

Uzumaki 100

Chapter 100 - New Discovery

It is a group of Wife and Aunts from Uzumaki Clan who manage the dinning hall, and some people who can handle heavy goods.

Because the pot is big and the mealing policy is now implement, everyone has their own job unless it is a special situation.

Seeing that lunch has already begun, everyone put down their work, grabbed some snow on the ground and rubbed their hands, then walked towards their respective position with a smile on their face.

Everyone was in order, and nothing there was a hint of confusion.

Uzumaki Xin nodded in satisfaction when seeing this scene, it seems that a few days have passed, they are all used to it.

This is one of Xin's rule when it comes to family.

He like everyone eating on same table, working making foods, and get together before sleeping talking about some important things happen that day.

His table is basically people from everyone's department.

For example, Old Patriarch, Uzumaki Mother, Great Elder and other Elderly, CPO Lucci. They will show up every time they arrive at a meal.

Of course, Kushina is also at this table sitting next to his mother.

"There has been any problem recently?"

Xin give Kushina a meal, then took his own share and looked at them.

"As long as the equipment is better, it shouldn't be a problem." Arms Department Leader, Six Elder said.

"What we need is more saw, axe, and hammer, we currently looking for more Earth Shinobi." Second Elder remind them.

Xin ignore them, the construction is overcrowded, except some tools, that place is perfectly fine.

"The harvest day is coming, we also need some help in the field." Third Elder ask them.

"Don't have people." First Elder.

"Don't have time." Second Elder.

"Don't have strength." Fourth Elder.

"Don't have-" Fifth Elder.

"Stop Old Fifth! How can't I don't know your group is the most easy of all logistics group! Come with me two days later and bring your own people, I want all of them can use Shadow Clone Jutsu."

"But."

"No but!"

"... Fine."

Xin did not even bother to look at them, this simple argument start form simple thing and ends in just second.

"Brother Xin, I done researching for new metal."

"What kind of Metal?"

"Tungsten, the thing you said."

"Tungsten is harder than Iron by 2.8x, as well as a high melting point of almost 4000 °C."

"I don't know what king of Jutsu can melt Tungsten, even lava can't melt it."

"How did you create Tungsten? If I'm not wrong, Tungsten is natural form and hard to recreate?"

Kushina push her chest and proudly said." I discover it by mistake, I mixed som metal and mineral when I'm trying to create new things but yesterday I accidentally discover I created that Metal you talking to."

"And how did you know it's Tungsten?"

"Of course I analyze and try it." Kushina took out a six inches nail and show it to him.

"Here is the sample, check it."
