

The Lord 701

Chapter 701: Retaliation

Hearing Zhou Chang's words, Li Mao felt quite delighted, but he still said, "Esteemed City Lord, of course you are good enough. I'm sure His Majesty will be pleased with such a grand figure like you joining. However, would you like to first send a few people to Great Qin to take a look? You will be able to verify whether everything I said was the truth; Great Qin has the confidence to invite anyone to take a look!"

This was to increase Zhou Chang's trust in Great Qin. Even if he sent ambassadors, Great Qin would welcome them.

Hearing Li Mao's words, he marveled at Great Qin's confidence.

In order to act as safely as possible, Zhou Chang decided to send a few of his trusted aides. There were many City Lords who decided to do the same thing.

Roughly 150 or so City Lords sent ambassadors to Great Qin. They were already interested in submitting, and if everything that Great Qin's ambassadors said was true, Great Qin would indeed be the best person to submit to. They would no longer have to worry about natural disasters, and Great Qin would be able to deal with future dangers as well.

Even though Zhao Fu had sent out 1,000 or so ambassadors, only 150 or so City Lords were willing to send their own ambassadors to take a look at Great Qin. Most people were still hesitant.

As City Lords, most of them did not want to have to submit to someone else, and the situation was not too dire yet. They were not in a hurry to make a decision, as this would determine their life or death, and there would be no room for regrets. Of course, there were many City Lords who hated players, and they were the ones who had committed the slaughters.

Tangerine City's City Lord, Liu Dacheng, was currently spending time with a few beautiful female attendants when a soldier came to report that the Great Qin Empire had sent ambassadors to visit.

Hearing this name, Liu Dacheng knew that it was an Otherworlder empire. Because they were quite far away from Great Qin, he did not know Great Qin's true strength. However, he greatly despised Otherworlders.

As such, without even thinking about it, Liu Dacheng ordered, "Kill all of them! In the future, kill any Otherworlders who come. Your elder hates seeing Otherworlders; the more we kill, the safer we'll be in the future!"

The soldier felt quite troubled and said, "City Lord, it was Sir Liu who asked me to come and invite you. He says that they're very important people, so please go and meet them!"

Liu Dacheng yelled angrily, "Who's the City Lord here? Are you going to obey him or me? Kill those people; do you think I'm afraid of the Great Qin Empire?"

The soldier's face went pale, but he heeded the order and went out to give out the order.

Five Stage 3 soldiers and a scholar were powerless against an entire system main city and were cruelly killed.

Nearby, a man in green wanted to stop this but was unable to. Looking at the six corpses, he felt that a catastrophe was about to descend.

Great Cart City's City Lord, Zhao Cheng, also received a report from a soldier that ambassadors from Great Qin had come. He knew some information about Great Qin, but he had chosen to resist Great Qin. He despised Otherworlders, and the Otherworlder Dynasties were his greatest enemies.

Zhao Cheng went to the city gates and looked at the six people. He felt quite surprised but suddenly attacked. In order to protect the scholar, a few soldiers were instantly killed.

The scholar was stained with blood, and he felt quite scared, causing his body to tremble. He knew he was going to die, but thinking about Great Qin, the books he had read, and the soldiers who had died for him, his gaze became resolute as he stood straight. He could not allow Great Qin to be shamed; even if he had to die, he would die with dignity.

"Everything you've done today will be repaid ten times over by the Great Qin Empire!" the scholar said as he looked coldly at Zhao Cheng.

Facing this threat from someone who did not even have Stage 1 Cultivation, Zhao Cheng could not help but coldly harrumph. He waved his hand, causing an arc of light to flash out. Blood spurted everywhere as the scholar's head was chopped off and rolled to the ground as his body also collapsed to the ground.

Zhao Cheng coldly laughed and had his soldiers kill the remaining soldiers and send their corpses back to Great Qin.

Within East Peace City, the City Lord, Xu Nei, condescending looked at the six people in front of him and said arrogantly, "You dare not kneel when greeting me?"

Hearing these words, the scholar felt quite displeased, but he understood the importance of this task, so he gave a slight smile and cupped his hands as he said courteously, "Esteemed City Lord, my name is Qian Chang, a scholar of Great Qin. I have been sent as an ambassador to this city!"

"I told you to kneel, didn't you hear me?" The Xu Nei's voice became louder, bringing with it a trace of anger.

This caused Qian Chang's expression to become cold. He once again cupped his hands as he said, "Esteemed City Lord, I am a scholar of Great Qin. I only kneel to the heavens and earth, my parents, and His Majesty. I will not kneel for anyone else."

Xu Nei coldly harrumphed. He was also one of the City Lords who hated Otherworlders, and he had no plans to join Great Qin at all. He simply wanted to humiliate Great Qin.

Hearing Qian Chang's words, he angry slapped out, causing a formless energy to slam the six people to the ground. The Stage 3 soldiers were instantly killed, but Xu Nei left Qian Chang alive. Looking at Qian Chang coughing up blood, Xu Nei stepped on his head and said coldly, "I'll kill anyone from Great Qin!"

Following this, Xu Nei crushed Qian Chang's head with his foot, causing blood and brains to fly everywhere.

Out of the 1,000 scholars, roughly 950 scholars returned, which meant that 50 of them were killed. Luckily, most of the City Lords were rational and thought of Great Qin's strength, so they treated the ambassadors with respect.

The City Lords who had killed the ambassadors were all ones who had committed massacres in their cities. They hated Otherworlders and acted savagely, doing whatever they wanted.

The deaths of the 50 ambassadors enraged Zhao Fu. However, Great Qin now had a good reason to kill those City Lords.

Now that the passages to other regions had been opened up, it was easier for the City Lords to communicate with each other. If Great Qin attacked a system main city for no reason, this would make the other system main cities feel hostile towards them, which was why Great Qin had not acted recklessly.

Now that they had killed Great Qin's ambassadors, killing them was something to be expected. With this reason, Great Qin could attack them without the other City Lords saying much. After all, they had killed Great Qin's people first.

Zhao Fu gathered all of the City Lords, and split 90 or so City Lords into three teams, leaving the rest to defend Great Qin.

The system main cities that had killed Great Qin's ambassadors were in different regions, so Zhao Fu decided to destroy them all quickly without giving them any chance to retaliate. Each group would take down one City Lord at a time, and the three groups would be able to destroy the 50 system main cities in one night.

They would give up on the people and resources of those 50 system main cities, as they would not be able to bring them back due to the time constraints. If they sent out too many soldiers to escort them back, that would also be quite troublesome, so they would only take away the City Creation Stones.

Chapter 702: Blood for Blood

Everything was prepared, and it was now night time. Zhao Fu personally led one of the groups and headed towards one of the system main cities. Since they dared to kill his people, he would return blood for blood. Only by killing them would he be able to relieve the hatred and anger in his heart.

Zhao Fu first went to Tangerine City by himself – he had ordered the others to kill City Lords in the nearby regions.

Because Liu Dacheng did not know of Great Qin's strength, he did not put Great Qin in his eyes at all. After killing Great Qin's people, he acted as if nothing had happened and had even called for a raucous banquet.

Beside him, a green-clothed man looked quite anxious. He had been worrying about what had happened the entire day and felt that the situation was quite dangerous.

Zhao Fu stood in the air as he looked down. Now that he was the City Lord of a Sub-Main City, the Great Qin Seal had become even more powerful. Adding on Zhao Fu's Sovereign Bloodline, Zhao Fu would be able to fight ten system main city City Lords without any problems at all.

Looking at the raucous scene below, Zhao Fu's expression was quite cold as he took out the Sin Dragon Sword. He used one of his biggest attacks right from the beginning, sending his power into it and causing the Sin Dragon Sword to give off a chilling sword light. Countless traces of water vapour gathered, forming thousands of water swords in the air that gave off a powerful sword aura that covered everyone below.

Currently, Zhao Fu did not care about harming any innocents, because right now, he felt that everyone in the system main city should die.

The sudden descent of the sword aura caused the countless people participating in the banquet to feel a chill through their bodies. They looked up in terror and saw a black-cloaked figure standing in the air. There were thousands of water swords around him, pointing down at them.

Immediately, everyone realised what was about to happen. Expressions of terror covered their faces as they rushed outside and tried to run away, but it was too late.

Swish, swish, swish...

The water swords shot downwards, flashing past like cold rays of light. They pierced into people's chests, causing blood to spurt everywhere and for limbs to fly everywhere. The countless people participating in the banquet were instantly turned into corpses, and the raucous scene became deathly silent.

Liu Dacheng furiously roared, “Who are you? Why are you slaughtering Tangerine City’s people?”

Zhao Fu coldly harrumphed, “You dared to kill Great Qin’s people, and yet you ask who I am? Today is the day you die!”

Liu Dacheng realized what was happening, and he gripped his saber as he shouted. He stomped on the ground, causing the ground beneath him to crack as he shot into the air. His saber gave off shocking a saber light as he slashed towards Zhao Fu.

Zhao Fu disdainfully smiled and raised the Sin Dragon Sword and slashed forwards, sending out a powerful black crescent towards Liu Dacheng.

Bang!

Liu Dachen was hit by the black crescent and heavily fell to the ground, smashing out a crater that was ten meters wide. He coughed up a mouthful of blood before crawling up with great difficulty.

Shing!!

A piercing sword hum sounded out as Zhao Fu flew down from the sky, his sword bringing with it monstrous power as he slashed at Liu Dacheng. Liu Dacheng gripped his saber with both hands as he blocked, but the massive force behind Zhao Fu’s sword made it impossible to stand. He was forced into a half-kneeling position as he defended against Zhao Fu’s attack.

Zhao Fu looked at Liu Dacheng coldly, and his sword suddenly spun, knocking Liu Dacheng’s saber away. Liu Dacheng was greatly startled, and he tried to retreat. However, Zhao Fu rushed forwards and stabbed his sword through Liu Dacheng’s chest. Liu Dacheng looked down in confusion before falling to the ground, dead.

Zhao Fu picked up the City Lord Seal that floated out of Liu Dacheng’s corpse, then put the corpse into his ring. Liu Dacheng’s corpse was quite valuable, and Zhao Fu also took his spatial ring. There were many valuable things inside, but Zhao Fu did not bother looking through it as they would not be too useful to him.

At that moment, Zhao Fu sensed something and turned to look at a man clothed in green pretending to be dead under a table. He raised his hand, preparing to kill him with a single strike.

The green-clothed man sensed Zhao Fu's killing intent and hurriedly got up and knelt, calling out, "I'm willing to submit to sir!"

By now, there were countless system main city soldiers rushing over. Zhao Fu coldly harrumphed as he said, "Pacify this city before I come out, or I'll slaughter this entire city!"

Zhao Fu walked towards the City Hal. Now that he had so many City Lords, slaughtering an entire city was not a big deal; it would just take some time.

"Yes, yes, this lowly one understands!" seeing how this person seemed to view hundreds of thousands of lives like grass and how he had killed the City Lord in just a few blows, the green-clothed man hurriedly nodded and agreed.

After conquering and relocating this system main city, Zhao Fu once again obtained a lot of EXP and Achievement Points.

By the time Zhao Fu came out, the scene had been pacified, making Zhao Fu feel quite surprised. He had never thought that the man in green actually would have been able to pacify the others; it seemed that he held quite a high position in this system main city.

Zhao Fu had expected to see an army of angry system main city soldiers outside, whom he would kill. After all, the hatred in his heart could only be quenched by his blood.

However, since they had surrendered, he did not want to kill them, so he said coldly, "I still have people to kill. Great Qin's people will come and take over this city later."

The man in green nodded in terror, showing that he understood. He now knew that many system main cities would be bathed in blood tonight – this was Great Qin's strength, a single person could destroy an entire city.

The man in green thought that Zhao Fu was just a minor figure in Great Qin who had been sent to slaughter the city. Back when Liu Dacheng had killed Great Qin's ambassador, he had already had a bad feeling, which was now manifesting.

In East Peace City, Xu Nei hugged his wife as he slept. A ray of sword light suddenly descended from the sky, causing Xu Nei to instantly wake up. He rolled to the side, and the massive sword light annihilated the entire house. Even though Xu Nei was able to avoid the attack, his wife was slashed into pieces.

Xu Nei furiously roared and rushed out from the ruins of his house, looking at the black-cloaked figure in the sky. He immediately understood what was happening and yelled, “You’re from the Great Qin Empire!”

Zhao Fu coldly laughed, “You’re quite smart. Now, die!”

As he spoke, Zhao Fu prepared to kill him, but three powerful auras suddenly exploded out – the three other City Lords of this region had arrived.

Zhao Fu stopped and coldly looked at the three people who had arrived. They were not ones on his kill-list, so he said, “This matter is between Great Qin and East Peace City. Are you sure you want to get involved? You should know what the consequences are!”

Feeling the monstrous aura from Zhao Fu’s body, the three City Lords felt a bit shocked. After hearing Zhao Fu’s words, the three people realized that Xu Nei had most likely killed Great Qin’s ambassador, and now, Great Qin’s people had come to take revenge.

Hearing Zhao Fu’s threats, the three City Lords did not feel angry. After all, the other side had the strength to back up such threats. Instead, they looked at Xu Nei with hostility and felt that they had almost been tricked into being dragged into this.

Chapter 703: Level 5 Great City

Once the three other City Lords were dragged in, it was possible that they would die as well. They now knew more about Great Qin, especially Great Qin’s Legatee. He was simply too terrifying, so they had treated the ambassadors with respect.

Now that Xu Nei had killed a Great Qin ambassador and wanted to drag them in, this was quite infuriating.

“This matter has nothing to do with this old man. I’ll be leaving first!” a gray-robed elder said. He did not want to step into muddy water for no reason.

The other two people also said similar words; they were not stupid either.

Seeing this, Xu Nei cried out in horror, “I can give all of the fortunes in my city to you three. There’s only one person from Great Qin, so the four of us will definitely be able to kill him together!”

The three other City Lords ignored these words. Who would take such a great risk for a bit of money? Even though there was only one person, his aura was far more powerful than the four of theirs combined. Moreover, even if they could kill him, so what?

Great Qin stood behind this person, and if they fully enraged Great Qin, even more City Lords would come the next day. How could they stop them? As such, the three City Lords did not even look back as they flew away.

Seeing this, Xu Nei’s expression became determined, and he gripped his spear as he rushed at Zhao Fu.

Before the three City Lords had flown far away, they heard a pitiful cry behind them. They all sighed – Great Qin was simply too terrifying, as even a single City Lord was this powerful. Just how powerful was Great Qin’s true strength? They had mistaken Zhao Fu to be just a minor figure.

As the night went on, the sun soon began to rise. The two other groups had been quite successful and had destroyed city after city.

Finally, the three groups gathered together again and appeared above Great Cart City. The City Lords exploded out with their auras, and the 90 auras caused the air to seem to freeze. The residents below felt a heavy weight on their bodies, and a trace of blood leaked out of their mouths.

Zhao Cheng was startled by this massive power and hurriedly rushed out. He looked up confusedly at the 90 god-like people in the air.

“Great Qin is here to repay its debt!” Zhao Fu stood in the air as he coldly looked at Zhao Cheng.

Seeing so many City Lords, Zhao Cheng felt a sense of terror in his heart. He had never thought that Great Qin would bring so many City Lords; he was definitely doomed today. Zhao Cheng could only yell, "I'm part of the eastern side's alliance! You can't kill me, or else the eastern side alliance will attack Great Qin!"

Zhao Fu coldly harrumphed, "Do you think I care?"

Hearing Zhao Fu's words, Zhao Cheng felt a chill through his heart before saying, "I'm willing to submit to Great Qin!"

"Sorry, but I refuse. Do you have anything else to say?" Zhao Fu coldly asked.

Zhao Cheng's heart sank; he had never expected Great Qin not to accept his surrender. Since that was the case, the only thing he could do was run. Zhao Cheng suddenly turned into a ray of light and rushed away. He did not even care about the system main city anymore; all he wanted to do was live.

Looking at Zhao Cheng running away, Zhao Fu coldly laughed as he said, "Slaughter the city!"

"Yes!" the City Lords replied simultaneously before scattering to different parts of the city and unleashing powerful attacks towards the residents trying to escape. Houses crumbled and howls sounded out as an aura of death and despair filled the entire city.

In just a few moments, the 100,000 system main city soldiers were reduced to corpses by 20 or so City Lords.

Some elderly and women kneeling on the ground, crying and pleading for mercy, were instantly killed by a few sword lights; this was an absolutely merciless massacre.

Zhao Fu sat on the city wall, coldly looking at the scene in front of him. Next to him was Zhao Cheng's head, and as the sun slowly rose and shined on the land, it made him quite difficult to see.

The warm sunlight could not warm up the deathly silent city; Great Cart City had already been reduced to ruins. There were barely any structures left intact, and there was blood and corpses everywhere. It was now a city of death.

The news of Great Qin destroying 50 system main cities in a single night was like a nuclear bomb, shaking both the Heaven Awaken World and the real world.

Destroying 50 system main cities in a single night – that was simply too terrifying. Just how powerful was Great Qin?

News about Great Qin once again filled the Heaven Awaken World forum. This was the first time such a massive event had happened after the Chaotic World had opened, and this was the first time Great Qin had massacred so many system main cities. Hundreds of thousands of people had died, and no one had escaped the disaster, whether they were men, women, the old, or the young.

Many players nearby had gone to take a look, and those places had turned into hell on earth, making them filled with fear.

Even though Great Qin had slaughtered players before, players could endlessly revive, while the indigenous residents could not; when they died, they died forever. This was the first time Great Qin had truly massacred so many people, and this made the people even more afraid of Great Qin.

This event also caused mass-panic within the Heaven Awaken World, especially the hundreds of regions around Great Qin. If they hadn't known the reason for this massacre, they might have fled out of terror so as to not be destroyed by Great Qin the next night. They all inwardly rejoiced that they had not done anything to the ambassadors, or they would have been like that as well.

Great Qin's thunderous actions placed even more pressure on the various City Lords. Now, they could either choose to surrender or die fighting.

Right now, Zhao Fu did not know about everyone talking about what had happened. Instead, he was smiling as he looked at Great Qin's new stats.

3492950/40240000 892640/9482000

Village Name: Great Qin City (Epic)

Level: Level 5 True Main City

Village Area: 34,400 square kilometers

Village Territory: 2,421,800 square kilometers

Residents: 3,492,950/40,240,000

Military: 892,640/9,482,000

Popular Support: 80

Village Special Stats: Territory Crop Output +190%, Territory Crop Growing Time -190%, Population Limit +130%, Residents' stats can randomly +14, Soldiers' stats +15%, Population Attraction +145%, chance of attracting higher grade population +145%

Subsidiary Village Limit: 46,930

Subordinate Villages: Logue Village, Jean Village, Dorun Village, Li Family Village, Wolf Village, Ferocious Tiger Village...

The sheer amount of EXP from conquering 50 system main cities had caused Great Qin to level up again. Next was a Capital City, but they now needed 120 million EXP to level up. After all, establishing a kingdom was not easy, so it was understandable.

Great Qin had already fulfilled all of the other conditions for levelling up to a Capital City; it did not lack Great Cities, Cities, Towns, and Villages at all.

Also, the ambassadors sent by the various system main cities all started to head back. They had personally seen that the inside of the Inner Great Wall and the outside were two completely different worlds.

Outside the Inner Great Wall, there were dark clouds everywhere and continuous natural disasters, but inside, it was warm, bright, and peaceful. The residents all lived in peace and bliss, and there were all sorts of races living in harmony. It was an incredibly admirable scene.

Many City Lords had already agreed to join Great Qin, and after joining Great Qin, Great Qin's strength became even more terrifying. Under this stimulus, the eastern, western, and southern sides started to ferociously attack.

Chapter 704: Three Armies

The first to attack was the most powerful side, the eastern side. Their army now numbered more than 10 million and had increased by three million from before. There were about 90 or so City Lords, and they started to ferociously attack the Leaf Province, which was previously the Southleaf Region.

Zhao Fu immediately ordered Bai Qi to take ten million soldiers and 80 City Lords to meet them in battle.

Following this, the southern side also started to attack. They had eight million soldiers, two million more than before, as well as 80 City Lords. They flooded into the Flask Province, which had been the Open Flask Region before.

Zhao Fu ordered Wang Jian to bring six million soldiers and 70 City Lords to meet them in battle.

However, what Zhao Fu did not expect was that the southern side's force had increased significantly to 12 million soldiers. They now had seven million soldiers more than before, as well as 100 City Lords. They gave off a heaven-toppling aura as they marched into the Valiant Province, which was the original Valiant Peace Region.

Now, Great Qin was in some danger. They only had 19 million soldiers, and that was including what they had absorbed from the northern side. 15 million of them were Stage 1 soldiers, and four million were not even Stage 1 yet. And yet, they had to face a combined force of 30 million soldiers.

Zhao Fu had already sent out 14 million soldiers to defend against the eastern and western sides, and he never expected the southern side, which had been the weakest, to suddenly become the strongest existence.

Great Qin only had five million soldiers left at its disposal, who had to face the advance of 12 million soldiers. This was a bit difficult.

Great Qin was already struggling against the eastern and western sides, as both of the armies it sent out were weaker than the two armies they were facing. This was especially so in terms of City Lords: each of the armies that Zhao Fu sent out had ten less City Lords than the other side, and City Lords were incredibly important on the battlefield.

Now, the Great Qin only had five million soldiers and 37 City Lords remaining, while the southern side had 12 million soldiers and 100 City Lords.

“Your Majesty, the situation is quite dire. Should we go and invite the City Lords who were willing to join Great Qin?” Li Si asked.

Bai Xihan coldly harrumphed, “How could they be willing to help? Do you think they don’t know Great Qin is being attacked? They want to see Great Qin’s true strength; if we can survive this, they will definitely join, whereas if we can’t defend, then they will naturally give up on joining us!”

Li Si thought about it and realized that Bai Xihan was right, and sighed.

Zhao Fu thought about it, and after a while, he made a decision, saying, “I’ll deal with the southern side. I need ten City Lords and one million Stage 1 soldiers, as well as all of the Stage 2 and Stage 3 soldiers. The rest of the soldiers can go and support the eastern and western sides.

“Also, Li Si, gather some civilian soldiers to guard against the northern side in case Vietnam tries to do anything!”

After hearing that Zhao Fu wanted to only bring ten City Lords and about one million soldiers to defend against an army of 12 million soldiers and 100 City Lords, Li Si felt quite concerned and said, “Your Majesty, are you only going to bring so few people? I’m worried for your safety!”

Zhao Fu’s gaze was resolute as he replied, “The battles on the two other sides are quite difficult, so with the extra reinforcements and geography, they will have no problem in defending. I will take care of the situation at the south by myself!”

Seeing that Zhao Fu was not going to change his mind, Li Si could only go and carry out his orders.

As Zhao Fu gave out orders, all of Great Qin became quite tense. This was the first big battle after completing the Inner Great Wall, and it was also their first defensive battle. Great Qin's various Departments all stopped and helped out in manufacturing items needed for the war.

At the east of Great Qin, the Leaf Province was always filled with fog, and it was a marshland. It was difficult for people to walk around, and they would often get lost.

In order to construct the Inner Great Wall here, they had expended a lot of time. They first needed to find things that could prevent them from getting lost and then items that could turn the mud into hard rocks that they could walk on. The Inner Great Wall was constructed at the center of the Leaf Province.

Bai Qi was in charge here, and after reinforcements from the south came, he now had ten million soldiers and 90 City Lords, which was a comparable force to the eastern side.

The eastern side's army gave off roars that could shake the surrounding 100 kilometers, and they flooded into the Leaf Province. Bai Qi sensed them from far away and immediately gave the order to prepare for battle.

The 90 system main city City Lords flew into the sky and looked at the fog ahead. It was difficult to see, so they joined forces to create a massive gale that dissipated the surrounding fog. Below, the soldiers used their various items to solidify the ground to make it easier to walk.

The system main city army started to advance, and soon, the two armies were facing off against each other. Before they had even started to fight, two massive auras spread out, causing the surrounding air to seem to freeze. It was difficult to even breathe, and ordinary people would not even be able to stand up when feeling such auras.

The eastern side City Lords looked at the army on the Inner Great Wall that rivaled theirs and frowned. The three sides were all simultaneously attacking, and Great Qin definitely did not have the strength to rival all three of them on all sides.

As such, it was quite surprising that Great Qin's forces on the eastern side were not weaker than theirs. They could not help but wonder what Great Qin's forces were like on the two other sides.

By now, there was no room for retreat. Great Qin was becoming stronger and stronger, and if it accepted the surrender of more City Lords, it would start to take the initiative to attack. When that

time came, they would not be able to defend, so they might as well take this opportunity to heavily wound Great Qin.

The two sides were about 10 kilometers away from each other, with a lot of marshland between them. The eastern side City Lords gave the order to continue solidifying the ground and advance.

Seeing that they were solidifying the ground, Bai Qi obviously could not allow them to do as they wished. If they were allowed to do this, Great Qin would not have as much of an advantage anymore.

Whoosh, whoosh, whoosh...

As soon as the system main city soldiers entered firing range, Bai Qi ordered Great Qin's soldiers to start attacking. Powerful ballistae immediately started to shoot ballistae bolts towards the system main city army.

The system main city soldiers were ready, and they started to line up shields and form a shield wall.

Bang, bang, bang...

The thick ballistae bolts slammed down from above like heavy raindrops, smashing into the shields and causing massive impact sounds.

The City Lords did not expect the ballistae bolts to have such immense strength. Even though the Shieldbearers who were hit were not injured, they were pushed back a few steps, and some were even knocked over backward.

These were all Stage 1 Ballistae, and the ballistae bolts were all made out of Blue grade materials. If Stage 1 soldiers weren't careful, they could be heavily injured. Great Qin had researched the Stage 1 Ballistae very early on, and they had already mass-produced them.

Chapter 705: Seven Murders General Star

Sounds of the air being torn could be heard as countless arrows descended from the Inner Great Wall. They were simply innumerable, and the massive, sharp ocean-like aura could cause anyone to shiver.

The system main city shieldwall had already been broken through by the Ballistae, and seeing this, the City Lords hurriedly wanted to act. However, Great Qin's City Lords suddenly attacked, stopping the eastern side's City Lords from defending their soldiers.

“Arghhh...”

As the arrows poured down like rain, many system main city soldiers were hit, causing blood to fly everywhere and howls to sound out. Soon, the shieldwall was quickly reformed.

Looking at the countless injured and dead soldiers, the eastern side City Lords felt furious. They ordered their Archers to also attack, and they drew their bows and sent arrows whistling towards the Inner Great Wall.

Great Qin's side raised their shields, and with the advantage of being on the Inner Great Wall, they were able to easily defend against this wave of arrows.

If both sides continued to shoot at each other like this, the eastern side would definitely be at a disadvantage. Seeing this, the eastern side City Lords could only give up on this idea. However, there were still marshes in between them and Great Qin, so if they rushed up, they would be greatly hindered by the marshes.

Now, they faced the big problem of how to get past these marshes. Their soldiers could not continue onwards, or they would have to suffer the attacks of the other side while struggling to get through.

One of the City Lords suddenly said, “Please cover me, I have something that we can use!”

Hearing his explanation, the other City Lords started to launch all sorts of destructive attacks towards the Inner Great Wall.

Seeing this, Bai Qi frowned and ordered Great Qin's City Lords to defend against these attacks and tie down the eastern side's City Lords, preventing them from affecting the battle. The battle was left to Bai Qi, while the other City Lords were responsible for distracting the other side's City Lords.

However, at that moment, one of the eastern side City Lords rushed to the front of the system main city army and waved his hand. 100 or so yellow crystals flew out, shooting into the marshes around them.

These yellow crystals had very powerful Earth attribute energy; after shooting into the marshes, rays of yellow light burst forth. The muddy ground became yellow ground that was about 100 kilometers wide and could be walked on. Soon, the system main city soldiers started to walk on it.

Now that Great Qin had lost the advantage of terrain, the system main city soldiers started to charge. Seeing this, the eastern side City Lords felt quite delighted and also turned into rays of light as they went to fight Great Qin's City Lords.

Boom! Boom! Boom!

The two sides started to engage in a massive fight, and shockwaves rippled out in the sky. Great Qin's City Lords had an advantage in terms of equipment, as they had Talisman Equipment and Talisman Armor.

Their Talisman Equipment were all Legendary grade weapons fused with Gold grade Talisman Stones, which could rival an exquisite Epic grade weapon. With those sorts of equipment, Great Qin's City Lords' attacks were somewhat stronger.

The City Lord Seals of the two sides were about the same strength, so what determined victory or defeat would be their Cultivation, equipment, and skills.

Even though the eastern side's City Lords were slightly at a disadvantage, the ten million soldiers below gave off terrifying auras as they flooded towards the Inner Great Wall with unstoppable momentum.

Bai Qi's gaze became cold as he roared, "Fire!!"

Arrows streaked through the air, bringing with them immense force as they shot towards the flood of soldiers. However, the system main city had clumped together, their auras rising and forming a formless barrier above them that provided solid a defense.

As the arrows descended, most of them were blocked by the combined soldiers' auras, and only a small portion of them hit the soldiers. However, they were not enough to slow down this massive flood at all.

Bai Qi coldly drew the Seven Murders Sword at his waist. The only people present who had General Armaments were Bai Qi, Bai Xihan, and Meng Tian, but only Bai Qi planned to use his – he wanted to gather the soldier aura of ten million soldiers and completely release the Seven Murders General Star.

Bai Xihan and Meng Tian would only dilute the soldier aura, so Bai Qi ordered them to kill City Lords. With their strength, it would be better for them to go and kill City Lords.

Bai Qi slowly breathed out and raised the blood-red Seven Murders Sword with both hands, pointing it towards the sky. He then exploded out with his full strength, causing his eyes to become blood-red as he howled, “Seven Murders General Star... descend!”

Boom!!

A gigantic, blood-red star, suddenly appeared in the sky and slowly descended. The sky was instantly dyed blood-red, and a chilling killing intent also spread out, accompanied by a boundless might that covered the surrounding 10,000 kilometers.

This caused all of the City Lords present to look at Bai Qi, who was at the center of all of this. His body gave off an incredibly destructive aura, and his eyes gave off a bright, blood-red light, making him look like an Asura.

In the distance, the City Lords watching from afar also saw the blood-red star descending. They could feel its aura of slaughter and terror, which seemed almost corporeal, and they could almost see a mountain of corpses and sea of blood. They couldn't help but feel a chill and inwardly shiver.

“Soldier Aura Formation!” Bai Qi roared out as countless traces of blood-red aura streamed out of Great Qin's soldiers' bodies, flooding towards Bai Qi. The massive amount of blood-red aura formed a blood-red orb that was 1,000 meters wide, and it hung high in the sky as it gave off a shocking might.

“Skreeee!” a piercing bird's cry rang out as a gigantic blood-red eagle with a wingspan of 1,000 meters broke out of the blood-red orb. It flapped its wings, sending out blood-red gales that covered the surrounding 100 kilometers and rushed towards the flood of system main city soldiers.

Looking at the terrifying blood-red eagle, the soldiers at the front had resolute looks in their eyes. They did not fear death, and they gripped their weapons as they yelled, “Charge!!”

Immediately, the system main city army’s aura once again rose and became even more terrifying. It seemed to be able to destroy anything in its path as it charged towards the Inner Great Wall.

“Kill!!” On the Great Wall, the soldiers’ eyes became blood-red after being affected by the Seven Murders Star. They all roared as they sent even more power into the massive blood-red eagle.

Boom!!

A shocking explosion sounded out as the massive flood and the blood-red eagle collided. It was as if two worlds had collided, shaking the heavens and the earth.

After sensing this massive shockwave, the City Lords watching in the distance felt incredibly dismayed and watched as this intense battle unfolded. It was simply too shocking and terrifying.

Clang, clang, clang...

In the end, it was still the blood-red eagle with the Seven Murders General Star’s power that was more powerful. The blood-red gales that it sent out were like countless blood-red blades that slashed towards the system main city soldiers, and they were impossible to defend against by ordinary soldiers.

As the blood-red eagle flew past, bringing with it sharp gales, the massive flood of soldiers immediately started to disperse. There was a bloodied path that was ten kilometers wide that ran down the center of the army – this was formed from countless system main city soldiers’ corpses and blood, and the scene was incredibly gory. At least one million soldiers had died from that attack.

Chapter 706: Ten Million Soldier Aura

This was the terrifying scene created from condensing ten million soldiers' soldier aura. In just a moment, the blood-red eagle had slaughtered nearly one million soldiers, which was simply too horrifying.

However, the system main city army did not collapse. By now, they had solidified most of the marshes, so the soldiers were able to spread out and continue rushing at the Inner Great Wall, ignoring the blood-red eagle.

Bai Qi reduced the amount of energy that the blood-red eagle was absorbing because its power came from the soldiers. Now that the blood-red eagle had already dealt a devastating blow to the system main city army, it was better for Great Qin's soldiers to conserve their strength.

Facing the flood of system main city soldiers, Great Qin's soldiers continued to shoot out arrows, which pierced through the system main city soldiers' bodies. The stench of blood spread out, and cries continuously sounded out as more and more people died.

By now, some of the system main city soldiers had rushed to the bottom of the Great Wall and started to use ladders and grappling hooks to start to scale the walls. In response, Great Qin used arrows and heavy objects to retaliate.

The battle between City Lords in the air became more and more intense, and explosions continued to sound out. Meng Tian gripped his azure spear and stabbed it with shocking power, piercing through a City Lord's chest, but in the next instant, two City Lords came over and started to attack Meng Tian. Bai Xihan faced three City Lords by herself, and the other City Lords were also fighting bitterly.

Just as the eastern side's battle was intense, it was so for the other places as well.

At the western side in the Flask Province, it was narrower near the top and wider near the bottom, making the region look like a flask. Because of the terrain, it was possible for a very small force to defend against a very large force.

The two forces here were of the same size – the western side had eight million soldiers and 80 or so City Lords, while Great Qin also had eight million soldiers and 80 or so City Lords.

The Flask Province was not as troublesome as the Leaf Province. The ground here was flat and it was clear, making it easy to charge. The only problem, which was a big problem, was that everyone had to be squeezed together.

This was because the place where they had to charge was in a bottle-neck shape. With so many people charging, they would all be grouped closely together.

This was not good, because if they were too close to each other, it would be difficult to move, making it difficult to dodge any attacks. If the other side cast any large attacks, it was likely that many people would be killed.

It was not good to have too many people or too few people. Because Great Qin had eight million people defending, if they only sent a few hundred thousand over, even though they could charge effectively, they would be able to do nothing. Great Qin would be able to destroy them incredibly easily.

Even though the terrain seemed quite simple, it was of a greater problem than at the Leaf Province. The Leaf Province only had fog and marshes, which could be easily dealt with, but what could they do about this flask-like shape?

After discussing, the western side City Lords decided to destroy the terrain. They all had immense power, and since the terrain was unfavorable to them, they would use their power to change the terrain. If this was in the real world, such a thing would not be possible, because no one in the real world had such power.

Even though they wanted to change the terrain, how could Great Qin allow this? Just as the western side City Lords prepared to act, Great Qin's City Lords suddenly attacked, forcing them to defend.

The western side did not want to advance, because the terrain was very unfavorable to them. Moreover, Wang Jian was in charge of this battle on Great Qin's side. His job was not to attack but to defend, and since the other side was not willing to attack, how could he give up the advantage and instead attack the other side?

The stalemate continued for a few hours, and the western side City Lords could not wait anymore. The 80 City Lords simultaneously charged up and quickly launched attacks, destroying a portion of the cliffs.

The bottleneck became a bit wider, and Great Qin's City Lords quickly arrived, forcing the western side City Lords to retreat. A few hours later, the western side's City Lords once again suddenly attacked, opening up the bottleneck a bit more.

After doing this a few times, the bottleneck became much wider, forcing Great Qin's City Lords to start camping nearby.

Seeing that they had already done much, the western side's City Lords looked quite pleased. They finally started to order their soldiers to advance, and the western side's soldiers started to flood forwards with immense auras towards the Flask Province's Inner Great Wall.

Wang Jian and Wei Liao smiled – the system main city army was finally willing to attack. In actuality, Great Qin had allowed them to open up the bottleneck. After waiting for a few hours, it was Great Qin's side that was in a rush, as Great Qin was still fighting on two other sides.

If they dealt with matters here, they would be able to go and support the two other battlefields.

Otherwise, Great Qin's City Lords would have stood guard near the cliffs right from the beginning so as to prevent the western side City Lords from destroying the terrain. However, that would mean that the system main city army would never attack, which Great Qin did not want. The other two battlefields, especially Zhao Fu's, were greatly lacking people, and it was quite dangerous for them.

Swish, swish, swish...

Facing the massive onslaught of the system main city army, Wang Jian ordered Great Qin's Archers to continuously release arrows. Even though they were able to kill many of them, they were unable to stop the advance of the army.

Seeing this, Wang Jian's expression did not change, and he turned to look at the two people behind him as he slightly smiled and bowed, saying, "I'll have to trouble Concubine Binoche and Concubine Kerache!"

The enchanting and seductive Binoche and the cold and beautiful Kerache held their metal staffs and walked out from behind him. They raised their staffs and started to chant, causing a terrifying aura to ripple out from their bodies.

Wang Jian immediately gave the order, "All of Great Qin's City Lords, engage the enemy City Lords to prevent them from interfering!"

Great Qin's City Lords obeyed and turned into rays of light as they flew towards the western side's City Lords. The western side's City Lords showed no fear and flew up as well, and the two sides started to fight.

Countless system main city soldiers rushed up like a massive ocean, giving off a terrifying and monstrous aura as they ferociously charged at the Inner Great Wall. Great Qin's Archers continuously shot out arrows, ending life after life.

However, this could not stop the system main city soldiers. They were true soldiers who were unafraid of death and courageously pressed forwards. If it had been an army of players, they would have quickly collapsed. After all, player armies were quite disorganized, and their strength came in their numbers.

Looking at the Inner Great Wall right in front of them, the system main city soldiers at the front felt incredibly eager and excited. They were about to directly fight Great Qin, and as soldiers, they all had strong battle intents. Their blood started to boil as they continued onwards towards the Inner Great Wall.

After breaking through the Inner Great Wall, they would be able to charge into Great Qin's territory and wipe out Great Qin. This caused the countless soldiers to excitedly yell, "Charge!!"

At that moment, an incredibly destructive aura eclipsed all of the system main city soldiers, and all of them felt a chill through their bodies. A wave of unspeakable terror rose out of their hearts, and their bodies started to tremble.

Chapter 707: Fire and Ice Orb

The sky turned both fiery and icy; one side seemed to be burning, giving off an incredible heat, while the other seemed to be frozen, giving off a bone-chilling coldness. It was the fiery and icy aura that caused the soldiers to tremble and feel terror.

"Charge!!" the system main city soldiers continued to roar and rush at the Inner Great Wall with immense battle intent. Their shouts and stamping of the ground shook the surrounding hundreds of kilometers.

At that moment, two orbs that were 1,000 meters wide appeared in the sky: one gave off blistering flames while the other gave off bone-chilling coldness. The two orbs slowly fused together, giving off an aura of annihilation. Even the City Lords were greatly dismayed and hurriedly looked over.

The two gigantic orbs were soon fused into one orb of fire and ice by Binoche and Kerache. Some places gave off cold air while other places had flames; it looked incredibly mystical and dangerous.

This was the fusion of two forbidden spells: Binoche's Meteor Descent and Kerache's World of Ice. Both of them were incredibly powerful forbidden spells, so just how terrifying would the fusion of them be?

Looking at the people below them, Binoche and Kerache raised their staffs before swinging them down. The orb of fire and ice in the air also started to fall.

The western side's City Lords were greatly startled and wanted to stop it, but it was already too late.

Bang!!

A shocking explosion sounded out as the 1,000 meter wide orb of fire and ice landed on the ground and exploded. The terrifying power it released devoured everything, and the shockwave blasted outwards. The ground continuously trembled, and a tall mushroom cloud rose up, causing the entire world to seem to fall silent.

Whether they were the City Lords in the air or the Inner Great Wall on the ground, all of them were hit by the shockwave. As the shockwave rippled out, dirt and rocks shot everywhere, and everyone did their best to defend.

After a while, things began to settle down. A ten-kilometer wide crater had appeared in the ground, with corpses all around it – it was a scene of complete desolation.

The terrifying ocean of soldiers instantly stopped. Whether they were the western side's City Lords or Great Qin's City Lords, they all dumbfoundedly looked at the scene before them. Because of how closely grouped the system main city soldiers were, Binoche and Kerache's spell had instantly killed 1.6 million or so soldiers.

However, Binoche and Kerache's faces were quite pale; that attack had used up all of their strength, as well as the fire and ice cities' power.

Wang Jian quickly came back to his senses and smiled as he said, “Thank you for your help. Please go and recover your strength!”

Binoche and Kerache nodded before sitting down to recover.

The western side’s City Lords’ expressions were very unsightly because they had no idea just how Great Qin had unleashed this massive attack. As such, they hurriedly gave the order to pause the attack.

This single attack had wiped out 1.6 million soldiers, and they only had eight million soldiers in total. If this happened a few times, they would be completely wiped out. As such, they could only stop, and the two sides once again entered into a stalemate.

At the south of Great Qin, there were mountains everywhere, which were quite treacherous to traverse. Great Qin had established its Inner Great Wall on the mountains, allow them to look down from above. Zhao Fu and his one million soldiers had made preparations and set up camp here.

An army of 12 million soldiers and 100 City Lords, giving off immense auras, stood below the mountains, looking up at Zhao Fu.

One of the City Lords coldly laughed as he said, “You think that you, and one million soldiers, can stop us? What a joke! Call out your Legatee! If he’s willing to stay in this region and not come out, we’ll let him off. Otherwise, we’ll destroy Great Qin!”

Zhao Fu’s expression did not change as he said, “I am Great Qin’s Legatee! What else do you have to say?”

Hearing that Zhao Fu was Great Qin’s Legatee, the southern side City Lords looked at each other in surprise. They had never thought that this person would be Great Qin’s Legatee. How could he stand here facing so many of them by himself? Did he not fear death?

“Very good! What do you think about what I said before? As long as Great Qin stays in this region, doesn’t come out, and allows us to manage the other regions, we’ll let off Great Qin. Otherwise, don’t blame us for being cruel. There are three sides attacking; Great Qin definitely can’t defend against all of us!” the City Lord said.

Zhao Fu felt quite angry as he coldly harrumphed, “Do you really think that you can stop Great Qin’s advance? You can try all you want; Great Qin has never feared anyone before!”

Hearing this, the southern side’s City Lords’ expressions became cold. It seemed that there was no need to continue talking, so they started to charge.

The 12 million soldiers obeyed and roared, bringing with them a ferocious aura as they charged forwards. The sounds they gave off made it seem as if they were a massive tsunami.

Zhao Fu waved his hand and also gave the order to attack. Out of the one million soldiers, many were very close to Stage 2, if not already Stage 2, and there were also 10,000 Stage 3 soldiers, 5,000 Corpse Soul Guards, and 150 Corpse Soul Commanders.

They followed Zhao Fu’s commands and started to roll down massive rocks that were five or six meters tall, six or seven meters wide, and weighed a few thousand kilograms. The countless rocks rolled down the mountain, giving off massive sounds.

As the rocks rolled down the mountain, they began to roll faster and faster, and they gave off an oppressive aura. The system main city soldiers at the front quickly reached the rocks, and they roared as they used their full strength to push. However, they were still knocked over by the rocks, and after it rolled over their bodies, only a bloodied mess remained.

This caused the southern side’s City Lords’ expressions to become grim. The rocks simply weighed too much, and with their momentum from rolling down the mountain, Stage 1 soldiers were unable to defend against them at all. Even if they attacked with their full power, they would be unable to destroy the rocks. Only Stage 3 soldiers and above would be able to defend against them, and even Stage 2 soldiers would have some difficulty. The southern side’s City Lords immediately started to act, as these rocks were not a big deal to them.

The southern side’s City Lords released their City Lord Seals and gave off powerful auras as they stretched out their hands. A massive, formless hand blocked the rolling rocks – the 100 City Lords were actually able to stop the countless falling rocks.

However, this was not easy on the City Lords, as they were not just stopping a single rock but multiple rocks with immense momentum.

“Fire!” Zhao Fu ordered, and Great Qin’s soldiers brought out Ballistae with Talisman Bolts loaded onto them.

Whoosh, whoosh, whoosh...

The Ballistae's bowstrings continuously trembled as their bolts turned into monstrous rays of white light, tearing through the air towards the City Lords.

Most of Great Qin's Talisman Bolts were with Zhao Fu. With Zhao Fu's current strength, he was unable to deal with 100 City Lords by himself, unless he used up all of Great Qin's Fate. However, Zhao Fu did not want to see the consequences of that, so he had to use other methods.

Chapter 708: Rush Him Together

The 100,000 rays of white light gave off terrifying sounds, shocking the many City Lords. In response, they immediately created energy barriers to defend.

Things would have been fine if there weren't too many of the bolts, but because there were 100,000 of them, the City Lords' energy barriers were unable to withstand all of them. Their energy barriers started to crack, making them feel greatly shocked, and they used all of their power to maintain the energy barriers.

Because of this, there was nothing stopping the rocks anymore, and they once again started to fall. The system main city's Shieldbearers roared and pushed up with their shields with all their might, and they were able to barely block one rock each.

However, even more rocks descended, making it impossible for them to defend. Since they could not block or stop the rocks, they could only dodge. However, with so many people, how could they dodge easily?

The countless rocks gave off terrifying sounds as they rolled down the mountain, instantly destroying the system main city soldiers' charge. They crushed soldier after soldier, causing hundreds of thousands of deaths.

Within their energy barriers, the City Lords felt incredibly furious. Just as they were about to try to stop the rocks again, countless rays of white light once again shot at them, and they were forced to defend again.

Great Qin had shot out 200,000 Talisman Bolts so far, and each one would be able to kill 60,000 to 70,000 system main city soldiers. It was a pity that they could only be used to suppress the City Lords right now, making them much less of a threat.

The system main city soldiers were furious and once again charged. As their auras gathered together, they once again formed a terrifying flood as they rushed up towards the Inner Great Wall.

Great Qin's side continuously threw down rocks; Zhao Fu understood how difficult this defense was, so he had prepared adequately.

Looking at the City Lords continuously defending against the white rays of light, Zhao Fu gave out an order, and three gigantic Ballistae were sneakily pulled out. These were the Dragon-Slaying Ballistae, and each of them had to be drawn by six Corpse Soul Commanders with Stage 4 strength.

The Dragon-Slaying Ballistae were equipped with metallic bolts that were ten or so meters long and three fingers wide. There were many talismans on the bolts, and there were also golden Talisman Stones socketed into the head, body, and tail of the bolts.

Apart from this, there were also 36 small crystals socketed into them, making them seem extremely beautiful.

The bolts' bodies were made of Gold grade materials, and their cores were made of Legendary grade materials. Each one of them cost 100,000 gold coins to produce, which was one billion copper coins. They were extremely precious, and Zhao Fu had wanted to use them to kill boss monsters of regions.

However, in the face of such danger, he could only bring them out. With such terrifying Talisman Bolts, just how powerful would the Dragon-Slaying Ballistae be?

Whoosh! Whoosh! Whoosh!

Three massive sounds could be heard as three gigantic golden rays of light, giving off power that seemed to be able to pierce the world, tore through the sky.

The southern side's City Lords, who were defending against the white rays of light, were not prepared at all. By the time they noticed something, it was already too late – the three golden rays of light instantly pierced through their energy barriers, stabbing through their bodies and slamming them into a mountain kilometers away.

The heads of the bolts stabbed four or five meters into the mountain, creating ten-meter craters around them, while there was still ten meters of their bodies remaining outside. There were two or three City Lords' corpses strung on each of them, and blood dripped down from them, creating a horrific scene.

The three rays of golden light had instantly taken away seven City Lords' lives. The remaining City Lords were completely dumbfounded, and a chill spread throughout their hearts. They had not been able to react at all and had only seen a flash of golden light.

Instantly, the remaining City Lords flew even higher and spread out, becoming incredibly wary. They quickly saw the three massive Dragon-Slaying Ballistae and it was those three ballistae that had shot out those terrifying bolts.

“Rush him together! If we can kill Great Qin's Legatee, everything will be over!” The City Lords quickly came back to their senses and exploded out with immense power as they rushed at Zhao Fu. Zhao Fu could not allow them to get close, as he could not fight all of them at once, so he once again ordered the soldiers to shoot out the white rays of light.

This forced the southern side's City Lords to once again go on the defensive, and three rays of golden light once again flashed out with shocking power. However, because the City Lords had all spread out and were prepared, the three rays of golden light only took away another three City Lords' lives.

Now, ten City Lords had died already, and the remaining City Lords' expressions were all quite unsightly. The Talisman Bolts that Great Qin shot out were simply too powerful, and because there were too many of them, they were forced to defend.

However, by now, the massive system main city soldier army had paid a great price to finally reach the bottom of the Great Wall.

Zhao Fu waved his hand, and ten figures appeared beside them. The ten Disaster Cavalrymen half-knelt as they said in their eerie voices, “What are your commands, Your Majesty?”

The Disaster Cavalry now had a high level of intelligence, and Zhao Fu looked at them as he ordered, “Begin!”

The ten Disaster Cavalrymen stood up and went to the front of the Inner Great Wall. They drew their swords and pointing them towards the sky, releasing massive auras as ten black pillars of light shot into the sky.

Countless traces of deathly aura gathered to form a massive vortex, and a black magic formation appeared, giving off a chilling black light. A terrifying power filled with a deathly intent soon began to ripple out.

“Roarrrr...” On both sides of the Inner Great Wall, countless Skeletons rose up and ferociously assaulted the system main city soldiers from both sides.

The City Lords’ expressions fell, and the system main city soldiers, who were about to attack, had no idea what was happening before they were attacked by the Skeletons.

After clearing out so many regions, Great Qin had obtained many corpses. Apart from a portion that was used for the Corpse Soul Blood Lake, they had about 60 million corpses. There were human corpses and beast corpses, and 30 million corpses attacked the system main city army from each side.

Now, the system main city army was unable to attack the Inner Great Wall at all, and they could only stop. They were proper soldiers, so they quickly adapted to the situation and started to kill the countless Skeletons.

After the initial injuries and deaths caused by the surprise attack of the Skeletons, the system main city army’s losses began to decrease. After all, there was a great gap in strength between the Skeletons and the system main city soldiers.

The system main city army still had around nine million soldiers, and it was possible for them to stop the 60 million Skeletons, mainly because of how weak the Skeletons were.

Seeing this, Zhao Fu raised a hand, and the Disaster King Ring on his index finger gave off a black light and shot into the magic formation in the sky. The black magic formation gave off an even more intense black light, and an aura of disaster covered the entire sky.

The black light buffed the Skeletons, causing them to excitedly roar and continued to ferociously attack the system main city soldiers. 90% of Great Qin's soldiers on the Inner Great Wall drew their bows and started to attack the system main city soldiers as well.

Seeing this chaotic scene, the southern side's City Lords once again charged at the Inner Great Wall. If they could kill Great Qin's Legatee, they would be able to end all of this.

Chapter 709: Emperor's Domain

Facing the southern side's City Lords rushing over, Zhao Fu once again ordered the 100,000 Stage 2 soldiers to shoot out Talisman Bolts, and white rays of light once again shot through the air.

The City Lords were furious by this point, and one of them yelled, "Let's gather our power together!"

Everyone stretched out their hands and pressed against the air. Waves of light rippled out from their hands, forming a gigantic, rainbow-colored barrier. Countless rays of light smashed against the barrier, but they were firmly blocked by the barrier.

The City Lords were delighted to see this and sped up as they headed towards Zhao Fu.

Seeing this, Zhao Fu did not order for more Talisman Bolts to be shot out. They only had about half of their Talisman Bolts remaining, and they were no longer as effective anymore. Zhao Fu did not use the Dragon-Slaying Ballistae either and watched as the City Lords flew towards him.

The southern side City Lords all looked at Zhao Fu with savage smiles. After killing so many of their soldiers, they wanted to kill Zhao Fu to take revenge.

A countless number of Great Qin's soldiers blocked in front of Zhao Fu, willing to be meat shields, resolutely looking at the City Lords in the sky.

"Hahaha..." a cruel-looking young man laughed loudly as he pointed at Zhao Fu with his spear and said, "Are you afraid? Let me tell you, even if you kneel down, it'll be pointless!"

Zhao Fu ignored the young man and ordered the countless soldiers in front of him to move. Hearing this, the soldiers could only obey.

The cruel-looking young man was the first to attack. He rushed forwards, turning into a black blur and arriving before Zhao Fu in an instant. His spear gave off a boundless might as he ferociously stabbed towards Zhao Fu's chest.

Zhao Fu did not move and coldly looked at the cruel-looking young man. Only when the spear was about to hit him did Zhao Fu suddenly stretch out a hand and grab the spear.

This caused the cruel-looking young man to feel quite startled; he had never thought that Zhao Fu would be able to stop his attack so easily.

A trace of a cold smile appeared on Zhao Fu's lips as he pulled the spear. The cruel-looking young man was suddenly pulled forwards, making him feel quite surprised, and he hurriedly tried to retreat, but it was too late. Zhao Fu's hand pierced forwards like a bolt of lightning, instantly stabbing through his chest. The cruel-looking young man could not believe that he had been killed just like that.

If it was before, Zhao Fu would not have been able to kill a City Lord so easily. However, he had used his Nation Armament and Clan Armament's power.

The Twelve Metal Colossi were now a Level 8 Nation Armaments, and the Imperial Ruler's Seal was now a Level 7 Clan Armament. The Nation-Suppressing Pillar was a Level 3 Nation Armament, and because Great Qin had only just obtained the Great Qin Emperor Peacock, it was still a Level 1 Clan Armament.

Right now, Zhao Fu had only used the Twelve Metal Colossi and Imperial Ruler's Seal's powers. Otherwise, Zhao Fu would not be able to fight against so many City Lords at all. Even though he had to use up Fate, Great Qin had a lot of Fate stored up, so using some of it would not be a problem. However, he definitely could not use it all up again.

Everything had happened in just an instant, and the City Lords had never thought that Zhao Fu would be able to kill a City Lord in a single instant. By the time they were able to react, it was too late.

"Let's attack together! Great Qin's Legatee is too monstrous!" an elderly man with an aquiline nose yelled.

The other City Lords all suddenly attacked, and powerful attacks giving off destructive auras started to rain towards Zhao Fu.

Zhao Fu raised his hand, releasing his Emperor's Domain. A black dragon-inscription barrier instantly spread out, covering the 100 meters around him. Some of the soldiers who had wanted to protect him were covered by it as well.

Boom!!

A massive explosion rang out as the countless powerful attacks landed on the black dragon-inscription barrier. Countless cracks appeared on the barrier, and at the center, a trace of blood leaked out of Zhao Fu's lips.

The City Lords were all quite surprised that so many of their attacks were not able to break through Zhao Fu's barrier. However, Zhao Fu had evidently been hurt, and smiles appeared on their faces. They once again prepared to attack – most of them had only used half their strength in that attack, and now, they prepared to use their full power.

At that moment, Zhao Fu's body turned into a ray of light and rushed away as if he was trying to escape. The City Lords coldly laughed and followed behind him before surrounding him.

"You're too naive; did you really think you could escape? Dream on!" a chubby man said mockingly.

Zhao Fu looked at the City Lords around him and suddenly laughed as he said, "What glory is there in beating me with so many people? Come at me one by one if you dare!"

"Do you really think we're stupid enough to fight you one on one? Everyone, don't waste any words with him. Kill Great Qin's Legatee and join with the two other sides to destroy Great Qin. The Great Qin Empire is worth an incredible amount, and even if we split everything evenly, we'll still have massive gains!" a City Lord said as he coldly smiled and looked at Zhao Fu.

The other City Lords did not hesitate and immediately started to attack with their full power. Sword lights, saber lights, staff shadows, hatchet lights, spear lights, and all sorts of other attacks started to fly towards Zhao Fu from all sides.

Zhao Fu could not retaliate at all and could only defend. He was forced down to the ground, blowing open a crater. He coughed up a mouthful of blood, looking seriously injured.

The City Lords savagely laughed as they rushed over. In their eyes, Zhao Fu was already dead; after all, he did not seem to have any power to resist anymore. If they killed him, Great Qin would be like a headless chicken, and they would be able to easily destroy Great Qin and share in its spoils.

Zhao Fu lay on the ground and looked at the incoming City Lords without any fear on his face. Instead, there was an evil smile on his face.

Ten cloaked people holding Ghostwood Staffs stealthily approached and stood in a circle around the City Lords and Zhao Fu. Just as the City Lords were about to deal the final blow to Zhao Fu, the ten people raised their Ghostwood Staffs, and an eerie energy exploded out. A massive gray magic formation appeared on the ground with Zhao Fu at the center.

Immediately, hellish chilling qi erupted out, and ghostly qi spread everywhere, instantly covering the surrounding ten kilometers. Ghostly howls could be heard, and ghostly figures darted about.

The City Lords were given a big fright. They instantly found that something was off, and they quickly retreated.

However, only 30 City Lords were able to make it out, and they looked at the region filled with ghostly qi. Just then, they felt as if they had descended into hell, and their bodies instinctively trembled in fear.

Zhao Fu grinned as he looked at the City Lords frozen around him. Everything just then had been a pretense in order to make the City Lords let down their guards.

The magic formation on the ground was called the Great Yin Qi Formation, and it greatly boosted all ghost-type skills. The ten people holding Ghostwood Staffs were ten Hundred Ghost Illusionists who had received City Lord Seals, and they had cast an enhanced Dark Ghostworld.

Now that Zhao Fu had unlocked Divine Sense, was the City Lord of a Level 5 True Main City, and had received his Sovereign Bloodline, Zhao Fu was able to ignore the Dark Ghostworld.

Chapter 710: Level 1 Capital City

Zhao Fu did not waste any time and stretched out his hand, the Sin Dragon Sword appearing in his hand. Zhao Fu sent a massive amount of power into it before slashing out, sending an arc of light flashing out. Blood flew everywhere, and the heads of the 60 frozen City Lords fell to the ground.

Following this, the headless corpses also crashed to the corpses, and different-colored City Lord Seals rose from their bodies and fell nearby.

The ghostly qi gradually dissipated, and the City Lords who had escaped finally saw this horrific scene. A chill spread in their hearts, and a look of terror appeared on their faces. They immediately ran the other way without pausing for a single second.

They had just visited hell and come back; 60 City Lords had died so easily without a sound or reaction. This was simply too terrifying, so how could the remaining 30 City Lords dare to stay and fight with Zhao Fu?

Looking at the escaping City Lords, Zhao Fu did not give chase, because the battle at the Inner Great Wall was more important.

By now, many of the system main city soldiers had heard that their City Lords had died, and they furiously attacked the Skeletons around them, wanting to take revenge for their City Lords. However, some soldiers started to run – some of them were ordered to by their City Lords, while others did so because they understood that they had lost this battle.

Seeing that there were still many system main city soldiers who were resisting, Zhao Fu ordered the ten Hundred Ghost Illusionists to cast the Dark Ghostworld before using the Talisman Bolts to kill them.

In the end, Great Qin achieved an overwhelming victory, obtaining 70 City Lord Seals and killing seven million soldiers. Around one million soldiers had surrendered, and four million had run away.

Around 70,000 people from Great Qin died, and there were about 500,000 soldiers who were injured. All of the 60 million Skeletons had died.

News of the southern side's defeat quickly spread to the two other battlefields. The City Lords at the two other sides could not understand just how Great Qin had defeated their strongest side with its weakest side.

The single City Lord and one million soldiers had actually defended against 12 million soldiers and 100 City Lords, and they had won a decisive victory. Not only had they killed seven million soldiers, but they had also killed 70 City Lords. If it wasn't for the fact that the news had come from their own people, they would not have believed such a thing.

Now that the southern side had lost, Great Qin would be able to reinforce the eastern and western sides. However, the system main city sides were already at a disadvantage and the situation would become even worse.

In the end, the eastern and western City Lords could only give the order to retreat. Seeing this, the Vietnamese City Lords, who had been preparing to attack, also silently retreated. It was the Chinese City Lords who had told them that they were going to destroy Great Qin and that they would be able to receive great benefits.

Facing Great Qin's terrifying strength, they felt quite afraid. As such, they hesitated for a while before finally deciding to enter China's territory to attack Great Qin.

However, before they could even attack, they received news that the southern side had been completely defeated, causing the two other sides to retreat. 30 million soldiers and countless City Lords had been sent into retreat – if such a monstrous force had been defeated, then the Vietnamese side with their three million soldiers and 20 or so City Lords would have no chance at all. As such, they decided to retreat to Vietnamese territory.

This could be said to be Great Qin's victory; the battlefield they had suffered the greatest losses on was the eastern battlefield: Great Qin had lost 800,000 soldiers and 1 City Lord, and six million soldiers had been injured.

For 800,000 soldiers and one City Lord to die in battle and six million to be injured, this was the greatest loss that Great Qin had ever suffered, and it was a big blow to Zhao Fu.

War was incredibly cruel, and the intensity of the eastern battlefield was not something that Zhao Fu could change.

However, they had also made great gains on that battlefield. They had killed 15 of the eastern side's City Lords and killed seven million soldiers, while 2.2 million had escaped and 800,000 had surrendered.

The battlefield that they had the least losses on was the western battlefield. Binoche and Kerache's combined forbidden spell had instantly killed 1.6 million soldiers, causing the two sides to enter into a stalemate. No matter how Wang Jian taunted the other side, they were unwilling to advance. Wang Jian could do nothing about this since they were unwilling to attack either.

The western side remained as a stalemate, so Great Qin did not suffer any losses. In terms of gains, they had killed 1.6 million system main city soldiers.

Next, it was time to clear out the battlefields. Wang Jian immediately took three million soldiers and hurried over to where Zhao Fu was. Seeing that Zhao Fu was fine, he let out a sigh of relief.

Zhao Fu ordered his subordinates to conquer and relocate the system main cities and bring back the City Creation Stones. He then had the battlefields cleared, and this marked the end of this massive event.

Great Qin was the victor in this battle, and the surrounding system main cities were forced to relocate. Otherwise, the only outcome of staying would be death. The 22 regions to the east of Great Qin and the 25 regions to the south of Great Qin all became empty regions.

Most of the system main cities on Great Qin's west did not relocate, because they had not suffered too great of a loss and wanted to continue to resist.

They started to build powerful defenses to prevent Great Qin from suddenly attacking them while trying to rope in other City Lords to defend against Great Qin together.

Most of the City Lords watching from the distance finally made a decision. Since Great Qin had such monstrous strength and could still win against such powerful forces, they could only feel admiration. Great Qin was definitely a strong mountain to lean against in this Legacy Land.

With such immense power and stats, they would not have to worry about natural disasters either, so Great Qin was undoubtedly the best master to serve.

After this massive battle ended, roughly 80 City Lords personally went to Great Qin and expressed their willingness to submit. They were truly willing to submit and had no reservations, so they personally went to Great Qin. Part of the reason was to apologize for simply watching the battle before.

Of course, Zhao Fu was quite happy about 80 City Lords joining Great Qin. However, he was quite displeased with them simply watching the battles.

After all, the battle had been quite intense, but they had simply stood by and watched. They had only chosen to join Great Qin because it won, and nobody would be happy about such a thing. Even though they were quite selfish, Zhao Fu could understand it – after all, this was how this world was.

If he did not have the power to make them submit, how could they be willing to serve him? However, because they had personally come to apologize and seemed quite sincere, Zhao Fu decided to take them in.

The 80 system main cities had eight million Stage 1 soldiers and 40 million residents. After accepting their surrender, Great Qin's strength once again greatly increased. This greatly pleased Zhao Fu, so he set up a massive banquet to welcome them.

Of course, part of this banquet was to celebrate their victory and reward some of the Generals. Zhao Fu gave out many rewards to those who had made great contributions – these people were willing to give up their lives for him, so he would never treat them less than they deserved.

Also, after Great Qin killed so many City Lords and relocated so many system main cities and had 80 City Lords join them and relocate their system main cities, this caused Great Qin to once again level up. It was now a Level 1 Capital City.
