

## The Lord 601

### Chapter 601: Conclusion

Xianru offered a piece of paper to Zhao Fu. He took it and looked at Nü Lü before lightly laughing, “What, are you feeling shocked?”

Nü Lü came back to her senses and couldn't help but smile. “No one would expect that you are Great Qin's Legatee. The Ying family would never expect Great Qin's Legatee, who they have been searching for all this time, to have always been with the Ying family. You've fooled the entire world!”

Zhao Fu smiled as he said, “That was just to maximize my benefits. Only by shrouding Great Qin's Legatee in mystery can I make people respect him.”

Hearing this, Nü Lü nodded and felt that she understood the things that Zhao Fu had done before a bit more.

Zhao Fu took out the Imperial Ruler's Seal and pressed it against the paper. Immediately, the paper gave off waves of golden light, making it seem quite extraordinary, and the light was filled with a prestigious, noble aura.

“We, Great Qin's Legatee, confer on Nü Lü the title Imperial Concubine, and you will receive the acknowledgment of Great Qin's Fate!”

Zhao Fu waved his hand, and the paper turned into a golden light that entered Nü Lü's body. Suddenly, golden Phoenix Qi flooded out, instantly covering the Meeting Hall. Everyone present felt incredibly shocked upon seeing the amount of Phoenix Qi that Nü Lü possessed.

“Skreeee!!”

A piercing Phoenix cry that seemed to pierce through the heavens sounded out. The crystal Emperor Phoenix Statue once again became a golden phoenix and flew in the sky as Nü Lü's Phoenix Qi rushed towards the sky.

Boom!!

After absorbing the immense amount of Phoenix Qi, the golden phoenix exploded out with an even more powerful aura and gave off a brilliant golden light, seeming to dye the entire world golden. The golden Phoenix's body immediately became 30 or so meters long, which was many times bigger than before.

A small golden Phoenix descended from the sky and entered the Meeting Hall before being absorbed into Zhao Fu's body. Countless traces of golden light passed through Zhao Fu's body, causing Zhao Fu's injuries from the Fate backlash to be instantly healed.

Boom!!

A massive explosion rang out, and everyone in the Midland Continent heard this. They all looked up at the sky and saw that the weather had suddenly changed.

“System announcement! Great Qin's Fate has recovered, and Great Qin's Legatee's injuries have recovered. The shift in Fate has concluded!”

“System announcement! The shift in Fate has concluded, and the invaders' bonus stats have been canceled. Killing Chinese players will not give any additional rewards, and conquering Chinese territory will not give bonus Fate!”

“System announcement! Congratulations to China for successfully defending against the invasion. All who participated in the defense will receive 100 War Points!”

“System announcement! China should repel the intruders. Killing the intruders will give four times War Points!”

System announcements continuously sounded out in countless players' minds. The 21 invading countries' momentum weakened while China's momentum became much stronger.

Many people from the foreign countries decided to retreat. Now, they were classified as intruders, so if they stayed here, they would be furiously attacked by China.

This was a world where personal benefits reigned supreme. Because of the plentiful rewards, countless ordinary players had attacked China and invaded.

However, now that there were not any benefits, no one wanted to invade anymore. This was a world where everyone pursued their own benefits, and patriotism had its limits. Who would give everything they had for their countries? Perhaps very few people would do so, but their numbers could not compare to those who wouldn't.

When tyrants ruled, people only rebelled because their interests were harmed.

The equipment, skills, and cultivations that players possessed were worth hundreds of thousands of dollars, and who would want to sacrifice all of that for nothing?

Before, China had been suffering continuous losses not only because they did not have sufficient preparations but because many people did not want their interests to be harmed.

Back when they had been attacking Great Qin, they were extremely passionate because of the massive rewards from the various Dynasty Legatees and factions. Otherwise, who would do such a thing without any incentive?

Some people would claim that they were not afraid of anything and not back down when facing any enemies. However, that was only for the ones who did not have anything.

When one had possessions worth hundreds of thousands of dollars, which would be lost if they died – things that could change their lives – would they still do the same?

No matter which country it was, everyone pursued their own benefits.

Now that the Chinese side had a large amount of benefits available to them, their morale continuously rose. Countless people used Boundary Medallions to go to the boundary regions. The invading ordinary people just wanted to retreat, as there were no longer any rewards and they had already obtained their rewards, so they just wanted to leave now.

China now formally began its counterattack. At the southern side, China gathered 20 million people and defeated the Russian army in one fell swoop. The proud and elegant Oleg, seeing his army being annihilated, had an ugly expression as he ordered a full retreat.

Facing the Mongolian army's terrifying steel cavalry, the Chinese side prepared countless heavy ballistae, armor-piercing arrows, and defensive carts. They no longer passively defended, and they instead braved the countless arrows under the shielding of their defensive carts. They successfully destroyed part of the Mongolian army and sent the rest into retreat.

Facing Kazakhstan, the Chinese side gathered eight million people and forcefully fought back, successfully beating them back.

On the eastern side were the ones who put up the most resistance, Japan and South Korea. These two were the most arrogant countries, while the other countries had all been sent into retreat by China.

Facing the resolute resistance from these two countries, the Chinese side gathered in the Flowing Wind Region and Great Sun Region for decisive battles, and the Chinese side finally successfully sent the two countries into retreat.

The battle forces between China, Japan, and South Korea was roughly the same, and the only reason China was able to win so decisively on all fronts was because everyone on the Chinese side was united and filled with battle intent. On the other hand, the two countries with ordinary players had long since wanted to stop fighting. The Chinese players valiantly rushed up to kill their enemies, most likely because of the increased rewards.

Many Japanese and South Korean players were caught by the Chinese side, and they knelt on the ground and continuously cried out.

"China's the strongest, and we admit our loss. Please spare us!"

"We're sorry! We'll kowtow to you, so please let us off!"

"Lord! Please forgive us this once. Everything I have on me is all I have; please spare us just this once!"

"Chinese people are the most powerful in the world! Please let us inferior existences off!"

In the face of losing everything that they had, all of them submitted and wanted to live. Just like what they had done, China humiliated the other side – now, their positions were completely reversed.

The northern side of the Midland Continent was still the calmest. After all, there were not many people there, and because the countries over there feared Great Qin, they had not invaded much.

After the system announcements sounded out, those countries had silently retreated from the regions they had conquered and returned to their own territory, so there was not much conflict up there.

On the western side, seeing that they had lost the advantage, Shama could only choose to retreat. However, they had no intention of giving back the regions that they had conquered; they only gave up on delving deeper. They continued to occupy the 13 regions close to India's territory.

## Chapter 602: Time of Peace

Apart from India on the western side, China was able to reclaim all of the regions that it had lost. Some players instead started to invade the original invaders' territories, but most people had stopped.

After all, they did not receive any bonus rewards from invading their territories, as the system announcement only stated that they would be given additional rewards for repelling the intruders. If they went to other countries' territories to kill people, they would not receive any additional bonuses and only gain the standard amount for killing people of other countries.

China's crisis was now over, which was what Great Qin and the other Dynasty Legatees wanted. China now had a brief time of peace again.

Most people were quite happy about this, and this was especially so for the Hundred Schools of Thought, the Ancient Clans, and the governmental faction. Now, China could stabilize again.

This period of time should have been one for development, and if they had internal conflict, China would continuously be weakened and perhaps something like this could happen again. What they wanted was for China to be at peace internally.

Within an ancient-looking room, a handsome young man with an extraordinary aura mumbled with an expression of disbelief, “This is impossible. Lil Lü would never willingly marry someone else. Back then, we already made an agreement!”

This young man was Xuanyuan Xiu, the Xuanyuan family’s Legatee, and the ‘big brother Xuanyuan’ Nü Lü referred to.

Thinking about everything that had happened between him and Nü Lü since they had grown up together, as well as that sweet promise they had made, Xuanyuan Xiu felt as if his heart was being ripped apart. Tears trickled out of his eyes as he continuously shook his head, unable to accept this.

The elderly woman sighed and tried to comfort him, saying, “Lil Xiu, this was a decision made by Nü Lü. I tried to persuade her otherwise, but now that the shift in Fate has concluded, this means that she has become Great Qin’s Legatee’s person. She is now within Great Qin’s territory, so it’s impossible that you’ll see her again. She left you a letter to help you forget about her and start anew.”

After saying this, the elderly woman handed Xuanyuan Xiu a letter before leaving with a worried expression.

Xuanyuan Xiu hurriedly opened the letter, and after reading its contents, he bitterly wept in pain and collapsed to the ground as he howled.

China’s number one beauty marrying into Great Qin made many people feel sorry for her. It could be said that China’s peace had been brought about by her singlehandedly.

Many famous poets and artists wrote poems and songs to honor Nü Lü for her selfless sacrifice. In just a moment, Nü Lü’s fame rose to a terrifying level.

It was a pity that none of them would ever be able to see her again because they all understood who she belonged to now.

If the person was a good person and treated her well, they would not feel any pity and would instead congratulate her. However, that person was not only cruel but also licentious. Nü Lü’s life would be ruined after marrying such a person.

However, this was not something they could change now. With how terrifying Great Qin was, they could only sigh and mourn for Nü Lü.

Back at Great Qin, after a few days, nothing had happened. Nü Lü had thought that Zhao Fu would hold a banquet and formally marry her before consummating with her.

However, unexpectedly, Zhao Fu had not done anything after making her a concubine and had only told people to look after her. Nü Lü felt quite disappointed, and she realized that she was only an ordinary person in Zhao Fu's heart and not special at all.

However, Nü Lü did not choose to leave. Instead, she often remained within the Meeting Hall. This was the center of Great Qin's power, and all of the important decisions were made here.

Nü Lü had another aim, which was to change Great Qin. Here, she would be able to directly talk with Great Qin's Legatee.

Zhao Fu did not chase her away because even if she heard about their important plans, she could not be able to communicate that information to the outside world.

Now that China had gone into a time of peace, Great Qin focused on developing. Its main job was to clear out the remaining three regions around it. Great Qin now had 1.8 million soldiers, and the speed at which they cleared the regions was much faster than before.

By now, they had cleared around one-fifth of East Green, and Zhao Fu decided to relocate Mountain Willow Town back to Great Qin. Liu Subai and the others did not mind because this way they would be able to integrate into Great Qin more.

As for Shattersteel Iron, it was a good material to backstab others, so Zhao Fu established a town that was focused on mining Shattersteel Iron. Perhaps it would be useful in the future.

Talisman Equipment was also mass-produced now, and they had produced roughly 700,000 or so pieces. These were all ordinary Talisman Equipment, as they had to do some research into more advanced Talisman Equipment. Zhao Fu had bought 50 Gold grade Talisman Stones, and he wanted to use them with Gold grade materials to create advanced Talisman Equipment.

The Talisman Equipment created from a White grade Talisman Stone and Blue grade materials could rival an exquisite Silver grade weapon, so if a Gold grade Talisman Stone was fused with Gold grade material, just how powerful would the Talisman Equipment be?

Hearing Great Qin's various decisions, Nü Lü felt incredibly shocked. She had never thought that Great Qin would be this powerful.

After the meeting, the various Generals all had their orders and went to carry them out. Zhao Fu remained in the hall and read through the books that he had bought from the bookshop.

Zhao Fu had gone through some of the books and had some basic understanding of the Grassi people. The ten or so books that he had bought were all very thick, and Zhao Fu was not able to read through them quickly. The Grassi people had a very long history and many different ethnicities, similar to Earth.

It started from low-grade creatures evolving into high-grade creatures, who then went to unify the world. Their social structure and nation structure were similar to Earth's.

Even though Earth's people and the Grassi people were both called Humans, they had different races, different-colored skin, and different histories.

The Grassi people were not weak at all and had Nation Armaments and Clan Armaments. They would be Earth's greatest enemies in the future, and Zhao Fu wanted to understand them more. This would be useful when fighting against them in the future.

Soon, it was night time, and after reading for the whole day, his eyes were quite sore. Just as he was about to rub his eyes, a figure darted to his side and gently rubbed his temples.

"Lord husband, are you feeling better?" Nü Lü lightly smiled as she asked gently.

Zhao Fu felt quite surprised and immediately understood. Now that he had made her a concubine, she was indeed entitled to call him 'lord husband.'

Nü Lü gave people a sense of familiarity, and even though Zhao Fu had only met her for a short amount of time, he felt that he had known her for a long time. She was one year older than Zhao Fu, but she had a very mature aura. This was especially so because of her unique motherly aura that made people feel even closer to her.

Nü Lü did not think too much about this. Since she had become Zhao Fu's woman, she was determined to be a good wife to him.

After meeting Zhao Fu and observing him, she found that he was not as ruthless and licentious as the rumors had said. Instead, he seemed like quite a gentle person. She had no idea how those rumors had spread.

### Chapter 603: Gold Grade Talisman Equipment

After hearing Nü Lü's words, Zhao Fu nodded and asked, "You still haven't left?"

Nü Lü shook her head and smiled as she said, "Lord husband, you've read for an entire day now, and it's night time. I just left for a short while and made some food. I hope it suits your tastes."

Zhao Fu looked beside him and saw a table covered with dishes. Zhao Fu had not expected Nü Lü to treat him so well, and he looked up at her.

Facing Zhao Fu's gaze, Nü Lü's face became slightly red and asked, "What is it, lord husband?"

Zhao Fu couldn't help but ask, "Why are you treating me so well? There's no need for you to do so. I know I'm not that charming for you to instantly like me. You only joined Great Qin to stop the shift in Fate, right?"

Nü Lü lightly laughed and replied, "So that's what was on your mind! Now that you're my man, I'll be with you forever, so of course I have to treat you well!"

Zhao Fu didn't know how to reply to her, and he hadn't thought about his entire life yet. He suddenly fell silent.

"Lord husband, your food's getting cold!" Nü Lü smiled as she reminded Zhao Fu.

Zhao Fu came back to his senses and nodded. He put the book aside and went to the table, picking up the bowl and chopsticks. He tried some of Nü Lü's food and found that it was quite good.

Nü Lü looked at the book that Zhao Fu had been reading and found that it was a special script. It was not a foreign language or an Outlander language.

“Lord husband, what is this book?” Nü Lü asked in curiosity.

Zhao Fu did not bother hiding anything and told her about the outside world. Hearing this, Nü Lü’s face became pale – she had never thought that there would be such a great danger in the future.

“Can’t lord husband tell the rest of the world about this so that all of humanity can make preparations?” Nü Lü sat down beside Zhao Fu and asked with an expression of worry.

Zhao Fu looked at her and replied, “That’s not possible. If the whole world found out, the Heaven Domain Boundary would be closed ahead of time. If that happens, all of humanity will be destroyed. The Heaven Awaken World develops powerful people, and only the powerful will survive. In the future, humanity will not only have to face the Grassi people but the real Heaven Awaken World.

After hearing Zhao Fu’s explanation, Nü Lü understood and felt quite happy that she had been able to join Great Qin. Otherwise, she would not have been able to know about such things.

At the same time, she understood Great Qin’s various decisions – all of it was to defend against the enemies in the future, and as the ruler of Great Qin, Zhao Fu had many things to take into consideration. Nü Lü suddenly felt that Zhao Fu was quite charming, and her gaze towards Zhao Fu became more interested.

Zhao Fu felt quite uncomfortable being looked at like this, and he asked, “Aren’t you going to eat?”

Nü Lü came back to her senses and smiled as she picked up her bowl and chopsticks and also started to eat. She did not ask about anything else big, and she instead just chatted with Zhao Fu about whether or not he liked the food and what he liked to eat.

After eating, Zhao Fu returned to reading while Nü Lü stayed by Zhao Fu’s side. She occasionally made some tea and brought it to Zhao Fu, and she sometimes did some embroidering.

The next day, Zhao Fu received news that the advanced Talisman Equipment had been made. This caused him to grin, as he had been looking forward to this. The previous night, Zhao Fu had people take Nü Lü back to her own room. His closed heart was slightly touched, making him feel a bit uncomfortable.

Nü Lü did not come over today – she could understand Zhao Fu’s personality and could tell that Zhao Fu’s heart had not fully accepted her. This would take some time, so she did not cling to Zhao Fu.

However, her relationship with Zhao Fu had already far surpassed his relationship with any of the other women, and Nü Lü was already quite satisfied with this.

Zhao Fu went to where Shi Qianhuo was, and Shi Qianhuo handed to him a sword. This sword was made from Gold grade materials and a Gold grade Talisman Stone.

This sword was different to ordinary Talisman Equipment in that its blade was covered with runes and the body of the sword was black. The sword was one meter long, and the place where the blade and hilt connected had a gold rune giving off a faint golden light. The sword gave off a powerful, mysterious aura.

Shing!

Zhao Fu sent his cultivation power into the sword, and the sword immediately devoured Zhao Fu’s power, giving off a clear sword hum. The runes on the blade lit up as a sharp sword wind rushed out. Standing by the side, Shi Qianhuo felt as if the sword qi was going to tear open his skin, and he quickly retreated.

This sword’s power was incredibly shocking, and Zhao Fu casually waved his hand, causing a sword light to flash out, drawing out a ten or so meter long sword gash on the ground.

This sword could rival a trash Epic grade weapon, but it required a lot of cultivation power, and only people with at least Stage 3 Cultivation would be able to use it.

This was simply too shocking – even trash Epic grade equipment was superior to Legendary grade equipment and had a mighty amount of power.

However, this sword's stats only had the stats of a Gold grade equipment and did not give as much as an actual Epic grade equipment. However, its power was enough.

Zhao Fu started to feel quite excited – this was a Talisman Equipment that was made from Gold grade materials and a Gold grade Talisman Stone, and it could rival an Epic grade equipment. Zhao Fu had bought 50 Gold grade Talisman Stones, so that meant they would be able to create 50 advanced Talisman pieces of equipment.

Those would be equivalent to 50 Epic grade pieces of equipment, and if his soldiers held Epic grade equipment, they would be completely unstoppable.

How could Zhao Fu not feel excited? The Kirsh Kingdom definitely would not have such things. If they could create a large number of Talisman Equipment, Great Qin would be able to stop any invasion.

However, it was a pity that this advanced Talisman equipment could only be used by people at Stage 3 or above.

However, Talisman Equipment made from Silver grade materials and a Silver grade Talisman Stone would rival a trash Legendary grade equipment.

Zhao Fu thought about it and tried out a Silver Talisman Equipment, and he found that it really could rival a Legendary grade equipment but required at least Stage 2 Cultivation.

Zhao Fu had bought 4,000 or so Silver grade Talisman Stones, so if they were all made into Talisman Equipment, Great Qin would gain the equivalent of 4,000 Legendary grade equipment. This was simply too exciting, and Great Qin would be invincible within this Legacy Land.

However, Great Qin only had a mine for Blue grade materials, Bronze Concentrate, and they still had not found a mine for Silver or Gold grade materials. As such, they could only obtain them by buying them, but this was limited.

It seemed that Great Qin would have to find Silver grade and Gold grade mines in the future – only then would they be able to mass-produce powerful Talisman Equipment.

It was a pity that these mines were extremely rare. After all, Silver grade and Gold grade materials were quite valuable, and they could only wait to see if they could find some by chance in the future.

Afterward, Zhao Fu went to the place where he had planted the Trees of Life. It had been a few days, and he wanted to see how many had started to grow.

#### Chapter 604: Incantation of Rest

After arriving at the place, Zhao Fu saw that many of the branches had withered and looked dead. However, there were a few of them that looked full of life, and they had started to take root in the soil, making their leaves look greener.

Zhao Fu took a look and found that 70 or so of the branches had died, while around 30 had survived. This was already quite good – 30 Trees of Life was equivalent to three million gold coins.

Moreover, these were branches cut off for free, and with how lush the original Tree of Life was, he would be able to cut 100 branches every month without any problems. Great Qin's plan to develop a large number of Divine Tree Warriors was coming into fruition.

However, these branches needed some time to grow, and only after they became actual trees would they be able to develop Divine Tree Warriors. Now that Great Qin had Water of Life, they could speed up their growth.

Zhao Fu felt quite satisfied with these results. Zhao Fu planned to go to the outside world again, mainly to buy more Talisman Stones.

He had bought 700,000 White grade Talisman Stones last time, and with the 100,000 they already had, they had roughly 800,000 White grade Talisman Stones. Great Qin's army now had 1.8 million soldiers, and because the number was continuously rising, they had to meet this demand.

Moreover, Zhao Fu also wanted to create Talisman Defenses. Now that they had powerful attack equipment, if they could also have powerful defenses, Great Qin's battle power would become many times more powerful, so they greatly lacked Talisman Stones.

Moreover, Great Qin also needed a large number of Stage 1 corpses. After increasing their army size, they only had 150,000 corpses left.

After continuously clearing out East Green, Great Qin's overall population continuously rose, as did their army size. 150,000 corpses definitely wouldn't be enough, and because Great Qin's main task was to clear out the surrounding regions for now, they would not attack any other regions, so obtaining Stage 1 corpses would be difficult.

It was possible that the outside world would be able to provide a large number of Stage 1 corpses, as essentially all of their corpses were at least at Stage 1, and Great Qin even had Stage 2 and Stage 3 soldiers. If Zhao Fu could obtain their corpses, Great Qin's strength would once again increase.

Those were Zhao Fu's two main goals. After doing some preparations, Zhao Fu once again stepped through the door to the outside world and left the Legacy Land.

Because he now had a map, Zhao Fu did not need to randomly fly about, and he instead flew directly towards the Kirsh Kingdom. Before he had left last time, he had asked the Swan Goose Group to obtain more Talisman Stones for him, and with their abilities, they most likely would have prepared quite a lot.

Zhao Fu once again went to the shop's private room, and Roxi was the one receiving him once again.

"Dear guest, we've prepared the Talisman Stones you wanted. Almost half of the Talisman Stones in the Kirsh Kingdom are here," Roxi said as she smiled.

Zhao Fu nodded and asked, "How many do you have?"

Roxi explained, "There are 1.5 million White grade Talisman Stones, 200,000 Blue grade ones, 20,000 Silver grade ones, and 500 Gold grade ones, totaling six million gold coins. With your VIP card, dear guest can receive a 20% discount."

Zhao Fu was quite shocked to hear that the Swan Goose Group had been able to obtain so many Talisman Stones; this far exceeded what Zhao Fu had expected. The overall price was quite expensive, and even with the 20% discount, it was still more than five million gold coins.

Spending so much money made Zhao Fu feel an ache within his heart, but Great Qin greatly lacked these resources, so he had to buy them no matter how expensive they were. Zhao Fu had prepared a spatial ring, and he put all of the money in there and handed it to Roxi.

Roxi received the spatial ring and looked within it, and she revealed a brilliant smile before giving him a spatial ring with the Talisman Stones inside.

Zhao Fu took over the spatial ring and also took a rough look, and he found that there were not any problems.

“Dear guest, this is the Swan Goose Group’s Sovereign Card; it will give you a 30% discount on everything we sell,” Roxi said as she handed over a three-colored card.

Zhao Fu had spent over ten million gold coins at their store, and that was a massive fortune that ordinary people could not even imagine. It only made sense to give such a person a Sovereign Card. After making these transactions with Zhao Fu, her position in the Group became much higher.

Zhao Fu received the card and hesitated before saying, “Manager Roxi, there’s something else that I want; I’m not sure if your Group will be able to obtain it.”

Roxi felt quite delighted; she had not expected Zhao Fu to want other things. She started to become curious as to Zhao Fu’s identity: there were less than five factions that could casually spend ten million gold coins, and with so much money, she could guess just how prestigious Zhao Fu’s identity was.

“Dear guest, as long as you have the money, we can obtain anything for you!” Roxi said as she grinned.

Zhao Fu felt much more at ease because he did not know where he could obtain corpses. The Swan Goose Group was one of the largest financial groups in the Kirsh Kingdom, so perhaps they had their ways. As such, he did not hesitate anymore and asked, “I need a large number of Stage 1 and above corpses!”

Roxi felt quite startled; she hadn’t expected Zhao Fu to ask for corpses. Ordinarily, corpses did not have much use and were simply buried.

Many people used Incantations of Rest in the Heaven Awaken World, which made it so that after death, people would not become Undead and their bodies would rest.

The Death Race was a special race in that any creature that died and became an Undead would become part of the Death Race. In order to prevent this, most people in the Heaven Awaken World used Incantations of Rest.

Roxi hesitated and did not immediately agree – after all, selling corpses seemed quite taboo.

After thinking for a moment, Roxi earnestly asked Zhao Fu, “Dear guest, do you really need a large number of corpses?”

Hearing that there was hope, Zhao Fu felt quite happy and nodded.

“I can’t make a decision on this; I have to report this to the higher-ups in the group. Dear guest, can you wait for a short while?” Roxi said apologetically.

Zhao Fu understood how difficult this matter was, so he agreed.

Following this, Roxi left, and a female attendant came in with some desserts and tea.

Half an hour later, Roxi returned and smiled as she said, “Dear guest, the Group agrees to this transaction and will help you collect corpses. However, it will be a bit expensive: Stage 1 corpses will cost 20 gold coins, Stage 2 corpses will cost 100 gold coins, and Stage 3 corpses will cost 500 gold coins.”

Roxi felt a bit nervous because corpses were essentially useless, and selling one for 20 gold coins was already incredibly expensive. After all, 20 gold coins would be enough for an ordinary family to live on for many years.

On the other hand, Zhao Fu was speechless with excitement. 20 gold coins for a Stage 1 corpse was an incredibly good deal, and hearing that they could even provide Stage 2 and Stage 3 corpses, Zhao Fu felt even more excited. After all, with those Stage 2 and Stage 3 corpses, Great Qin could nurture Stage 2 and Stage 3 soldiers.

Chapter 605: Strongest Nation

Zhao Fu suppressed his excitement and said calmly, “That’s fine. I’ll take all of the corpses you can find.”

Roxi let out a sigh of relief and felt a lot of admiration towards Zhao Fu’s grandness. She had no idea just how much money Zhao Fu had to be able to spend it so liberally.

Moreover, Zhao Fu had said that he would take all of the corpses they could find, which meant that this could become a continuous transaction. The profits that this would bring in would be enormous.

When she thought of this, Roxi felt incredibly excited and nodded, saying, “Don’t worry dear guest. We’ll help you obtain a large number of corpses, but it will take some time.”

Zhao Fu nodded and said that he would buy more Talisman Stones in the future, and he especially wanted higher-grade ones.

Roxi felt quite shocked about Zhao Fu’s fortune – he wanted even more high-grade Talisman Stones on top of the corpses; just how much money would that cost? He simply had too much money.

Zhao Fu did not mind what Roxi thought, and after their discussion, he immediately left. A few days later, he once again returned.

By now, Roxi had gathered 400,000 Stage 1 corpses, 20,000 Stage 2 corpses, and 1,000 Stage 3 corpses.

Zhao Fu was quite astounded – he had never thought that the Swan Goose Group could amass so many corpses in such a short amount of time. This was especially because of those 20,000 Stage 2 corpses and 1,000 Stage 3 corpses, which made him incredibly pleased.

The Swan Goose Group had put in a lot of effort to obtain those corpses. They had bought corpses from all over the Kirsh Kingdom, and they did not dare to touch the corpses of soldiers, as they could not afford to offend the governmental faction. Because of this, they could only turn their gaze to other sources.

As long as there was demand, there would be a supply. This resulted in a new profession, which was Graverobber, and it was especially for stealing corpses. They would come and steal the corpses that were buried.

Of course, the governmental faction would not allow this sort of behavior. If it was an unknown corpse, no one would mind, but if it was someone who had a family, there would be anger from the common people, and this matter caused a lot of tension in the Kirsh Kingdom.

Over the past few days, countless graves had been robbed, and the governmental faction started to investigate. Because of this, the Swan Goose Group started to be wary and even thought about giving up.

However, in light of the massive benefits that Zhao Fu offered, they still chose to carry this out secretly. They did not dare to be as bold anymore though, and they expanded their business to the surrounding few kingdoms.

After spending more than ten million gold coins, Zhao Fu did not have many gold coins on him, so he used equipment to trade. This equipment was not what Great Qin had made but equipment from players. There were tens of millions of them, and Zhao Fu had been worried that he would not be able to get rid of them all.

Zhao Fu set the price for the equipment quite low, and even though he suffered a bit of a loss, Zhao Fu felt that this was worth it. As long as Great Qin could obtain a large number of corpses, it would be fine.

After returning to Great Qin, Zhao Fu refined the Stage 2 corpses and obtained Stage 2 Blood God Pills, and he gave them to some of Great Qin's older soldiers. In a few days, Great Qin had 20,000 more Stage 2 soldiers, and with the ones from before, Great Qin now had 40,000 Stage 2 soldiers.

As for the Stage 3 corpses, because there were not many of them, the refined Blood God Pills were given to people who were Captain level or above.

Most of the Generals and Commanders were at Stage 3, while Zhao Fu's cultivation had reached Stage 4. He had consumed a Stage 4 Blood God Pill, and his Cultivation was at Stage 4-4.

Great Qin was also mass-producing Talisman Equipment, and apart from the offensive weapons, they had also started to produce Talisman Defenses.

One type was Talisman Armor. Talisman Armor had a mystical sheen to them, and there were a few grooves along them that had some runes within them. There was a circle at the center of the armor, which was the core, where the defense was the strongest.

If they sent their cultivation power into the armor, the grooves and circle would light up, making it seem like a piece of armor from a sci-fi movie. The armor would also become more powerful, and it would be able to rival a Talisman Equipment of the same grade.

Now, they had a large number of corpses and Talisman Stones, and the two things that had been bothering Great Qin had been resolved. Now, Great Qin just needed to steadily develop.

Zhao Fu became quite free with his time, and he mainly spent it reading about the Grassi people's history and their current situation in order to learn more about the previous world before them.

The previous, previous world's race was called the Lantong people. Their looks were like westerners, and they had deep blue eyes. However, their blood was blue.

Zhao Fu obtained a lot of information from the books, and Zhao Fu read every day.

"Lord husband, you should take a break. You've been reading the entire today," Nü Lü said caringly as she walked in with some desserts.

Zhao Fu nodded. After reading for so long, he felt quite fatigued, so he put the book aside and looked at Nü Lü.

Nü Lü's personality was like that of a woman from ancient times. Her embroidery and cooking skills were quite good, and most women now would not be able to do such things, nor would they be so considerate.

Nü Lü placed the desserts on the table before sitting on Zhao Fu's lap and gently massaging his temples.

After interacting for a few days, they had become closer and closer.

Zhao Fu closed his eyes and leaned against the chair, enjoying her massage. At that moment, Nü Lü said, "Lord husband, how is the situation in the west with India?"

Now that Nü Lü's body had entered the Heaven Awaken World, she did not know what was happening outside, and because she had no way of finding out herself, she could only ask Zhao Fu.

Zhao Fu replied, "India constructed a powerful defensive wall and continuously strengthened their forces there. Because of their faith, many of them have powerful battle intent, and because of their massive population, China isn't able to reclaim those regions for now. The fighting between both sides is quite intense, and there hasn't been a clear victor yet.

"I think that Shama is slowly assimilating those regions. Even though they are not receiving any bonus rewards anymore, they're just buying time for Shama to assimilate those 13 regions. Only after assimilating those 13 regions will they retreat to India's territory."

"When that time comes, China will only have 13 shells, while Shama, with his Nation Armament, Clan Armament, and the support of countless players, will possess strength that will surpass Great Qin, and his nation will become the strongest nation in the world."

Zhao Fu knew clearly that Great Qin would be weaker than the Maurya Dynasty. After all, Great Qin did not have the support of players, and they instead had countless enemies. Great Qin had only assimilated five regions, while the other side was assimilating 13 regions.

With so many regions and the support of countless players, Shama would definitely surpass Great Qin – this was completely obvious.

## Chapter 606 - Great World Refinement

"Stronger than Great Qin? Won't they be a great threat to China in the future?" Nü Lü asked worriedly.

Zhao Fu nodded and replied, "That's for sure. After all, India's population is not much inferior to China's, and their Legacies are not weaker either. Moreover, because India's territory is not as big as China's, the number of players they have in each region is much denser, so it is easier for them to gather together.

"As such, they have an advantage in both invading and defending, and they will be China's greatest threat in the Midland Continent. Even Russia is many times weaker than them."

“Do you have any way of stopping them, lord husband?” Hearing the most powerful person in China say this, Nü Lü started to feel quite worried about China’s future.

Zhao Fu had also thought about this, and he lightly laughed before asking, “What do you think?”

Nü Lü thought before kissing Zhao Fu on the cheek and embarrassedly smiled. She then said, “I believe that lord husband is the strongest!”

Zhao Fu couldn’t help but smile. He looked at the woman in front of him and kissed her on lips before somewhat clumsily stretching his tongue into her mouth. Nü Lü shyly reciprocated, and their tongues danced together as their body temperatures rose. A lovey-dovey aura appeared around them.

At that moment, Zhao Fu stretched out his hands to Nü Lü’s chest. He knew that her breasts were quite big, but after touching them, he found that they were incredibly big, and they were even bigger than Long Xiaoxiao’s.

A while later, Zhao Fu stopped kissing Nü Lü, but he did not move his hands as he looked at Nü Lü’s red face and lightly chuckled.

Nü Lü embarrassedly clung onto Zhao Fu and buried her head in his chest as she asked in a small voice, “Lord husband, do you want to do it? I’ve... prepared myself.”

Zhao Fu smiled as he started to take off Nü Lü’s clothes and looked at her white skin and incredibly alluring figure.

“Do you like her?” A voice suddenly sounded out in his mind – it was the golden dragon.

Zhao Fu briefly paused, and he started to feel quite conflicted. He didn’t know how to answer the golden dragon, as he was not sure how he felt towards Nü Lü right now.

“What is it, lord husband?” Seeing that Zhao Fu had stopped, Nü Lü looked up and asked shyly.

Zhao Fu smiled and shook his head, but he did not continue.

Nü Lü's face became incredibly red, and she lightly bit her lips as she took off her clothes, revealing her incredible body and enormous breasts. She then kissed Zhao Fu's lips, slipping her tongue into his mouth.

"Then just do it! I know what you're thinking!" the golden dragon calmly said within Zhao Fu's mind.

However, Zhao Fu gently pushed Nü Lü away and helped her put on her clothes again. Nü Lü felt quite surprised and could not understand why Zhao Fu had done this.

"Do you really know?" Zhao Fu said calmly out loud but to the golden dragon.

Nü Lü looked quite confused and could not understand. Seeing her expression, Zhao Fu explained about the golden dragon, causing Nü Lü to lightly cry out, and she once again buried her head in Zhao Fu's chest.

The golden dragon asked in surprise, "Aren't you going to continue? You don't need to worry about me; I'm actually a female as well. I know what you're thinking. She reminds you of your mo-."

"Enough! What do you want? And are there really male and female Fate Dragons?" Zhao Fu cut the golden dragon off.

"I can't clearly explain my situation, but what I wanted to ask was whether you wanted to control India's Nation Armaments and Clan Armament," the golden dragon said.

After hearing this, Zhao Fu wondered if he had heard the golden dragon incorrectly, and he asked to confirm, "Are you saying that I can control other countries' Nation Armaments and Clan Armaments?"

"Of course! Why would I mention it otherwise?" the golden dragon said as it rolled its eyes.

Zhao Fu felt quite shocked because this sounded simply impossible. Nation Armaments were incredibly important to countries, and they were part of their foundation. Only the Legatee of a Dynasty, Nation, or State could have one, and other people would not even be able to touch them, or they would be killed by the backlash.

As such, Zhao Fu had felt incredibly shocked when he heard the golden dragon's words.

“What sort of method is that?” Zhao Fu asked after calming himself down.

The golden replied, “It's a bit troublesome, and you'll need to make some preparations. If it wasn't because I thought India was quite a big threat and that it was better to get rid of it earlier, I wouldn't tell you this method.”

Zhao Fu nodded seriously. If he really could obtain their Nation Armaments, it would be understandable for it to be troublesome.

The golden dragon explained, “Zhao Fu, you have that Emperor Phoenix Statue, right? Catch all of the women a part of the royal family with Phoenix Qi, as many as possible, and use their Phoenix Qi to weaken the Nation Armaments' resistance. Then, use the Heaven and Earth Refining Formation to do a Great World Refinement and forcefully refine the Nation Armaments.

“If you want to also use their Nation Armaments, you'll have to capture at least 100,000 of their people – the more the better – and after taking their Fate, you'll be able to use their country's Nation Armaments.

“If you want to use their Clan Armament, it will be even more troublesome. You'll have to capture almost all of the women with Phoenix Qi from their country and use their Phoenix Qi to weaken the Clan Armament's resistance.

“If that's enough, you'll have to heavily wound their country and cause the Clan Armament to grow weaker; that way, it will be easier for you to deal with the Clan Armament.

“Afterward, you'll need to use the Great World Refinement to forcefully refine it and catch at least one million of their people, have them submit to you, and take their Fate.”

After hearing this, Zhao Fu felt quite shocked – if this was true, wouldn't he be able to steal all Nation Armaments?

A single Nation Armament was already incredibly terrifying, and if he could wield countless Nation Armaments, wouldn't he be invincible? That was simply monstrous.

Zhao Fu couldn't help but feel excited and asked, "Is this really possible? Also, what is the Great World Refinement?"

The golden dragon felt quite annoyed as it replied, "Of course it's possible. Back then, the Heaven Murder Empire had countless Nation Armaments. We didn't have the Emperor Phoenix Statue though, so it was even more troublesome. The Great World Refinement is a refinement technique created from ten people who have a large amount of Fate and are extremely powerful. They can use the Heaven and Earth Fate to conduct a refinement."

After hearing the golden dragon's explanation, Zhao Fu understood. However, the fact that the powerful Heaven Murder Empire had been destroyed by someone else was quite shocking.

Zhao Fu decided to stop thinking about this, and now that he had this sort of method, he had a reason to make a move against India.

However, Zhao Fu would not be able to fight Shama for now, as he had a Nation Armament, a Clan Armament, and a massive amount of Fate from his invasion. Zhao Fu did not have as much Fate, so he had to think of another way.

#### Chapter 607: Beginning of Preparations

"I've decided to make a move against India!" Zhao Fu said to Nü Lü in his arms.

Hearing this, Nü Lü kissed Zhao Fu on the cheek and lightly smiled as she said, "I knew lord husband would do something about this!"

Zhao Fu also laughed. If it wasn't for the method that the golden dragon had mentioned for stealing Nation Armaments and Clan Armaments, Zhao Fu would not have been able to make this decision.

"Alright, I'm going to return to the real world," Zhao Fu said.

Nü Lü nodded and thought of something before saying, "Lord husband, I've been at Great Qin for a while and haven't told my family how I am. Can you pass on a message for me to the Ancient Clans and tell them I'm doing fine and for them not to worry?"

Zhao Fu nodded and agreed before returning to the real world.

After his consciousness returned to his body, Zhao Fu called over Mu Guilin and had him bring all of the information they had on India before asking someone to invite Su Yuyan.

After a while, Su Yuyan arrived and looked quite surprised. It was quite difficult to meet with Zhao Fu, and this was the first time that Zhao Fu had taken the initiative to request to meet with her.

“What is it? Don’t tell me you missed me,” Su Yuyan said amusedly as she sat down next to Zhao Fu.

Zhao Fu lightly laughed, “Looks like a superstar like you is quite narcissistic. I want Flower Moon to help me find information on a person; I’m sure it will be quite easy with Flower Moon’s abilities. I’m considering working together with Flower Moon, and I will no longer do anything to people belonging to Flower Moon. Additionally, I can also protect Flower Moon and provide it a sanctuary within my kingdom in the future.”

Su Yuyan’s expression became serious – she knew how important this matter was. With Great Qin as a big tree to lean against, Flower Moon would be much safer in the future, and they would not have to worry about any danger.

“Whose information are you after?” Su Yuyan asked.

Zhao Fu did not hesitate and replied, “I want information on everyone in Shama’s family!”

The Ying family was powerful, but their power was limited to China. Even though they could find some information, it would not be very detailed. However, Flower Moon’s forces were all over the world, and they specialized in dealing with information, which was why Zhao Fu wanted to work together with them.

Su Yuyan understood and asked in surprise, “Is Great Qin going to make a move against India?”

Zhao Fu did not mind and nodded.

Su Yuyan smiled and said, “I can represent Flower Moon to cooperate with Great Qin, but what about our three sisters who you captured?”

“We can’t let them go as they’ve already become the Legatee’s imperial concubines, but I can help you take care of them,” Zhao Fu said apologetically.

“What? They’ve become imperial concubines?” Su Yuyan said in surprise and delight.

She and the others from Flower Moon had thought that their sisters had been made into sexual objects for Great Qin’s Legatee, being tormented every day. With how cruel Great Qin’s Legatee was, that was perfectly possible.

She had never expected that they had been made imperial concubines – this meant that they would have a high status within Great Qin and that they would not have to worry about them anymore. What Su Yuyan did not expect was that every woman Zhao Fu had taken had been made an imperial concubine.

Zhao Fu lightly nodded in response.

Su Yuyan happily scooted over, and Zhao Fu wondered what she was doing. She suddenly leaped at him and pushed him down on the sofa, and her lips heavily pressed against his. Her tongue dove into Zhao Fu’s mouth, continuously moving around, and their tongues soon intertwined as they passionately kissed.

A few minutes later, Su Yuyan heavily breathed as she flirtatious looked at Zhao Fu and said, “Thank you! It was most likely because Great Qin’s Legatee is willing to work with Flower Moon and made our sisters imperial concubines, right?”

Zhao Fu was quite surprised and had never thought that such a thing would happen. He looked at this superstar and wanted to explain.

However, Su Yuyan lowered her head again and once again kissed Zhao Fu’s lips. Another few minutes passed, after which Su Yuyan tidied up her clothes and said coyly, “I’m going now! If you want to go further, that’ll depend on your behavior.”

Zhao Fu watched as Su Yuyan left and felt at a loss as to what had just happened.

Zhao Fu shook his head and did not think about that anymore, and he had the information about his plans secretly spread throughout China. All of China felt quite delighted – they had never expected Great Qin to deal with India.

India was currently China's greatest enemy, and all of the Dynasty Legatees and factions feared it. They had conquered 13 regions, and this was like a sharp sword that pierced into China's heart, making everyone feel pained.

China had taken back most of the boundary regions and had even invaded some regions of other countries, but India had been defending those 13 regions the entire time.

In fact, on the internet, the Indian netizens said that the 13 regions already belonged to India and told the Chinese people to piss off, making them quite furious.

Despite this, China was unable to do anything about it. India was simply too powerful, and with Shama defending, China's various attempts had all failed. This had boosted India's morale, resulting in many mocking threads on the internet.

“China is complete trash. You think you can beat us?”

“Our great India is the best in the world. Even China doesn't dare to do anything to us!”

“It's obvious that lord Shama is invincible; there's no one in the world who can rival him!”

“That's right! Lord Shama is the most powerful. Isn't Great Qin's Legatee incredibly powerful? Call him out!”

The smaller countries that had been defeated were incredibly angry, and now that China was suffering, they naturally felt quite happy. They stood on India's side and mocked China as well.

“We acknowledge those regions to belong to India. Chinese people should scam!”

“India is number one, and China is number two!”

“China is useless! India is conquering your territory, but you come and attack us. You’re indeed all useless. You are chickens in front of India!”

“We support India destroying China!”

These words made many Chinese people quite angry, and many of them furiously attacked the regions that India controlled. The various Schools of Thought and Sects thought of various ways, but they were unable to break through India’s defenses. They could only suppress their anger, but they were close to exploding.

Some people thought about Great Qin and hoped that Great Qin would help, but they soon gave up on that idea. Great Qin was not in the west of the Midland Continent, and with all that had happened, it was not likely that Great Qin would help China.

Moreover, even if Great Qin wanted to help, they had just recovered and would not be able to use a lot of Fate, so how could Great Qin’s Legatee be a match for Shama? After all, Shama had a Nation Armament, a Clan Armament, and a massive amount of Fate, so anyone who came would lose.

However, Great Qin had announced that it would deal with India, which no one had expected. With Great Qin joining, countless people felt much more confidence, and their blood ran hot. Who said that China had no one capable?

Chapter 608: Peak of the World

The various Dynasty Legatees were all very supportive of this, as India had humiliated all of China, but despite trying, they were unable to do anything.

They all understood that they were inferior to Great Qin’s Legatee. Many of the difficulties they faced could be easily resolved by Great Qin.

After receiving the message passed on by Zhao Fu from Nü Lü, the Ancient Clans felt incredibly relieved.

With Nü Lü's looks, the people from the Ancient Clans thought that Nü Lü would simply be used for her body, making them feel incredibly pained. However, they could not ask for her back, as she had gone voluntarily.

However, hearing that Nü Lü was doing well, as well as that Great Qin was willing to deal with India, the Ancient Clans understood that Nü Lü had achieved her goal in changing Great Qin for the better. This was something all of the Ancient Clans wanted.

Even the elderly woman who had been opposed to this smiled in relief and supported Nü Lü's actions.

The only person who was still against this was Xuanyuan Xiu. He still had not heard about this, as he had been in the Heaven Awaken World this entire time, pursuing even greater strength. As the descendant of the Xuanyuan family, he had an incredibly powerful Legacy.

The Schools of Thought were also quite happy about the change in Great Qin. From how they saw it, what Great Qin was doing was quite unnecessary, as it was in a completely different part of the Midland Continent and had just recovered. They would not ask this of Great Qin, but Great Qin had voluntarily stepped up.

With the support of many sides, Zhao Fu smiled, as the first step of his plan was successful. After receiving the information on Shama's family, the second step of his plan was also complete.

Zhao Fu returned to the Heaven Awaken World and started to carry out the next steps. He first modified the door to the outside world. With how powerful it was, not only could it connect worlds, but it could also connect to other regions.

While it could only transport one person at a time, it could continuously transport people, so Zhao Fu planned to bring 50,000 Assassins.

The door could transport 12 people every minute, which was 120 people every ten minutes and 720 people per hour. As such, it could transport roughly 17,000 people per day, so it would take around two to three days of continuous transporting for Zhao Fu and the 50,000 Assassins to reach the western region of the Midland Continent.

Zhao Fu understood that this operation would be quite dangerous, so he had the 50,000 Great Qin Assassins all bring Talisman Equipment. The equipment was all made from Blue grade materials and Blue grade Talisman Stones, and it could rival ordinary Gold grade equipment.

Because of the Assassins' profession, they were not suited for wearing the normal Talisman Armor, so the armor was changed to light and flexible inner armor.

Most of the 50,000 Assassins were at Stage 1, and some were even at Stage 2. Zhao Fu also brought the 12 Assassin Legatees and gave them various tasks. He also brought with him the Hundred Ghost Illusionists.

As for everyone else, Zhao Fu left them in Great Qin and handed command to Bai Qi. He also had the main Great Qin army continue to clear out East Green.

After making preparations, Zhao Fu led the 50,000 people to the west of the Midland Continent.

It was impossible for India not to know about something so big. After hearing that Great Qin was getting involved, Shama and the various Indian factions had grave expressions.

This was because with Great Qin joining, the battles would become much more difficult. If this was a game, it would rise to Nightmare mode. Everyone acknowledged how terrifying Great Qin was, and no one doubted this.

The only thing to feel relieved over was that Great Qin had not completely recovered yet, and Great Qin and Great Qin's Legatee were still relatively weak, which made them feel much better. If it was Great Qin at its peak, they would not even dare to have a direct battle.

They would not lose for sure, and they even had some chances at success. If they could really defeat Great Qin, India's Fate, morale, and reputation would all be greatly boosted. No one would think that India was weaker than China, and they would believe that India was stronger than China and that India was the most powerful nation in the world.

Moreover, if they defeated Great Qin, they would not have to worry about the rest of China. They would be able to invade once again, and this would be a complete invasion without any worries. After all, after getting rid of Great Qin, there would be nothing standing in their way.

Shama would take Great Qin's Legatee's place and stand at the peak of the world, proudly looking down, and all people would have to submit.

Shama discussed with India's various large factions as to whether or not they should gather more people. They could only succeed, and failing was not an option. They had to spread chaos throughout China and step on that prideful nation, using it to boost India to the peak of the world.

On the Chinese side, they also quickly gathered people, and many Schools and Sects madly joined. Now that Great Qin had decided to help, they were filled with excitement and confidence.

The ordinary people reacted even more greatly. They loudly yelled in excitement, as not only were there immense rewards, but they also all believed that with Great Qin in the lead, they would be able to break through India's defenses and chase out all of the Indian players from the Chinese territory and vent out their anger.

Indian players and Chinese players continuously gathered, and the tension gradually built. Looking down from above, one would be able to see two masses of people that spread as far as the eye could see.

This was a battle between two countries and two peoples, and this would definitely shock the whole world and be told for thousands of years.

The entire world paid a great deal of attention to this battle. Whether it was Tina Pendragon or Akhenaten, all eyes were focused here.

Everyone knew that this battle would determine the fate of the Midland Continent, and it could even affect the entire world. After all, China and India combined had a quarter of the world's total population, and they could definitely affect the situation of the entire world.

If China won this battle, China's position would be unshakeable. If India won, India would take China's place.

However, even disregarding all of this, the intense battle between these two large nations was enough to make people incredibly excited.

After nearly three days, Zhao Fu finally transported all 50,000 people over. He then gave the 12 Assassin Legatees some tasks and had them carry them out secretly.

Following this, Zhao Fu led the 50,000 Assassins to where the Chinese camp was.

By now, there were roughly 40 million people gathered, and they were not only from the various factions but from many Schools and Sects as well. The noise was deafening, and everyone looked around as if everyone was waiting for a single person.

## Chapter 609: Great Battle

“Great Qin is here!” a person suddenly yelled, and soon, the raucous scene quickly fell quiet. Countless people looked towards where that voice had sounded out from.

They saw a person wearing a black cloak, giving off a prestigious, terrifying, and mysterious aura. He was followed by people wearing hoods, who gave off icy auras.

The countless people automatically made way and looked over with looks of curiosity, awe, and fear. So these were Great Qin’s people – they were so scary. The person walking in front was most likely Great Qin’s Legatee.

After personally seeing the renowned Great Qin Legatee, countless people felt excited and scared, but the scene remained quiet. At the center of the ocean of people, there was a building where the large factions’ representatives were gathered. After hearing this, they all moved towards where Zhao Fu was.

“I am the Great Han Dynasty’s Liu Ye!” Liu Ye brought over a group of people as he walked over to Zhao Fu, smiled, and introduced himself.

Zhao Fu looked at the refined-looking young man in front of him, nodded, and said, “I am Great Qin’s Legatee!”

Liu Ye felt a bit awkward after hearing Zhao Fu’s simple and mysterious self-introduction. He did not understand why Zhao Fu was still hiding his identity. However, there was a more pressing matter, so Liu Ye did not mind too much.

As for the Great Tang Dynasty and Great Qing Dynasty, they felt quite hesitant after seeing Great Qin’s Legatee for themselves. There was some enmity between them, so they did not come up. However, as a Legatee of one of the five Great Dynasties, Liu Ye had some confidence and came to see Great Qin’s Legatee, who he was wary of.

The battle would mainly be split into four regions, and many people had gathered here just to show respect to Great Qin's Legatee and would later move to their own regions.

The region that Zhao Fu had come to was the main battle region, where they would face the main Indian army. The 40 million players were all given to Zhao Fu to command.

Following this, Zhao Fu cordially talked with the various leaders, and the leaders' opinions of Zhao Fu somewhat changed. After personally meeting Great Qin's Legatee, they found that he was not as barbaric and ruthless as the rumors made him out to be and seemed quite kind and gentle.

Following this, the battles began, and some of them left. Zhao Fu commanded the main army, and with Great Qin's Legatee's mighty name, none dared to disobey, and they all acted incredibly submissive and loyal.

After all, their confidence this time came from Great Qin; without Great Qin, they would not have much hope at all.

Zhao Fu went to a tall platform and said with a mighty, booming voice, "There's nothing for you all to worry about! China will definitely win this time, so all you have to do is charge. Great Qin does not want any of the spoils of war, and I will instead reward all of them to you. Show these people China's true power and kill them all!"

"Victory for China! Victory for China! Victory for China!"

Countless people excitedly and passionately yelled. Their shouts were deafening, and they could be heard from dozens of kilometers away. Their morale was incredibly high, and they seemed invincible.

Zhao Fu gave a satisfied smile and formally let them out to battle!

The massive ocean of people gave off a terrifying aura and unstoppable momentum as they surged forwards.

Soon, Zhao Fu led the massive ocean of people to where India's defensive wall was. Looking at the 20-meter tall wall made from massive stones, it seemed quite difficult to break through

There were countless people standing on the wall, all of them holding weapons. They looked quite excited and had intense battle intent, showing no fear. It seemed that both sides had great motivation, and neither side's battle intent was weaker.

As the two armies faced off. The atmosphere became quite heavy, and it was as if two wild beasts were roaring at each other.

Zhao Fu stood in the air and looked at the Indian army ahead as he slowly raised his hand and pointed, yelling, "Charge!"

Boom!!

A massive sound burst forth as the massive ocean of Chinese players rushed at the Indian army.

Swish, swish, swish...

The air was continuously torn as countless arrows flew out from the walls and descended, and many Chinese players were killed.

On the Chinese side, many players also started to shoot arrows, and many people on the walls were hit and cried out.

The massive ocean of players quickly rushed to the bottom of wall, and they started to prop up ladders they had prepared and threw up grappling hooks. The Indian players continuously shot out arrows and threw down heavy objects and boiling oil, intensely retaliating.

There were many injuries and casualties on the Chinese side – some fell from a great height while others were killed by being smashed by heavy objects or burned by boiling oil. However, the Chinese side continued to charge, and the scene was incredibly intense. However, both sides started to lose vigor as they suffered many casualties already.

At that moment, a gray fog covered a 20-kilometer portion of the wall. Those within the gray fog were lost within it – Great Qin's Hundred Ghost Illusionists had acted.

Now, Great Qin's 300 Hundred Ghost Illusionists were all at least Stage 2, and some were close to breaking through to Stage 3. Unless the players' cultivations were at Stage 3, they would not be able to break free from the illusion and would be stuck within it.

Now that that portion of the wall had been taken under the Chinese side's control, countless Chinese players gathered over there and started to climb up.

On the other hand, those on the wall did not dare to enter the fog, as anyone who entered was not seen or heard from again.

It looked like this portion of the wall was about to be easily taken over, so Shama couldn't help but act. He unleashed his City Lord Seal, causing a massive aura to ripple out. An azure light shot out resplendently as a massive Sanskrit character rippled out.

The ghostly qi quickly dissipated – ghost-type skills were quite weak against such measures.

Clang!

A massive black sword light, bringing with it a sharp sword wind, tore through the air and slashed towards Shama. At that moment, Zhao Fu also unleashed the Great Qin Seal's power and attacked Shama.

Facing this terrifying attack, Shama swung his long saber, and an azure saber light also slashed out and collided with the black sword light. Both of them exploded, but the black sword light then turned into countless traces of sword qi and continued onwards towards Shama.

Shama felt quite shocked and stretched out his hand, causing a semi-circular azure barrier to appear in front of him, blocking the countless black sword qi. The Sanskrit character also disappeared, and the ghostly qi once again started to spread.

However, Shama had no mind to care about that, and he looked ahead of him seriously. He understood who this person in front of him was – it was Great Qin's Legatee, the person Shama was wary of the most.

If Shama only used his City Lord Seal, he definitely would not be able to defeat Zhao Fu. After all, Zhao Fu had the City Lord Seal of a Great City, which had the additional power from 23 City Lord

Seals. On the other hand, Shama only had an Advanced City Lord Seal, so he would not be able to rival Zhao Fu's power.

However, Shama was not afraid, as he had a Nation Armament and Clan Armament as well. He wanted to personally see just how powerful Great Qin's legendary Legatee was!

Chapter 610 - Victory is Mine

Boom!!

A massive explosion sounded out as Shama held his long saber diagonally, and an azure flame burst forth from his body. Shama's clothes were blown about by the wind around him, and at that moment, his power greatly increased, making him seem like an invincible expert.

As Zhao Fu held the Sin Dragon Sword, his expression became serious. He first closed his eyes and lightly breathed in before suddenly opening them and exploding out with his City Lord Seal's power and his King's Power.

A wild gale erupted out as a massive amount of black aura streamed out from Zhao Fu's body and filled his surroundings, covering his body. Zhao Fu's body could not be seen within the black aura; only his blood-red eyes shined like two blood-red gems. His aura was also incredibly terrifying, making him seem like a demon god.

"Hahh!!" Shama attacked first, speeding towards Zhao Fu as he slashed out with his saber. A massive azure saber light rushed towards Zhao Fu like a massive gale.

Clang!!

A clanging sound rang out as a massive black crescent slashed out, seeming sharp to the extent that it could cut apart space itself. It flashed out, and even the black aura around Zhao Fu was blown away by that terrifying sword qi.

Bang!!

The black crescent instantly split the azure sword light in half and caused it to explode and dissipate, creating a wild gale. The people below were affected as well, and anyone hit by the wind was split into pieces, creating a bloody scene.

Clang!

Shama slashed out with his saber again, destroying the incoming black crescent.

Suddenly, Zhao Fu's body blurred and disappeared, arriving above Shama in just an instant. The Sin Dragon Sword gave off a large amount of sword light as Zhao Fu slashed downwards, sending out a massive black sword light that seemed to be able to split apart anything.

Shama's pupils contracted as he gripped his saber with both hands and blocked the strike.

Bang!!

A muffled explosion sounded out as sparks flew everywhere, and Shama's body was blown ten or so meters back before he could steady himself. He looked at Zhao Fu seriously as a trace of blood leaked out from his lips.

"With your current power, it's impossible for you to defeat me. Submit to me or die!" Zhao Fu said with a domineering and mighty tone, shaking anyone's soul who heard him.

Shama's expression became savage as he felt the azure City Lord Seal within his body continuously trembling.

Bang!!

A massive explosion sounded out as the azure flames around Shama exploded, but his body disappeared. He appeared before Zhao Fu the next second and slashed towards Zhao Fu.

Clang!!

A heavy collision sound rang out as Zhao Fu used his Sin Dragon Sword to block, but at that moment, Shama lashed out with his leg, kicking Zhao Fu's abdomen and sending him back seven or eight meters.

"Great Qin's Legatee isn't so great after all!" Shama loudly laughed.

Zhao Fu's expression became cold as he raised the Sin Dragon Sword and pointed it at Shama as countless traces of black water vapor quickly gathered.

Whoosh!

The water vapor instantly gathered into a 100 meter long water sword, piercing towards Shama. Shama narrowly dodged, and his sleeve on his arm was torn.

At that moment, Zhao Fu changed the direction of the sword, slashing the water sword horizontally towards Shama. Shama raised his saber and blocked the water sword but was still blasted back by the impact.

Zhao Fu once again swung the water sword, creating an immense sword wind that seemed to cover the heavens and earth, and he ferociously slashed towards Shama.

Shama coldly harrumphed and gripped his saber with both hands as his muscles bulged. His veins could be seen as traces of azure, and a crystalline aura started to rise out of his body before forming a massive, savage-looking bird.

"Skreee!!" Facing the sword wind, the savage-looking bird spread its wings and gave a piercing cry as corporeal soundwaves rippled out and destroyed the sword wind.

Shama's saber shined with light as the savage-looking bird flapped its wings, rushing out like an arrow shot out of a bow and bringing with it a mighty aura as it flew towards Zhao Fu.

Seeing this, Zhao Fu once again slashed out with his water sword, causing the massive bird to shatter into an azure aura. However, the water sword also turned into countless traces of water vapor and also disappeared.

At that moment, Shama suddenly appeared behind Zhao Fu and hacked at Zhao Fu with his saber. However, Zhao Fu seemed to have predicted this and swung backward with his sword, causing a sharp arc of light to slash out.

A look of surprise appeared on Shama's face, and he immediately retreated and used his power to form an azure barrier.

Crash!!

The arc of light flashed past and the azure energy barrier was instantly shattered, and a horizontal gash appeared on Shama's chest. Blood flowed out from the wound, dyeing Shama's clothes red. Luckily, most of the power had been stopped by the barrier, so Shama's wound was not very serious.

“Roarrrr!!” A gigantic dragon's roar rang out. Zhao Fu raised his sword as a massive sword aura rippled out. A water dragon spiraled in the sky, giving off a terrifying aura as the surrounding clouds were all dissipated.

Zhao Fu looked at Shama with his blood-red eyes, and the cold killing intent that he was emitting caused Shama to feel a chill within his heart. Shama was given a big fright and hurriedly put all of his strength into his saber as he prepared to block.

Zhao Fu swung his sword downwards, causing the water dragon in the sky to rush down with immense force and slam into Shama like a bolt of lightning.

Boom!!

In that instant, the water dragon smashed Shama into the ground and caused an enormous explosion. The ground caved in, forming a 100-meter wide crater, and dust filled the air, making it difficult to see.

The massive battle between the two people caused the two armies below to feel quite shocked. None of them thought that the two people would have so much power.

However, seeing Shama being blown into the ground, it was evident that Great Qin's Legatee held the upper hand. This caused the morale of the Chinese side to swell, and the Indian side, seeing their lord Shama seemingly lose, immediately lost a lot of their battle intent.

Zhao Fu stood in the air and looked down at the crater. He knew that things would not be easily finished like this. After all, from the beginning, Shama had only used his City Lord Seal's power.

The dust gradually settled, and Shama coughed up a mouthful of blood and stood up from the ground. He looked at Zhao Fu in the sky and madly laughed as he said, "Great Qin's Legatee, I admit that you're stronger than me, but only in terms of our City Lord Seals. However, victory is mine – it seems that you're unable to use your Nation Armament and Clan Armament. Today, I'm going to trample on Great Qin's name."

Zhao Fu did not reply to Shama and charged down from the sky and attacked.

Boom!!

A shocking explosion rang out in the surrounding thousands of kilometers as a silver pillar of light rushed into the sky and a monstrous power exploded out like a wild gale. The ground slowly collapsed as trees, rocks, and some people were blown into the sky.

The weather changed, and clouds madly gathered, forming a gigantic vortex with the azure pillar of silver light at the center. An oppressive aura covered the entire region, and countless creatures ran in terror.

A 100 meter stone pillar with all sorts of sceneries, people, and animals engraved on it slowly descended from the sky, giving off an immense power.
