Section 199

"Zhang Xiaoyou is indeed a genius, he was able to come up with such an exquisite formation."

"Once this formation is deployed."

"Don't talk about assisting the True Immortal disciples to survive the Golden Immortal Tribulation. Even in the future, we will be lucky enough to break through to Taiyi Immortal."

"This formation is still there and will be of great help."

Yu Liwei, who was next to her, also nodded.

After Zhang Yuhe's improvement, the Immortal Level Renshui Thunder Absorbing Formation was extremely large and complex.

But there is no doubt about the effectiveness of the formation. It is indeed very effective.

The only troublesome thing now.

That is, how can we collect the materials required for more than 10,000 lightning-absorbing pillars.

Although it is described according to the content on the jade slip.

The materials required for the thunder-absorbing pillar are all the most common immortal-level spiritual materials in the immortal world.

But no matter how common it is, it is still an immortal material.

If you get a few hundred pieces, that's fine.

Any force among them can take it out.

But the formation deduced by Zhang Yuhe actually requires more than 10,000 fairy-level lightning-absorbing pillars.

This number is really a bit exaggerated.

Even if the treasure troves of the three forces were emptied, they still wouldn't be able to collect that much material.

Yu Li stood up slightly, looked at Zhang Yuhe, and asked seriously.

"Are you sure?"

Zhang Yuhe nodded and replied solemnly.

"As long as I collect all the materials, I am confident that I can refine all the lightning-absorbing pillars and lay out the complete Renshui thunder-absorbing array."

Zhang Yuhe is very confident about the Renshui Thunder Absorbing Formation.

When he was at Yu Fantian, he had refined and improved this formation many times.

He was very satisfied with the actual effect.

He believes that this formation has now been deduced to the immortal level.

Its effect in weakening the Heavenly Tribulation will inevitably become more powerful.

At least helping him survive the Golden Immortal Tribulation would definitely be no problem.

"Okay, leave the materials to us, and you can just refine the lightning-absorbing pillar."

After Yu Liwei finished speaking, she looked at Long Xingxiu next to her.

Wait for his statement.

The reason why Yu Liwei wanted to bring the Ten Thousand Beast Sect together to build the Tribulation Transcendence Platform.

On the one hand, it is considering that Zhang Yuhe's demand for materials is extremely huge.

With the participation of one more force, the construction progress can be accelerated.

On the other hand, she wanted Long Xingxiu to feel at ease and stop thinking about what was there and what was not.

There is no need to fight over such a small pond in Ji'an sea area.

Everyone makes progress together.

After waiting for the overall strength to improve, then find a way to develop in Chaos Continent.

The resources in the Ji'an sea area can support their cultivation to the Golden Fairyland.

It's already the limit.

If they want to make another breakthrough, they must go to the Chaos Continent.

There are unlimited resources out there.

As long as they can gain a firm foothold in Chaos Continent, they can break through to Taiyi Immortal in the future.

It's not impossible.

Moreover, the Chaos Beast is the real enemy of the monks.

Yu Liwei was really not interested and started fighting among themselves in this small pond in the Ji'an sea area.

But even though she thinks so, she still needs the other person to understand.

If the Ten Thousand Beast Sect was like the Ouyang family, then she wouldn't mind erasing it.

So as not to leave any trouble.

Long Xingxiu is obviously very knowledgeable.

He stood up immediately and said passionately.

"The matter is settled."

"When I return to the sect, I will immediately send someone to deliver the materials in inventory."

"Then activate the Golden Immortal monks in the sect to go to various sea areas to collect the materials as soon as possible."

Hearing this, Yu Li nodded slightly.

She looked at Zhang Yuhe and spoke slowly.

"The first batch of materials will be delivered in a few days. We will need to go to other large areas to purchase the remaining materials."

"But don't worry, these materials are not too precious. As long as you put in a little more effort, you can definitely collect them all."

Zhang Yuhe stood up and said gratefully to the two of them.

"Thanks to the support of the two seniors, I will definitely build the first tribulation platform in Ji'an sea area."

"Okay, then let's make arrangements separately."

After saying this, she turned into a stream of light and flew away from the Taoist Peak.

Yu Liwei came all the way over, only said a few words, and then left directly.

Long Xingxiu didn't tease anymore.

He bowed his hand to Lian Zhengyu and then flew away.

A few days later.

The Nine Immortals Sect and Ten Thousand Beasts Sect respectively sent people to deliver the materials in stock.

In addition to the materials Zhang Yuhe collected from the Ouyang family, there is also the Dao Sheng Sect's inventory.

At present, we have gathered together, almost 5,000 copies, the materials needed to refine the lightning absorbing pillar.

These materials have been accumulated by the major forces in the Ji'an sea area for countless years.

Even so, it was only barely enough to refine half of the lightning-absorbing pillars.

This still needs to be 100% successful every time the weapon is refined.

Fortunately, Zhang Yuhe has never failed since he first came into contact with weapon refining.

If it were replaced by another weapon refiner.

Perhaps on average, there will be almost half a failure rate.

In that case, the materials they need to collect will be doubled again.

This is even more troublesome.

Zhang Yuhe brought all the materials to the Daosheng Sect's Weapon Refining Hall.

Prior to this, Lian Zhengyu had already emptied the weapon refining hall, and other disciples were refining magic weapons and immortal weapons.

Everything has to be paused or moved elsewhere.

The huge refining hall was completely used by Zhang Yuhe alone.

He opened up all the secret rooms in the hall, and hundreds of cauldrons appeared in his sight.

However, not all of these cauldrons are suitable for refining immortal weapons.

To refine immortal weapons, the level of the cauldron must at least reach the top-grade Tongtian Lingbao.

Zhang Yuhe waved his right hand and removed the unsuitable cauldrons. There were probably more than a hundred cauldrons left.

After putting various materials into the more than a hundred cauldrons.

He quickly pinched the magic formula.

Under these cauldrons, hot flames soon ignited.

More than a hundred cauldrons started to refine immortal weapons at the same time, like a super refining workshop.

This is definitely a great wonder in the fairy world.

But Zhang Yuhe did not feel too much pressure.

He always believed that.

Refining is a very simple thing.

As long as the cultivation is sufficient, and there are suitable materials and drawings.

Refining immortal weapons only requires hands.

At the same time, he even had time to slowly deduce his magical powers while activating more than a hundred cauldrons.

...

Chapter 179 Galaxy Dragon Body Movement

Zhang Yuhe silently observed the status of the cauldrons in the hall.

He took out a jade slip and carefully checked the contents on it.
