

The Lord 1521

Chapter 1521: Alliance

“System announcement! City stats have been reduced.”

“System announcement! Den stats have been reduced.”

“System announcement! Region power has been reduced.”

“System announcement! Kingdom power has been reduced.”

“System announcement! Nation Armaments have been affected.”

“System announcement! All protection periods have prematurely ended.”

Zhao Fu’s expression was quite serious. This time, it was not just Cities and Region power; even Dens and Kingdoms had been affected as well. More importantly, Nation Armaments had also been affected, and all of the new worlds’ barriers had disappeared.

It seemed that the Heaven Awaken World’s situation was becoming worse and worse. At this rate, all stats would disappear. Now that Great Qin had the Sealing Heaven Suppressing Earth Formation, it could leave the Heaven Awaken World, but it did not have the ability to protect itself.

Zhao Fu had to quickly develop his faction to prepare for the future. Based on the current trend, the outlook for the future was not very positive.

At the same time, Zhao Fu was now resolved to make the human world a similar existence to the Heaven Awaken World. Great Qin would be able to survive and perhaps even be able to reach new heights as a result.

The barriers of the new worlds disappearing once again interfered with Zhao Fu’s plans. Not only would he not be able to attack the Wind Spirit World, but also his plans to attack the other world would also have to be delayed.

Before, Great Qin could have expanded to both sides and bully the new worlds, but this was no longer possible as other worlds would interfere.

Zhao Fu decided to first gather his subordinates to discuss their future plans. He returned to Great Qin and spread out his military forces.

Now that the barriers were gone, the Fish Scale World, Dark Demon World, and Spirit Light World were exposed to other worlds. As such, they could not leave those worlds unguarded, and defending such a large area required large forces.

In the end, Zhao Fu could only send spies to the Wind Spirit World and the other Human World to gather intelligence.

Just as Zhao Fu had expected, the Wind God's Son was developing incredibly quickly and already controlled one-third of the Wind Spirit World's territory. As the billions of the Wind God Empire's soldiers marched in, the Wind God's Son became the ruler of the Wind Spirit World.

The Wind God's Son also established an empire, called the Wind God Empire – it seemed that the Wind God's Son really was the reincarnation of a Wind God.

This Wind God had been one of the Ancestors of the Wind God Empire, and he had used some kind of method to reincarnate. The Wind God Empire had been able to precisely find the location of his relocation, which was why they had sent billions of soldiers and established the second Wind God Empire.

The Wind God Empire had thought that it was powerful enough and would be able to take care of this matter with no problems, but it was a pity that it had run into Great Qin.

However, adding on the Wind Spirit World, the second Wind God Empire now had five worlds, making it incredibly powerful. Zhao Fu sent people to continuously monitor it, as he was worried that they might attack.

After all, Great Qin had enmity with the original Wind God Empire, so the second Wind God Empire would also see Great Qin as an enemy.

The Human World nearby was called the Glass Race and their people had white hair. Apart from that, there was not anything special about them. Of the eight major races, the Human Race was relatively weak.

This was a relatively ordinary new world, and it had not progressed as quickly as Great Qin or the second Wind God Empire. It was still split into many factions, large and small. The white-haired and white-pupiled young man from before was called Dong Yueli, and his faction was the largest. However, he had not yet gained control of a Continent.

The Glass World was even weaker than the Corpse Pall World. Even though the Corpse Pall World was not very powerful, at least each Continent was unified.

Now, the Glass World was exposed to the invasions of other worlds. Some other worlds nearby planned to invade.

By now, all of the Glass people were incredibly terrified and started to send out ambassadors, telling people that Great Qin was next to it and that it was willing to join their alliance to help resist the Devil Horn Empire as well.

The other worlds were quite interested because taking down a new world would just result in them losing some forces and they would not be able to gain much. Apart from population, nothing else was of much value.

If they increased their forces resisting the Devil Horn Empire, they would naturally be quite happy. Moreover, the Glass World was right next to Great Qin, and Great Qin conquering it meant being neighbors with Great Qin; no one wanted this.

After thinking about it, the various worlds agreed to the Glass World's request and decided not to attack it. The Glass World joining the alliance would provide some assistance.

A massive crisis was now over for the Glass World, and everyone in it rejoiced. Countless people cheered and the streets were filled with celebrations.

The Glass World picked ten or so representatives who were all geniuses and held important positions to liaise with the surrounding worlds, and this included Dong Yueli.

The other worlds of the alliance also invited them to discuss plans to resist the Devil Horn Empire. The ten or so representatives were naturally quite excited.

This was the first time they would be interacting with the powerful people from the outer worlds. The outer worlds had all developed for dozens of years, and they were much stronger than them.

Apart from Dong Yueli, who had left the Glass World a few times, none of the others had seen the rest of the Heaven Awaken World before.

Dong Yueli and the others took this matter quite seriously and came to the meeting place. Facing the major figures from the other worlds, they expressed their goodwill, and the other factions were also quite courteous.

A gentle and reserved middle-aged man smiled as he said, "Welcome to our alliance, members from the Glass World. I am the Hanrow Kingdom's King and the leader of the alliance."

Dong Yueli hurriedly replied, "You're too courteous, Alliance Master! It is the Glass World's fortune to be able to join the alliance."

The middle-aged man felt quite pleased towards Dong Yueli's attitude and laughed as he said, "Please have a seat! We'll soon start discussing how to resist the Devil Horn Empire."

Dong Yueli and the others looked around and found a place to sit.

Many people gave all sorts of suggestions at the meeting. Some people wanted to bring more people into the alliance, some wanted to work together with Great Qin, and some wanted to increase their forces and train together in order to increase their unity.

There were many geniuses at the meeting but there were also many different opinions. Everyone had their own reservations, so there were soon disagreements.

Dong Yueli and the others behaved themselves and just listened and did not give any suggestions. With their strength, they were not qualified to speak here.

In actuality, they only joined the alliance to avoid being invaded by members of the alliance and to ward off Great Qin from attacking them. That was the Glass World's true goal, or else they would not have joined the alliance.

Chapter 1522: Wind God

Suddenly, some people walked in and handed out letters to the various leaders. The leaders all felt quite confused, but the people whispered something to them, causing them to look quite serious as they started to read the letters.

Dong Yueli and the others felt quite confused, not knowing what had happened for the leaders to become so serious.

Following this, the leaders started to look at them – some had expressions of pity and reluctance, while others had condescending expressions.

This included the Alliance Master, who had treated them incredibly courteously; he now seemed quite cold, causing Dong Yueli and the others' hearts to sink. Something bad had definitely happened, but they did not know what it was.

The Alliance Master looked at the others, who all nodded; there was not a single person who did not nod. Seeing this, the middle-aged man said, "Apologies, members of the Glass World, you have been kicked out from the alliance. Don't worry, we won't attack you though."

Those words instantly caused Dong Yueli and the others to feel quite furious; what did these people take them as? Even though they were weak, they were not completely defenseless. How could they just kick them out like that, and not give them any face?

Even though they were furious, but facing the bosses of the various worlds, they did not dare to vent their anger. Dong Yueli said coldly, "Alliance Master, can you tell us what happened and why you're kicking us out?"

The Alliance Master explained, "Great Qin sent a message telling us not to accept you, or else it will no longer help tie down the Devil Horn Empire and will treat us as enemies. If we kick you out, Great Qin promises not to attack us. Apologies, but you should understand how much we fear Great Qin, so we can only kick you out."

This was how domineering Great Qin was; a single word was enough to command the entire alliance, who could only obey.

Dong Yueli and the others understood and got up to leave. Their hearts were now filled with anger towards Great Qin and the alliance.

At the same time, they quickly hurried back to prepare various things to resist Great Qin. They understood that Great Qin was definitely going to attack, and if they did not prepare soon, it would be too late.

Great Qin was indeed mobilizing forces to prepare to attack the Glass World. As Great Qin's massive war machine started to operate, an enormous aura of killing and conquering spread out, causing the atmosphere to become oppressive and everyone started to become wary.

Great Qin had already stationed soldiers in its other worlds, and they set up measures to prevent other worlds from spying.

Seeing that Great Qin was about to attack the Glass World, the Devil Horn Empire, which had been lying low, caught this opportunity to announce that it would fully support the Glass World as long as it submitted to the Devil Horn Empire and become its vassal world.

Great Qin had been obstructing the Devil Horn Empire's development this whole time, and now that the Devil Horn Empire had the same number of worlds as Great Qin, it wanted to take revenge and obstruct Great Qin.

As Great Qin's enemy, the Devil Horn Empire was determined to stop Great Qin from attacking the Glass World in order to relieve its anger.

The Glass World had been terrified at the prospects of being attacked by various parties, but after joining the alliance, it had been overjoyed at its newfound peace. However, hearing that Great Qin was going to attack it and that the alliance had kicked it out, it once again fell into fear.

However, they were much more afraid than before, and there were already people planning on escaping the Glass World. After all, Great Qin was many times more terrifying than other worlds.

However, hearing that the Devil Horn Empire was willing to help them, the Glass World once again felt quite joyful. The Devil Horn Empire was Great Qin's biggest rival and would definitely be able to stop Great Qin and allow them to live.

All it took was becoming a vassal world of the Devil Horn Empire, which was not a big deal as it would be in name only and they would not truly submit to the Devil Horn Empire. Even though it was quite shameful, their lives were more important than their pride.

By now, the Glass World's people had gone through a rollercoaster of emotions, going up and down from joy to terror.

Zhao Fu did not care too much about the Devil Horn Empire. He had expected it to get involved; right now, Zhao Fu was focused on Great Qin's soldiers.

Defending the six worlds took up a lot of the forces, and they also had to defend Great Qin's Territory at the Outer World Battlefield. The City states and Region power weakening had also caused Great Qin's beasts' power to decline, and even though the soldiers were developing well, their numbers were still too small.

Now, they had to face the Devil Horn Empire and the second Wind God Empire. Given all of the other factors, Great Qin was in quite an unfavorable situation.

However, with Great Qin's current strength, it would still be able to conquer the Glass World. Right now, they were gathering intelligence on the Glass World while holding meetings to discuss how to attack.

The Devil Horn Empire was also gathering its forces, and a massive aura spread out. The Devil Horn Empire planned to attack Great Qin through the Desolate Crow World. That place was also close to the Glass World, allowing them to help the Glass World too.

The two large Kingdoms started to move out, and a terrifying aura caused the surrounding worlds to feel quite nervous. Those who were tactful stayed away; when the two sides started fighting, they would not have any regard for third parties. Many factions once again started to monitor the situation between the two factions.

Within a large palace, there sat a heroic-looking and beautiful woman with green eyes on a throne. She wore green armor and rested her chin on a hand as she listened to a half-kneeling soldier report, and she gave a cold smile.

This woman was the 'Wind God's Son' and was the reincarnation of the Wind God. She had once been a terrifying existence and held great authority within the Wind God Empire. More than half of the Wind God Empire's territory had been conquered by her, and she was the Wind Spirit World's World Protector. Her name was Feng Shensha.

The news that the soldier was reporting about was about the Devil Horn Empire and Great Qin.

"These two fellows are quite interesting, especially Great Qin's Legatee – he can be called a legendary figure. Despite being a new world, he made the Wind God Empire suffer such a loss. Who would have thought that This Sovereign would appear at such a complicated area and be required to personally attack," Feng Shensha felt quite shocked as she said somewhat amusedly.

With her identity and experience, she did not care too much about these two small Kingdoms on the outskirts. If it was not for the fact that the Wind God Empire was tied down by a few other Royal Kingdoms, she would have immediately mobilized troops to easily destroy those two Kingdoms and have their Kings prostrate themselves before her.

Feng Shensha thought for a moment before saying, "Right now, they're too occupied with fighting with each other and won't take notice of us. This is a good opportunity – mobilize our forces to attack the world next to the Charm Devil World."

Chapter 1523: Gold God Race

The world next to the Charm Devil World was a God Race World, and the people living there were called the Gold God Race. They had golden pupils and liked to make gold armor. They were incredibly powerful and were much stronger than the Charm Devil World.

That was why back then the Wind God Empire had chosen to develop to the left and avoid the Gold God World to the right.

The Gold God Race was quite strong and they were quite proud, and they did not fear the Wind God Empire much. They would be quite tough to crack.

Feng Shensha preferred tough ones because conquering them felt more satisfying. As such, she gave orders to attack the Gold God World first.

“Yes, Your Majesty!” the soldier turned and left to spread Feng Shensha’s order.

Feng Shensha left behind one billion Stage 3 soldiers to defend and the other two billion Stage 3 soldiers and the Wind Spirit World’s 600 million soldiers attacked the Gold God World together. Feng Shensha wanted to give the soldiers who had never seen the outside world before some experience.

The two armies quickly faced off against each other, both sides giving off powerful auras and causing the air to seem to become heavy. A dangerous aura spread out, and this aura could be felt even far away.

“If you submit to you now I will treat you well in the future. It’s best not to seek your own deaths,” Feng Shensha stood in the air and gave off a terrifying aura as she said domineeringly and coldly.

Her cultivation was at the World Realm and she also had the power of a Nation Armament.

On the side of the Gold God Race, a golden-haired, proud-looking young man who looked somewhat handsome replied coldly, “In your dreams. Submitting to you is out of the question.”

Feng Shensha coldly laughed and did not say anything else before giving the order to attack.

The two billion Stage 3 soldiers charged first. Green aura flames burst forth around their bodies, making them seem like a green flood that gave off a sharp and destructive aura as they rushed towards the Gold God army.

The Gold God Race immediately started to counterattack. Their soldiers gave off traces of gold aura which flowed into the sky and formed a golden moon.

This golden moon gave off a terrifying aura and boundless golden moonlight, covering the ground.

Swish, swish, swish...

The Gold God Archers started to shoot out arrows, which were empowered by the golden moonlight. They turned into golden rays of light that contained powerful godly power and tore through the sky as they shot towards the Wind God soldiers.

Facing the countless incoming golden rays of light, the green aura condensed before exploding out, and an incredibly sharp green gale rushed forwards.

The golden rays of light were cut apart by the green gale, and they fell from the sky.

This caused the Gold God soldiers' expressions to fall. By now, the Wind God soldiers had reached the defensive walls, and each soldier gave off an intense aura that formed large winds that helped them rush up the walls.

Boom!

The golden moon in the sky exploded out with an even more powerful aura as golden moonlight covered the gold-armored soldiers. The Gold God soldiers were bathed in golden light as they looked incredibly valiant, like divine soldiers.

On one side were the gold soldiers and on the other side were the green soldiers, and both sides clashed in a chaotic battle.

The Wind God Empire's 600 million Stage 1 soldiers split in two directions, roaring as they charged at two different areas of the defensive wall.

With the help of the main force, they quickly charged up the defensive walls and were baptized with blood.

A Wind Spirit soldier held a large axe that glowed with green light and hacked out, sending out a green blade of light that cut a Gold God soldier from head to toe. Another Wind Spirit soldier held a spear and stabbed out, piercing through a Gold God soldier's chest.

The Gold God soldiers and Wind Spirit soldiers were more or less equally matched, and the Gold God Race had a slight advantage as they were on their home soil. Both sides continuously killed, causing blood to fly everywhere and the death toll continuously rose.

However, the Wind God side had their Stage 3 soldiers, who gave off green aura flames and looked like wind demons as they slaughtered their way through.

They sent out green wind blades incredibly densely, and the Gold God soldiers were unable to defend at all. Their bodies were torn apart by the green blades and blood splattered everywhere as cries continuously sounded out. The bloody stench was enough to make anyone feel nauseous.

By now, the Gold God soldiers already felt some fear and started to retreat. The Wind God soldiers' expressions were cold as they gave chase, not willing to spare any of the Gold God soldiers.

“Arghhh!” Seeing the soldiers on his side being wiped out, a Gold God soldier furiously roared and charged up without regard for his life towards a Wind God soldier, but he was mercilessly cut down by another Wind God soldier.

Ten or so Gold God soldiers stood around a Wind God soldier and attacked, but they had already lost 90 people fighting him. A spear finally pierced through that Wind God soldier's chest, taking his life, but they had already suffered great losses. The Gold God soldiers were not a match for the Wind God Empire's Stage 3 soldiers.

One faction was from the inner regions while the other was from the outer regions; their strength were on completely different levels and the gap was too great. Moreover, they did not have an advantage in numbers either.

In the end, the Gold God World was taken down by the second Wind God Empire, and the remaining Gold God people either submitted or escaped to other worlds.

Within a dazzling palace, Feng Shensha sat on a throne as a few soldiers brought up a gold-haired young man.

This was the young man who had spoken with Feng Shensha before, the strongest King in the Gold God World. His identity and bloodline were the most prestigious in his world.

“Kneel and crawl over!” Sitting on the throne, Feng Shensha gave a trace of a smile as she said incredibly overbearingly.

The golden-haired young man was furious and yelled out, “Just kill me!”

Feng Shensha lightly laughed and stretched out a hand. Countless traces of green aura flowed into the golden-haired young man's body, and the sharp aura cut apart his body from within. His entire body was cut, and the immense pain caused the young man to howl and wish for death.

The injuries were all internal, so from the outside, he looked completely fine. A while later, the young man was unable to endure it anymore and crawled over to Feng Shensha.

A trace of a smile appeared on Feng Shesha's face as she stretched out a foot. The young man vigorously licked the foot like a dog, giving off strange noises of pleasure.

Chapter 1524: Insect Monster

Looking at the young man madly licking her foot and giving off strange sounds of pleasure, Feng Shensha smiled and understood that she had tamed this young man. She pressed the young man's head under her foot and said with her beautiful voice, "My interesting little boy dog, only by being obedient will you be treated like this in the future, understood?"

The young man lay on the ground and had a flattering look on his face as he stretched out his tongue and hurriedly nodded. The pain from before had completely destroyed his pride, and he only wanted to curry favor with Feng Shensha and not endure that kind of pain again.

Feng Shesha was quite pleased, took out a collar and leash made of silver, and put the collar around the young man's neck. She then led him out, making him walk like a real dog.

The Gold God World had already been fully conquered by the Wind God Empire. The Wind God Empire did not commit a massive slaughter like before, as Feng Shensha required a large population.

After all, four of the other worlds it had did not have any people at all and were like empty shells. As a Kingdom, population was incredibly important and with these people, the second Wind God Empire would be able to start becoming truly powerful.

Before, the second Wind God Empire had five worlds, and with the Gold God World, it now had six worlds. The three largest factions in the area now all had the same number of worlds.

The second Wind God Empire's sudden attack shook the other factions, including the Devil Horn Empire and Great Qin, who stopped fighting against each other.

Before, the Wind Spirit World had seemed incredibly tame, but after Feng Shensha established the second Wind God Empire, it had revealed its fangs. With her strength, no one dared to take her lightly.

The Devil Horn Empire and Great Qin decided to temporarily strengthen their defenses at the borders. The Wind God Empire was between the Devil Horn Empire and Great Qin and there were many areas where they were connected. Now that the second Wind God Empire had revealed its fangs, Great Qin and Devil Horn Empire had to be careful.

At the same time, Zhao Fu received news from the Outer World Battlefield that Great Qin Territory was being attacked by a large number of monsters and requested reinforcements. It seemed that the situation was quite urgent and dangerous, or else they would not have asked for reinforcements like this.

After hearing about this, Zhao Fu quickly gathered forces and soon received more information that it was an Outer World City that was attacking.

This was the Chaos Evil City that Zhao Fu had heard about before, and even though it only had ten million people, they had created six billion insect monsters that were incredibly terrifying. Great Qin only had two billion soldiers stationed there, putting them in an incredibly disadvantageous situation. It was only natural that the situation was so urgent.

However, the situation in the Heaven Awaken World was not too good either and they required a large number of soldiers to defend. After thinking about it, Zhao Fu planned to send two billion soldiers and also six million or so Fallen Light Angels. They were Spirit Light people who had taken on the Fallen Angel profession.

They all had strength equivalent to the peak of Stage 3, and they had Darkness power that could counter the Outer World Battlefield. More importantly, Zhao Fu heard that the six million Fallen Light Angels could cast a very powerful ability with the 24 Emissaries.

The wife of the Spirit Light World's World Protector, Athenkali, was the core figure for this. She was the only six-winged Fallen Light Angel, and she was about to break through to eight wings.

Even though she still looked quite cold, her aura had become much more mature and bewitching because she and the 24 Emissaries were often ravaged by Zhao Fu.

After gathering his forces, Zhao Fu hurried to the Great Qin Territory.

“How’s the situation?” After reaching the Great Qin Territory, Zhao Fu immediately flew to the defensive walls and asked Arasina.

Arasina looked somewhat serious as she replied, “This time the Chaos Evil people have sent roughly five billion insect monsters and are about 1,000 kilometers away.”

Zhao Fu felt quite confused as he asked, “These Chaos Evil people are so far away; why are they suddenly attacking the Great Qin Territory?”

Arasina thought about it before replying, “It’s most likely because of the abnormal signs caused from fusing the two Dens, which alerted them of our existence.”

Hearing this, Zhao Fu understood. However, now that the Great Qin Territory had four billion soldiers and tall defensive walls and other kinds of defenses, Zhao Fu was not too worried about this attack.

All of Great Qin’s soldiers started to get ready and pushed out terrifying ballistae and set up barrels of darkness flame oil. Countless Wyverns spiraled in the sky and tens of thousands of Spirit Light Emissaries had been summoned already. Great Qin’s forces were all prepared and gave off an incredibly powerful aura.

Rumble...

Massive sounds could be heard as the ground started to tremble. An incredibly chaotic and violent aura flooded out, causing all creatures to fall into terror.

Countless figures flooded over the horizon and were simply innumerable, completely covering the ground. The sky was also blotted with countless insect monsters, making it difficult to see the sky itself.

These insect monsters were different than ordinary insect creatures. They looked both like humans and insects, and they looked incredibly ugly and terrifying.

Some had the bodies of ants and heads of humans, while some had the upper bodies of humans and lower bodies of scorpions. Others had the upper bodies of grasshoppers and the lower bodies of humans.

The flying insect monsters in the sky had the heads of insects and bodies of humans, as well as pairs of thin wings. Some had human bodies but had cockroach-like shells and wings.

These insect monsters looked like hybrids between humans and insects. No wonder Hong Mei and the others had been quite afraid of these Chaos Evil people; they were simply too evil.

Such a massive insect monster army was naturally controlled by many people. There were hundreds of thousands of them, and the leader was a savage-looking big man with a braid. He was most likely the City Lord of Chaos Evil City.

He did not seem interested in speaking because Outer World creatures naturally desired to kill Heaven Awaken World people.

Boom!

Countless insect monsters gave off heaven-toppling auras as they madly rushed at the Great Qin Territory, seeming completely unstoppable. Just this aura alone was enough to cause people to despair.

Bang! Bang! Bang...

As the insect monster horde rushed up, Great Qin's traps were activated. The ground split apart and massive cracks appeared. Countless insect monsters fell into the cracks that were thousands of meters deep, and there were countless steel spikes that were hundreds of meters long within.

As countless insect monsters fell down, they were impaled by the steel spikes and green blood spurted out as the insect monsters cried.

Those controlling the insect monsters looked quite panicked and quickly tried to stop the insect monsters. However, such a large horde could not be stopped so easily, and countless insect monsters flooded into the cracks.

Chapter 1525: Fallen Angel

Chi, chi, chi...

The sounds of bodies being pierced could be heard as the steel spikes were lined with. Green blood flowed down the steel spikes and covered the ground, giving off a disgusting stench and creating a terrifying scene.

The first trap successfully defended against the insect monster horde's charge, but that was only for the insect monsters on the ground. The insect monsters in the sky were unobstructed and continued to charge over with terrifying auras.

Swish, swish, swish...

Massive sounds of the air being torn could be heard, causing the sky to tremble. Countless arrows contained immense power as they shot out, piercing into the insect monsters' bodies, which howled as they plummeted from the sky.

The arrows that Great Qin was using were made to counter these Outer World Battlefield. They not only contained Darkness materials but contained Spirit Destruction Crystals.

Seeing the large number of insect monsters dying, the fierce-looking big man looked quite furious and gave the order to counter-attack.

The insect monsters in the sky opened their mouths and spat out blue liquid, which sizzled as they landed on the defensive walls. They were incredibly corrosive and created small craters on the defensive walls.

"Arghhhh..." Cries sounded out as the liquid fell on some soldiers' bodies. Their equipment was quickly burned through and the liquid burned away at the soldiers' bodies, making them feel immense pain and cry out.

The insect monsters on the ground started to attack the ground, causing the ground to cave in and fill the cracks. The leaders also sent out a vanguard to scout out the way.

Great Qin's second and third cracks were also discovered and were destroyed as well.

The insect monster horde once again gave off a ferocious aura as they madly charged towards the Great Qin Territory incredibly quickly as if they could destroy everything.

Seeing many soldiers dying, Zhao Fu's expression became quite cold and he looked slightly furious. He gave orders for the Wyverns, Spirit Light Emissaries, and ballistae to start ferociously attacking.

1,000 or so Insect Den Wyverns shot out terrifying beams of light which flashed out and slammed into the insect monster horde. Countless explosions of light blasted out, spreading out with terrifying power, blasting insect monsters' bodies apart, and causing them to fall like rain.

The 100 meter tall Spirit Light Emissaries stretched out their hands and enormous white beams of light containing searing power shot out. Countless insect monsters' bodies were scorched and fell from the sky.

The countless ordinary Wyverns spat out large amounts of flames and icy blasts, killing large amounts of insect monsters in the sky.

Swish, swish, swish...

Bolts containing terrifying power shot out with immense power, drawing out black traces in the air and seeming to tear apart the sky.

These bolts were all three meters long and were made of materials that were at least Silver grade, and they were socketed with Darkness Crystals. Even though the Dragon-Slaying Ballistae had been simplified, they still had immense power and were specialized in killing large creatures.

As the larger insect monsters were hit by the bolts, they continuously fell down from the sky, creating another rain of corpses.

The insect monsters on the ground were also attacked. Thick vines shot out from the ground and attacked the incoming insect monsters, binding them up and devouring their blood and flesh.

There was a massive one that had vines that were dozens of meters thick. The insect monsters charging over were completely ripped apart by the enormous vines, and their life force was absorbed.

Zhao Fu had planted large numbers of Man-Eating Vines outside the Great Qin Territory to deal with these insect monsters. The massive vine was the Man-Eating Vine Demon, and the area within dozens of kilometers was devoid of any living creatures.

However, the insect monsters did not show any fear and continued to attack.

The insect monsters in the sky started to self-immolate as large flames burst forth around their bodies, and they smashed into the defensive walls like enormous fireballs. The flames easily ignited the corrosive liquid, and as they crashed onto the defensive walls, they created seas of flames which burned soldiers alive.

The insect monsters on the ground also self-destructed with great force, blasting open craters on the ground. Countless vines were blasted apart, sending liquids flying everywhere.

Countless Man-Eating Vines were heavily injured and were no longer able to stop the insect monster horde, which continued to charge towards the Great Qin Territory with great force.

By now, they had reached the defensive walls and quickly climbed up, while Great Qin's side continuously poured down flaming oil which ignited into large black flames and burned countless insect monsters to death.

The ferocious-looking big man gave the order to continue fiercely attacking, and he sent out larger and more powerful insect monsters.

They turned into even larger fireballs as they smashed at the defensive walls, causing loud explosions to sound out. Countless large insect monsters exploded, causing the defensive walls to crack; if this went on, the defensive walls would fall apart.

At that moment, after seeing how powerful the insect monsters were, Zhao Fu did not hold back anymore and had all of the experts act.

Arasina slashed out a black sword light, which contained incredibly sharp power and seemed to cause the air to be split in two. Countless insect monsters in the air were cut in half, and they fell like rain.

Long Hao'Er and the other dragon women turned into six 10,000 meters long dragons, breathing out powerful dragon flames that easily raised the surrounding 1,000 kilometers and killed countless insect monsters.

Boom! Boom! Boom...

Explosions sounded out as millions of figures spread out black wings and flew into the sky, giving off a powerful Darkness aura.

These people were led by the 24 Emissaries, and they spread out and formed a circle with Athenkali at the center.

The 24 Emissaries had serious expressions as they started to chant, causing their bodies to give off intense black light. A black magic formation appeared with the 24 Emissaries as the foundation, and Athenkali was at the center.

The other Fallen Light Angels also chanted and their bodies gave off rays of black light.

The rays of black light were gathered by the magic formation, causing it to start to spin. A massive wave of Darkness power spread out, creating a Darkness storm that swept out.

At the center, Athenkali felt a massive amount of Darkness divine power enter her body, causing her body to give off black light. Her six pairs of black wings became many times larger and a black halo appeared above her head.

Athenkali looked incredibly solemn, like a Darkness godly spirit, and she gave off a pure Darkness aura.

Chapter 1526: Yasakani no Magatama

Athenkali stretched out a white hand towards the countless insect monsters in the sky and lightly cried out, “God Angel!”

A massive wave of Darkness power flowed out of Athenkali’s hand, and ten massive black holes that were 10,000 meters wide appeared in the sky. Fallen Angels flooded out from the black holes, giving off cold auras as they rushed at the countless insect monsters.

There were tens of millions of Fallen Angels, and they all had at least Stage 3 strength. They held Darkness swords and set out Darkness sword lights that could easily kill ten or so insect monsters.

The insect monsters died in droves, and Great Qin’s various measures were able to successfully suppress the incoming insect monsters.

On the ground, countless soldiers launched attacks to kill the insect monsters climbing on the defensive walls. Without the threat from the insect monsters in the air, they were quite effective.

Zhao Fu flew down from the defensive walls and waved his hand. A massive wave of energy blasted back the insect monsters in the surrounding 10,000 meters. Zhao Fu then squatted down and pressed a hand against the ground as his golden pupil in his left eye quickly spun, and a wave of energy entered the ground.

Boom!

A shocking explosion sounded out as a heaven-toppling aura rose up from the ground. The ground instantly caved in as a massive head rose up, followed by a body and then feet.

This figure was 100,000 meters tall and had long, black hair, and black eyes. He had a muscular body and slightly dark skin, and his hands were like claws, making him look like a demon god. He gave off an incredibly terrifying aura, which swept out like a wild gale.

This was the second time that Zhao Fu had summoned the Primogenitor Statue; the first time was to conquer the Spirit Light World. He had then put it back into the blood lake to continue refining it.

As Great Qin had continued to conquer other worlds and obtained more people, their bloodlines had also been fused into it, causing the Primogenitor Statue to continue to develop. Now, the Primogenitor Statue's strength was not inferior to Emperor Heaven Realm experts.

Most important was its size, which gave it the attack range dozens of times longer than an ordinary Emperor Heaven Realm expert.

Zhao Fu stood on the Primogenitor Statue's head and controlled it. The Primogenitor Statue grabbed at the air and gripped a blood-red sword, and a wave of terrifying power entered the sword, causing the space around it to crack.

Shing!

A shocking sword hum sounded out as the Primogenitor Statue vigorously slashed out, and an enormous blood-red sword light blasted out. The air exploded as the blood-red light flashed forwards, and everything in the 10,000 kilometers in front of the Primogenitor Statue was cut apart.

Countless insect monsters were cut into pieces, causing green blood to dye the ground, and countless trees, hills, and streams had also been annihilated by this strike, leaving behind flat land and causing the surroundings to sink into silence.

A trace of a smile appeared on Zhao Fu's face; that single strike had instantly killed tens of millions of insect monsters, but it had cost a lot of energy.

The Primogenitor Statue now belonged to Great Qin and had fused with the blood of nearly 400 billion people; it was only natural that it was so powerful.

Seeing the power that the Primogenitor Statue unleashed, the ferocious-looking big man felt quite startled and his expression became quite unsightly.

By now, he had lost around half of the insect monster army that he had brought, and now only had four billion insect monsters left. Seeing that they would not be able to take down the Great Qin Territory, he was not stupid and gave the order to retreat. After recovering their strength, they would come to destroy the Great Qin Territory.

The insect monster army started to retreat, and Great Qin soldiers all looked delighted. They had won and successfully defended the Great Qin Territory, and many people cheered.

However, Zhao Fu would not let them off so easily; how could they come and leave as they pleased?

Zhao Fu controlled the Primogenitor Statue to raise a hand, and a 1,000 meter long blood-colored jade appeared above its hand. This was one of Japan's Three Sacred Treasures, the Yasakani no Magatama.

The Yasakani no Magatama gave off a blood-red light and started to spin, faster and faster, until it looked like a blood-red disc. It created an enormous blood-red whirlwind that gave off an immense suction force, pulling rocks and logs into the sky.

The clouds in the sky madly swirled as destructive auras rippled out, causing the world to seem incredibly cold, and everyone's hearts could not help but feel terror.

The Yasakani no Magatama continuously spun until a blood-red whirlwind that was tens of thousands of meters wide formed, containing enough power to rip apart everything.

Boom!

Zhao Fu controlled the Primogenitor Statue to throw out the blood-red whirlwind, which gave off world-destroying power as it shot out incredibly quickly with unstoppable momentum.

Everything in its way, whether it was mountains, trees, or insect monsters were crushed to dust.

The blood-red whirlwind's target was extremely far away. It slammed into the insect monster horde and continued on to the center, where the Chaos Evil people were.

The Chaos Evil people had never thought that the Primogenitor Statue would be able to attack so far away, and they were caught completely unprepared. They were turned into minced meat and the insect monster horde started to run out of control.

The ferocious-looking big man felt quite startled and understood what kind of terrifying faction he had attacked, and he started to feel regret.

Zhao Fu controlled the Primogenitor Statue to raise its sword, and he spoke with a booming voice, "Great Qin's soldiers, hear Our order... Kill!"

Bang! Bang! Bang...

Zhao Fu controlled the Primogenitor Statue to charge out with a terrifying aura. Each step it took caused the ground to crack and it left behind enormous footprints.

"Kill!" Great Qin's soldiers gathered together, forming a black flood as they roared and gave off a world-shaking killing and conquering aura as they charged at the escaping insect monsters.

Boom! Boom! Boom...

Great Qin's experts also gave off massive auras and obeyed Zhao Fu's order as they turned into rays of light and shot out.

Zhao Fu controlled the Primogenitor Statue to charge into the horde of insect monsters and sent out sword lights, killing countless insect monsters.

By now, the ferocious-looking big man looked quite terrified, and he ordered the remaining insect monsters to stop Zhao Fu. However, Zhao Fu did not feel any fear and quickly attacked as Great Qin's soldiers followed behind him.

Soon, Zhao Fu rushed out of the horde of insect monsters and charged towards the Chaos Evil people, and he ordered the other experts to kill the Chaos Evil people controlling the insect monsters.

In the end, Zhao Fu caught up to the ferocious-looking big man. The man realized he could not escape, so he could only roar as he exploded with might and charged at Zhao Fu. However, Zhao Fu casually killed him with a slash and ended this battle.

Chapter 1527: Chaos Evil City

After killing these Chaos Evil people, the remaining insect monsters ran about in chaos and did not cause much harm to Great Qin. Zhao Fu left a portion of soldiers to defend the Great Qin Territory while he brought the majority to attack the Chaos Evil City.

With six billion insect monsters, no one had dared to offend the Chaos Evil City. Now that five billion of them had been destroyed by Great Qin and there were only a few hundred million left to defend, they would not be able to resist at all. This would be their best opportunity to destroy them.

As for the ten million Chaos Evil people, they were nothing in front of Great Qin's army.

Boom!

Great Qin's soldiers were like a massive flood as they gave off a world-shaking aura and surged forwards.

They quickly arrived at Chaos Evil City. Because Great Qin had moved quite quickly and they had killed all of the Chaos Evil people, Chaos Evil City did not know of their side's massive defeat.

Chaos Evil City was an enormous City and had massive City Walls that were over 100 meters tall. Around the City Walls were large holes, around which was green liquid that gave off a disgusting smell.

This was most likely where the Chaos Evil people created the insect monsters, as well as where the insect monsters lived. There were countless holes, and they looked quite chilling.

By now, the Chaos Evil people had fallen into chaos and terror. There was nowhere to run, as Great Qin's army had tightly encircled the city, and even a fly would not be able to escape.

Looking at the holes, Zhao Fu ordered people to drop flaming oil into them to avoid anything unexpected. As the flames raged, countless insect monsters immediately crawled out of the holes; these were the remaining few hundred million.

The hundreds of millions of insect monsters were controlled by the Chaos Evil people to madly attack Great Qin. Some directed charged into the walls of flames, while others rushed to where there were not flames and attacked Great Qin's forces.

Even though they had shocking momentum, Great Qin was already prepared to defend and was waiting for their attack.

Swish, swish, swish...

Arrows containing immense force arced through the air and descended like rain.

The insect monsters charging up were pierced by countless arrows, causing green blood to fly everywhere. Many insect monsters immediately died, but there were still countless insect monsters that continued rushing at Great Qin's forces.

At that moment, the Wyverns spat out flames or icy blasts, while the Spirit Light Emissaries shot out beams of light, as did the Insect Den Wyverns. Great Qin's experts also attacked and blasted at the insect monsters.

The insect monsters were unable to resist at all. They were blown up and turned into shattered corpses, and green blood covered the ground.

After killing the last wave of insect monsters and destroying their holes, Great Qin's army started to siege the City. Now, there were only roughly ten million Chaos Evil people left within it.

They all held weapons and had grim expressions, and some people's bodies even trembled. They wanted to protect Chaos Evil City and have a final battle with Great Qin.

The person in the lead was a middle-aged man with slightly white hair. He looked somewhat like the ferocious-looking big man from before, and he was most likely that man's father. His aura was more powerful and he had Divine Realm cultivation.

This was the outer regions of the Outer World, and having such cultivation was quite astounding. Most people in this region only had World Realm cultivation at most.

Zhao Fu stood in the air and gave a trace of a confident smile as he said, "You no longer have the power to resist; only by submitting will you be able to stay alive. Don't seek your own deaths."

The white-haired middle-aged man coldly harrumphed, “The Chaos Evil people will definitely not submit to the Heaven Awaken World people. If you want to fight, we will fight. Sooner or later, the Outer World will destroy your Heaven Awaken World.”

Zhao Fu’s expression became cold and said to the experts next to him, “Kill everyone on the City Walls; don’t spare a single one!”

There were only about three or four million people on the City Walls, and they were all the people who could fight. With so few people, they would be easily taken care of by Zhao Fu’s experts.

Boom! Boom! Boom...

Rays of light shot out with ferocious power and slammed towards the City Walls, and the battle was soon over. The white-haired middle-aged man was attacked by two Divine Extreme Realm dragons, and he was killed within ten bouts.

Long Hao’Er happily held his head as she went up to Zhao Fu, “Owner, I killed him; you have to properly reward me later.”

Bai Han’Er felt somewhat displeased as she had also fought and Long Hao’Er had taken the kill, so she felt quite wronged as she said, “Owner, I also helped out a lot; don’t forget about me.”

Zhao Fu lightly laughed and nodded.

Following this, the last of the resisting Chaos Evil people were killed, and Great Qin’s army flooded into the City.

The elderly people, women, and children all ran in terror and hid in houses as they trembled. They all fell into despair and prayed that a miracle would happen.

However, no miracle happened – those who wanted to run were killed by arrows, and those within houses were dragged out. Anyone who resisted was killed, and the City was filled with screaming and crying as blood ran down the streets.

Zhao Fu led some people to the City Hall and sat on the seat of the City Lord, and he waited for the results of clearing out Chaos Evil City.

Soon, Xiao Jian came back with a baleful aura and reported, “Your Majesty, in the end only two million or so were willing to submit. The rest have been killed already and we have obtained many resources and treasures, as well as 400 or so Insect Dens.”

Hearing this, Zhao Fu gave a trace of a smile. Just those 400 Insect Dens were worth Zhao Fu attacking Chaos Evil City. With those 400 Insect Dens, Great Qin could nurture another 400 Insect Den Wyverns.

In the end, only two million or so people out of the ten million were willing to surrender. This number was quite low, and it was only because they were humanoid creatures that they would even surrender. The Insect-type creatures would never surrender.

Of course, if Zhao Fu had an Outer World bloodline, perhaps it would be possible to subdue them.

As for how the Outer World people controlled the Insects, Zhao Fu understood that the Outer World people naturally created a type of mental mark that allowed one to control a large horde once they imprinted the mark on a leader of the Insects.

Moreover, the Insects would only obey people with the Outer World aura. Otherwise, it would be just like when Zhao Fu had taken in Xue Ji – the other Blood-Sucking Mosquitos immediately turned and ran, completely unwilling to submit to Zhao Fu.

Moreover, it was not so easy to obtain an Outer World bloodline, as it would clash with Heaven Awaken World bloodlines.

Moreover, even if a person had an Outer World bloodline and could control a large group of Insects, they would not be able to interact with Heaven Awaken World people because they would lose control and instinctively want to kill Heaven Awaken World people.

Chapter 1528: Historical Remnant

Only by creating creatures like the Blood Demon Snake Mosquitos by fusing two types of Dens would they be able to create insect monsters that obeyed Great Qin. The Dens used for fusing had to be quite strong, and ordinary Dens would not do.

Xiao Jian smiled and said, “Your Majesty, this subordinate has brought the Chaos Evil City’s City Lord’s relatives here; perhaps they know some important information. Would you like me to bring them in?”

Hearing this, Zhao Fu lightly laughed and said, “Bring them in!”

Following this, six women were brought in. Two of them had mature figures. One of them had a voluptuous body and a simple aura, while the other had a mature figure and a virtuous aura. They were both that white-haired middle-aged man’s wives, the mothers of the ferocious-looking big man.

They were called Yue Hong and Yue Mei.

There were also another three women. One had a bewitching figure and looked quite flirtatious; one had a seductive figure and gave off an enticing aura; and one had a fit-looking figure and had a trace of wildness about her. They were the ferocious-looking big man’s wives, and they were called Yue Shan, Yue Tiantian, and Yue Long.

Last was a pretty and lively-looking girl called Yue Ling, who was the ferocious-looking big man’s daughter.

They were all looking at Zhao Fu with expressions of hatred or terror, as Zhao Fu had killed their husbands and destroyed Chaos Evil City. They were worried what Zhao Fu was going to do to them; evidently, these Heaven Awaken World person were not good.

Zhao Fu looked at the women with interest and got up from the seat as he smiled and hugged a few of the beautiful women.

The women immediately started to struggle and cursed at Zhao Fu, but he only calmly smiled as he said, “If you continue to resist, I’ll kill everyone else who was locked up with you.”

Following this, none of them dared to resist as they cried and looked quite pitiful. However, Zhao Fu properly tasted them and did it with them.

After a few intense rounds, Zhao Fu smiled as he hugged a strengthless, beautiful woman and girl as he said, “Tell me everything you know about Chaos Evil City.”

One of the ferocious-looking big man’s wives, Yue Shan, glared at Zhao Fu and said, “You just ravaged us so intensely; won’t you even let us rest before asking us?”

“There’s nothing for us to say; our bodies have even been dirtied by you, our enemy. If you want to kill us, just kill us so I can go to my husband and son.” Thinking about how Zhao Fu had killed her husband and son, Yue Hong spoke with tears in her eyes.

Zhao Fu smiled and gently hugged her as he said, “Now, you’re all my women, so how could I bear to kill you? Don’t worry, I will take care of all of you.”

One of the ferocious-looking big man’s wives, Yue Tiantian, looked at Zhao Fu and lightly nodded as she said, “I believe you. Just then, you were so powerful. My husband was quite powerful, and I had never thought that you would be dozens of times more powerful than him. I feel that I’ve been completely conquered by you.”

Those words caused the other women to look quite angry, as Yue Tiantian was evidently submitting to Zhao Fu.

Zhao Fu started to ask Yue Tiantian about Chaos Evil City’s various matters. The other women tried to stop her, but now that Chaos Evil City had been destroyed, there was no point in protecting these secrets anymore, so they could only allow Yue Tiantian to do as she pleased.

Zhao Fu heard about how Chaos Evil City had developed insect monsters and felt quite disgusted. They had used a secret technique to put men’s semen into female insect monsters’ bodies, causing those female insect monsters to give birth to half-human and half-insect monsters.

Moreover, that secret technique involved men doing it with the female insect monsters.

However, for the insect monsters to number six billion or so, it was impossible to produce them all through such means; many of them had been produced from insect monsters mating from each other.

What surprised Zhao Fu was that the Chaos Evil City would also hold special events where men did it with insect monsters. The more insect monsters they did it with, the greater the rewards would be.

Chaos Evil City's City Lord naturally did not participate in this. Zhao Fu felt that the Chaos Evil people were truly quite perverted and twisted.

Yue Tiantian and the other women knew this secret technique, but Zhao Fu was not interested in it at all. What he was interested in was a historical remnant that Chaos Evil City had. It was because of this historical remnant that they had become so powerful, and they had obtained that secret technique from there.

That historical remnant opened once every month and only three people could go in. Tomorrow would be the next time that it opened.

That historical remnant was incredibly dangerous, and the old City Lord had only been able to make it to the third level despite having Divine Realm cultivation, and he was forced to retreat with injuries.

After hearing about how dangerous it was, Zhao Fu felt even more interested because perhaps he would be able to make great gains there. As such, he decided to take a look the next day.

Yue Tiantian lay in Zhao Fu's embrace and said coquettishly, "You baddie, I've told you everything now, so you have to treat us well and not bully us."

Zhao Fu laughed and hugged her as he nodded earnestly.

Yue Tiantian could sense Zhao Fu's sincerity and her face became slightly red as she said, "You baddie, I want more."

Following this, Zhao Fu started going about it with the women again. The women no longer resisted and instead indulged in the pleasure, and their lewd voices traveled incredibly far.

The next day, Zhao Fu called over Di Moji and Yuan Ziyuan. They were Great Qin's two strongest Emperor Heaven Realm experts, and because he would not be able to use his Nation Armament in the historical remnant, he would only have Heaven Realm cultivation, so he decided to bring them with him.

Yue Tiantian brought Zhao Fu to a secret passageway that was ten meters tall and four meters wide. There were carvings on the wall that all depicted humans and insect monsters mating, not just men and female insect monsters but also women and male insect monsters.

Following this, the group reached a large hole that was hundreds of meters tall and hundreds of meters wide. There was nothing inside it except a purple vortex at the center of the hole.

This was most likely the entrance to the historical remnant. Zhao Fu first checked that there was nothing wrong with it before bringing Di Moji and Yuan Ziyuan in.

After the three of them entered, the scene that greeted them made them feel incredibly shocked. There were six levels here, and each was a massive continent that floated above the previous, and they were connected by stairs.

This was the first time Zhao Fu had explored an Outer World historical remnant. He was not very familiar with anything, and he felt incredibly interested.

The first and second levels had been explored by the Chaos Evil people, so there would not be much value in exploring them. As such, Zhao Fu directly led the two women to the third level.

Countless insect monsters flooded out – they looked even more evil and twisted than Chaos Evil City's insect monsters, and some could cause people to vomit.

Chapter 1529: Lord Holy Son

There were worms that had worm-like heads and bodies, but they were covered with human eyes. There were also beetles with beetle heads and human bodies, but their bodies did not have skin, revealing their bloody flesh.

There were also frogs with human breasts, and some had up to 20 pairs. There were also insects with insect heads and limbs but four to five male members.

Moreover, they were not weak at all and there were many of them. It would be impossible for a Divine Realm expert to pass through them; no wonder the old City Lord of Chaos Evil City had been forced out with injuries.

Zhao Fu could not use his Nation Armament here, nor could he summon the Primogenitor Statue, and he would not be able to do much with his cultivation, so he left killing these insect monsters to the two women.

For them to rank within the top ten beauties in the Demon Domain, they were not only as beautiful as goddesses but they also had terrifying strength. Both of them held swords and slashed out countless sword lights, and the insect monsters swarming up were unable to resist at all and were cut into chunks.

Zhao Fu stood there and watched since he could not provide any assistance. It was a pity that Zhao Fu could not summon the Evil Flower Demons, as they had fused with the Demon Lord Star.

Otherwise, the 12 Evil Flower Demons would have been able to directly devour all of these insect monsters.

A while later, Di Moji came back with a smile, “Husband, we’ve killed all of the insect monsters, and we can head to the depths of the third level now.”

Yuan Ziyuan pouted as she said, “My good husband, you just came in to have fun and left everything to us. Later, if you don’t properly reward us, I won’t spare you.”

Zhao Fu smiled as he hugged one of them in each arm and said, “I know, I know! Let’s continue on!”

As they reached the depths of the third level, a massive insect monster that was tens of thousands of meters long appeared in front of them. It had a woman’s head and a spider’s body. The woman looked quite beautiful but Zhao Fu was not interested at all, so he had the two women kill it.

Di Moji and Yuan Ziyuan turned into two powerful rays of light as they shot towards the spider insect monster. The spider insect monster roared and gave off a ferocious aura as it opened its mouth and shot out countless rays of black light.

The rays of black light were incredibly powerful and could easily pierce through boulders. They opened up craters on the ground and covered a large area.

Zhao Fu did not dare to stay close by to as he might be caught up, so he watched from afar.

Even though the spider insect monster was incredibly powerful, the two women were stronger. They unleashed their barriers and blocked the countless rays of black light, and they slashed out two mighty sword lights.

The spider insect monster was hit on its back, and green blood spurted out of two massive gashes, causing it to roar in pain.

The spider insect monster's eyes became blood-red and its aura became more powerful as its lower half gave off large amounts of black mist that spread out and covered the two women, and it easily permeated through their barriers.

The two women's breathing became erratic as their faces became bright red. The mist had powerful aphrodisiac properties, causing the two women to become somewhat strengthless.

The massive spider insect monster grasped this opportunity to bite towards the two women. Zhao Fu felt quite shocked and stretched out his hands, causing two chains to shoot out and wrap around their bodies and drag them back.

The spider insect monster looked at Zhao Fu furiously and looked quite startled before its expression became one of glee, and it gave off a mighty aura as it rushed towards Zhao Fu.

Zhao Fu wanted to bring the two women and retreat to the second level, as he was not a match for this massive spider insect monster. The two women had been careless and had thought that the spider insect monster would not be able to retaliate, so they had breathed in a lot of the black mist and had become delirious.

Zhao Fu had been binding them with his chains, but because their strength was far greater than his, they easily broke free and pushed him onto the ground and started to rip off his clothes.

This made Zhao Fu feel quite shocked; this was certainly not the time for this. That massive spider insect monster was charging over, and if they started doing it now, they would be dead for sure.

However, without his Nation Armament, Zhao Fu was not a match for them at all, and he could not move as they pressed him to the ground.

A massive shadow covered the three people – it was that spider insect monster, and it looked at Zhao Fu with delight as it spoke with a droning voice, “Holy Son essence!”

The spider insect monster’s body became smaller and smaller until it became a naked woman. She had a bewitching figure and long, black hair. She was incredibly beautiful but had four arms, and her abdomen looked somewhat like a spider’s abdomen.

The woman came to Zhao Fu’s side and stroked Zhao Fu’s peerlessly handsome face as some black mist flowed into his body, and she said in a flirtatious voice, “Lord Holy Son, please enjoy yourself!”

Following this, the woman pushed aside the two others and pressed Zhao Fu against the ground with her four arms and started to ravage Zhao Fu.

Because of that black mist, Zhao Fu’s Six Desires Demonic Qi started to go out of control, and he quickly pressed the woman against the ground as he started to instead ravage her.

After Zhao Fu regained consciousness, he pushed aside the woman lying on top of him in disgust and felt quite angry. No woman had ever treated him like this before, and he raised his hand and prepared to kill the woman.

The woman looked quite pitiful and pleaded, “Lord Holy Son, I’ll definitely serve you well. Just then, didn’t you feel good ravaging me? As long as you take me in, you can do it with me every day and give me your Holy Son essence. I’ll take you to the depths of this historical remnant now.”

Di Moji and Yuan Ziyuan woke up, and they blushed. Seeing that Zhao Fu wanting to kill the woman and the woman begging for mercy, they felt quite compassionate towards her. If she still acted like an enemy, they definitely would have killed her.

Hearing that she could directly take them to the depths of the historical remnant, Di Moji said, “Husband, you should think about it.”

The woman also hurriedly said, “Lord Holy Son, there are a terrifying thing in the depths of the historical remnant that can shake the Outer World. It was once destroyed by countless Outer World sovereigns together, and it is definitely an unimaginably terrifying thing.”

Zhao Fu felt quite interested and wondered what that thing was. The Outer World sovereigns were equivalent to the Heaven Awaken World higher-beings; what could they have joined together to destroy?

Looking at the woman who he had just ravaged, Zhao Fu could not bring himself to kill her and he coldly harrumphed as he said, “You’d best not be lying to me, or else your outcome will be tragic.”

By now, Zhao Fu had set down countless restrictions within her body and could control everything.

The woman knelt down and said in delight, “Thank you, Lord Holy Son!”

Chapter 1530:

Outer World Treasure Trove

Zhao Fu looked at the woman and asked, “What’s your name?”

The woman shook her head and said happily, “How about Lord Holy Son gives me a name?”

Zhao Fu thought about it and decided to call her Zhu Ji.

Zhu Ji gave a satisfied smile and went up to hug Zhao Fu’s arm, and she led him and the two other women to the fourth level.

The fourth level was filled with countless insect monsters, and their auras were even stronger than the ones from the third level. They flooded over like a tsunami, seeming to want to destroy everything. They made even Di Moji and Yuan Ziyuan feel a trace of pressure, and their expressions became somewhat serious.

However, Zhu Ji smiled and stepped forwards and opened her mouth as she gave off a formless soundwave that instantly spread out, causing the countless insect monsters to retreat. It seemed that Zhu Ji was quite capable.

Suddenly, a figure giving off a powerful aura flew in front of everyone. It was a beautiful woman with a seductive figure with long, golden hair. She had a pair of bee's wings and a pair of bee-like eyes, and she was completely naked.

Zhu Ji gave a trace of a smile as she said enticingly, "Bee, this is Lord Holy Son. Do you want Holy Son essence? Come and serve him."

The woman looked incredibly delighted, and her beautiful eyes fell on Zhao Fu's body and discovered his Holy Son aura. She flew in front of Zhao Fu and half-knelt as she said flirtatiously, "Lord Holy Son, I'll come and serve you!"

Zhao Fu knew things would turn out like this and did not bother saying anything as he ravaged the woman and tasted her, and he felt that she was somewhat sweet.

Following this, he named her Feng Ji.

The fifth level also had a woman who had a bewitching figure and white skin. She had black and white long hair and had a pair of butterfly's wings and two antennae on her head. She also gave off a powerful aura.

She was already panting under Zhao Fu's body, and she then collapsed to the ground. Zhao Fu called her Dia Ji.

The group continued onwards and soon reached the sixth level. The process was quite smooth, making Zhao Fu feel quite speechless.

The insect monster guarding the sixth level was a centipede with three human heads. One head was an elderly person, one head was a woman, and one head was a child. Zhao Fu did not hold back and directly ordered to have this centipede killed.

Zhao Fu was quite interested in knowing what that item at the end was, and whether it was worth all of this.

The centipede sprayed out a poisonous mist that had a terrifying corrosiveness. The ground that it covered sizzled and became black, and it gave off an acrid smell.

With their experience from last time, Di Moji and Yuan Ziyuan did not dare to be careless and sent out rays of sword light that descended like rain towards the centipede. The sword lights cut open its shell and pierced into its body, causing green blood to flow out.

Zhu Ji, Feng Ji, and Dia Ji also unleashed powerful attacks towards the centipede, dealing a lot of damage as well.

This caused the centipede to become incredibly enraged, and its three heads cursed at the three women. It was evident that they knew each other, and the centipede accused them of betraying their master – not only had they submitted to a Heaven Awaken World person, but they were also attacking it.

The three women ignored the centipede because it was bound to die. After all, the key to the treasure trove was the centipede's three heads.

The centipede had been their master's most faithful subordinate, and it would never betray their master, much less submit to a Heaven Awaken World person.

As for them, because their master had been dead for many years, they naturally wanted to find a new master. Zhao Fu, who was a Holy Son, was undoubtedly the best choice.

Shing!

A massive sword hum sounded out as a black beam of light shot into the sky, and a massive storm of sword qi spread out. Di Moji held her sword, giving off a powerful aura, and the air seemed to become heavier.

An enormous black crescent which seemed to have the power to slice through everything blasted onto the centipede's body, causing it to roar in pain. A massive gash appeared on its body, from which blood spurted out and dyed the ground green.

However, the centipede was incredibly tough and mustered up the large of its strength as it rushed at Zhu Ji and the two others, wanting to kill the three traitors.

By the side, Yuan Ziyuan slashed out a sword light that slammed into the centipede, sending it flying. It smashed open a large crater, causing the ground to violently tremble. The centipede twitched a few times before it went silent.

Zhu Ji and the two others cut off the three heads and brought them to Zhao Fu and smiled as they said, “Lord Holy Son, with these three heads you can open the treasure trove. Would you like to open it now?”

Zhao Fu nodded.

Following this, the group came before a beautiful pair of doors. Beside the doors were two stone pillars, and the doors seemed to be gold-plated and gave off a golden light. There was also a beautiful picture of a mountain and river engraved on the doors.

At the center of the doors were three holes. In actuality, one did not need to kill the centipede – as long as its heads were inserted into the holes, the doors could be opened, even if the centipede was still alive. However, it was evident that the centipede would not submit to Zhao Fu.

Zhu Ji and the others placed the three heads into the holes. The holes gave off a blood-red light as a massive aura spread out from the beautiful doors, and they slowly opened as a terrifying aura swept out from within.

Space and time seemed to freeze as everyone felt as if their bodies had fallen into an icy cavern. They could not help but feel terror and their bodies trembled.

All of their faces became somewhat pale; that terrifying aura seemed to surpass even the level of higher-beings and seemed to reach the level of Celestials. None of the people felt the ability to resist at all.

Moreover, that aura contained a bloodline-level suppression, and it was even stronger than Zhao Fu’s Divine Bloodline by a bit.

Even Di Moji and Yuan Ziyuan were barely able to withstand this with their Imperial Bloodlines. There seemed to be some kind of will trying to make them kneel down, and if they were not resisting with all their might, they would have directly knelt down.

Zhao Fu and the others looked at each other with serious gazes before walking through the doors, and they arrived at a white and luxurious hall.

Within the hall, there was a coffin made of platinum, above which floated an octagonal-shaped jade the size of a fist. It gave off an eight-colored light, and the aura from before came from the coffin.

Zhu Ji lightly smiled and said, “Lord Holy Son, don’t worry, that’s just the aura that master left behind. The coffin does not have anything except a few pieces of clothes.”

Hearing this, Zhao Fu carefully approached and sensed that there was indeed nothing within the coffin. In order to confirm this, he lightly pushed open the coffin and found that there really were only clothes inside. The thing of value was most likely that octagonal-shaped jade.
