood splattered everywhere and dyed the ground.

Massive craters appeared in the ground and fragmented centipede corpses could be seen everywhere. This single attack from the Insect Den Wyvern killed at least a few hundred thousand centipedes; it was much stronger than ordinary Wyverns.

Zhao Fu gave a pleased smile and continued to observe the battlefield.

Another wave of arrow rain descended and by now, most of the centipedes were dead or injured. Only a small portion of centipedes were able to make it to the army, and they were blocked off by the shield wall while the Infantrymen stabbed through their bodies with their spears. In the end, they were easily killed as well.

Zhao Fu came to the center and looked at the Den and smiled. He fused it into another Wyvern without a City Lord Seal. Of course, he first fused it with the Red Centipede bloodline.

The Wyvern struggled on the ground and gave cries of pain as its body started to go through changes and its aura started to become chaotic.

In the end, it became a 1,000 meter long Wyvern. This Insect Den Wyvern was quite similar to the previous one but had slight changes.

This Insect Den Wyvern's scales were red and it did not have a pair of thin insect wings on its back, but its chest had a few thick and solid pieces of exoskeleton. Its defense was greatly increased and it did not gain an antenna, but it did gain pincers and gave off a powerful aura.

The two Wyverns looked different, and it was most likely because of the bloodlines and Dens fused.

He had to pair up the right bloodline with the right Den because the Den would only spawn this type of bloodline. If he used another bloodline, the Den would not be able to be fused and the creature that he tried to fuse it with would definitely die.

Zhao Fu ordered the soldiers to continue clearing out the battlefield, collect the centipede corpses, and bring the eggs back.

Zhao Fu saw that it would be dawn soon, so he gave the order to return to the base. Otherwise, after the eight suns came up, Great Qin's soldiers would quickly be scorched to death.

After returning to Great Qin, the other armies had returned as well and brought back large numbers of Insect corpses. What made Zhao Fu pleasantly surprised was that there were six Dens, which meant that Great Qin could create another six Insect Den Wyverns.

However, they still had not found a Sunlight Gemstone mine, so Great Qin's army still could not leave the base during the day. Zhao Fu felt quite worried – without any Sunlight Gemstones, if the base was destroyed, they would be doomed.

They had to obtain Sunlight Gemstones or else their movements would be greatly restricted, and they would be incredibly vulnerable.

If someone snuck into the base and destroyed the Sunblaze Emperor Immortal Formation, Great Qin's soldiers would perish under the eight suns.

“What have you come to find This God for?” Arasina gave off a cold aura as she walked out and looked at Zhao Fu with her beautiful eyes.

Zhao Fu took out an Insect egg and put it on the ground as he asked, “What can this Insect egg be used for? Can the Great Qin hatch it and use it?”

Arasina looked at the Insect egg and said, “You wish! Do you really think Outer World creatures can be taken in so easily? These eggs mainly have two uses: one is to create an Insect Curse and one is to create an Insect Soul.”

Zhao Fu asked in curiosity, “What are Insect Curses and Insect Souls?”

Arasina replied, “Because of the Outer World’s special Laws, the creatures there are quite special. These Insect eggs are very suited for casting curses, which are called Insect Curses.

“Anyone who is cursed with an Insect Curse will have an insect appear in their body, which will continuously torment them. The pain is immense and can even kill people. Insect eggs are split into different levels and can unleash different Insect Curses.

“The Insect eggs you’ve obtained are trash Insect eggs and basically no one would use them. They are normally destroyed because the Insect Curses they unleash can be dispelled very easily.

“As for Insect Souls, when they are incubating, you can send your power into it and the Insect egg’s Insect Soul will enter your body. After the Insect Soul enters your body, it will instinctively devour your life force, which will cause immense pain.

“At that moment, you need to seal the Insect egg, making it so that it cannot absorb any energy. You will also gain control of the Insect Soul within you, and you will obtain the Insect Soul’s power.

“However, even though the Insect Soul can increase power by a bit, Insect Souls are naturally antagonistic to Heaven Awaken World creatures. As such, using the Insect Soul’s power will easily cause backlash, so very few people do this.”

Hearing this, Zhao Fu felt quite disappointed. The effects of the Insect Curse and Insect Soul were both too weak and dangerous. It seemed that he would not be able to create an Insect Soul army.

However, Zhao Fu kept these Insect eggs for now because there were one million or so of them and perhaps they would be useful in the future.

“You’ve been busy for an entire night; you should take a break,” Arasina came up and lightly hugged Zhao Fu and said charmingly.

Zhao Fu looked at how enticing she seemed and lightly laughed as he said, “You go first then, and I’ll have a good rest by myself.”

Arasina glared at Zhao Fu and said shyly as she said, “Husband, This God wants you. This God will serve husband tonight.”

After saying this, Arasina took the initiative to kiss Zhao Fu and took off her clothes.

Bai Xihan stood outside the door as she listened to the intense noises coming from within. She stopped and a slight embarrassment came to her cold face.

Xu Liuyi felt quite surprised and stood at the door as she looked at Bai Xihan and asked, “What is it? Xihan, didn’t you want to talk to His Majesty about the base?”

However, she soon heard the noises from within and her face became slightly red. She gave off an enticing aura; as a young woman, Xu Liuyi’s body could not help but become hot upon hearing those voices.

Sun Hanxiang and Wei Qiang also arrived. Hearing those voices, their faces also became red.
