

The Lord 1721

Chapter 1721: Stage 8 Dragon

If he fused City Lord Seals into them, the Splendor Night Silver Dragons would be more powerful than even ordinary Stage 9 dragons.

It was a pity that City stats were continuously becoming weaker, causing the City Lord Seals to also become weaker. Otherwise, with the original power of the City Lord Seals, if they were fused into the Splendor Night Silver Dragons, they would be able to challenge Stage 9 Elite dragons.

Zhao Fu held the Den, which was the statue of the silver dragon, and chose to use it.

Boom!

The statue exploded out with a powerful aura and gave off boundless silver light as it rose from Zhao Fu's hand. It hovered in front of Zhao Fu and massive amounts of silver liquid flowed out of it, forming a silver, octagonal stage that was three meters tall.

The statue hovered at the center of the stage and a silver light flashed as a 600 meter long massive dragon appeared in front of Zhao Fu. It spread its silver wings and gave a massive dragon's roar, causing wind to rush out.

This silver dragon looked the same as the statue. It was covered with silver scales and had incredibly sharp horns. It had a pair of black, obsidian-like eyes; a pair of massive, silver wings; and a pair of sharp dragons claws that had six toes each. It also had a slender and long tail.

It gave off a massive dragon's might that caused people to feel a trace of coldness, and their bodies uncontrollably trembled.

Looking at the powerful Splendor Night Silver Dragon, Zhao Fu grinned. If he nurtured them like the Wyverns, Great Qin would have another powerful force.

Zhao Fu handed matters here to people specialized in this area; he did not have to manage it himself.

After taking care of these matters, Zhao Fu returned to the Great Qin Palace. By now, all of Great Qin knew of Zhao Fu's return, and everyone looked incredibly excited, as their emperor had returned.

The Ministers and Generals all looked excited and respectfully waited outside the Palace. Zhao Fu had changed into his black dragon robe and wore his black dragon crown as he sat on the throne.

"The Imperial Court is in session!" a cry sounded out as the Ministers and Generals orderly filed into the Palace and paid their respects, "We greet Your Majesty! Long live His Majesty! Long live His Majesty!"

Zhao Fu gave a trace of a smile and asked, "What has happened in Great Qin during this long period of time that We have been away for?"

The Ministers and Generals took turns stepping forward to report on what had happened while Zhao Fu was not present.

Zhao Fu had primarily handed internal affairs matters to Li Si. He had done many things during this period of time, one of which was holding another Imperial Examination, selecting geniuses from various races to serve Great Qin.

They had also created many large rivers to make transportation even more convenient, splitting off countless tributary rivers to irrigate farmland.

They also began to encourage farming; crops planted and harvested by commoners would belong to them and not Great Qin, encouraging commoners to grow more food. Now that crop production stats had disappeared, food was an important issue for every Kingdom. Of course, Great Qin would collect some taxes.

They also promoted interactions among subjects and businesses, encouraging them to innovate and cause Great Qin to become even more lively.

People's representatives were also elected, and they would make various suggestions to the Imperial Court to express the residents' ideas and opinions. This was greatly valued by Great Qin.

This was all due to the hard work of Li Si and the various Ministers, and Zhao Fu gave appropriate rewards.

During the time Zhao Fu had left, no Kingdoms had attacked.

Whether it was the Devil Horn Empire or second Wind God Empire, they were all doing their best to develop their factions and stabilize their foundations. They had both attacked other worlds, and they now each had nine worlds. They were both one world away from becoming Royal Kingdoms.

Now, the two factions' population and military were quickly increasing and becoming incredibly terrifying, causing the surrounding Kingdoms to feel quite fearful.

Even though Zhao Fu had not been present, Great Qin did not fall behind. Under Bai Qi's command, they had also conquered one world.

Because Zhao Fu understood that he would be in the Outlander Domain for a long time, he had given Bai Qi and Li Si immense authority, allowing them to take care of all matters. In Great Qin, they could be said to be above countless people and only below a single person.

Of course, it was because Zhao Fu trusted the two of them the most that he would give them such great authority.

Seeing the two other factions develop so ferociously, Bai Qi had gathered the Ministers and Generals to make plans to also conquer another world.

With Great Qin's current strength, as long as the smaller worlds did not ally together and the two large factions did not interfere, it was quite easy to conquer a world.

The world that Great Qin had conquered was called the Mountain World and contained many mountains, making transportation quite inconvenient. It had taken Great Qin quite a bit of effort to conquer it.

The people who lived there were called the Mountain People and were an ordinary Human race. They had western looks and were quite tall and well-built. Because they lived in mountains and fought with beasts, they were quite savage.

When Great Qin had attacked the Mountain World, the Mountain People had used their familiarity with the geography to try to stop Great Qin's invasion.

Facing the complicated terrain and the Mountain People's attacks, it would be quite difficult to conquer the Mountain World with ordinary soldiers, and they would suffer heavy losses.

As such, Great Qin did not use ordinary soldiers but the beast army and the devil army led by Masanori Hano. With their abilities, the terrain was not a big problem and was instead beneficial to them. This was the benefit of having many different types of forces.

The beasts and devils were far more ferocious and savage than Great Qin's ordinary soldiers, and they caused a few terrifying massacres.

The beasts were not just too bad and simply ate people. Apart from creating a bloody scene and leaving behind broken corpses, they would not make their victims feel too much pain. However, the devils were much more twisted and savage.

The devils also ate people but liked to eat them in torturous ways. Some would skin their victims before eating their bloodied bodies, while others would rip open people's stomachs and eat their organs. Some devils liked digging out eyes and eating them before cutting their victims up.

They did not spare anyone, whether they were male or female, old or young. As the devils passed through Villages, Towns, and Cities, there would be no living creatures left afterwards, creating ghost Villages, Towns, and Cities.

There was blood everywhere, as well as fragmented limbs and organs. Some heads were hung on walls, with terrified and pained expressions.

Chapter 1722: Great Qin's Soldiers

The massacres caused by the beasts and devils infuriated and terrified the Mountain People, but they were unable to stop them at all. In the end, Great Qin successfully conquered the Mountain World.

Great Qin had killed five billion Mountain People and taken in 23 billion, while eight billion or so had escaped. Great Qin had also gained 60,000 Cities and countless other items and resources. Among them were quite a few good things.

Firstly, the Mountain People had large amounts of spirit medicines such as ginseng and reishi mushroom in the human world as they grew on mountainous areas. Even though these spirit medicines were not of much use to Zhao Fu, they were very effective for ordinary people.

There were also Great Mountain Stones, which were a type of treasure created by mountains. They were incredibly heavy and could be used both defensively and offensively, and they could cause a lot of destruction.

Great Qin had lost a few hundred million soldiers, but this was a small price to pay.

In total, Great Qin now had 465 billion people and 720,000 Cities, further strengthening Great Qin's foundation.

Now, there were three factions in this area that had nine worlds. All of them lacked one world to become a Royal Kingdom. Just thinking about three Royal Kingdoms appearing in this area could cause anyone to feel afraid.

The surrounding worlds fell into immense terror. Facing Great Qin, the Devil Horn Empire, and second Wind God Empire, they quickly formed an alliance to resist them, and there were about 30 or so worlds in total.

An alliance of 30 worlds was quite fearsome and its strength greatly exceeded any of the three factions. It could completely suppress the three factions.

Because of the formation of this alliance, Great Qin, the Devil Horn Empire, and the second Wind God Empire became much warier, as this alliance could completely annihilate them if they were driven to it.

This forced the three factions to change their plans, which was to conquer one more world and become a Royal Kingdom before attacking the other factions.

The alliance gathered countless forces to gather around the three factions, making it impossible for them to easily conquer any worlds. The three factions also sent large numbers of soldiers to their

borders to defend, guarding against any sudden attacks from the alliance. As such, the situation was currently in a stalemate.

Zhao Fu listened to all of this as he sat on his throne. He was quite pleased with the performance of the Generals and gave out appropriate rewards to them as well.

As for the matter of the alliance, he could only leave it for now. With Great Qin's current strength, he could not butt heads with the alliance, as that was not beneficial for Great Qin at all. He would wait for a suitable opportunity to conquer a world and level up Great Qin to a Royal Kingdom.

After listening to these reports, Zhao Fu decided to head to the Outer World and the Underworld.

At that moment, a message came from the Yellow Springs Kingdom in the Underworld, saying that the factions around it were attacking and that the situation was quite dangerous. As such, it requested reinforcements from Great Qin.

Zhao Fu gave a trace of a smile; this coincided well with his plans, so he headed to the Underworld and brought two billion of Great Qin's soldiers with him.

Seeing Zhao Fu return, the Yellow Springs 12 Empresses all smiled and flirtatiously gathered around Zhao Fu, saying, "Husband, you've finally come back. You have no idea how much we missed you; you have to make it up to us later."

Those words caused the palace attendants nearby to feel quite surprised. Not only were the Yellow Springs 12 Empresses peerlessly beautiful, but they were also the powerful rulers of the Yellow Springs Kingdom and were normally incredibly cold and proud. Anyone had to act carefully around them.

However, in front of Zhao Fu, these 12 noble empresses seemed to become like 12 lewd wives who were desperate for their man.

Zhao Fu smiled and hugged Huang Quanling and said, "I'll have a good taste of you all later. Tell me about the Yellow Springs Kingdom's situation, as well as information about the attacking factions."

Following this, the women started to tell Zhao Fu about the Yellow Springs Kingdom's development, as well as the problem they were currently facing.

The Yellow Springs Kingdom was at the boundary region of the Underworld. The factions here were not very powerful and with Great Qin's help, the Yellow Springs Kingdom had grown incredibly quickly. It was now as big as two worlds, and it had 40 billion or so residents. This was quite impressive.

For ordinary factions, it would take at least dozens of years of growth to reach this level. Seeing the Yellow Springs Kingdom develop so rapidly, the surrounding factions felt quite threatened. Under the leadership of a large Kingdom nearby, they started to attack the Yellow Springs Kingdom.

The Yellow Springs Kingdom was not weak and had around four billion soldiers. They were all high-quality soldiers who had drunk the Yellow Springs water, and they were stronger than ordinary soldiers.

What was also worth mentioning was that the Yellow Springs Kingdom's soldiers all wore yellow armor, and after obtaining Yellow Springs Power, their eyes became yellow. All of the soldiers looked like terrifying Yin Soldiers that had walked out of the Yellow Springs.

Yellow was the Yellow Springs Kingdom's main color; the 12 Empresses all had yellow pupils and wore yellow palace dresses, while Great Qin's main colour was black.

The factions attacking the Yellow Springs Kingdom were made up of the large and small Ghost Kingdoms in the surroundings. Of them, the four largest factions were the Ghost Tiger Kingdom, Mountain Spirit Kingdom, Great King Kingdom, and Left Tribute Kingdom.

All of them had eight billion people and one billion or so soldiers. Adding on the various other Ghost Kingdoms, they had around eight billion soldiers in total.

It seemed that Great Qin had not brought enough soldiers. The Yellow Springs Kingdom's four billion soldiers and Great Qin's two billion soldiers were only six billion soldiers in total, and the other side had an extra two billion soldiers.

Zhao Fu was unable to bring more soldiers as the outside factions were tying down large numbers of Great Qin's soldiers, and they also needed to defend Great Qin's territory in the Outer World as well.

However, even though there was a disparity of two billion soldiers, Great Qin would be able to make up for this with its foundation. Currently, the attacking side was attacking from four directions.

Zhao Fu split Great Qin's soldiers into four groups of 500 million to support the Yellow Springs Kingdom in each of the directions. Zhao Fu personally came to the most dangerous side, which was the West side.

This side was led by the Ghost Tiger Kingdom, and there were about two billion or so soldiers, while the Yellow Springs Kingdom only had one billion soldiers. The Ghost Tiger Kingdom's full assault caused the Yellow Springs Kingdom's forces to fall into danger.

However, after Zhao Fu brought his soldiers to join in, they quickly brought back the situation in their favor and successfully defended against the Ghost Tiger Kingdom.

The Ghost Tiger Kingdom's people were confused to see such a large group of soldiers come to reinforce the Yellow Springs Kingdom, and they were all wearing black armor.

Chapter 1723: Yellow Springs

Following this, the three other sides sent messages that with the 500 million reinforcements on each side, they had successfully defended against the attackers, forcing the attackers to temporarily stop attacking.

Zhao Fu started to think about how he could defeat them. Even though he had the power of nine worlds and using his Nation Armament would have terrifying effects, he was still unable to fight against a few billion soldiers by himself.

As such, Zhao Fu could not just charge in and instantly kill everything by himself.

This time, Zhao Fu did not bring any beasts and had only brought Great Qin's ordinary soldiers.

As for War God's Fury, he had fused the Earth Soul into it, and it could now give off terrifying destructive power. However, it was as big as a region and he could not bring it into the Underworld or Outer World, and he could only use it in the Heaven Awaken World.

Of course, since Zhao Fu had not brought any beasts, he had brought other things to make up for this, including some things he had never used before.

Now, if they could bait the other side into attacking again, he would be able to use those things. When Great Qin had been previously attacked, the situation had been too hurried and Great Qin had not made adequate preparations, so they could only beat back the attackers and had not used those things.

Zhao Fu waited for a day, but none of the attackers attacked again. The situation had fallen into a stalemate, making Zhao Fu feel quite disappointed. He had been waiting for the other side to attack so he could swiftly get rid of them.

Currently, the attacking factions had gathered together, discussing how to deal with the Yellow Springs Kingdom.

A skinny and weak-looking elder looked at everyone and said carefully, "Now that the Yellow Springs Kingdom has received powerful reinforcements, there is only a difference of 500 million soldiers on each side. Moreover, they have the edge as the defending side, making it impossible for us to break through. I think we should stop attacking."

A powerfully-built man resolutely rejected this, "How long has the Yellow Springs Kingdom been around for? Only a few months, yet it has become a super Kingdom that has territory equivalent to two worlds and has 40 billion people. If we don't destroy it now, it'll be us who will be destroyed soon."

A scholarly-looking young man sighed and said, "I wonder what the Yellow Springs Kingdom's background is; the speed at which it has grown is simply terrifying. Also, we completely surrounded it – where did those reinforcements come from?"

A cold and eerie-looking woman said, "I heard that they're from the Heaven Awaken World. Those soldiers seem to be from the Human Race, not the Death Race. It's possible that they're from a terrifying Human Race Kingdom that has been secretly supporting the Yellow Springs Kingdom, which is why they've been growing so quickly."

A middle-aged man in black said angrily, “A Human Race Kingdom dares to stick its hands into the Underworld? We should gather even more factions to destroy it.”

The scholarly-looking young man replied, “It will be very difficult! The others will not benefit from it, so why would they be willing to participate and suffer losses? Also, since we understand that the Yellow Springs Kingdom has a powerful Kingdom backing it, that means we really will not be able to destroy it. Now, we should be thinking about how to defend.”

The skinny and weak-looking elder gave a trace of a smile and said, “I agree. Since we can’t destroy it, we should immediately start preparing to defend and limit its growth.”

Hearing this, everyone fell silent and nodded.

In order to attract the attackers to once again attack, Zhao Fu had the City gates opened, but he found that the other side still did not do anything.

Zhao Fu thought about it and decided to withdraw to the second defensive wall. This was very dangerous, as it was equivalent to giving up one defensive wall. If this was not done well, their defenses could be easily destroyed by the enemy.

However, even though this was dangerous, Zhao Fu had the confidence to defeat the other side, and it would be very beneficial for his side.

Seeing the Yellow Springs Kingdom, the attackers felt quite tempted and wanted to charge in. Perhaps they would be able to break through all of the Yellow Springs Kingdoms’ defenses and destroy it in one fell swoop.

They did not know who the Commander for the Yellow Springs Kingdom was; such a tactic was incredibly daring and was directly challenging and taunting them.

Some people wanted to take their soldiers and attack, but they were stopped by others. This was evidently a massive trap, and once they fell into it, they definitely would not be able to return. Now that they had guessed that the Yellow Springs Kingdom had a powerful Kingdom supporting it, they

would not do something so stupid like this unless they had enough confidence. As such, they still did not attack.

Instead, they went with the plan they had discussed and built defensive structures nearby in order to prepare to start defending.

Zhao Fu felt quite surprised; even this was not enough to bait them in; it seemed that the other side was quite disciplined. Seeing them build defensive structures, Zhao Fu quickly realized their goal and did not hesitate, gathering the army to prepare to attack.

If they did not attack now, attacking after they finished building the defensive structures would be even more difficult, and their losses would be greater.

Attacking two billion soldiers with 1.5 billion soldiers was not very appropriate, so Zhao Fu brought over 200 million soldiers from each of the other three sides. He had 2.1 billion soldiers in total and had the other three sides continue to defend.

“Kill!” Countless soldiers roared as they gave off a powerful aura and flooded out from the defensive wall, giving off an all-destroying power as if nothing could stop them.

The allied side felt incredibly startled. They had stopped attacking, and now it was the Yellow Springs Kingdom who dared to attack. However, this was advantageous for them, and the allied side savagely laughed. Since the other side was seeking death, they would help them.

The allied side quickly formed a defensive formation and waited for the Yellow Springs Kingdom to rush up before they attacked.

Boom! Boom! Boom...

Massive sounds rang out as terrifying arrows shot out from the Yellow Springs Kingdom army, seeming to cause the sky to explode. They gave off sharp lights and drew arcs in the sky before descending towards the allied side.

Facing those arrows, countless people's hairs stood on end and they could not help but tremble.

The Commander was greatly startled and yelled, “Shields!”

They were already in a defensive formation, so they did not have to get into formation in a panic. The Shieldbearers at the front raised their shields and exploded out with powerful auras, causing a semi-spherical gray energy barrier to appear.

Seeing this massive gray energy barrier, everyone let out a sigh of relief and felt that it would be able to defend against the attacks.

Bang! Bang! Bang...

Massive sounds rang out as the first wave of arrows slammed against the defensive barrier with great power, causing sharp lights to shoot everywhere. Massive gusts of wind spread out as countless cracks appeared on the barrier, causing everyone to feel incredibly shocked.

Chapter 1724: Yellow Springs Beasts

Bang! Bang! Bang...

The next wave of arrows gave off terrifying power as they pierced through the gray energy barrier, and the gray energy barrier shattered. The arrows tore into the army, tearing through them and ripping apart their bodies.

Blood flew everywhere and broken corpses fell all over the ground. Countless cries sounded out, and the scene was incredibly gory, making people's hairs stand on end.

As the wave of arrows descended, the front of the army became a field of corpses. Blood dyed the ground completely blood-red and a gory stench spread out.

Countless people looked terrified; just what kind of arrows were these to have such terrifying destructive power?

These were Great Qin's Talisman Arrows. Because they were limited by Talisman Stones, Great Qin did not have too many Talisman Arrows. However, they had been stocking up on them, and after conquering the Mountain World, they had obtained many Talisman Stones, and Zhao Fu had brought a large number this time.

However, the matter was not over. The Desolate God and 12 women in blood-red clothes appeared in the sky.

The Desolate God gave off a cruel smile and said to the 12 women behind her, “Begin! Show them our power and don’t let those bastards look down on us.”

The 12 women in blood-red clothes nodded and stretched out their hands as a powerful aura exploded out. Countless runes flowed out of their hands as 12 blood-red figures appeared behind them, giving off an intense blood-red light. They then turned into blood-red images and descended amidst all of the corpses.

As the 12 images descended to the ground, they became 12 blood-red orbs that were two meters wide. They floated a few centimeters above the ground and exploded out with a formless suction power, causing the blood in the surroundings to flood together.

The allied side quickly sensed the danger and immediately gave the order to attack those blood-red orbs.

Swish, swish, swish...

Arrows shot out quickly and descended like rain, but they pierced through the blood-red orbs and did not have any effect on them, nor did they affect the blood that was gathering.

As the blood continuously gathered, they became 12 enormous orbs of blood – the Talisman Arrows had killed tens of millions of people, and the orbs of blood had gathered tens of millions of people’s worth of blood.

Boom! Boom! Boom...

The massive orbs of blood lined up and shot out countless blood-red tentacles. All of them contained massive power and tore through soldiers’ chests; some pierced through dozens of soldiers’ of chests.

Those soldiers directly died and their bodies quickly withered as all of their blood was sucked away by the tentacles. Countless people died in an instant, creating a horrific scene.

The allied side felt quite startled and had never thought that the blood-red orbs would have such terrifying power. As such they did not hold back.

“Roar! Roar! Roar...” Massive roars sounded out as magic formations were activated and boundless Yin Qi gathered, forming ghost tigers that were over 1,000 meters long. There were hundreds of them, and they gave off powerful auras as they charged at the blood-red orbs.

Boom! Boom! Boom...

The blood-red orbs' tentacles gave off immense power as they shot towards the hundreds of ghost tigers incredibly quickly.

Some ghost tigers swiped with their paws, sending out terrifying blades of energy that slashed apart the incoming tentacles; some gave off massive roars that sent out monstrous sound waves that shattered the incoming tentacles.

Swish, swish, swish...

However, the tentacles that were slashed apart or shattered re-formed into blood-red blades that gave off terrifying power as they shot towards the ghost tigers, bringing with them blood-red sword lights.

“Roar! Roar! Roar...” Massive cries of pain sounded out as the ghost tigers were pierced by the countless blood-red blades, and their bodies dissipated into blood-red ghostly qi.

However, some ghost tigers erupted out with boundless gray flames that burned many of the tentacles. The Blood God Demons were immune to some physical attacks, but they did not have much resistance against energy attacks.

“Roar! Roar! Roar...” Massive ghost tigers once again condensed and gave off enormous roars as they rushed towards the blood-red orbs with boundless ghostly flames.

Even though the ghostly flames were effective against the blood-red orbs, the blood-red orbs did not seem to be afraid. They continued to shoot out countless tentacles to attack the ghost tigers. The tips of the tentacles crystallized, allowing them to create massive wounds, and the blood-red orbs also used the tentacles to attack soldiers and gain even more blood.

Swish, swish, swish...

Great Qin's soldiers once again shot out countless rays of light, and they flew with immense power, tearing apart countless soldiers' bodies. Countless cries once again sounded out, and blood dyed the ground red.

By now, the allied side's defensive formation had crumbled, and facing the Talisman Arrows and tentacles' attacks, the scene became quite chaotic.

Boom!

At that moment, Great Qin's soldiers surged forwards like a tsunami, crashing into the allied army. A massive sound rang out and the battle officially began.

A Great Qin soldier held a spear and pierced through an allied soldier's throat, while another Great Qin soldier rushed up with his saber and swung vigorously, chopping an allied soldier's head off. Another Great Qin soldier vigorously hacked down with his axe, splitting an allied soldier's body in half.

The allied side was in complete chaos. After taking three terrifying blows, morale was incredibly low, and the soldiers were panicked as they defended.

Hearing that the Yellow Springs Kingdom was attacking on this side, the other three sides ferociously attacked the Yellow Springs Kingdom.'

However, the Yellow Springs Kingdom's forces on the three other sides were prepared and had been waiting for them.

The three other sides also had some Talisman Arrows. They did not have as many as Zhao Fu's side, as Zhao Fu's side was the main attacking force.

Even though they did not have as many Talisman Arrows, they were still able to create massive effects with them. The allied armies gave off terrifying auras as they flooded forwards towards the defensive walls, but as waves of Talisman Arrows shot out, they killed many people and greatly reduced their momentum.

Bang! Bang! Bang...

Loud explosions sounded out as Great Qin's soldiers threw out Destruction Crystals, resulting in massive explosions. Even though there were not many of them, they were still able to create a lot of chaos in the enemy forces.

The three other sides also condensed many powerful ghost creatures that charged towards the defensive walls, while the Yellow Springs Kingdom's soldiers exploded out with terrifying auras, and their yellows auras formed Yellow Springs Beasts that fought against the ghost creatures.

Great Qin's soldiers also used their Corps Formations and created powerful creatures to support the Yellow Springs Kingdom's soldiers.

Chapter 1725: Earth Book

By now, the attacking soldiers on the three other sides had reached the defensive walls and started to attack. They used various methods to scale the walls: some used ladders, some used grappling hooks, and some leapt up.

The Yellow Springs Kingdom focused on defending and continuously used arrows, heavy objects, and Yellow Springs water.

The Yellow Springs water was the water from the Yellow Springs. It did not harm Yellow Springs soldiers and instead brought them benefits, but it was incredibly dangerous to anyone else, as it could corrode their bodies and equipment.

However, ordinary Yellow Springs water was not very powerful; the soldiers on whom it was poured on would not immediately die, and they could use their energy to resist it.

This was the Yellow Springs Kingdom's goal, to weaken the soldiers so that by the time they scaled the walls, they would have to resist the corrosion of the Yellow Springs water while also fighting the Yellow Springs soldiers.

The Yellow Springs soldiers were focused on defending, and there were 1.3 billion soldiers on each side. With the items that Zhao Fu had prepared, they would be able to keep the attackers at bay and tie them down so that they could not reinforce the Ghost Tiger Kingdom's side.

The two sides quickly clashed, and the sounds of weapons colliding continuously sounded. Blood flew everywhere as people fell; the battle was incredibly intense.

Even though the enemy had superior numbers, the Yellow Springs soldiers and Great Qin's soldiers were stronger, and it seemed that the Yellow Springs Kingdom had the advantage.

Back on Zhao Fu's side, the battle between the two sides was incredibly intense. The allied forces were at a disadvantage because the previous few waves of attacks had sent them into chaos. They were unable to effectively defend against Great Qin's soldiers' attacks and could only rely on the soldiers at the back who were not in chaos.

The Desolate God raised a hand and a powerful aura spread out as bloody mist rose from the ground and formed bloody clouds in the sky. They gave off immense power and an enormous pressure spread out as blood-red light shot out from the clouds.

As the blood-red light fell on Great Qin's soldiers' bodies, Great Qin's soldiers felt a power attach to their bodies, making them stronger and causing their blood to boil, giving them even more will to fight.

The Desolate God's blessing made Great Qin soldiers even more ferocious, and as they attacked the allied forces, the allied forces were gradually pushed back.

Seeing that the allied forces were being suppressed, Zhao Fu gave a smile and disappeared.

The various Kings' expressions were quite grim. If this battle continued on like this, they would definitely lose. They did not have any power to change this – not only were the enemy's soldiers powerful, but they also had many tricks.

“Arghh!” A cry sounded out as everyone's hearts tightened and they turned to see a person in a black cloak appear behind a King. His sword stabbed through the King's heart, and blood leaked out of that King's mouth as his gaze became dim and he fell to the ground.

Even though they did not know who Zhao Fu was, Nation Armaments' powers blasted out as countless terrifying auras spread out, causing wild gales to blow out.

The enemy had dared to come here alone, and he only had Great Earth Realm Cultivation, causing everyone to coldly laugh; this was simply seeking death. This person most likely had an important mission from the Yellow Springs Kingdom, so the Kings did not think too much and gave off terrifying auras and rushed at Zhao Fu.

Seeing the incoming Kings, Zhao Fu smirked and exploded out with his Nation Armament's power. A powerful black aura flame blazed around his body, causing a powerful gale to spread out.

Shing!

Zhao Fu slashed out and a massive blood-red sword light containing terrifying power slashed out, bringing with it a wave of blood-red sword wind. It cut apart five or six Kings' bodies, causing blood and limbs to fly everywhere.

The other Kings were greatly startled and their bodies froze as they looked at Zhao Fu with terror. They had never thought that Zhao Fu would have such terrifying power.

Zhao Fu had used his Nation Armament's power, which now had the power of nine worlds. It was only one away from becoming a Royal Kingdom, and it was not something that these Kings of tiny Kingdoms could compare to.

Seeing them all stand there in terror, Zhao Fu did not hold back and once again slashed out, sending out a sharp sword arc that seemed to slice the air apart, and a few heads fell to the ground as blood sprayed out of their necks.

Everyone else quickly came back to their senses. This person in front of them was a monster, and they immediately started to run.

Zhao Fu gave a cold smile as he chased behind the Kings. Some guards rushed up, wanting to protect their Kings, but they were easily slashed apart by Zhao Fu and were unable to stop him at all. The main army was tied down by Great Qin's soldiers, so they were unable to help either.

They were already losing, and now that their Kings had died, they lost even more morale. Some people even started to run away, and once there were a few people who started, more and more people started to run, causing their side to collapse.

Zhao Fu chased down the various Kings in the sky, while Great Qin's soldiers chased after the allied forces on the ground; Great Qin had won this battle.

However, Zhao Fu did not stop, and he ordered his soldiers to continue to charge and kill all enemies.

After hearing about the complete loss on the western side, the allied forces on the three other sides immediately retreated. They would not be able to break through the Yellow Springs Kingdom's defenses and already had suffered many losses. If they were pincerred, they would definitely suffer a terrible defeat.

A few days later, Zhao Fu grinned as he looked at the 200 or so Nation Armaments in front of him. These Nation Armaments were from the Kingdoms that the Yellow Springs Kingdom had conquered, as well as from the allied forces on the western side.

These Nation Armaments all had ghost attributes and had the Underworld's Fate. They were not suitable to be used in the Heaven Awaken World, so it was best to use them for the Sealing Heaven Suppressing Earth Formation.

Zhao Fu did not want to waste so many Nation Armament, so he planned to build a subsidiary formation for the Sealing Heaven Suppressing Earth Formation here. After all, the Yellow Springs Kingdom in the Underworld was also a part of Great Qin and they could not just leave it out.

Soon, people had built towers in the Yellow Springs Kingdom, forming the Sealing Heaven Suppressing Earth Formation. It was not usable yet, and it required a portion of the main formation's power to be split off into it in order to use it.

Zhao Fu stood in the Yellow Spring Kingdom's main tower and started to split off some of the main formation's power. A massive formation appeared in Great Qin's territory and Heaven and Earth Power continuously gathered as a massive power entered the ground.

Boom!

A powerful pillar of light blasted down from the sky and landed on the tower as a formless energy spread out. The entire magic formation was activated as the countless Underworld Nation Armament's gave off an intense light and enormous amounts of Underworld Power madly gathered, causing clouds to swirl.

Zhao Fu stood in front of the magic formation and the image of a book appeared. This was a subsidiary formation and did not need the actual core Nation Armament. A portion of the power of the core Nation Armament, the Book of God, was split here as well.

Massive amounts of Underworld Power flowed into the image of the book, causing it to give off a terrifying aura. It became more and more corporeal until it became a gray book. What made Zhao Fu feel quite surprised was that this book was called the 'Earth Book.'

At the same time, Zhao Fu received a system announcement that boundless Heaven and Earth Power had entered the Book of God and that its name had been changed to the 'Human Book.'

Chapter 1726: Human Book

Zhao Fu felt quite startled and had never thought that such a thing would happen, and he looked at the Earth Book floating in front of him.

The cover of the Earth Book seemed to be made out of stone and had many ghosts carved on it. The words 'Earth Book' were written on the spine and it was about five centimeters thick.

Zhao Fu felt quite curious and looked at the Earth Book's information, and countless people's names flowed out, floating in the surroundings and giving off faint light.

Yellow Springs Empress – Huang Quanling; Yellow Springs Empress – Qing Yayuan; Yellow Springs Empress – Liu Yeye; Yellow Springs Empress – Yan Yan...

Zhao Fu looked through the names, and the ones at the front were the 12 Yellow Springs Empresses. The others also belonged to the Yellow Springs Kingdom.

This book could also control everything in the Yellow Springs Kingdom, such as Heaven and Earth, every blade of grass, and every tree. Everything was within the control of the Earth Book; it was similar to a world's consciousness.

After looking at the Earth Book's information, Zhao Fu immediately returned to the Heaven Awaken World and came to the main tower in Great Qin. After becoming the Human Book, the Book of God had also gone through big changes.

The cover now seemed to be made out of green jade, and a prosperous scene of the human world was carved on it. The words 'Human Book' were carved on the spine, and it was about as thick as the Earth Book. However, the light and aura that it gave off were far more powerful.

Zhao Fu guessed that this was because of the fact that Great Qin controlled nine worlds in the Heaven Awaken World, while the Yellow Springs Kingdom only controlled two worlds' worth of territory in the Underworld. Moreover, the Human Book was the original copy while the Earth Book was a subsidiary.

Zhao Fu looked at the Human Book's information and found that its function was similar to the Earth Book – it recorded all kinds of people's names and could also control Heaven and Earth Power.

It seemed that the Earth Book and Human Book were core items for governance, and they would become important items for controlling worlds in the future.

The reason that Zhao Fu had made the Book of God the core item of the Sealing Heaven Suppressing Earth Formation was because he was impressed by its special attributes, and he was not too surprised that it had become the Earth Book and Human Book.

Apart from Zhao Fu, the other person who could control the Earth Book and Human Book was Ling Ji, who used to be the human world's consciousness. Apart from them, no one could control the two books.

After looking through the Human Book's information, Zhao Fu returned to the Yellow Springs Kingdom because he had not finished dealing with matters there. The Yellow Springs Kingdom had only destroyed the factions in the west, and there were still three other sides.

After destroying the factions in the west, they had received great gains: around ten billion people and countless other resources and Cities.

Of course, there were countless beauties and female members of the royal family. They were quite important as they could be used to refine Nation Armaments.

Now, these women had been brought to Great Qin to provide large amounts of Phoenix Qi. By now, the Emperor Phoenix Statue's power was incredibly terrifying, and it was not any inferior to a Nation Armament's power.

The factions on the three other sides fell into terror. Now that the Yellow Springs Kingdom had destroyed the factions on the western side, its strength had greatly increased while theirs had greatly plummeted. They were now the weaker side.

They knew that the Yellow Springs Kingdom would soon make a move against them, so they quickly built defenses and prepared to defend.

Zhao Fu wanted to take down the factions on the three other sides in one go, but he was not sure if they could indeed do so. After destroying the western factions, the Yellow Springs Kingdom had gained around ten billion residents, which was equivalent to one-quarter of their previous population. If they started an uprising, the consequences would be quite severe.

Moreover, they had not truly taken control of the western factions' territory, and there could be hidden troubles. This made him give up on attacking the three other sides, and he decided to digest and stabilize for now. After properly dealing with the residents and territory, they would make a move.

"Husband, now that you're free, can you give us some love?" The 12 Yellow Springs Empresses looked at Zhao Fu flirtatiously and in expectation as they gathered around him.

Zhao Fu lightly laughed; he indeed did not have anything to do right now. All the matters regarding stabilizing and digesting could be left to the various Ministers.

He hugged the women with both arms and walked into the palace before starting to do it with them. After not doing it with Zhao Fu for a long time, they were incredibly desperate and lewd, lustfully crying out.

Afterwards, Zhao Fu put on his clothes and left behind the group of red-faced, panting beauties on the ground.

Zhao Fu then came to the Outer World. Hearing that Zhao Fu had arrived, everyone came out to greet him.

Arasina lightly harrumphed, "You remembered to come back?"

Zhao Fu lightly laughed and brought her into his embrace as he asked, "How have we been developing in the Outer World? Has anything big happened?"

Arasina's expression softened as she said somewhat flirtatiously, "I'll tell you in detail in bed."

The other women's faces became red as they looked at Zhao Fu in expectation. They had not seen Zhao Fu in a long time and desperately needed him.

Zhao Fu laughed and nodded, properly satisfying the women. Afterwards, he lay on the bed with one arm around Arasina and the other around Bai Xihan as he smiled and asked, "Now, can you tell me?"

Arasina's face was red as she gave a pleased smile and started to tell Zhao Fu about everything that had happened in the Great Qin Territory.

The Great Qin Territory had not developed too quickly, unlike the Underworld, as they had faced many obstructions. After all, Great Qin was an outsider and was the enemy of all creatures here.

The key thing was that the creatures could not be subdued or tamed, and they could only be killed. This meant that they could not gain their strength, making their development quite slow. The only thing of use was the various items they obtained.

Now, the Great Qin Territory had control over an area that was about the size of one-third of a normal world. The danger zones in the surroundings had also been cleared out, resulting in them obtaining large amounts of materials and resources. They also had many Dens, and now there were around 3,000 Insect Den Wyverns.

However, the Great Qin Territory also faced some powerful enemies in all directions. They greatly restricted the Great Qin Territory's development, making it so that the Great Qin Territory could not expand out.

The east side was the most dangerous side, because there were large numbers of Outer World people there. They numbered in the tens of millions and controlled ten billion insect creatures.

The Great Qin Territory only had three billion soldiers, and if those Outer World people controlled the ten billion insect creatures to attack, that would be incredibly dangerous and it would be incredibly difficult for the Great Qin Territory to deal with them.

Chapter 1727: Refining Battlefield

Moreover, they were highly intelligent, unlike those brainless insect creatures. The Outer World people had already discovered the Great Qin Territory's existence, but perhaps because they understood that Great Qin was not ordinary, they did not directly attack.

On the northern side, there were large numbers of beast-type creatures. They looked somewhat like oxen, but when they opened their big, bloody mouths, there were countless sharp teeth, which made them look quite terrifying. They numbered around six billion.

They were called Terror Oxen and were large-sized creatures. They were powerfully-built and had immense destructive power. They were much more difficult to deal with than ordinary insect creatures, and once they started to madly charge towards the Great Qin Territory, it would be very difficult to stop them.

There was also the south side, where there were aquatic-type creatures. They looked like ribbonfish and had flat bodies and blue eyes. They had mouths filled with sharp teeth and could swim in water as well as fly in the sky.

There were around five billion of them, and they were quite difficult to deal with as they could fly.

In comparison, the west side was somewhat simpler. There were large numbers of insect creatures there, around five billion. They looked like cockroaches and were a dark red color. They could not fly but could move quite quickly.

Zhao Fu felt quite frustrated. In the Heaven Awaken World, Great Qin had to face the Devil Horn Empire, second Wind God Empire, and the new alliance, while in the Underworld, they still had enemies in three directions that they had not destroyed. He did not have any forces to spare at all.

He could only tell the Great Qin Territory not to expand too quickly and slow down its development. In any case, expanding out would just give it more territory and some resources, and that would not increase its battle power by much.

There was also the nurturing of the Blood Demon Snake Mosquitos, which had gone quite well. There were now a few million of them – they were Stage 3 creatures, and having nurtured a few million of them in such a short period of time, this would mean tens of million in one year.

This was much faster than nurturing soldiers from Stage 1 to Stage 3, and the Blood Demon Snake Mosquitos could also breed among themselves as well. The Blood Demon Snake Mosquitos' reproductive abilities and speed at which they grew were astonishing.

Zhao Fu felt quite delighted; when the time came, Great Qin would have a powerful insect creature horde helping them conquer their enemies.

Now, the Great Qin Territory was focused on defending, and it started to build all kinds of defensive structures to defend against the dangers on all sides.

Following this, Zhao Fu once again returned to the Heaven Awaken World.

Now, Zhao Fu's task was to increase the number of people in Sword Obsession. The Emperor Killing Sword could have long since leveled up, but Zhao Fu did not have time to capture Sword Cultivators – this time, he required 10,000 relatively talented Sword Cultivators.

The people in Sword Obsession were quite frightening; no matter how one killed them, they would not stay dead. 10,000 people in Sword Obsession were stronger than even one million soldiers.

It was difficult to find so many people with talent in Sword Cultivation, but Zhao Fu had long since had a target, which was naturally the Ancient Sword Sect.

Now that Zhao Fu's Nation Armament had the power of nine worlds, even if he met the Ancient Sword Sect's Sect Master, he would not have to be afraid. He would not be humiliated like he was in the past; now, it was not certain who would win.

Zhao Fu started to make preparations. Zhao Fu still remembered what had happened back then, and the flames of his anger had not quelled. After such a long time, it was time to pay back this debt with interest.

At that moment, an unimaginably big world was slowly moving towards the Heaven Awaken World with terrifying might. Space itself was unable to withstand that power and continuously twisted and ripped apart.

The Heaven Awaken World gave off a rainbow-colored light that turned into a barrier that blocked in front of it. That world gave off a strange blood-red light and an extremely terrifying power slammed into the Heaven Awaken World.

Boom!

A shocking explosion sounded throughout the entire world, including the Godly Spirit World and Underworld.

The entire Heaven Awaken World violently trembled, and countless boulders rolled down as massive waves crashed. Some structures directly collapsed while birds flew into the air in terror and countless beasts ran in panic.

The world became chaotic and an extremely dangerous aura spread out, instantly covering the entire world. Countless people felt as if they had fallen into icy water, and they could not help but tremble.

The trembling went on for a while, and Zhao Fu, who was in the middle of preparing, looked quite shocked. He did not know why the entire world was shaking. Moreover, that aura was simply too terrifying.

In the midst of his confusion, he received a string of announcements.

“System announcement! The Refining Battlefield has opened.”

“System announcement! The Battlefield Door has opened.”

“System announcement! Factions of at least Dukedom Kingdom level can pass through the Battlefield Door to enter the Refining Battlefield or Outer World Battlefield.”

“System announcement! After entering a Battlefield, killing creatures of other worlds will give points that can be used to exchange for rewards.”

“System announcement! The variety of rewards has been updated.”

“System announcement! The quality of rewards has increased.”

“System announcement! The number of rewards has increased.”

“System announcement! Spirit qi has weakened; Region Power has weakened; World Power has weakened; Fate has been affected.”

“Warning! Factions of at least Dukedom Kingdom level must obtain a certain amount of points every month. If the points requirement is not met every month, corresponding punishments will be given. If the points requirement is not met for an extended period, the faction will lose its Kingdom status and the entire Royal or Imperial Clan will receive a backlash.”

“Warning! The Battlefields prohibit in-fighting. Violators will be severely punished. Heavily violations will result in immediate extermination.”

“Warning! Anyone who submits to enemies from other worlds will immediately suffer divine punishment, resulting in immense pain and even the destruction of the soul. The punishment will also apply to their entire family and friends.”

Zhao Fu looked quite confused; he had never thought that another Battlefield would open. Could it be that disturbance from before was another world crashing into the Heaven Awaken World?

Now, the Heaven Awaken World’s boundaries looked quite dangerous. The situation was not great with the Outer World, and now there was another unknown world. It seemed that it was not any weaker than the Outer World.

The three final system announcements were also quite scary. The first one stipulated that if they did not gain enough points every month, they would lose their status as a Kingdom.

This meant that a Kingdom would become an ordinary faction without the various privileges and powers of Kingdoms.

The Royal or Imperial Clans would also receive a backlash. Zhao Fu had suffered this before, and it was incredibly painful. It would also cause one's power to weaken and make it difficult to recover. If a Royal or Imperial Clan suffered this, it would cripple the entire Royal or Imperial Clan.

The second prohibited in-fighting, and any violators would be exterminated. This was quite terrifying, as this would be the Heaven Awaken World directly acting, and perhaps even Celestials would not be able to survive.
