

## The Lord 641

### Chapter 641: Fire and Ice Bloodlines

The fire bird brought with it an immense heat wave, and Zhao Fu was expressionless as he raised his sword and slashed out a wave of water. In just a single attack, the fire bird was sliced in half, and it turned into countless flames as it disappeared.

Bang!

Suddenly, a seven or eight meter long ice shard shot out, appearing before Zhao Fu in an instant. However, Zhao Fu leaped backward before jumping into the air, and the ice shard stabbed four or five meters deep into the ground.

“Roarr!!” Zhao Fu raised his sword, and countless traces of water vapor gathered to form a dragon that gave off a dragon’s roar. It gave off an immense aura as it rushed towards the two women.

Each of the women raised a hand, and their palms shined with light. An ice and fire energy shield appeared, and as the water dragon crashed against it, a muffled explosion sounded out, and the water dragon dissipated into water vapor again.

Binoche coldly harrumphed and raised her magic staff, causing fireballs to appear in the sky. There were as big as watermelons, and there were around 100 or so of them, giving off an immense amount of heat.

Kerache’s expression was cold, and she gave off killing intent as she also raised her magic staff and created hundreds of ice shards.

Whoosh, whoosh, whoosh...

The fireballs and ice shards flew towards Zhao Fu incredibly quickly, drawing out streaks in the air, and they reached Zhao Fu in an instant.

Zhao Fu sent his King’s Power into the Sin Dragon Sword, causing it to give off a large amount of sword light. Zhao Fu continuously slashed out with the sword, sending out sword arcs that

destroyed the incoming fireballs and ice shards as he flew towards the two women – after all, it was quite advantageous to deal with magic users at close range.

Binoche and Kerache could tell what Zhao Fu's intentions were, but they did not retreat. Instead, they flew to either side of Zhao Fu and started to attack him from there.

Zhao Fu started to be forced into a more passive state, as he was being pincerred on both sides. He was forced into defending again.

Zhao Fu felt that if there was another person helping him, it would be much easier to deal with these two women. Even though it was just Zhao Fu, he had some other methods.

After grasping an opportunity, Zhao Fu flew out of their pincer attack and raised the Sin Dragon Sword, and a black sword light shot into the sky as he yelled, "Godly Hell's Doors!"

A black hole appeared in the sky, and traces of demonic qi flooded out as roars sounded out and countless demons flew towards the two women.

Facing these countless demons, the two women did not seem to care at all. Even though there were many demons, they were far too weak and were unable to threaten them.

Binoche pointed her staff at the incoming demons, and within the moon at the top of the magic staff, and fireball quickly spun, and a searing aura spread out, covering the surroundings with an extreme amount of heat.

Whoosh!!

Countless flames rushed out of the magic staff, forming a sea of flames. The demons were unable to withstand those flames and howled in pain.

At that moment, a figure suddenly appeared behind Binoche. Zhao Fu's abilities at masking his presence were extremely strong, and Assassins were a great threat to Mages.

Shing!

Zhao Fu sent all of his power into the Sin Dragon Sword, causing it to loudly hum. The sword gave off countless traces of sharp sword qi and an extremely dangerous aura.

Boom!!

Zhao Fu slashed downwards, and Binoche quickly used her magic staff to block it. However, she felt an immense force slam into her, causing her to crash into the ground and blowing open a ten-meter wide crater.

Elsewhere, Kerache formed an ice sword and easily killed the demons rushing at her. She turned and happened to see Binoche being slammed down, causing her to slightly pause.

In the next second, Zhao Fu appeared before her and slashed horizontally with his sword. Kerache was sent flying back hundreds of meters and crashed against a wall of ice, and with a bang, the entire wall of ice collapsed.

“I’ll slaughter you!” Binoche sharply cried out as she rushed out of the crater, a trace of blood leaking out of her lips. She raised her magic staff as a fiery magic formation appeared beneath her feet. A massive amount of fire energy gathered towards her, and an incredible heatwave rippled out, seeming to twist space itself.

The sky was dyed a fiery colour, and the fire energy gave off a suffocating pressure. Following this, Binoche started to chant, and an even more terrifying aura descended from the sky.

Zhao Fu looked up and saw that there were actually dozens of flaming meteors falling from the sky.

Zhao Fu did not hesitate to use his King’s Crown. Countless chains burst forth from the ground, breaking through Binoche’s magic defenses and tightly binding Binoche, who was still chanting. Her spell was interrupted, and she was immediately hit with a backlash, causing her to cough up a large mouthful of blood.

However, the meteors in the sky did not disappear, and they gave off an immense destructive power as they continued to fall. Luckily, there was no one controlling them, so they were quite easy to dodge.

Bang, bang, bang...

The massive meteors slammed into the ground, causing it to violently shake. The sound was simply deafening, and a destructive aura rippled out. Hundred meter wide craters appeared in the ground, the craters were charred black.

These meteors annihilated everything within 10,000 meters, and they also interrupted Kerache's spell. Her face became incredibly pale from the backlash.

Forbidden arts were incredibly powerful, but they were difficult to cast and had strong backlashes.

Zhao Fu smiled and waved his hand, causing the countless chains to shoot out, binding Kerache as well. Following this, he threw Binoche and Kerache aside as he walked towards the crystal palace in excitement.

After walking in, apart from the two crystal coffins, he also saw a crystal stage. The stage was 1.5 meters tall, 30 centimeters wide, and rectangular shaped.

On the stage, there were two hexagonal crystals floating in the air, giving off resplendent lights. One contained fire and the other contained ice.

Zhao Fu smiled as he picked up these two crystals and looked at their stats.

[Fire Origin Spirit Crystal]: A crystal containing Fire Origin, which can be used on Domains and fused with City Hearts to form special City Hearts that will spawn people with a fire bloodline.

[Ice Origin Spirit Crystal]: A crystal containing Ice Origin, which can be used on Domains and fused with City Hearts to form special City Hearts that will spawn people with an ice bloodline.

“Fire and ice bloodlines?”

Zhao Fu thought about it – based on the information from the demon god, an energy bloodline was at least an Intermediate Bloodline and would give all sorts of stats and the ability to control ice or fire. Anyone who had this sort of bloodline would become more powerful than ordinary people, as they would have an innate ability.

These were precious treasures, and they could spawn two types of bloodlines, which would give Great Qin a very large advantage in the future. Soldiers with an ice or fire bloodline would most likely be able to deal with five soldiers of the same Cultivation.

After going back, Zhao Fu would fuse these two crystals with Legendary grade City Hearts. They would have immense potential, and the City Lord Seals that they condensed would be incredibly powerful.

Zhao Fu smiled, put those crystals away, and prepared to return to Great Qin to have people explore the inner region of Gloomy Jungle. The Ice Spirits and Fire Spirits here dropped crystals that could insta-kill people with Stage 2 Cultivation, so they were quite valuable. Zhao Fu wondered just how many crystals they could obtain.

After taking a few steps, Zhao Fu looked at the two women who he had bound and thrown to one side. They were currently looking at him furiously – what should he do with those two?

## Chapter 642: Great Python

Zhao Fu walked over to them, and when he thought about their battle, he felt that their powerful magic would be quite useful in battles. Just Binoche's meteors would be able to insta-kill 50,000 to 60,000 Stage 1 soldiers.

Zhao Fu did not know what sort of forbidden skill Kerache had, but it would definitely be extremely powerful and be able to insta-kill tens of thousands of soldiers as well. If he could have them submit, that would be for the best.

"I'll give you an opportunity to surrender! If you're willing to submit, I can choose not to kill you!" Zhao Fu said.

Binoche glared at Zhao Fu and yelled, "You dirty low-life; how could I, the great Binoche, submit to you? I'll burn you to death and listen to your howls!"

Kerache's expression was extremely cold, and she said murderously, "You despicable man, I want to slice off your flesh bit by bit and make you die from the pain!"

Zhao Fu laughed; these two still did not understand the situation that they were in and had no idea whose hands they had fallen into. Zhao Fu could easily kill both of them.

Since they did not seem like they would submit, did he have to kill them? What a pity!

Zhao Fu thought about it and remembered that he had the all-knowing golden dragon, so he asked it, “Do you have any way to make them submit?”

The golden dragon rolled its eyes at Zhao Fu and said, “I’m sure you know by now – doesn’t the Six Desires Celestial Art have a method for subduing women? That’s the best method!”

Zhao Fu felt quite awkward and asked, “Is there no other way?”

“There are, but they’re definitely not as good as the Six Desires Celestial Art!” the golden dragon replied.

“Alright then.” Zhao Fu had no choice but to turn his gaze to Binoche.

Binoche could sense that Zhao Fu wanted to do something, and she yelled, “If you dare to do anything to me, you scum, I’ll slaughter you and make you wish that you were dead!”

Hearing her words, Zhao Fu did not feel angry, and he instead smiled, looking at her with pity. He came before Binoche and used his hand to squeeze Binoche’s cheeks.

Binoche struggled while hatefully glaring at Zhao Fu as if she wanted to kill Zhao Fu 100 times.

At that moment, Zhao Fu suddenly kissed her, and their lips came together. A large amount of black qi rushed from Zhao Fu’s mouth into Binoche’s mouth, causing her resistance to weaken. Finally, her face became red, and her eyes looked quite lustful as she took the initiative to stretch her tongue into Zhao Fu’s mouth.

Zhao Fu kissed Binoche back while taking off the few articles of clothing that she had and started to do it with her. He even used the chains to try out all sorts of positions that were quite difficult.

By the side, Kerache watched with a fearful look and desperately struggled. However, after hearing Binoche's moans, she started blushing.

A few hours later, Zhao Fu placed the strengthless Binoche on the ground and came over to Kerache.

Kerache turned her head away, not knowing if she felt afraid or embarrassed. Zhao Fu kissed her on the lips, after which both of their bodies became entangled.

After finishing up, Zhao Fu put on his clothes again and felt a bit awkward as he looked at the two women glaring at him and said, "Let's go!"

The two women harrumphed, and even though they seemed like they were ignoring Zhao Fu, they still walked behind him somewhat awkwardly.

Nothing much had happened in Great Qin over the past few days, and Great Qin's soldiers continued to clear out the surrounding regions. Seeing Zhao Fu bring back these two beauties, everyone felt quite surprised.

As two top-grade Mages, Binoche and Kerache had quite a lot of Phoenix Qi, and Zhao Fu made them Imperial Concubines as well. In actuality, even if they did not have any Phoenix Qi, Zhao Fu would still make them concubines, as they now had that sort of relationship.

Zhao Fu also realized that the only two Legendary grade and above City Hearts that he had were the Great Qin City and Maurya City, which were Epic grade and Legendary grade respectively.

Could he still fuse those two crystals into the Great Qin City and Maurya City? Both cities had Legacies, and if he could fuse the crystals into them, perhaps he could strengthen the Legacies.

However, Zhao Fu was disappointed – since both of them were historical legacies, he could not fuse the crystals with them unless he was to destroy the legacies. How could Zhao Fu be willing to do such a thing? As such, he decided to fuse the two crystals into two system main cities.

Zhao Fu found that this was not possible, as those cities already had City Lord Seals. If he wanted to fuse the two crystals into the City Hearts, he had to destroy the City Lord Seals. In the end, Zhao Fu could only fuse the two crystals into two Gold grade towns.

The names of those towns changed, becoming Fire Town and Ice Town.

Zhao Fu then spent some time on internal affairs. Three days later, Great Qin finished clearing out another region, and Zhao Fu moved over a system main city and renamed the region to Wing Province.

Great Qin started to clear out the next region, but soon, they were surprised to find that the boss monster of this region had not left.

Ordinary, after a region's system main cities were conquered, the boss monster of the region would be able to leave and would no longer be restricted to stay within the region.

As such, Great Qin had not encountered any boss monsters when clearing out the regions, but this time, the boss monster had not left. Instead, it had tried to stop Great Qin in clearing out the region and had created many beast tides.

After hearing about this, Zhao Fu immediately went to that region.

When Zhao Fu arrived, he saw that there were a few waves of beast tides, giving off a ferocious aura as they rushed at Great Qin's soldiers.

Great Qin's army had used wood and rocks to create a simple defensive wall, dug out trenches, and set up many traps. The beast tides were incredibly ferocious, and they would not be so easy to deal with.

"Your Majesty, the boss monster here is a massive violet python, and it has been hiding underground this entire time. It's very difficult for us to kill it!" Wang Jian came over and reported.

Zhao Fu nodded and ordered the other City Lords to stay here and help the soldiers defend. There were tens of millions of beasts, and even though Great Qin soldiers could kill ten or so with every hit, there were simply too many of them.

Following this, Zhao Fu brought Bai Qi, Wang Jian, Wei Liao, Sima Cuo, Meng Tian, and Li Mu to the depths of the region.

In the innermost part of the region, there were tall mountains everywhere, and if the boss monster hid underneath these mountains, it would indeed be quite difficult to deal with it.

The only thing they could do was to go underground and lure the boss monster out or kill it underground. If it did not come out, Zhao Fu would not be able to do much to it.

The boss monster was quite big, so it would not be too difficult to find underground. After discussing with the others, Zhao Fu set his plan into motion.

## Chapter 643 - Ginseng

They came to a large tunnel that was 100 meters wide, which had been created by the python. It was completely dark inside, gave off a putrid stench, and gave off a trace of coldness. Facing such a massive tunnel, an ordinary person's legs would have gone weak from fright.

Zhao Fu brought his group in, and soon, they found that the path ahead was blocked by countless large rocks. Clearing them would be quite difficult, and if they moved them one by one, it would take a few days. This python was quite smart.

Facing these large rocks, Zhao Fu took out the Sin Dragon Sword and set his power into it, causing it to shine with a brilliant sword light and give off a dangerous aura.

“Roarr!!”

Zhao Fu slashed out, causing a water dragon to fly out and smash towards the pile of rocks. A muffled explosion sounded out as the countless rocks were blasted into tiny fragments, and the path ahead was cleared.

Seeing Zhao Fu's power, everyone present felt quite shocked.

Following this, they continued onwards and found another pile of rocks. They cleared them out, and after walking for a while, they found yet another pile of rocks.

As such, they were forced to walk a bit then clear rocks, then repeat this process. Zhao Fu did not continue to clear the rocks and instead left this to his subordinates. They were much slower, and after a few hours, they no longer found any piles of rocks, but they found many snakes.

There were snakes of all sorts of colors, and they had a strong stench to them – they were evidently quite venomous, so everyone became quite wary. There was nothing to worry about snakes that were at Stage 1 and below – even if they were bitten, they could use their cultivation to stop the venom. However, there were many Stage 2 and Stage 3 snakes here as well.

Things could get quite dangerous if the others were bitten by the Stage 2 or Stage 3 snakes, but Zhao Fu was not worried as he had a Poison Spirit Constitution from the All Poison Divine Pill, which made him immune to these snakes' venom. However, he had to take care of the others, so he unleashed his King's Domain and covered the seven of them while Bai Qi and the others started to kill the snakes.

As they advanced, they saw more and more snakes, which became more and more ferocious, throwing themselves at Zhao Fu's party without any regard for their lives.

However, no matter how many snakes there were, they were all blocked by Zhao Fu's King's Domain. The venom that they spat out sizzled on the King's Domain but did not affect it at all. After all, Zhao Fu's King's Domain had been strengthened.

As they headed onwards, the tunnel became larger and larger, and soon, they found a region that was thousands of meters wide and saw four snakes that were each 100 meters long.

When Zhao Fu and his party stepped into this region, the four massive snakes sped towards them incredibly quickly like black blurs.

The four snakes had immense strength – as they slammed into the King's Domain, it violently shook, and the people beside Zhao Fu immediately unleashed their City Lord Seals and started to fight the four snakes.

The poisonous fog that these snakes spat out was quite difficult to deal with – if they accidentally breathed it in, they could be poisoned. With how intense this poisonous fog was, if a Stage 1 soldier breathed in even a bit, they would definitely die.

However, these snakes were facing Bai Qi and the others, who had the power of General Stars. The General Stars' power was a high-grade power, so in the end, they were able to easily kill these four snakes, and Zhao Fu put away their poison sacs.

After continuing onwards, they came to a region that was over 10,000 meters wide, where there was a 1,000-meter long python that had violet, glowing scales. It also had a violet horn on its head, and it gave off a massive, terrifying aura.

What surprised Zhao Fu was that there was a tree beside it – the tree was only ten or so meters tall, but its trunk was quite thick, around four or five meters wide. The tree's crown was quite lush, covered with jade-green leaves, and there were many unusual-looking fruits growing on it.

These fruits were all human-shaped and looked like children sitting down. They had a flesh color and a slight glow, making them look quite mystical.

“Ginseng Fruit?” Those fruits resembled the Ginseng Fruit from Journey to the West, and when he saw these fruits, Zhao Fu felt quite shocked, and his heart started to beat rapidly.

In Journey to the West, the Wuzhuang Temple on the Longevity Mountain had Ginseng Fruits, which were said to take 3,000 years to bloom flowers, 3,000 years to grow fruit, and another 3,000 years to ripen, which was roughly 10,000 years to eat.

It seemed that over the past 10,000 years, it had only grown 30 or so fruits, and the fruits looked like little infants. Just smelling the fruits could allow someone to live 360 years, and eating one could allow one to live 47,000 years.

If these really were Ginseng Fruits, eating one would allow a person to live 47,000 years; that was longer than all of human history so far.

Zhao Fu did not need to live for so long; just living for 1% of that would be enough. Even then, he would be able to live for 400 years or so. Every item in the Heaven Awaken World that could increase one's lifespan was incredibly valuable; after all, everyone wanted to live longer, so such things were incredibly costly.

Chi!

The violet python's eyes flew open, revealing its violet, cold-looking eyes. It opened its mouth and spewed forth a large amount of poisonous fog. The poisonous fog had an intense stench and a powerful corrosive effect, seeming to corrode even the ground that it floated past.

Zhao Fu was greatly startled, and because this area was not very big, it was quite difficult to avoid such a large AOE attack. Bai Qi used his Seven Murders Star's power to create a blood-red barrier that barely defended against the fog, and everyone else did the same. None of them had an opportunity to attack.

This violet python was a poison-type creature and had a geographical advantage, so it was effectively much more powerful than an ordinary boss monster.

In just an instant, not only were Zhao Fu and his party surrounded by the poisonous fog, but the entire region was also filled with it. Luckily, the Ginseng Tree gave off a green light, making it so that the poisonous fog could not go near it.

Rumble!!

A wave of rumbling could be heard as the violet python rushed over. In the next instant, the violet python appeared before Zhao Fu and opened its mouth, biting towards Zhao Fu.

Zhao Fu raised his sword and slashed out a water dragon, which collided with the violet python. The massive impact caused the water dragon to scatter into water vapor, and both Zhao Fu and the violet python retreated ten or so meters.

Zhao Fu's pupils constricted, as he discovered that this violet python was much stronger than an ordinary boss monster. Bai Qi and the others were using all of their power to sustain their barriers so as not to allow any poisonous fog in. After all, if they breathed in this intense poisonous fog, their lives would be in danger.

"Bai Qi! All of you retreat!" Seeing this, Zhao Fu decided to have them retreat first.

Everyone else nodded. They knew that they could not help at all if they stayed and would instead obstruct Zhao Fu, so they could only retreat.

Whoosh!

The violet python twisted its body and moved incredibly quickly, attacking towards Zhao Fu again with immense force.

Zhao Fu slashed out an incredibly sharp sword light, and the violet python rammed at the sword light with the horn on its head. The sword light shattered and disappeared, and in the next instant, the violet python appeared before Zhao Fu and once again bit at him.

Bang!

As the violet python bit at Zhao Fu, he could only fly into the air, while the python's massive head slammed into the ground and opened up a massive crater.

#### Chapter 644: Violet Scaled Great Python

Zhao Fu took this opportunity to slash downwards, opening up a three-meter-long wound on the violet python's body. Blood immediately spurted out, which contained a fatal poison, and splashed against the King's Domain. Its incredibly corrosive nature almost burned through the King's Domain.

"Ssssssssss!" The violet python gave a hiss of pain and turned its head as it spit out some violet poison. The violet poison shot out like arrows, and Zhao Fu immediately dodged to the side, not daring to directly receive those attacks.

Bang!

The violet python grasped this opportunity to use its massive body to slam against Zhao Fu, causing his body to fly backward.

As that was happening, the violet python opened its mouth, condensing the poisonous fog in its mouth into a ball before releasing it towards Zhao Fu.

Zhao Fu finally stabilized his body, and seeing the poisonous ball flying towards him, he knew that there was no way for him to dodge it. As such, he decided to send his power into the Sin Dragon Sword, and countless traces of water vapor gathered, forming a 100-meter long sword.

Clang!

Zhao Fu slashed out, unleashing an immense sword wind, splitting the incoming poisonous ball in half. The poisonous ball exploded, releasing countless traces of a poisonous aura – this poisonous aura was many times more intense than the poisonous fog from before, and Zhao Fu could only retreat.

Seeing that these attacks were ineffective against Zhao Fu, the violet python furiously opened its mouth and shot out a violet light towards Zhao Fu.

Facing this violet light, Zhao Fu's hairs stood on end, and he immediately dodged to the side.

Bang!

A massive sound rang out as the violet light shot to the roof of this space, instantly opening up a 100-meter wide hole. Violet-black liquid dripped down, forming smaller holes on the ground, looking quite horrifying.

Zhao Fu coldly harrumphed and slashed down with the Sin Dragon Sword, causing another water sword to condense and fly towards the violet python.

“Sssss!!”

The violet python's massive body had not been able to dodge in time, and a massive injury was opened up by the water sword, causing blood to gush out.

“Roar!!!”

The violet python almost went mad with pain, and its body continuously gave off a violet light. Zhao Fu felt a trace of danger and stepped back, preparing to defend.

Swish, swish, swish...

Countless violet snakes of light shot incredibly quickly out of the massive python's body towards Zhao Fu. In just the blink of an eye, they had reached Zhao Fu.

Zhao Fu used all of his strength to sustain his King's Domain, and he also slashed out countless sword lights that destroyed the majority of the violet snakes of light. However, there were still many violet snakes of light, and they continued on towards Zhao Fu like a tidal wave.

Bang!!

The King's Domain was shattered, and Zhao Fu was sent flying backward and coughed up a mouthful of blood before he was able to stabilize his body. Most of the City Lords were currently defending against the beast tides on the surface, so Zhao Fu could not use their power. However, he could at least use Bai Qi and the five others' powers.

A black and gold dragon seal appeared, giving off a large amount of black light. A terrifying aura rippled out like a wild wind in all directions, and Bai Qi and the five others felt Zhao Fu's power calling them. They unleashed their City Lord Seals and sent their powers into the Great Qin Seal.

Boom!!

An even more berserk power rippled out, sweeping through the entire region. A terrifying aura of suppression weighed downwards, causing space itself to tremble. The violet python sensed some danger, but after looking at the Ginseng Tree, a look of determination appeared in its eyes.

The violet python's body gave off a large amount of violet light, which gathered at its horn. The resplendent light that its horn gave off could cause anyone's heart to feel a chill.

Clang, clang, clang...

The sound of chains could be heard as countless chains shot out of the ground and tightly bound up the violet python. The violet python desperately struggled as the light on its horn became brighter and brighter.

Zhao Fu gathered his power into the Great Qin Seal, causing it to give off the boundless aura of a great mountain as it rocketed towards the violet python.

The violet python roared as it pointed its horn towards Zhao Fu, shooting out a violet light. The surroundings were all dyed violet, and wherever the violet light passed, it left behind white smoke. It was as if it could corrode space itself.

Boom!!

The two massive powers collided together, and Zhao Fu's Great Qin Seal, which gave off the aura of a mountain, smashed towards the python's head. Immediately, blood flew everywhere, and the violet python howled in pain.

However, that violet light also continued onwards, instantly piercing through Zhao Fu's shoulder. Zhao Fu coughed up a mouthful of black blood, and his wound was charred as it was quickly corroded.

At that moment, Zhao Fu's Poison Spirit Constitution came into effect. The little green grass within his body lightly swayed and gave off an aura of life as it sent out a large amount of green light to absorb the poison.

Zhao Fu endured the pain and suppressed the poison before once again mustering his strength to use the Great Qin Seal to smash towards the python's head.

Bang! Bang! Bang!

After a few hits, the Great Qin Seal finally smashed the violet python's head apart, causing its blood and brains to stain the ground around it. Following this, Zhao Fu received a few announcements.

"System announcement! You have killed the Violet Scaled Great Python and obtained 10,000 Achievement Points."

"System announcement! You have killed the Violet Scaled Great Python and obtained a large amount of this region's Fate."

"System announcement! You have killed the Violet Scaled Great Python and obtained 300,000 EXP."

"System announcement! You have obtained one Legend Point."

Zhao Fu had heard all of these system announcements before, and he also now knew the usage for Legend Points – after the Chaotic World Stone Steles reached Level 6, they also offered rewards for Legend Points.

One Legend Point could exchange for a trash Legendary grade equipment, and 30 Legend Points could exchange for a Legendary grade City Creation Stone.

Even though Zhao Fu knew the use of Legend Points, he would not casually go around killing boss monsters. One reason was that they were difficult to kill, and the other was because of the losses they would sustain from fighting beast tides. Those losses would far outweigh a Legendary grade piece of equipment, and even though Legendary grade City Creation Stones were tempting, the costs were greater than the benefits.

Next, it was time for Zhao Fu to claim his spoils of war. A boss monster's entire body was a treasure, and putting aside the snake blood and snake flesh, the horn would be able to be made into a top-tier Legendary grade weapon, and the skin would be able to be made into Legendary grade defensive items.

The skin could be used as inner armor, and all of Great Qin's leaders could have one. Zhao Fu already had Legendary grade inner armor, but the others didn't.

There were also two more things.

One was a green stone that was as big as a chicken's egg, and it gave off a faint green light and a putrid stench. Zhao Fu did not know what it was, so he picked it up and looked at its description.

[Thousand Year Snake Gallstone]: A gallstone created by a thousand-year-old snake. Consuming it will improve one's constitution, add resistance to poison, and unlock Vision.

The final part of the description made Zhao Fu feel ecstatic. Vision was the fourth sense of the five Celestial Senses. If he ate this gallstone, he would only be missing one sense, and Zhao Fu had been quite excited about Celestial Mode for a long time.

The second item was a small violet cauldron that was as big as a palm. There were birds, beasts, and insects engraved on it that looked quite real. The small cauldron gave off a faint, eerie glow, making it seem like an inauspicious item.

## Chapter 645: Triple Layered Pupil

Zhao Fu picked up the little violet cauldron and looked at its description.

[Ten Thousand Poison Divine Cauldron]: Level 1 Saint Armament that can smelt and refine ten thousand poisons and create the most domineering poisons in the world. The more poisons that it refines, the higher grade this Divine Cauldron will become.

It was another developing-type item, just like the King's Crown that he had obtained before. As the King's Crown had continuously absorbed King's Aura, it had risen to Gold grade and was now just a bit away from reaching Legendary grade.

Zhao Fu was quite interested in the Ten Thousand Poison Divine Cauldron, as poison was essentially something that all people feared. Once they were poisoned, things would be quite tough for them.

If he could refine the most domineering poisons in the world, they would be quite useful, such as for assassinations. As such, it would be worth nurturing this cauldron.

Zhao Fu put the cauldron away and looked at the large snake body. He remembered that he had a talisman that could turn corpses into swords, and if he could turn this Violet Scaled Great Python into a sword, it would most likely form a poisonous sword that also had a high grade.

As such, Zhao Fu took out the Swordcorpse Talisman and tried to use it but received a system announcement telling him that the snake's head had been damaged. Because of this, the sword that would be created would lack a sword spirit, and its grade would be much lower. As such, Zhao Fu could only give up on that.

Zhao Fu then turned his attention to the large, jade-green tree. Was this really a Ginseng Tree? Even if it wasn't, for the violet python to care about it so much, it was definitely a treasure.

Zhao Fu walked up and took a look at this tree.

[Ginseng Tree]: A precious tree that can increase one's lifespan. The Ginseng Fruits that it creates can add ten years to a person's lifespan, and a person can only eat one.

After looking at the Ginseng Tree's description, Zhao Fu felt a bit disappointed. Even though it was also called a Ginseng Tree, it was very different than the Ginseng Tree from the legends. This one could only add ten years to one's lifespan, while that one could add 47,000 years.

However, Zhao Fu looked through the rest of the information and found that this Ginseng Tree was planted from a Ginseng Fruit. Ginseng Trees were split into different levels, just like Trees of Life, and the longer they grew for, the higher level they would become and the more effective they would be.

This Ginseng Tree was about 100 years old, and the next level would require it to be 500 years old. When that time came, it would create Ginseng Fruits that could increase one's lifespan by 50 years. The next level would require 2,500 years and would create Ginseng Fruits that could increase one's lifespan by 250 years.

If a Ginseng Tree reached its final stage, perhaps its fruits really would be able to add 47,000 years, but the time it took for that was too long.

At that point, it would most likely only have dozens of Ginseng Fruits as opposed to hundreds – the more lifespan the fruits gave, the fewer fruits there would be.

In actuality, apart from having a large amount of life energy, Fruits of Life also increased lifespan, but it was only for one or two years.

For Trees of Life, a 100-year-old Tree of Life was a level 1 Tree of Life, a 200-year-old one would be a level 2 Tree of Life, and only a 1,000-year-old one would be called a World Tree.

Moreover, at that stage, it would only be a sapling, and after 10,000 years, it would be a level 1 World Tree, and after 20,000 years, it would be a level 2 World Tree.

Both types of trees needed an incredibly long time to grow and mature. Ginseng Trees, which specifically added lifespan, were much rarer than Trees of Life. After all, almost all ordinary Elf Cities had Trees of Life, so they were not as valuable.

Zhao Fu still felt quite pleased, and looking at the Ginseng Fruits, he plucked one and took a bite. He found that it was quite sweet and juicy, and it had a nice texture.

Zhao Fu decided to take this Ginseng Tree and replant it in the Great Qin City. He kept some of the Ginseng Fruits to give to his subordinates and decided to try to use the rest of the fruits to grow more Ginseng Trees. Now that Great Qin had Water of Life, it should not be too difficult.

Sensing that the battle had ended, Bai Qi and the others entered the region again and helped Zhao Fu carefully dig up the Ginseng Tree.

After the boss monster of this region died, the enormous beast tides automatically scattered. Fortunately, Great Qin had not suffered great injuries and casualties.

After putting away the Ginseng Tree, Zhao Fu started to deal with the Violet Scaled Great Python's corpse.

Zhao Fu put it away within the Ten Thousand Poison Divine Cauldron, as it could refine poisons and make the Violet Scaled Great Python's poison even more intense.

At the same time, Zhao Fu found that this little cauldron was like a magic treasure. Even though it was only as big as a palm, it had a massive region inside that could contain many things, and its usage was like a magic treasure as well.

Zhao Fu threw it up, and it floated in the air with its mouth pointing towards the Violet Scaled Great Python. It gave off countless traces of violet light and gave off an attractive force, absorbing poison and blood.

After dealing with these things, Great Qin's soldiers continued to clear out the region, and Zhao Fu returned to Great Qin.

After returning to Great Qin, Zhao Fu carefully re-planted the Ginseng Tree and took care of some other matters before going to his room and consuming the Thousand Year Gallstone, unlocking Vision.

When he unlocked it, Zhao Fu felt an intense pain in his eyes, causing them to leak blood. However, this became better after a while, and after opening his eyes again, he felt that the world looked different. The world now looked clearer, more vivid, and full of life.

Of the five Celestial Senses, Vision was the most direct and the simplest. The Vision sense simply enhanced one's vision.

In Chinese medicine, snake gall was used for improving eyesight, and in actuality, most items that could greatly improve vision would be able to unlock the Vision sense.

After unlocking Vision, Zhao Fu felt that his eyes had become much stronger, and he could even use Eye Techniques. There were many Eye Techniques in the Heaven Awaken World, but they greatly harmed one's eyes. However, Zhao Fu did not have to worry about this after unlocking Vision.

Moreover, after unlocking Vision, the strength of his Eye Techniques would be boosted, and he would be able to control them more easily.

It was a pity that even though Zhao Fu knew about Eye Techniques, he had never come across any before. He asked the golden dragon, but it did not have any Eye Techniques either: it did not bother with trash Eye Techniques, and because some of the more advanced ones were linked to bloodlines, the golden dragon could not help much.

Moreover, after Zhao Fu had awakened the Heaven Murder Imperial Bloodline, his eyes had gained double-layered pupils that were blood-red. Now, they had become triple-layered pupils, with the first two layers being blood-red and the third layer being white-colored. The blood-colored pupils looked quite terrifying, and now that there was a layer of white, his eyes looked much gentler.

In ancient times, those with double-layered pupils were hailed as sages and deities, and those people had shaken the world.

Now that Zhao Fu had triple-layered pupils, he would definitely be quite extraordinary as well.

After returning to his room at night, Nü Lü came over, giving off a flirtatious aura. Zhao Fu thought about what had happened before and realized that he had treated her coldly as he had not been in a good mood.

However, Zhao Fu did not say any apologetic words – instead, he pressed his lips against hers, and after a lot of thumping sounds, four women lay exhausted on the bed.

## Chapter 646: Southleaf Region

Just as Zhao Fu and Nü Lü were doing it, Tuoba Qing came in with a reddened face and joined in. Binoche and Kerache looked quite disgusted with Zhao Fu, but they couldn't help but also come over and immerse themselves in pleasure.

Zhao Fu felt that the Six Desires Celestial Art was a bit domineering to be able to amplify one's desires hundreds, if not thousands, of times, making such pure women into such lustful women. At the same time, Zhao Fu felt that his resistance towards women had broken down; now that the doors of pleasure had opened up, it was not something that could be easily controlled.

"I want more!" Binoche wrapped her slim arms around Zhao Fu's neck, her fiery eyes filled with lust. The old, savage Binoche was completely gone.

Zhao Fu lightly laughed, "Didn't you say that you wanted to kill me? Why are you asking for more now?"

Binoche harrumphed, "It's because of you, you baddy. I hate you so much, but I want more, so give it to me!"

Zhao Fu smiled and pressed down his body against Binoche's while the three other women also uncontrollably joined in.

The next day, Zhao Fu once again gathered his Generals. Many of the regions on the eastern side had not reacted yet, and Zhao Fu decided to give the army some time to rest before attacking two more regions.

One was called Southleaf, and the other was called Sun Tune. After conquering these two regions, the eastern side of the territory that Great Qin had decided on would be fulfilled. With the Southleaf region's marshlands and Void Zones, they would have a solid defense.

Great Qin would no longer have to fear the eastern side continuing to ally together to attack, and at the same time, Great Qin could also attack the eastern side's regions and easily retreat or attack the three other sides.

The national territory that Great Qin had set its eyes on was a bit small, but after conquering all of those regions and restoring Great Qin, they would be able to expand outwards, so it was not too bad.

Zhao Fu first obtained the information about these two regions. The Southleaf region had four system main cities, and because of its marshlands, it was not convenient for a large army to move through. It was possible to sink into a marsh at any step, so they had to find a way to deal with this.

The Sun Tune region only had three cities, and there was nothing special about it. In total, its Stage 1 soldiers numbered around 300,000.

Zhao Fu planned to split the army into two and quickly take down these two regions. After conquering these two regions and relying on their Void Zones, they would not have to be afraid of the regions on the eastern side.

Bai Qi led 16 City Lords and 1.6 million soldiers and quickly invaded the Sun Tune region while Zhao Fu led 19 City Lords and three million soldiers and invaded the Southleaf region.

They also had five City Lords remain in the Great Qin City to defend against anything unexpected, and this included Wang Jian. Now, with Great Qin's strength, taking down two regions was not a big deal. As such, Zhao Fu decided to act safely and have some people stay within the Great Qin City.

Bai Qi and his soldiers quickly arrived at the Sun Tune region through teleportation channels and immediately started to attack. He led the other City Lords and the soldiers to attack the first city that they arrived at.

Zhao Fu led his City Lords and soldiers to the Southleaf region but found it incredibly difficult to advance. There were marshlands everywhere, making it almost impossible to walk; anyone who fell in and struggled would only sink even deeper, and without anyone to save them, they would suffocate to death.

Most of the land in the Southleaf region was like this, and only the areas around the four system main cities were relatively flat and stable. Because there were marshlands here, there was also a lot of fog, making it difficult for the soldiers to advance.

Luckily, Zhao Fu had made preparations. Just like the players who had tried to attack Great Qin, since they could not walk, they instead froze the marshlands to form firm roads of ice. The soldiers then put on anti-slipping boots and successfully made it to a system main city.

Seeing countless enemies suddenly arrive, the first system main city quickly closed its gates, and soldiers arrived at the top of the city walls, nervously looking at the army below.

Zhao Fu did not bother with much and had his soldiers directly attack. Great Qin's soldiers flooded forwards, giving off a terrifying aura as they charged towards the city.

Zhao Fu also had a portion of the soldiers stay back just in case the soldiers from the three other system main cities came as well. Even though Zhao Fu had his soldiers set up isolation barriers, perhaps they also had ways to break through isolation barriers, so they could not be too careless.

The 19 City Lords around Zhao Fu also exploded out with immense strength, and their auras seemed to cause the weather to change. Their terrifying auras shook the surrounding region.

The 19 people turned into rays of light and shot towards the system main city, planning to kill the City Lord. As long as they killed the City Lord and obtained the City Lord Seal, the battle was effectively over. Killing the leader was always the most effective way to end a battle.

Because of Great Qin's sudden attack, most players had not had time to leave. They did not dare to help the system main city defend, as they had heard that Great Qin had developed a way to kill players in large numbers. They were afraid of Great Qin using this against them, and none of them wanted to die.

Many players quickly tried to exit the Heaven Awaken World, but because the city was already being attacked, they were unable to leave. As such, they could only hide within buildings in terror.

Some people shouted in fear, "Great Qin, we don't dare to make you an enemy; please spare our lives!"

Zhao Fu heard them, but they had already surrounded the system main city and were attacking, so how could they have time to let these people go? If they did so, they might miss the opportunity to attack, so Zhao Fu paid no attention to them.

If they obediently hid, Zhao Fu could spare them, but if they helped defend the city, Zhao Fu would use Reality Harming Talismans to kill them all.

There were not many players in the system main city, only 200,000 or so.

Great Qin's soldiers quickly climbed up the city walls and started fighting the soldiers on top of the city walls. Also, in just a few bouts, the system main city's City Lord had been heavily wounded by Great Qin's 19 City Lords, and seeing everything happening around him, he yelled, "I surrender!"

In the face of such immense strength, no one wanted to die for nothing, so this City Lord rationally chose to surrender.

Great Qin quickly took over this city. All of the soldiers put down their weapons, and the City Lord handed over his City Lord Seal.

Zhao Fu also decided to spare those players as well. The players all felt as if an immense weight had been taken off their bodies, and cold sweat rolled off their bodies as they felt that they had just come back from the land of the dead. They quickly left the system main city and did not dare to dally. Facing the prospect of true death, they did not dare to try to resist Great Qin at all.

The three other City Lords had been watching all of this in the distance, and after seeing how terrifying Great Qin was, they quickly turned and left.

Zhao Fu looked over at them and transformed into a ray of light as he chased after them. Soon, blood flew everywhere as a headless corpse fell to the ground, and Zhao Fu held an elderly man's head in his hand, smiling at the two wounded City Lords in front of them.

Following this, Zhao Fu brought back three City Lord Seals and two City Lords. Zhao Fu had never thought that it would be so easy to take down a region.

Chapter 647 - Level 3 Great City

Following this, Zhao Fu brought a large number of people and soldiers back to Great Qin. Zhao Fu had conquered four system main cities but had only taken three, leaving one behind to use as a base

for his soldiers. This location was quite important, and Zhao Fu did not want anyone making any trouble for him.

Moreover, by leaving a city here, they could continue to be on their guard against the eastern side's regions.

Of the four system main cities, only one of the City Lords had resisted, which was the City Lord Zhao Fu had killed. In front of Great Qin's massive army, they would not have the ability to resist anyway.

After returning to Great Qin, a soldier came to report that Great Qin had killed a City Lord, subdued two City Lords, conquered three system main cities, and brought back a large number of residents and soldiers.

By now, Great Qin's population was at 30.2 million people, so Zhao Fu expanded the military to 5.5 million soldiers. There were 3.8 million Stage 1 soldiers, 80,000 Stage 2 soldiers, and 2,000 or so Stage 3 soldiers.

They also had 42 Great Cities, 5 Cities, 30 Towns, and 2,669 Villages.

After conquering and relocating the seven system main cities, the Great Qin City obtained a large amount of EXP, and it once again leveled up.

(800000/42000000)

:3492950/12240000 892640/4482000

Village Name: Great Qin City (Epic)

Level: Level 3 Great City (800,000/42,000,000)

Village Area: 18,400 square kilometers

Village Territory: 821,800 square kilometers

Residents: 3,492,950/12,240,000

Military: 892,640/4,482,000

Popular Support: 85

Village Special Stats: Territory Crop Output +170%, Territory Crop Growing Time -170%, Population Limit +120%, Residents' stats can randomly +12, Soldiers' stats +13%, Population Attraction +135%, chance of attracting higher grade population +135%.

Subsidiary Village Limit: 16,930

Subordinate Villages: Logue Village, Jean Village, Dorun Village, Li Family Village, Wolf Village, Ferocious Tiger Village...

The Great Qin City was now a Level 3 Great City, and it had not been long since it had last leveled up. Now, there were two levels remaining until it could become a Capital City.

The final two levels were called Sub-Main City and True Main City.

Leveling up to a Sub-Main City required 42 million EXP, and it would take quite some time to obtain such an enormous amount of EXP. Only by continuously attacking system main cities would they be able to obtain so much EXP.

They had now conquered the eastern side, so only the western side, northern side, and southern side were left.

Great Qin had returned to clearing out regions. They had just finished clearing out one region. There were two more, so they still had seven regions to clear out.

In the eyes of ordinary people, this speed was already incredibly fast, but to Zhao Fu, it was still much too slow. However, there was nothing he could do about this, and him being impatient could not make anything happen faster.

A few days later, it was once again time to trade in the outside world. As Great Qin expanded its army, they needed more and more soldiers' corpses, the higher the Stage the better.

They also needed Talisman Stones. Great Qin now had two million pieces of Talisman Equipment, but there were only one million sets of both weapons and defensive equipment, which meant that they could only fully equip one million soldiers.

Within a private room, Zhao Fu and Roxi sat as they talked. From Roxi, Zhao Fu heard that the Devil Horn Empire was indeed attacking the Lantong people and Grassi people.

The Devil Horn Empire was that Level 1 Dukedom, and they were from the Devil Race and had short horns on their heads. Now, the Lantong people and Grassi people had allied together, or else they would not be able to resist the Devil Horn Empire's invasion. However, despite this, the Lantong people and Grassi people were still at a disadvantage.

After hearing about this, Zhao Fu couldn't help but feel nervous. If the Lantong and Grassi worlds could not defend against this invasion, the human world would have no chance at all.

If the Devil Horn Empire destroyed these two worlds, their next target would definitely be the newer worlds, as newer worlds were like free meat to everyone else.

Because of the massive battles between the three sides, the Swan Goose Group had been able to obtain one million Stage 1 soldier corpses, 50,000 Stage 2 soldier corpses, and 5,000 Stage 3 soldiers corpses.

Zhao Fu was very pleased with these numbers, but he felt an ache in his heart as that was another 25 million gold coins gone.

Moreover, apart from the corpses, there were also Talisman Stones. There were 1.4 million White grade Talisman Stones, 150,000 Blue grade Talisman Stones, 30,000 Silver grade Talisman Stones, and 340 Gold grade Talisman Stones, which were worth another few million gold coins.

In total, the cost came to 30 million or so gold coins. After spending so much money, Zhao Fu could not help but think about how much money he had left. For a while now, Zhao Fu had been paying with the equipment that they had obtained from the players they had slaughtered in that massive battle, and he had used up 40% of that equipment. If he continued to spend money like this, they would run out of money sooner or later.

However, if they were able to obtain these corpses, Great Qin would have 3.2 million spare Stage 1 corpses, while the Stage 2 and Stage 3 corpses would all be used immediately. Great Qin did not lack Stage 1 corpses anymore, so Zhao Fu's main focus was on higher Stage corpses and higher Grade Talisman Stones.

They greatly lacked both of these things, and Zhao Fu also wanted to think of a way to earn a large amount of money to support Great Qin's heavy expenditure.

Great Qin had opened up paths to 170 regions and had used up all of its Void Crystals. Through its businesses in the various regions, Great Qin earned roughly 700,000 gold coins per day, but they had to use some of that money on other matters.

They could only afford to spend 500,000 gold coins per day, which was five million in ten days. Currently, they did not have enough money to continue spending like this.

However, these things were all things that Great Qin needed, so Zhao Fu could not afford to be stingy. Zhao Fu gave a spatial ring to Roxi, and Roxi smiled brilliantly as she took a look then put it away and said, "Guest, is there anything else that you need?"

Zhao Fu bitterly smiled and shook his head. Now that he did not have as much money, he could not continue to recklessly spend money.

Roxi did not feel disappointed, as Zhao Fu had already spent more than 50 million gold coins at the Swan Goose Group, and it was the first time that they had encountered such a rich customer.

If they did not know that he had an extraordinary identity, they would have wanted to rob him just to see how much money he had.

Because of her trades with him, Roxi's position in the Swan Goose Group became higher and higher, and the Swan Goose Group's overall strength became a bit stronger as well.

When a Group had an immense fortune, it would develop its own faction. After all, without enough strength, one's money would simply belong to someone else sooner or later.

“I’ll be going now, Miss Roxi.” After completing the trade, Zhao Fu planned to leave. Now, it could be said that he was friends with Roxi.

Roxi smiled and nodded before thinking of something, and she called in three beautiful women and said, “Guest, you’re a VIP of our Swan Goose Group, so this is a small gift from us. They’re virgins and are skilled at serving others.”

Seeing this, Zhao Fu smiled and refused. He could not trust anyone right now, as he could not risk exposing his identity. Moreover, Zhao Fu did not lack women, and there were still many women Zhao Fu had not even touched yet.

Roxi did not try to force Zhao Fu, and she instead looked at him with appreciation. She felt that he was not someone who was ruled by lust – after all, these three female attendants had been specially picked out by the Swan Goose Group. Their looks and temperaments were excellent, and ordinary people would not be able to refuse them. However, she did not know of Zhao Fu’s reputation in the Legacy Land.

#### Chapter 648: Barbarians

After leaving the store, Zhao Fu planned to quickly return to Great Qin, as he felt that time was becoming tighter and tighter. However, after passing the slave market, he sensed the Silver Lake Immortal Shield tremble within his spatial ring. Zhao Fu felt quite surprised and looked around.

He saw that within the slave market, there was a barbarian slave bound by chains being dragged out by people.

Barbarians usually had inferior intelligence but had strong bodies. Because their culture was quite barbaric, they were referred to as barbarians.

The barbarian that Zhao Fu saw was two meters tall and covered with muscles. He had a thick beard and very long hair to the point that it covered his face, making it impossible to see what he looked like. There was also a beast skin around his waist.

This barbarian was incredibly strong and required six or seven people pulling on the chains to drag him. Moreover, that barbarian was continuously struggling, not wanting to move.

Zhao Fu felt the Silver Lake Immortal Shield tremble again, and he now understood its intent.

Seeing the barbarian struggle, the slave master's expression became savage, and he prepared to take out a whip to whip him.

"Wait!" A voice stopped him, and he looked over and saw a mysterious person wearing a black cloak. He felt that the person had a very powerful aura, so he immediately put on a smile and asked, "What is it, sir?"

"How much is this slave? I want to buy him!" That person was naturally Zhao Fu.

The slave master's smile became even brighter, and he immediately said, "Lord, this barbarian was the leader of a small faction, and we spent quite a lot of effort catching him. His Cultivation is around Stage 1-5, and since you're the lord who wants him, I'll sell him for 1,000 gold coins!"

This barbarian was quite difficult to subdue, and the slave master had been thinking of ways to get rid of him. Now that Zhao Fu wanted to buy him, and sensing how powerful Zhao Fu was, he most likely would not care too much about money, so he set a high price.

Zhao Fu did not mind the price, so he threw over a sack of coins.

The slave master happily caught the bag and looked through it before handing over a sheet of paper. This was a Contract, which could decide the life and death of a slave.

Zhao Fu received the Contract and immediately used it.

"Lord, do you want us to send him to your residence?" the slave master smiled and asked. They would normally provide a delivery service for slaves like him so as to prevent anything unexpected from happening.

"No need, you can all let go of him," Zhao Fu said.

Hearing this, the slave master gave the order to let the barbarian go, and the barbarian also stopped struggling. He looked at Zhao Fu, and he could instinctively feel that Zhao Fu was incredibly dangerous. However, he pointed at another barbarian locked in a wooden cage next to him and muttered something that Zhao Fu could not understand.

Zhao Fu looked at the barbarian that the man was pointing at and found that it was a child who was seven or eight years old. The child looked a lot like this man and was most likely his son.

Zhao Fu did not say much and threw another few hundred gold coins to the slave master and bought the son as well.

Zhao Fu walked ahead while the barbarian man carried the child in his arms and followed behind him. The barbarian man did not try to escape or attack Zhao Fu.

Even though there was a Contract, if one was strong enough, they could resist the power of the Contract. However, the barbarian man still did not dare to act, as the aura from Zhao Fu's body was simply too dangerous. This was the first time that the barbarian man had met such a dangerous figure before, so he did not dare to do anything.

After arriving at a boundary region, Zhao Fu used a Language Stone to learn the barbarian language, and he asked, "What is your name?"

The barbarian man replied, "I'm called Ye Ji. This is my son, Ye Wu!"

Zhao Fu nodded and took out the trembling Silver Lake Immortal Shield from his spatial ring and gave it to Ye Ji, saying, "This is yours from now on. As long as you wholeheartedly serve me, I won't neglect you!"

Ye Ji received the silver shield and found that it was a Legendary grade shield. Even though he had led hundreds of barbarians before, he had never seen a Legendary grade item, yet this person had casually given him such a precious item – it showed just how much that person valued him. As such, Ye Ji had his son kneel down with him, and he said, "I, Ye Ji, am willing to serve you, my lord!"

The barbarian child, Ye Wu, also blankly repeated what his father had said.

Zhao Fu smiled, then brought them back to Great Qin. Now, he had found owners for all seven pieces of the Silver Lake Immortal Equipment, which was a big load off his heart.

Following this, Zhao Fu told his Generals what he had learned in the outside world, as he was quite concerned about this.

The situation in the outside world was quite tense, which forced Great Qin to adapt its plans. They no longer continued to clear out the eastern side, and they instead decided to attack the three other sides and restore Great Qin as a nation. After this, they would be able to construct a Great Wall, allowing Great Qin to have more power to protect itself.

However, there were still seven regions that they had not cleared out yet, which was a bit of a headache. They could not just let them sit there, or else they would have more and more regions to clear out in the future.

Their currently clearing speed was actually already quite fast. With the Village Compasses and the Gray Wolves' sense of smell, it was quite easy for them to find villages. It now took less than a month to clear out an entire region, which was many times faster than before.

However, because of the situation in the outside world, Zhao Fu felt quite rushed. Zhao Fu also asked the golden dragon what they could do, and it suggested to use Undead Disasters to clear out regions.

However, if they did that, Great Qin would not be able to obtain much. Each region could provide two to three million people, which Zhao Fu did not want to give up. He also worried that the Undead Disasters would go out of control.

After all, Great Qin could not fully control an Undead Disaster of that scale and could only guide them. However, if the Undead Disaster turned on them, they would suffer heavy losses.

After thinking for a while, Zhao Fu felt quite frustrated, as there was no easy way to resolve this situation.

Suddenly, Zhao Fu remembered that he still had two Region Treasure Boxes that he had not yet opened. They were the Region Treasure Boxes that he had obtained after conquering the two eastern side regions from before.

Zhao Fu opened the first one, and light shot out as a piece of black wood appeared.

The piece of wood was about 60 centimeters long and was as thick as a person's thigh. It was square shaped and gave off traces of a black and cold aura.

[Soul-Nourishing Wood]: Souls and spirits can be placed within this piece of wood, which will provide healing properties.

Zhao Fu did not have much use for this, so he put it into his ring after taking a brief glance. He then turned to the second treasure box and opened it. An intense light shot out, after which a very large beast skin appeared before Zhao Fu.

This bearskin was wrapped up and was yellow-colored, and it looked quite crude. It also had a dense muddy smell to it.

The best skin seemed to be a material, and Zhao Fu couldn't help but feel a bit disappointed. However, after looking at its information, he grinned.

#### Chapter 649 - Great Earth beast skin

[Great Earth Beast skin]: A rare beast skin that contains the source energy of the land. Spreading the beast skin on the ground will cause it to show the topography within 5,000 kilometers, including various structures.

This beast skin's effects were quite extraordinary; not only could it show the topography of the land, but it could also reveal villages. Zhao Fu smiled – with this beast skin, it would be much easier to clear out a region.

Great Qin's army was currently split into teams, and with only 50 Village Compasses, there was not enough to go around. With this beast skin, he could have people easily look for the location of villages.

Moreover, they could also draw detailed maps, which would provide Great Qin with a great advantage. If they were to launch attacks, knowing the topography of the land would be quite useful. Moreover, after Great Qin established a nation, having maps would make it much easier to govern the land.

Zhao Fu once again gathered his Generals, and now that Great Qin was on a tight schedule, Zhao Fu ordered them to clear out a region within ten days.

If they could do so, there would be rewards, and if they could not do so, there would be punishments. Under Zhao Fu's pressure, the Generals did not dare to be complacent, and they gave it their all. This caused their soldiers to also become quite focused and nervous, and their clearing speed became even faster.

The soldiers solemnly left to conquer the regions, while Great Qin's various Departments also worked at full speed, doing their best to support Great Qin's soldiers clear out the regions. Right now, clearing out the regions was their top priority.

"His Majesty orders for the speed at which the regions are cleared to be increased. No one is to be complacent, and those who complete the task will be heavily rewarded, while those who fail will all be punished!" a muscular man in black armor, who gave off a powerful aura, loudly said to the countless soldiers below.

The soldiers all looked incredibly serious and had grave auras, creating an incredibly austere and mighty atmosphere.

The muscular man took out a sheet of paper and yelled out:

"Gong Gaochao! Take 1,000 soldiers and head 13 kilometers northwest. Destroy the Basic Village there as fast as possible!"

"Yes! This subordinate obeys!" an armored man walked up and said.

"Shu Haoqiong! Take 5,000 soldiers and head ten kilometers south. Destroy the Intermediate Village there as fast as possible!"

"Yes! This subordinate obeys!" another armored man walked up and said.

"Dai Zhonggong! Take 5,000 soldiers and head ten kilometers southeast. Destroy the Intermediate Village there as fast as possible!"

"Yes! This subordinate obeys!" another armored man walked up and said.

“Cui Yi! Take 1,000 soldiers and head 15 kilometers north. Destroy the Basic Village there as fast as possible!”

“Yes! This subordinate obeys!” another armored man walked up and said.

After the various orders were given out, Great Qin’s soldiers quickly headed out to their destinations and started to attack the villages. Their speed was incredibly fast, and they acted in an orderly fashion without any chaos at all.

Within the Great Qin City, Zhao Fu was searching for his next target. There were 20 or so regions allied together, and there were 71 system main cities, with a force totaling 10.4 million soldiers.

The eastern side’s six regions alliance, which had 21 system main cities and 3.1 million soldiers, had already been destroyed, and they had taken over those regions.

The western and southern sides each had five regions allied together, and each side had around 19 system main cities with 2.6 million soldiers each. However, because Jing Qianxue and the three other City Lords had tried to assassinate Zhao Fu, the western side’s strength was only as strong as the northern side’s now.

The northern side had four regions allied together, with 14 system main cities and 2.1 million soldiers.

As such, Zhao Fu decided that his next target would be the southern side. After getting rid of the southern side, the remaining two sides would not pose much of a threat.

Before signing the Contracts, even though it seemed like neither side would be able to attack each other, there were some small loopholes in the Contracts. As such, Zhao Fu used those loopholes to attack.

Even though it was a bit shameless, Zhao Fu had no other choice.

If they were not willing to surrender, Zhao Fu could only destroy them. Great Qin could not co-exist with them, and if Great Qin was to restore its nation, it would have to take all measures.

Currently, Great Qin's task was still to clear out the regions before making any attacks. After digesting those seven regions, Great Qin's strength would once again greatly increase.

Furthermore, Zhao Fu wanted to revise Great Qin's laws and decrees. The time for the restoration of Great Qin was coming soon, and it was time to start preparing for that. Laws were necessary to govern a nation, or the nation would descend into chaos.

It was just that he did not have anyone from the School of Legalism with him. However, he could still borrow laws from the real world.

However, this would still take some time, as many of the laws in the real world did not suit the Heaven Awaken World. After all, the real world was more democratic, while Great Qin would be more imperialistic, which meant that there was a great difference between them.

Moreover, the laws needed to suit Great Qin's culture, traditions, and people, so they could not just casually import laws.

Zhao Fu decided to enforce strict laws for the common people – of course, they would not be as strict as traditional laws were, such as cutting off tongues and ears and gouging out eyes. In order to carry out punishments, Zhao Fu decided to set up a special force.

As for those who committed unspeakable and inhumane crimes, there would be incredibly harsh punishments, such as death by a thousand cuts or flaying.

It would take quite some time to set up laws for Great Qin, and they would have to be continuously revised. When the time came, Zhao Fu decided to bring in some people from the School of Legalism to help.

Moreover, Zhao Fu gave the order to build many brick kilns. Zhao Fu wanted to build a Great Wall, and because getting stone from mountains would be too inefficient, it would be better to use bricks.

Ordinary bricks could be used to build roads and buildings, but they could not be used for constructing the Great Wall. After all, the Great Wall was for defending against enemies, so the bricks had to be at least sturdier than ordinary rocks from mountains.

As such, Zhao Fu ordered his people to research special bricks, and their progress was quite good. They would be able to produce special bricks soon.

Apart from constructing an inner Great Wall, Zhao Fu also wanted to construct an outer Great Wall. As Great Qin's territory continuously expanded outwards, they would continue to construct Great Walls, forming a powerful defense. For this, they needed a large number of bricks.

During this period of time, Zhao Fu returned to the real world a few times, but because his heart was completely focused on Great Qin, he did not pay too much attention to other matters.

Two months later, spring had departed, and the bright green colors became dark green. Summer had arrived in the Heaven Awaken World. The sunlight was incredibly intense, and it was quite hot.

During this entire time, Great Qin had not left its territory. None of the factions had heard anything from Great Qin, as Great Qin had been completely focused on developing. By now, it had finally finished clearing out the seven regions, had unified the eastern side, and had become vastly more powerful.

Chapter 650: Advance

Great Qin now had 45 million residents and eight million soldiers. Five million of them were Stage 1 soldiers, 100,000 of them were Stage 2 soldiers, and 5,000 or so of them were Stage 3 soldiers. That was Great Qin's current strength.

With that sort of strength, it would not be any problem for Great Qin to deal with the three other sides. This mainly required everyone in Great Qin to work together.

Great Qin now controlled 13 regions, and its strength was many times that of the other Dynasties. However, Zhao Fu still felt that this was not enough, as this sort of strength would be nothing in the face of more powerful enemies. They were still too weak, and Great Qin had to become even stronger.

In those two months, Zhao Fu had constructed many brick kilns, which could create bricks that were tougher than ordinary rocks and even steel. This was because, during the creation process, they would add metallic powder, and this sort of brick would be used for building the Great Wall and City Walls in the future.

In terms of laws, Zhao Fu had Shang Yang take charge. Many of the law reforms in Great Qin had been conducted by him back then, so Zhao Fu decided to hand this job to him again. Of course, it

was impossible for a single person to complete this monumental task, and it would require the help of many people.

At the same time, Great Qin prepared to start to attack the southern side. Back then, the contents of their Contract were that Great Qin's soldiers and City Lords were not to step within the contracted regions. However, people who did not fall into one of those categories, such as Great Qin's Assassins, were not restricted.

Zhao Fu looked at the 100 Assassins next to him. They were the elite of the elite and proficient at all forms of assassinations, and they were incredibly stealthy. At the same time, their Cultivations had all reached Stage 3.

"Your... Majesty, I'm... ready!"

For some reason, Little Sha still could not speak very well, and he was still at the same height and looked the same. He still looked like a 12 or 13-year-old boy and had blood-red eyes and sharp teeth, which looked quite scary.

Even though Zhao Fu did not know much about the Sin Devil Bloodline, just from the 500 years lifespan alone, Zhao Fu could tell that Little Sha's background was not ordinary at all. At the same time, Zhao Fu gave little Sha an official name – his surname would also be Zhao, so his name was Zhao Sha.

Within a system main city, there was a handsome-looking City Lord. He was called Zhang Nan, and he was the City Lord of Water Spirit City. Now that two or so months had passed without anything happening, many City Lords had relaxed and thought that Great Qin would not dare to attack them. After all, with those powerful Contracts, it would be very difficult for Great Qin to do anything to them.

Zhang Nan also thought that way – two months had already passed, so there was not much to worry about anymore. He was quite satisfied with their current life, as he was able to live with his wife in bliss and look after his aged mother. He was also awaiting the birth of his first child.

His wife was about eight months pregnant now, and there would be less than two months before his child would be born. They were not sure as to the sex of the child, but no matter what sex it was, Zhang Nan would still be quite happy.

Zhang Nan was preparing to go to sleep with his wife when suddenly one of his subordinates came and reported that something had happened.

Zhang Nan frowned and went outside, and he found that the streets were covered with ferocious fires everywhere. The situation was incredibly pressing, and Zhang Nan immediately went to personally put out the fires. Otherwise, if the fires spread, they would annihilate the city.

A while later, the fires had been extinguished, but Zhang Nan felt that something was off – why had such intense flames suddenly erupted out, and they were everywhere. Surely this was not just a random occurrence.

After returning to his residence, Zhang Nan's gaze became cold – his ill premonition had been correct.

His beloved wife and his mother had been captured, and there were sharp knives pressed against their necks.

Zhang Nan felt quite furious, as these two people were the two most important people in his life. "Who are you? Return my wife and mother!"

Wang Ergou smiled and replied, "City Lord Zhang, as long as you follow our instructions, we'll naturally let them go."

Zhang Nan felt a sense of danger, but looking at his wife and mother, he held himself back and asked, "What do you want me to do?"

"It's very simple – we just want City Lord Zhang to take your soldiers and attack Great Qin's territory before returning. Afterward, you can take your people and family away, and Great Qin will not stop you at all!" Wang Ergou said as he smiled.

Zhang Nan's heart trembled – so they were from Great Qin. However, if they did this, their side would be breaching the Contract, and all of their stats would be reduced by 40%. They would not be able to fight against Great Qin at all.

If Stage 1 soldiers' stats were reduced by 40%, they would be far weaker, and the five regions would not be able to stop Great Qin anymore.

By now, Zhang Nan had realized Great Qin's objective, and his expression became quite ugly as he furiously roared, "So Great Qin was not planning on having peace at all; isn't it too shameless to use such methods?"

Wang Ergou did not mind Zhang Nan's words, and he lightly ran the blade across Zhang Nan's wife's bulging belly. Zhang Nan's wife was scared to the point that her body uncontrollably shook, and tears streamed out of her eyes.

"City Lord Zhang, I'll say it one more time: take your soldiers to attack Great Qin, after which you, your family, and your people can run away. Otherwise, your wife, mother, and your unborn child might not live to see tomorrow!" Wang Ergou stared at Zhang Nan as his voice suddenly became cold.

Zhang Nan felt incredibly furious, but after looking at his crying wife and his trembling mother, he still agreed in the end.

Wang Ergou once again smiled. Before acting, all of the Assassins had found what the City Lords treasured the most so that they could use those things to force them to submit.

Following this, Zhang Nan gathered his soldiers and made preparations for the city to be relocated before invading Great Qin's territory.

"System announcement! The southern side has invaded Great Qin and breached the Contract. The southern side has received a 40% debuff to all stats!"

This system announcement was like a peal of thunder in countless people's ears, and after hearing this, they all looked incredibly shocked.

Zhao Fu was currently riding on Black Forest and was leading eight million soldiers and countless Generals. They had long since been waiting at the boundary region, and as soon as the system announcement sounded out, Zhao Fu gave the order to attack.

Great Qin's army flooded forward with immense momentum. In order to strike as quickly as possible, Zhao Fu and Bai Qi each led half of Great Qin's army and Generals to invade two regions.

Some of the City Lords who had no idea what was happening wondered why the Contract had been breached and why it had been their side that had breached it. They wondered if they could go and sign a new Contract with Great Qin the next day.

After all, over the past two months, Great Qin had given them many gifts and acted incredibly courteously. In fact, they had even eaten with Great Qin's representatives a few times, making them greatly trust Great Qin.
